The Eagles Picked to Win District Championship by Ed Reichelt—Stressing Bob Phillips

Etex Sport Notes By Ed Reichelt

Ed Reichelt, one of the regular sport writers for the Etex, is publishing a booster issue for the Etex this week. It is very interesting to Tyler County natives. The booster is publishing the same information as last week, but about one of our own boys who has made good in the sport world. It is also because the Etex has had such a large number of readers that the booster is published every week.

WILLIAMS Editor-MRS. J. H. WILLIAMS, ADV. MRS. J. H. WILLIAMS

WILEY THE Texas Legislature is hunting for something to tax to pay the Old Age Pension, would it be in order to state in Italy bachelors are taxed for being just that.

WOODVILLE KEEPS right on building new homes—depression or no depression. It is a fact, it building means to depression. Old Man Depression never did stop and display his wares in Woodville.

SALMOST BEFORE we know it the air will be more or less cluttered up with snow and icebergs and a few of us have got to remain at home and stay on the job instead of slipping down to Miami, or out to Los Angeles, Cal. for the winter season.

NOW AND then somebody takes a crack at our firms and periods—just Mrs. Sunday the Enterprise on page 2-D we and J.C.A.—no periods and so spaced used. This a fog and the fogger will probably inaugurate this new short-cut. It is a saving in the thin matrix which produces the period.

OLD BALNEY Oldfield says a mile a minute is fast enough on the present-day highway. Even though 30-40 cars are manufactured to do a lot for the time than only 60 mph. He says: "A mile a minute is fast enough for anyone to know where he is in any time on present highways. A modern motor car built to go faster than that, but our present day, heavy traveled highways are not."

SOME NEWS PAPERS are a column dubbed the "boner" meaning thereby a list of subscribers who paid up during the past 30 days or even past week. It is not on record on the list of those who returned the paper, or those who thought the publisher was kidding them when he published the words: "When Out, this Paper Stops." Some of them would have probably cluttered up columns if they printed the entire list.

WITH THE growth of Woodville it appears that about seven new fire departments will be installed in the near future. It is a fact that Woodville can keep on with practically no fires for a few more years. There is a possibility of a decent premium rate being put in force regarding fire insurance. It is a fact the writing of fire insurance is a sort of almost forgotten art in Woodville. Only when necessary, denoting it as a "disaster" policy, get on the record.

DO BEAT all how modern Woodville are getting. Let's see, we have water, sewer, electricity, the latest sets of aluminum, 17 different kinds of electric doodads, paved streets, curb here and yonder, motion pictures, a newly modernized athletic field, new school buildings, a modern, air up-to-now community meeting place and lodge hall, and last but not least, our new 1936 model court house. And, indeed, there are to be found folks who imagine the Tyler County court house is sure enough a building in a class by itself. It is 100, regardless of what anybody may think.

THEY DO say old drilling is about to be returned in the Sturiger field—where gas was discovered a few years since. It appears the well "laid plans of men and mice" went haywire when the big gas and oil well at Sturiger got out of control, pouring there a plenty of oil in the region south of Woodville. The newly selected location, not far from Camp 11, but located in Hardin county, is dangerously close to the leased lands in Tyler county. In the possible event that well comes in as a producer, there is going to happen right in Tyler county. Make it a better that it is in the Hardin county is being newly located.

CONCRETE HIGHWAYS PAY FOR THEMSELVES

Three reasons why concrete is the most economical pavement: 1. Long life and low upkeep—funds which would otherwise be spent for repairs may be used to complete your highway system. 2. Scientific investigation has proved that it costs motorists less to drive on concrete than on inferior surfaces. The saving is in gas, tires and car repairs. 3. Concrete builds business, promotes travel. A town on concrete is moved closer to all markets. And in addition to these money reasons concrete pavements give motorists relaxation, comfort... and swift travel with SAFETY!
