### ALMANAC

- January 22 - Act passed appointing the federal commission on 1937.
- February 1 - Boston was declared a "city of the future" for its work on the city's future.
- February 1 - The patent for the "Gibson" guitar was issued.
- February 1 - The United States took diplomatic relations with Germany.
- February 1 - The Philippines-American War was started.

#### CAN YOU beat it?

Here is Jan. 27, 1937, and its time to cut the grass on the lawn. Wonder how that sounds to the north-ers?

#### GOSH! WOULDN'T it

have been great if the great dust belt could have had some of the so-par-lous moisture Tyler County has received this month? We mean if the dust country could have had it at the right time last summer.

#### THE BOOSTER

has been taking in Woodville and sipping his subscription for several years. Now some folks come across upon the Booster with its new story starting in two weeks will not go these homes. This is just a hint to come across.

#### JAY KELLEY'S store

was broken into sometime last week- night. The police morning called to the Booster home for a help out. Any connection between the two and the robbery?

#### SAND THE truck

owners say that a 14-hour day is necessary for their drivers in their business. And is the State of Texas going to make allowance for a 14-hour driver? If it's high time for Texas to take trucking concerns into its hands, the same applies to the owners of passenger buses.

#### IT SEEMS as though

the trucking concern that hired the driver that killed Gov. Alfred's sister last summer, that forced her to drive 18 hours a day to hold his job, were the best who should have been placed on the stand at the investigation following the accident. One or two examples of this sort would help pave the way for a great change in the laws pertaining to the regulation of highway traffic.

#### AFTER MOST

of this January's days proving to be rainy days, a stranger coming up the main drag would wonder if the street had ever been paved in any manner. The roads could make lots of citizens glory in their spunk if they'd order the hose turned on the streets for a short time. It would help the luckless pedestrian and improve the general appearance of the "hottest growing town" in East Texas.

#### STRANGE

HOW news leaks out now and then. But it does, sure enough. More and more we learn The Booster is one of the greatest borrowed papers ever to circulate all over Tyler County. Anyway there is a certain satisfaction in knowing that both subscribers and readers are satisfied with this county's only news paper. And one, when it's a news hour late on Thurs-day, have the postman's car...

### THE BEAUMONT

Edge-prize strike one day last week was illuminating to say the least. What a Dickens of a fix printers, pressmen, stereotypers, and photoengravers are in. The printer, stereotype and the pressmen will handle all the several different forms that are sent to the pressroom. Had the several tradesmen's unions been affiliated, as they should be, a strike of printers, pressmen and other interlocking craftsmen would tie up the printing industry the day and hour it starts.

This writer, weathered a storm or two back yonder in the great cities of the middle north and on to Chicago. Believe it or not, the printers and pressmen were actually fighting each other. We know that's not a rumor but the actual fact. And yet some of the leaders of unionism would like to ask in the smile of the public while talking about a possible candidate for the presidency of these United States.

#### LAST

FREE The Booster carried on its first page the story of Alfred's Safety Committee. It seems it is up to the press of the State to get in behind this Safety Committee's work. The legislature is now in session and it behooves that very select hand-picked bunch of lawmakers to hit every lobbyist with a stuffed pipe, who in any way attempt to influence the vote of members of either house to lay down on the job. There is no question but that bus and trucking companies will do their utmost to have pigeonholed the two new measures already offered calling for an eight-hour day for drivers of trucks and buses. The daily papers have at last come to life and are doing their best to create a safety first atmosphere in the minds of legislators. They should be credited to BOOC bus and truck owners to arrange for a change in the day's hours their drivers must make to hold their jobs. It is up to the press of Texas, both weekly and daily to demand action. The Booster does not for an instant imagine its non-support can defeat any of the members of the 1937 legislature, but believe us, we shall sit up and snore if the "HOY, HEY, YOTE" on the safety laws that will be submitted. The Booster will have no hesitancy in stating if the laws are defeated that the 1937 legislature is perfectly satisfied with the daily killings on the highways of Texas. Also by this great safety program and do all in their power to help carry out the law. We'll commend as his writer views the 1937 legislative program, nothing else matters. If no other legislation is passed and made a real law, one that all the paid-for-and-owned lawyers cannot break through, if the press of the State will all get busy it will not take the representatives and senators long to realize it is time to climb on to the governor's band wagon.

#### THERE

is a condition brewing in East Texas at this time that should be seriously considered by the Legislature. It is known that a great sale of timber on cut-over lands has been consummated by a new industry for this part of the south—a paper-milling concern. Far be it for The Booster to discourage any endeavor for the State, but there are certain elements, if you please, that should be thoroughly thrashed out before it is too late. This paper concern has purchased some 250,000 acres of second-growth timber and for the sole purpose of converting the same into paper pulp at the mill. This means (and we mean no harm) that the timber that will be cleared up, that lumber that can be still be making good use of...

### DOES BLADDER IRRITATION

WAKE YOU UP?

It's not normal. It's nature's warning. "DANGER! AHEAD!" Make this the last. Use Buxto leaves, Juniper-oli, and 8 other drugs made into little green tablets, to flush out excess acids and impurities. Excess acids can cause irritation resulting in getting up nights, scanty flow, frequent desire, burning, backache, and leg pains. Just say Buxto to your druggist. In four days it not pleased you 25c will be refunded. Tyler County Drug Co., Woodville, Best Pharmacy, Col. Westell, Texas. Jan. 14-21-28, Feb. 7.

PERHAPS you never heard of a young printer named J. E. Dowden, but he was the man who made G. O. P. a synonym for the Republican party.

In 1924, the year that the Republican Party nominated James G. Blaine for the Presidency, young Dowden applied for work at the Cincinnati Gazette and got it. About 2:30 o'clock one morning last week, Dowden was called to the newspaper.

At the meeting that night the Republican candidate was conducting a two-hour speech when a voice floated down from the gallery. "Why don't you tell us something about GOP and what it did?" "Why, my friend," rejoined Blaine, "I've been talking about GOP all evening. The word 'GOP' stands for the Grand Old Party of the United States."

Woodville Locals

IN TRUCK LEGISLATION

Any change in existing Texas truck laws which will increase the present 7,000 pound load limit will affect adversely all communities in the state, both rural and urban. This statement was proved last week by identifying the economic effects of Texas legislation.

Increased truck load laws are economically increasing the distance which the truck can profitably carry its load.

Increased truck load laws are economically increasing the distance which the truck can profitably carry its load.

Increased truck load laws are economically increasing the distance which the truck can profitably carry its load.
