ARE YOU PAYING FOR A SUPERFEX EVEN THOUGH YOU DON'T OWN ONE?

If you don't have SUPERFEX, the spoiled food you throw away is sure to cost you more, sooner or later, than you would pay for SUPERFEX modern refrigeration. Think of the wastes of the hot summer weather: milk that sours, butter that turns rancid, meat that spoils, vegetables that wilt, leftovers that can't be used, waste and loss, that is, needless SUPERFEX ends such waste and in doing so pays its own way—amazingly fast!

But now think also of the daily joy of having modern refrigeration in your kitchen—ample ice cubes for cold drinks—fresh, crispy salads or frozen desserts to enjoy hot weather meals—and no waste food, because you can work over the "leftovers" into tasty dishes when you are ready to use them. No running down into the cellar or out to the well—no more worrying whether your next meal has spoiled before you get the chance to prepare it.

PERFECTION MADE SUPERFEX the Oil Burning Refrigerator

Check these features

- Greatest economy—users say fuel costs as little as \$10 a year.
- Most dependable refrigeration—both air and water cooled, by exclusive Super Condenser top. Refrigeration is continuous although burners operate only 2 hours a day. No constant flame.
- Trouble-free—no electricity, running water, outside connections or moving parts.
