**FRANKLY** TO expect a motor to park on the place where the sidewalk is supposed to be. When all this is actually a fact, old-timers coming to see Woodville will be looking for the drag and it will be an entirely different place, not like the old home town.

**THE LICENSE** plates sold to car owners who reside in counties other than in which the purchase was made are in lack. Some counties are also in trouble and it is said one county specializing in the sale of car license plates to foreign, out of the county car owners, has actually had uncompleted road work held up, and allocated funds withdrawn. A recent ruling by the court makes the matter plain, i. e., a car partying foreign license plates is regarded as not possessing any license, and subject to a fine of \$200 a day for operating without a license. That ought to teach county officials something as well as the car operator who was looking for a cheap set of 1938 car license plates.

We mean the copy containing this paper's protest regarding millions upon millions of this gas to the government of Germany?

**THE MAIN** drag is never going to look the same, for, be it known, the old path is getting its face lifted. Buildings are being shaved off—the fronts of them, others are to be moved back, and when the job is done, the street paved, the curbstones set, etc., it may be impossible for cars to park on the place where the sidewalk is supposed to be. When all this is actually a fact, old-timers coming to see Woodville will be looking for the drag and it will be an entirely different place, not like the old home town.
