

Tyler County Booster

WOODVILLE, TYLER COUNTY, TEXAS, THURSDAY, SEPTEMBER 7, 1939

THINK'MBOBBIES

The new-year-work for P. T. A. will open next Tuesday night at eight o'clock, when an informal reception will be held honoring the school faculty and parents of the 1st year children, who have just started their school career.

All who are interested are cordially invited and urged to be present.

The president, Mrs. Forest Pate is already on the job, and after a call meeting of her executive board has the years work pretty well mapped out.

Supt. Hensley will introduce the teachers and J. E. Wheat, the president of the school board will give the welcome address.

A short, interesting program is in the making and refreshments will be served.

First P. T. A. Meeting Tuesday

The following editorial from the Amarillo Daily News, under date of Sept. 1, sounded fine. Then this week Monday's papers told the world of the sinking of an English passenger boat with some 1477 humans, and which included a number of Americans, made the American people wonder if the fine sentiments of the Amarillo paper could actually be carried out during the great European conflict now raging. Here it is: "WE MUST STAY OUT. A little girl last night asked this question: 'Daddy, why are we so excited about this war?' She was the seven-year-old daughter of one of the editors of the News. Yet she put her finger on one of the most potent issues facing the United States. Hysteria is on. Adolph Hitler has said the word, the impetus has been given. Another World War may be in the making. Within days maybe hours, we Americans likely will see a repetition of the propaganda and pressure and the exhortation of the years before 1917. It will not come directly from abroad. It will come from our neighbors, from certain members of the press, from the radio. That there will be pressure and lots of it is certain. It has always been so. Within the last week, as tension mounted, higher and higher abroad, Americans—yes, Americans—have grown jittery. Too often has it been said on the streets, everywhere: 'There will be war—and we will be in it as sure as shooting.' A lot of young men who were too young to see broken, twisted men come back from the last war actually are eager for a fight. A uniform suddenly has become strongly appealing to them. Such talk, such emotion must stop. There is no reason—ABSOLUTELY NONE—why the United States should become embroiled in anybody's war unless American soil is threatened. Thinking Americans will calm themselves, forget the hysteria fomented from news reports from abroad, published in the press and screamed over the radio. They will say 'WE DON'T WANT WAR FOR THE UNITED STATES.' They should shout it so loudly—and so frequently—that the command will be unmistakable when Congress meets in its unavoidable special session to consider neutrality legislation. America does not want war. It will not get into a war if Americans stay level headed."

Methodist W. M. S.

"In Christ there is no East and West, In Him no South and North. But one great fellowship of Love Throughout the whole, wide earth."

The lovely words of an old song brought out at such a fitting time by Mrs. Lewis Parr, whose study of "Songs of Zion," interested the society, when it met with Mrs. J. C. Marshall for a joint social. Mrs. R. A. Ginn assisted Mrs. Marshall as co-hostess.

Mrs. J. H. Townsend ably presented chapter four of Circle One's study of Radiant Hearts. Another arresting talk was made by County Health Nurse Mrs. Dyer, who presented an enlightening survey of the Health Officers capacity to determine social diseases, and render treatment to the county indigents.

The regular meeting of the Methodist Society met at the church Monday, Sept. 4, in a business session. The meeting was called to order by the president, Mrs. Fain. The time of the meetings has been changed to 2:30 and the Spiritual Life Group Meetings will meet immediately afterwards from 3:30 to 3:45.

County Teachers Are Announced

The following is the official teachers list of common school districts, for the 1939-1940 terms of school.

Cruse School District No. 9: Velma Sumrall, Woodville, Texas.

Rayon Bluff District No. 10: Annie O. Johnson, Woodville, Texas.

Midway School District No. 11: Wanda Pedigo and Tennie T. Wilcox, Chester, Texas.

Spurger School District No. 12: A. A. Miller, J. W. Knight, Jot Hughes, Willie Martin, Mattie Miller, Edna Holder, Alma Batson, Effie Jordan, Idia McClain, Martha Feazel, all of whose address is Spurger, Texas.

Fred School District No. 13: Joseph Locke, I. W. Fulgham, James Manning, Ferrel Sheffield, Viola Arnold, Eula Calwell, Margaret Turner, Ina Lester, Blanche Jeffries, all of Fred, Texas.

Billocks Creek School District, No. 21: Evie Jewell Bostick of Dies, Texas.

Warren School District, No. 24: C. H. Wilbanks, David Watts, O. L. Ryall, Edison Starkey, Lucy Connolly, Ardum Cooper, Ida Woods, Curtis Robertson, E. C. Riley, Gladys Jenkins, Bessie Risinger, Ruby Findley, Faye Collier, Belle Wiggins, Jennie Boyd, Ethel Elliott.

Chester School District No. 17: J. H. Slack, H. C. Ellis, Louise Treadaway, Celesta Slack, Muriel Coward, Stewart Rice, Al Harris, Mrs. Cullen George, Sylvia Jordan, Ross Marsh, Alice Leakey, Jim Lambert, R. A. Permenter, Marcella Fermenter.

Holly Fork School District, No. 28: Ruth Simmons, of Colmesneil, Texas.

Mill Creek School District, No. 29: Bessie Kelley, Colmesneil, Texas.

Red Bank School District, No. 30: Mae V. Peare, Emilee, Texas.

M. J. Carmel School District, No. 31: G. W. Dyer, Woodville, Texas.

AN APPRECIATION

We wish we could express in words our appreciation to the friends and neighbors who did everything to lighten our burdens, during the illness and death of our dear mother. In helping care for her, the food brought and served to the family and relatives, and the beautiful flowers brought and sent to the bereaved children. Mrs. J. L. Bullock, Mrs. C. A. Norton; Mrs. Lmie McCluskey, A. M. and J. A. Anderson.

Birthday Party for Aged Veteran

Tuesday noon, Mrs. Mattie Hewitt honored her father with a birthday dinner and seven friends. Rev. Jeff Rhodes, Messrs. Edgar Hyde, George Tomlinson, J. B. Beal, J. B. Best and Henry Evans helped him celebrate his birthday. His daughter, Mrs. C. G. Summers, and daughter, Mrs. E. J. Williams, were also present.

Chester Fair October 12-13-14

At a meeting of business men, farmers and teachers Wednesday night of last week, the dates for this year's Chester Fair were definitely set for Oct. 12-13-14. All the old officers and committeemen, with one or two exceptions were re-instated, and rules governing some of the sections were modified so that entries of exhibits will be much easier than in previous years. Substantial increases in premiums were allotted in some sections, especially in the livestock sections. This being done with the hope of creating more interest in the development and showing of finer livestock in this area.

The Chester Community Fair is well organized and has become one of the outstanding agricultural, educational and entertaining events throughout East Texas.

Many changes will be made this year in displaying and curving for exhibits, and in the carnival attractions. It is the ultimate aim of the fair officials to make every feature of this year's fair outstanding in merit, and to create and leave in the minds of our exhibitors and visitors a happy remembrance of the 1939 fair.

Martin Dies Suspects France and England

Washington, Aug. 16.—The Dies committee on un-American propaganda resumed its hearings here today, with its chairman, Rep. Martin Dies, promising a complete expose of propaganda by Great Britain and France aiming to involve the United States in another World War.

While continuing its investigation of Fascist and Communist activities here, the committee will attempt to present a new picture of war propaganda and to expose the links connecting it with governments, causes or cliques of other nations. Mr. Dies announced: "I think it is the duty of the committee to lay the facts before the people regarding international effort being made to involve the United States in war. There exists a well-organized plan to influence public opinion in this country either for the enlistment of our active participation in a war, or to involve us financially if war comes. On one side there are European nations which want our active participation in a war, or that failing, our sympathetic support. On the other side there are European nations which want us to remain neutral because they feel that they would be at a vast disadvantage with this country against them in a war."

Asked to identify these two sides he said: "Based upon my own research and what I have learned," Dies replied, "France and England want our active support, while the Rome-Berlin Axis would like us to be neutral. I am convinced that 80% of the American people want to stay aloof from any foreign wars."

"Furthermore," said Mr. Dies, "the investigators have assembled a vast amount of information and we propose to see that it is given to the public."—Newsday, New York.

Warren Schools Opened This Week

Seven new teachers were included in the faculty of the Warren schools which opened their fall term Monday. Registration in the high-school totaled about 250, which number is approximately the same as in past years.

C. A. Walborn of Austin is the newly elected principal of the high school, who succeeds J. Webb Miller, now a teacher of vocational commercial work in the Midland high-school.

Miss Bobbie Ray, of Richards is the new instructor in commercial work. W. B. Erwin of DeFuniak, succeeds J. H. (Bob) Nall as mentor of the Woodville Eagles.

Jim Bock of Huntville takes the place of Edwin Martin, bandmaster, last year, and now with the Groveson schools. Mr. Bock comes highly recommended and from reports from his home town, if the patrons of the Woodville school will work with him the local band will go forward rapidly and keep a special place among the school bands of this section.

"Assigned to positions in the elementary schools are: Miss Frances Hicks, Dallas; B. E. Frohn, Mary Hardin-Baylor college; Miss Dorolite Pierce, Deary; Miss Rick Lipscomb, Towles; and Miss Katherine Adams, Waco. A. B. Taylor, University of Texas, is principal of the school.

Warren Schools Opened Monday

The Warren school opened on Monday of this week with the enrollment exceeding last year. The school has a new Home Economic building costing around \$5,000 located south of the main plant, which adds to the appearance of the campus and relieves the crowded condition in the high school. Mrs. Ida Woods, Home-Making teacher, is highly pleased over being in the new building.

The faculty met Saturday at 2 o'clock to go over the plans for the year. The faculty for the year includes: Supt., Chas. H. Wilbanks; Prin., H. S. D. H. Wiley; Ed. Elec. school, E. C. Wiley; Agriculture, O. L. Ryan; Home Economics, Mrs. Ida Woods; Coach and Science, H. A. Cooper; B. A. Edison Starkey, Eng. Miss Mary Barclay.

Elementary faculty: Mrs. Jenkins, Miss Bessie Lou Robinson, Mrs. Ruby Findley, Mrs. Faye Collier, Mrs. Belle Wiggins, Miss Jennie Boyd, Miss Ethel Elliott, Mrs. C. G. Summers, Mrs. E. J. Williams, Mrs. C. H. Wilbanks, Mrs. J. L. Bullock, Mrs. C. A. Norton, Mrs. Lmie McCluskey, A. M. and J. A. Anderson.

Published County Quota on NYA

J. C. Kellam, state administrator, last week advised Oscar A. Riley, county school superintendent, that Tyler county's quota of NYA school aid jobs for the 1939-40 school year has been set at 21 for white schools and seven for colored schools. The State Administrator said that quota was based on the county's relative youth population and its particular need for NYA school aid jobs.

Mr. Kellam, announced approval of an NYA work project for Colmesneil public schools. The project will employ approximately 50 boys. The first work to be done on the project will consist of clearing and grubbing a 20-acre lake site. Later a dam will be built and several buildings will be constructed, for the use as a summer camp for all youth organizations.

SINGING CONVENTION

The Convention will meet at the Enon Church near Chester Sunday, September 10. You are cordially invited to be present and take part. Bring your books. Visiting singers are expected.

Texas Highway Patrol on Tuesdays

The Texas Highway Patrol has suffered a large cut in operating expenses and men, which will make it necessary to drop some towns where Drivers and Chauffeurs licenses have been issued.

However, Woodville will remain on the list but the time of issuance will be changed. The time beginning September 6, 1939, and every Tuesday thereafter will be 1:00 p. m. to 2:30 p. m. It will be especially appreciated if all applicants make an effort to appear as much before 2:30 as possible, due to the heavy schedule the patrolman must now make.

Eastern Star Notables Were Here

The local chapter of the O. E. S. entertained the worthy Grand Matron, Mrs. Mildred Harris of Waco, Saturday evening, March 26th, with a banquet at the Ralphy Hotel at 6 p. m., and a program in the chapter room, immediately following.

Other special honor guests were Mrs. Viva Huffman, Associate Grand Conductress, Houston; Mrs. Alma Walker, Past Grand Matron, Houston; Mrs. Hazel McDonald, Member Constitution Committee, El Paso; Mrs. Pearl Lang, Deputy Grand Matron, Houston; Mrs. Mary Seale Pedigo, Grand Representative District of Columbia, Hull; Mrs. Eurlina Eddington, Port Arthur; Mrs. Mabel Harle, Grand Examiner District 4, Port Arthur; Mr. A. E. Shirley, Member Grievance and Appeals Committee, Port Arthur; Mrs. Clyde Van Cleve, Port Arthur; Mrs. R. L. Vernon, Beaumont; Elsie Nottingham, Dayton; Mrs. Tennie Phillips, Mrs. Eupha Smith and Clyde E. Smith, all of Woodville.

A large representation from the chapters of the Fourth District was present.

Dr. Watt Barclay, serving as toastmaster, welcomed the guests as mayor, in behalf of the city of Woodville and as Worthy Patron of the local chapter.

During the banquet a short program was given and enjoyed by all present. Those participating in the program were, Gerald Smith in two entertaining songs accompanied by Arnold Rhodes, Gaynell Little in a tap number and Sarah Sholars in an accordion solo.

After the banquet the guests were invited to the Masonic Hall where the chapter was opened by the Worthy Matron, Mrs. Watt Barclay, who introduced the honor guests and welcomed them. Immediately after this the doors were opened and a program honoring Mrs. Harris was given.

The Hawaiian motif was used in the decorations and program. Miss Julia Belle Cruse, gave a colorful travogue of Hawaii and as she passed from time to time, different Hawaiian scenes were interpreted by a group of songs and entertainers, consisting of Mrs. John Reid, Mrs. Audley Wisenbaker, Beverly Barclay, Gaynell Little, Helen Dean, Freda Matthews and Gerald Smith.

This travogue "In the Land of Make Believe," was especially written for this occasion by Mrs. Henry Evans. It drew much favorable comment from the visitors.

After the program, punch was served, while all enjoyed a social hour together.

While Mrs. Smith was one of the honor guests, she deserves much credit for the lovely table arrangements and the sumptuous banquet served at the Ralphy Hotel to 73 guests.

Mesdames Harris, Huffman, Walker, McDonald, Lang and Pedigo were guests of Mr. and Mrs. Clyde Smith Saturday and Sunday.

Warren Schools Opened Monday

The Warren school opened on Monday of this week with the enrollment exceeding last year. The school has a new Home Economic building costing around \$5,000 located south of the main plant, which adds to the appearance of the campus and relieves the crowded condition in the high school. Mrs. Ida Woods, Home-Making teacher, is highly pleased over being in the new building.

The faculty met Saturday at 2 o'clock to go over the plans for the year. The faculty for the year includes: Supt., Chas. H. Wilbanks; Prin., H. S. D. H. Wiley; Ed. Elec. school, E. C. Wiley; Agriculture, O. L. Ryan; Home Economics, Mrs. Ida Woods; Coach and Science, H. A. Cooper; B. A. Edison Starkey, Eng. Miss Mary Barclay.

Elementary faculty: Mrs. Jenkins, Miss Bessie Lou Robinson, Mrs. Ruby Findley, Mrs. Faye Collier, Mrs. Belle Wiggins, Miss Jennie Boyd, Miss Ethel Elliott, Mrs. C. G. Summers, Mrs. E. J. Williams, Mrs. C. H. Wilbanks, Mrs. J. L. Bullock, Mrs. C. A. Norton, Mrs. Lmie McCluskey, A. M. and J. A. Anderson.

Charles Harritt Rotary Tonight

Charles Harritt, Jr., of Conroe, who is governor of this district of Rotary International, will be in Woodville tonight on his official visit to the Rotary club. Mr. Harritt is a member of the Conroe club, and was elected governor of the 130th district at Rotary's 30th annual convention in Cleveland last June.

President John Reid and Secretary W. W. Cruise of the local Rotary and the 40 other members of the club will confer with Rotary Gov. Harritt on matters of club administration and activities. He will attend the club's regular luncheon meeting the day he is here and will in all probability address the entire membership of the club on that occasion. The Rotary club of Woodville was organized this year and meets weekly at the Ralphy hotel.

Rotary Governor Harritt was one of nearly 200 men who were selected to serve Rotary's 5,000 clubs and 210,000 Rotarians in 60 countries and geographical divisions of the world.

A large representation from the chapters of the Fourth District was present.

Dr. Watt Barclay, serving as toastmaster, welcomed the guests as mayor, in behalf of the city of Woodville and as Worthy Patron of the local chapter.

During the banquet a short program was given and enjoyed by all present. Those participating in the program were, Gerald Smith in two entertaining songs accompanied by Arnold Rhodes, Gaynell Little in a tap number and Sarah Sholars in an accordion solo.

After the banquet the guests were invited to the Masonic Hall where the chapter was opened by the Worthy Matron, Mrs. Watt Barclay, who introduced the honor guests and welcomed them. Immediately after this the doors were opened and a program honoring Mrs. Harris was given.

NEAL COMMUNITY
August 15th
The Leon Reed family of Port Neches are visiting in the P. H. Rhodes home.
Miss Marie Williams is enjoying an extended visit with her aunt, Mrs. Laura Bennett near Warren.
Albert Ritchey is again at home after enjoying a very pleasant visit with his sister-in-law Mrs. Cara Ritchey, and niece Mrs. Franklin Walters.
The Friday night singing at the Neal church was very well attended.
A shower was given in behalf of Mrs. Wiley Willford, Saturday night at the home of Mrs. Clyde Willford and was well attended. They were the recipients of many beautiful and useful gifts.
Miss Zannie Findley is on the sick list. It is the earnest desire of her many friends that she will soon be well again.
Supper last evening this community was blessed with good rains that gave added zest to gardens and growing crops.

Woodville Locals
C. L. Dismukes of Warren, has taken over the Nesbit Cafe on the highway near the school and is painting the building. This will be an added improvement.
Mrs. Bertha Prescott is erecting a nine room apartment house on a lot west of her home, and the Lazenbys will soon be moved into a new, modern, four room house near the Winters store, and their home will be ready.
Woodville surely needs more houses. Some members of the school faculty were forced to locate in Doucette as no apartments or houses were available.
Friends are sincerely sorry to see Mrs. J. H. Kenneson Jr. move to Houston. They are leaving here this week.

EMILEE
Hershel Rawls of Houston visited in the home of his parents last week. The Misses Dons, Alice and Junita Crosby visited their cousin, Clarice Crosby last week. Mrs. Hugh Sheffield and daughter and Mrs. Herbert Dean were week end visitors here. Mrs. Angus Sheffield are proud over the arrival of a twelve pound boy.
Mrs. C. C. Weaver are proud over the arrival of an eight pound girl. Rupert Crosby is visiting relatives in Beaumont. Mrs. J. M. Wigley is on the sick list.

Pope's Mill News
Mrs. Guy Boyett and children, who have been visiting her mother for several weeks left for their home in Fort Knox, last Friday.
Mrs. Guy Enlow and children have been visiting their mother Sunday and Monday. David and Ferra Collier from Dallas have been visiting their grand parents, Mrs. J. P. Collier, for several days. Each Collier will soon have his new home finished. Mrs. E. D. Pope has returned from California, where she went with her daughter and son-in-law, Mrs. Jeff Russell. She reports a very pleasant trip. Rev. R. L. Pope will soon have an appointment, Saturday evening, September 16th, to have the new church, where she went with her daughter and son-in-law, Mrs. Jeff Russell. She reports a very pleasant trip. Rev. R. L. Pope will soon have an appointment, Saturday evening, September 16th, to have the new church, where she went with her daughter and son-in-law, Mrs. Jeff Russell. She reports a very pleasant trip.

AFFIDAVIT OF COMMISSIONERS COURT AS TO COUNTY FINANCES

In the matter of County Finances in the hands of Landon Risinger, Treasurer of Tyler County, Texas.
IN THE COMMISSIONERS COURT OF SAID COUNTY.
In Regular Session, August 14 Term, 1939.
We, the undersigned, as County Commissioners within and for said Tyler County, and the Hon. Lou Cruse, County Judge of said Tyler County, constituting the entire Commissioners Court of said County and each one of us, do hereby certify that on this 14th day of August, A. D. 1939, at a regular term of our said court, we have compared and examined the report of Landon Risinger, County Treasurer of said County, for the period beginning on the 1st day of May, A. D. 1939, and ending on the 31st day of July, A. D. 1939, and finding the same correct have caused an order to be entered upon the minutes of the Commissioners Court, stating the approval of said Treasurer's Report by our said court, which said order recites separately the amount received and paid out of each fund by said County Treasurer since his last report to this court, and for and during the time covered by his present report, and the balance of each fund remaining in said Treasurer's hands on the said 14th day of August, A. D. 1939, and have ordered the proper credits to be made in the accounts of the said County Treasurer in accordance with said order as required by Articles 1836-1837, Chapter 1, Title 34 of the Revised Statutes of Texas, 1925.
And we, each of us, further certify that we have actually and fully inspected and counted all the actual cash and assets in hands of the said Treasurer belonging to Tyler County, at the close of the examination of said Treasurer's Report, on this 14th day of August, A. D. 1939 and find the same to be as follows, to-wit:

STATE SOIL CONSERVATION BOARD OF TEXAS

Notice of Hearing Upon Organization of Proposed Tyler County-Neches River Soil Conservation District, Embracing Land Lying in Tyler County, Texas.

WHEREAS, on the 20th day of July, 1939, there was duly filed in the office of the State Soil Conservation Board at Temple, Texas, a petition signed by fifty or a majority of land owners pursuant to the provisions of the State Soil Conservation Law, as enacted by the 46th Legislature, known as House Bill No. 20, requesting the establishment of Tyler County-Neches River Soil Conservation District, and

WHEREAS, the lands described by said petition and other lands which will be considered for inclusion in said district, are located in Tyler county, described substantially as follows:

All that portion of Tyler County lying north of State Highway No. 45.
NOW, THEREFORE, notice is hereby given that a public hearing will be held pursuant to the said petition, on the question of the desirability and necessity, in the interest of the public health, safety, and welfare, of the creation of such district; on the question of the appropriate boundaries to be assigned to such district; upon the propriety of the petition, and of all other proceedings taken under the said Act, and upon all questions relevant to such inquiries. The said public hearing will be held by the State Soil Conservation Board on the 23 day of August, 1939, beginning at 10 o'clock a. m. at Colmesnet, in the county of Tyler.
All persons, firms, and corporations who shall hold title to any lands lying within the limits of the above described territory, as owners, and all other interested parties, are invited to attend and will be given opportunity to be heard at the time and place hereinafore specified.
STATE SOIL CONSERVATION BOARD BY V. C. MARSHALL
Dated the 3rd day of August, 1939 August 10, 1939 No. 10-34

Heed that SQUEAK!

... Like the first sneeze of a hay-fever victim, it's a sign of approaching trouble. For it indicates that your car has gone too long without lubrication, and you know, as well as we do, that the life of any kind of machinery is dependent on its proper lubrication at regular intervals. ... Note that we've underscored the word "lubrication"; there's a reason for that. It's to differentiate the lubricating needs of your automobile from the old-time "grease job" which survived the horse-and-buggy era. ... Nowadays, lubrication requires experts using specialized lubricants developed by other experts to do the job asked by the automotive engineers—it's a thing far different from "greasing." ... So heed that squeak! Take your car to the nearest Humble sign for verified Humble lubrication—for an expert job utilizing continually improved Humble lubricants as recommended by the manufacturer of your car. ... Incidentally, this is a good time to do that squeak or no squeak we'll bet you've been driving a

Woodville Locals
 Mrs. M. D. Murphy and son have returned from several day visit in Houston.
 Even today, wise buyers are giving us the old "War Time Hush" for Feed and Flour here we have to go to high. Remember, we always have quality and a little better price at Davis Bros.
 Friends are sincerely glad that Mrs. Fred Matthews is able to be back in the store this week after a number of days illness.
 J. M. Lewis of Hillster, was a county seat visitor yesterday.
 Mrs. Dan Murphy and daughter of Nacogdoches, visited Woodville relatives Friday.
 Do not be surprised if prices advance. You are lucky if you call early and do your fall shopping before we have to buy again. Our store and upstairs are filled with cheap merchandise.
 Mrs. Elmo Schulte of Houston visited relatives in Colmesneil and Mrs. Lige Rushing over the week end.
 Mrs. Grady Merle Lowry is now visiting in LaPorte.
 Mrs. Beal of Belton visited Mrs. R. A. Rotan last week.

Woodville schools, the position with the Sun Oil Company. Miss Margaret Haynes returned last week from a visit in Houston. She returned there Monday as she has secured a position. Mrs. R. B. Reynolds and children of Center, have been visiting her mother, Mrs. J. R. Wrenbaker.
 Davis Bros. have "Declared War" on the fellow who tries to over charge you. We are always competitive and most always save you money. Our store is full of good staple merchandise.
 Mrs. S. L. Rainey enjoyed the week end in Jasper with the daughter, Mrs. C. C. Pool.
 Mrs. Laird of Galveston, and Ian MacDonald of Port Arthur, spent Sunday with the latter's parents, Mrs. C. F. McDonald.
 John Burr Cruse has returned from a visit with his sister, Mrs. S. B. Haynes of Lubbock. With them he made a western trip but places enroute to San Francisco were so interesting they were forced to turn back before reaching the coast as Mr. Haynes had only so long to be away.
 Mrs. J. M. Rogers of Batson will join Mrs. T. C. Rock and daughter, Miss Frances, and Mrs. O. T. Craver for a week end visit with relatives in Temple. Miss Frances will go on to her school work at the state university in Austin.
 Buying at Davis Bros. now is just like a big cut price sale. All our purchases made on the lowest market. No dry goods prices will be raised until we have to buy again.
 Prof. H. C. Ellis and son of Chester, were Woodville visitors Tuesday.
 J. W. Cruse has returned to his studies in the Military Academy in Roswell, New Mexico.
 Rev. and Mrs. W. A. Cockrell of the Chester and Corrigan Baptist churches have moved, to Amelia and friends were sincerely sorry to have them leave. Up until Sunday one had been called as pastor to take his place.
 Mrs. H. C. Filler of Urbana, and house guests, Mrs. Hall of Houston, and Mrs. Whitehead of Illinois, also Charlie Bob Cummings of Baytown, were in Woodville and Colmesneil, Sunday.
 Robert Mooney of Beaumont, is back among old friends and is working with his uncle, Roy Wright at the Sinclair station.
 Mrs. Joe Wickline of Kirbyville, were week end visitors in town.
 Big shipment of \$1.95 Fall Hats, Dickie's work clothes, and all kinds and prices fall prints, bed ticking, outing, brown and bleached domestic, bought on the lowest market and selling cheap at Davis Bros.
 Sunday Mrs. Clyde Walters met with a number of other people at the home of his parents, Mrs. B. R. Phillips, in Livingston. There was a sumptuous lunch spread for all at noon.
 Mrs. E. G. Hyde and Mrs. Thompson Hyde and son, spent Friday evening with Mesdames Hunt and Dean.
 Your girls and boys will receive courteous service and quality school supplies at Davis Bros. We also have the kind of school clothes and shoes that will want. We are always pleased to serve the girls and boys and want you to come to see us.
 Miss Betty Jane Dean is spending a few days in Beaumont as a guest of friends there.
 Sewelle Whitney, lightweight pugilist of New York, and his mother, Mrs. Whitney, of Houma, visited Mrs. Dean and Betty Jane for a few hours last Friday.
 Jack Southerland of Beaumont was in town Saturday on business. He also visited his parents Mrs. Southerland.
 Red & White Groceries and that good tender meat, well cut, at Davis Bros. is your guarantee of the best quality and price. We never over charge and most always save you money.
 Ell Hart and son, Richard, of Beaumont, called to see his sister-in-law, Mrs. Jennie Hart. Mr. Last Sunday Mrs. Clyde Waters of Tyler county.
 Dutch and Bill Childress of Fort Arthur and Clyde Childress of Houston enjoyed the week end with their parents at Harmony.
BEECH CREEK
 Beech Creek Health Club met at the home of Mrs. McKinley Bingham last Friday with a real good attendance. All were glad to have "Our County" Health Nurse, with us and enjoyed her talk very much. Our club as well as others are very proud of our health nurse. We are all blessing to our little community. She with the help of our County Health Nurse, has been a great blessing to the health of our people.

MRS. LOU ANDERSON
 Another splendid pioneer woman has gone on, one who has had a big share in making Tyler County what it is, born from a wilderness, where men and women of the early day worked and fought for everything they or their family had.
 This woman has been a great mother, rearing seven of her ten children to manhood and womanhood.
 Laurine Gant was born on February 14, 1849 in Mississippi and was brought to Texas when she was but two year of age. She passed away Tuesday morning at her home in Hillster.
 In 1870 she married Frank Anderson, who preceded her in death five years ago. Three of their children died in early childhood and only Tom passed on in recent years.
 Sons and daughters surviving are A. M. Anderson, Mesdames O. A. Norton and J. L. Black of Hillster, Mrs. Lanie McCluskey of Sour Lake, and J. A. Anderson of Lake Charles.
 She is also survived by 28 grand children, 42 great grand children and there are also five great, great grand children.
 She was a consecrated Christian of many years. Her beloved pastor, Rev. Ronald Pope was in charge of the funeral services Wednesday afternoon and evening. Rests beside her husband and children in the Anderson cemetery.
 She had not enjoyed good health for a number of years but not confined to her bed until in July. Nearly blind and hearing impaired she has expressed, often, a longing to go on. Although her children knew this they were broken hearted to see her go, and our love and sympathy go out to them in this sorrow. Fear was felt for the health of Mrs. Norton, at her nearness, and all sincerely hope she will not be ill.

HILLISTER
 Those who attended the funeral of Mrs. J. Evans of Long Station, who was buried at Village Mills, Saturday, were Mrs. C. S. Spurluck, Mrs. George Haynes and Mrs. Bev. Holt. Visitors in the R. D. McSweeney home over the week end were Mrs. F. D. McSweeney of Houston, Mrs. Chas. Strahan of Lufkin, Mr. Strahan has just returned from a year's stay in Persia. Visitors in the Emmet Wall home Sunday were Mrs. Henry Wall and children of Silasbe, Mesdames Frances Maddox and Mesdames Lewis attended the O. E. S. meeting, honoring the Grand Worthy Matron, Saturday evening in Woodville.—Mrs. Winston Kelley of Sour Lake were week end guests in the Chas. Kelley home.—Mrs. H. Black and daughter of Chester visited the pugilist, Mrs. John Phillips last week.—Visitors in the J. M. Lewis home Sunday were Mrs. Lewis, son, M. H. Rotan of Port Arthur.—Mrs. Grady Merle Lowry of Barbours Hill, has been visiting the mother, Mrs. Jim Phillips.—Grafton Currie was a business visitor in Jasper and Newton, Monday.—Visitors in the Chas. Spurluck home over the week end from Houston, were Roy Spurluck and wife, Chas. Stewart Spurluck and Henry Spurluck of Ingleside.—Mrs. Lee Feagin of Colmesneil, J. L. Albin and Mrs. Marlin Hankland of Houston, were Sunday visitors in the Jim Allison home.
 We are sorry to report, Miss Lonnie McSweeney had to be taken back to the hospital in Woodville Monday.—Mrs. Alma Wallace, of Conroe, visited her father, O. B. Crumpler, Sunday.—We are glad to report there were 23 additions to the church. Rev. Sanders closed the service Sunday.
 Mrs. Lynn and children of Oberlin, La., spent the day with Mrs. Chas. Kelley. Sunday Labor Day visitors in the home of Grafton Currie were the daughter, Mrs. Gibson and children, of Port Arthur, Joe Walters of Houston, and Mrs. George Hayes of Woodville.—We extend heart felt sympathy to the Anderson family over the death of their dear mother. Mother Anderson was sixty years old and one of the loveliest characters the writer ever met. The blessing of heaven rest on her soul.

WOODVILLE, TEXAS
 Mrs. M. D. Murphy and son have returned from several day visit in Houston.
 Even today, wise buyers are giving us the old "War Time Hush" for Feed and Flour here we have to go to high. Remember, we always have quality and a little better price at Davis Bros.
 Friends are sincerely glad that Mrs. Fred Matthews is able to be back in the store this week after a number of days illness.
 J. M. Lewis of Hillster, was a county seat visitor yesterday.
 Mrs. Dan Murphy and daughter of Nacogdoches, visited Woodville relatives Friday.
 Do not be surprised if prices advance. You are lucky if you call early and do your fall shopping before we have to buy again. Our store and upstairs are filled with cheap merchandise.
 Mrs. Elmo Schulte of Houston visited relatives in Colmesneil and Mrs. Lige Rushing over the week end.
 Mrs. Grady Merle Lowry is now visiting in LaPorte.
 Mrs. Beal of Belton visited Mrs. R. A. Rotan last week.

Woodville schools, the position with the Sun Oil Company. Miss Margaret Haynes returned last week from a visit in Houston. She returned there Monday as she has secured a position. Mrs. R. B. Reynolds and children of Center, have been visiting her mother, Mrs. J. R. Wrenbaker.
 Davis Bros. have "Declared War" on the fellow who tries to over charge you. We are always competitive and most always save you money. Our store is full of good staple merchandise.
 Mrs. S. L. Rainey enjoyed the week end in Jasper with the daughter, Mrs. C. C. Pool.
 Mrs. Laird of Galveston, and Ian MacDonald of Port Arthur, spent Sunday with the latter's parents, Mrs. C. F. McDonald.
 John Burr Cruse has returned from a visit with his sister, Mrs. S. B. Haynes of Lubbock. With them he made a western trip but places enroute to San Francisco were so interesting they were forced to turn back before reaching the coast as Mr. Haynes had only so long to be away.
 Mrs. J. M. Rogers of Batson will join Mrs. T. C. Rock and daughter, Miss Frances, and Mrs. O. T. Craver for a week end visit with relatives in Temple. Miss Frances will go on to her school work at the state university in Austin.
 Buying at Davis Bros. now is just like a big cut price sale. All our purchases made on the lowest market. No dry goods prices will be raised until we have to buy again.
 Prof. H. C. Ellis and son of Chester, were Woodville visitors Tuesday.
 J. W. Cruse has returned to his studies in the Military Academy in Roswell, New Mexico.
 Rev. and Mrs. W. A. Cockrell of the Chester and Corrigan Baptist churches have moved, to Amelia and friends were sincerely sorry to have them leave. Up until Sunday one had been called as pastor to take his place.
 Mrs. H. C. Filler of Urbana, and house guests, Mrs. Hall of Houston, and Mrs. Whitehead of Illinois, also Charlie Bob Cummings of Baytown, were in Woodville and Colmesneil, Sunday.
 Robert Mooney of Beaumont, is back among old friends and is working with his uncle, Roy Wright at the Sinclair station.
 Mrs. Joe Wickline of Kirbyville, were week end visitors in town.
 Big shipment of \$1.95 Fall Hats, Dickie's work clothes, and all kinds and prices fall prints, bed ticking, outing, brown and bleached domestic, bought on the lowest market and selling cheap at Davis Bros.

NOTICE OF EXECUTION SALE
 BY virtue of an execution and order of sale issued out of the District Court of Angelina County, Texas, on a judgment rendered in said court on the 13th day of December, 1938, in favor of the Martin Wagon & Trailer Company, a corporation, and against J. E. Riley in the case of E. L. Kurth, receiver vs. J. E. Riley, No. 8721, on this court for the sum of ONE THOUSAND FIVE HUNDRED SIXTY-FOUR and 04/100 DOLLARS (1,564.04) with interest thereon from December 13, 1938, at the rate of eight (8) per centum per annum, and for the foreclosure of a Deed of Trust Lien on the property hereinafter described, commanding me to proceed to seize and sell the property hereinafter described as under execution, I did, on the 6th day of September, 1939, at 10 o'clock A. M. levy upon the following described real estate situated in Tyler County, Texas, to-wit:
 A part of the Wm. Campbell League and being fully described in a deed from E. A. Dismuke to W. S. Jones of date May 31, 1915, and recorded in Volume 98, on page 117 of the Deed Records of Tyler County, Texas, to which reference is here made for particular description.
 And on the third day of October, 1939, being the first Tuesday of said month, between the hours of 10 o'clock A. M. and 5 o'clock P. M. on said day, at the courthouse door of Tyler County, Texas, in the town or city of Woodville, I will offer for sale and sell at public auction for cash all the right, title and interest of the said J. E. Riley in and to said real estate.
 Dated at Woodville, Texas, this sixth day of September, 1939.
 T. H. NICHOLSON,
 Sheriff, Tyler County, Tex.
 Sept. 7, 14, 21, 1939.

THE STATE OF TEXAS
 To the Sheriff of any Constable of Tyler County—Greetings:
 You are hereby commanded to summon J. S. Heath by making publication of this citation once in each week for four consecutive weeks previous to the return day hereof, in some newspaper published in your county, if there be a newspaper published therein, but if not, then in the nearest county where a newspaper is published, to appear at the next regular term of the District Court of Tyler County, to be holden at the court house thereof, in Woodville, Texas, on the fifth Monday in October, A. D. 1939, the same being the 30th day of October, A. D. 1939, then and there to answer a petition filed in said court on the 19th day of August, A. D. 1939, in a suit numbered on the docket of said court No. 5521, wherein Lucy Heath is plaintiff, and J. S. Heath is defendant, and a brief statement of plaintiff's cause for action, being as follows:
 That plaintiff has been an actual bonafide inhabitant of Texas for more than twelve months, and of Tyler County for more than six months next preceding the filing of this suit; that she and defendant were married October, 1926, and separated December, 2, 1931, that defendant abandoned plaintiff as said last date, and they have not lived together since that date, and she does not know where he resides; that no children were born to the union of plaintiff and defendant; that plaintiff desires her maiden name, "Lucy Williams," be restored. Plaintiff prays that she be decreed from defendant.
 Herin I do not but have before me said certificate in support of said cause, and with this you are hereby notified with your return to said court, and you are hereby commanded to cause the same to be published in some newspaper published in your county, if there be a newspaper published therein, but if not, then in the nearest county where a newspaper is published, to appear at the next regular term of the District Court of Tyler County, to be holden at the court house thereof, in Woodville, Texas, on the fifth Monday in October, A. D. 1939, the same being the 30th day of October, A. D. 1939, then and there to answer a petition filed in said court on the 19th day of August, A. D. 1939, in a suit numbered on the docket of said court No. 5521, wherein Lucy Heath is plaintiff, and J. S. Heath is defendant, and a brief statement of plaintiff's cause for action, being as follows:
 That plaintiff has been an actual bonafide inhabitant of Texas for more than twelve months, and of Tyler County for more than six months next preceding the filing of this suit; that she and defendant were married October, 1926, and separated December, 2, 1931, that defendant abandoned plaintiff as said last date, and they have not lived together since that date, and she does not know where he resides; that no children were born to the union of plaintiff and defendant; that plaintiff desires her maiden name, "Lucy Williams," be restored. Plaintiff prays that she be decreed from defendant.
 Herin I do not but have before me said certificate in support of said cause, and with this you are hereby notified with your return to said court, and you are hereby commanded to cause the same to be published in some newspaper published in your county, if there be a newspaper published therein, but if not, then in the nearest county where a newspaper is published, to appear at the next regular term of the District Court of Tyler County, to be holden at the court house thereof, in Woodville, Texas, on the fifth Monday in October, A. D. 1939, the same being the 30th day of October, A. D. 1939, then and there to answer a petition filed in said court on the 19th day of August, A. D. 1939, in a suit numbered on the docket of said court No. 5521, wherein Lucy Heath is plaintiff, and J. S. Heath is defendant, and a brief statement of plaintiff's cause for action, being as follows:
 That plaintiff has been an actual bonafide inhabitant of Texas for more than twelve months, and of Tyler County for more than six months next preceding the filing of this suit; that she and defendant were married October, 1926, and separated December, 2, 1931, that defendant abandoned plaintiff as said last date, and they have not lived together since that date, and she does not know where he resides; that no children were born to the union of plaintiff and defendant; that plaintiff desires her maiden name, "Lucy Williams," be restored. Plaintiff prays that she be decreed from defendant.
 Herin I do not but have before me said certificate in support of said cause, and with this you are hereby notified with your return to said court, and you are hereby commanded to cause the same to be published in some newspaper published in your county, if there be a newspaper published therein, but if not, then in the nearest county where a newspaper is published, to appear at the next regular term of the District Court of Tyler County, to be holden at the court house thereof, in Woodville, Texas, on the fifth Monday in October, A. D. 1939, the same being the 30th day of October, A. D. 1939, then and there to answer a petition filed in said court on the 19th day of August, A. D. 1939, in a suit numbered on the docket of said court No. 5521, wherein Lucy Heath is plaintiff, and J. S. Heath is defendant, and a brief statement of plaintiff's cause for action, being as follows:

Tyler County Booster

A First Class Publication Entered as Second Class Matter.

A Weekly Newspaper Boosting Tyler County and Woodville.

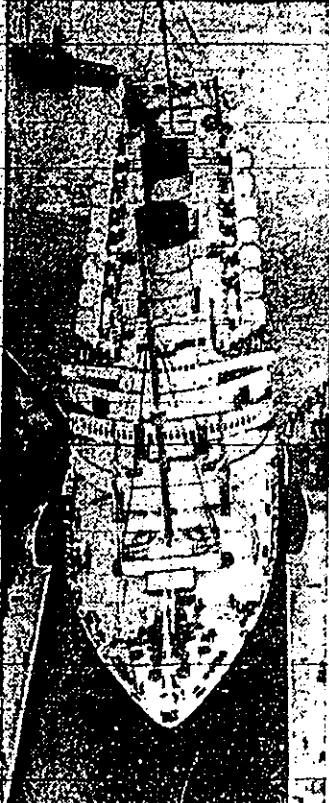

Printed in Woodville, U. S. A.

VOLUME XVIII

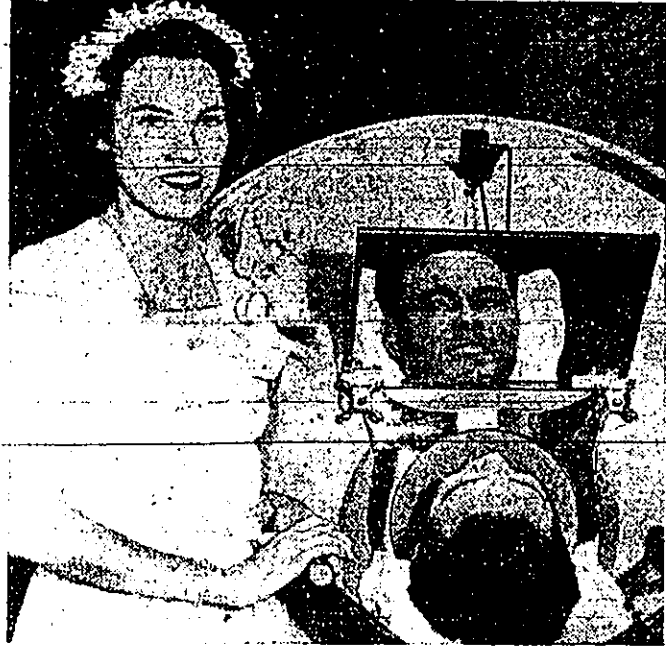

WOODVILLE, TYLER COUNTY, TEXAS, THURSDAY, SEPTEMBER 7, 1939.

NUMBER 14

NOTABLE NEWS EVENTS IN PICTURES

SAFE IN NEW BERTH—The liner Mauretania is shown being docked into the King George V dock in London, Eng., after much maneuvering. She is 772 feet long and 89 feet 6 inches wide. The dock is 800 feet long and 100 feet wide.

"BOILER KID" WED TO CHILDHOOD SWEETHEART—Fred Suite, Jr., who has lived in an iron lung since he was afflicted with infantile paralysis in 1936, is pictured with his bride, the former Theresa Larkin, after their Chicago, Ill., wedding. His bride was his childhood sweetheart.

ARTILLERY BATTERY HOLDS NIGHT MANEUVERS—Members of the gun crew servicing a 3-inch anti-aircraft gun were silhouetted by the glare of a searchlight, as they pointed their weapon aloft, in night maneuvers held near Manassas, Va.

SAIL HALF WAY 'ROUND THE WORLD TO WORK—This quartet of tars aboard the Australian cruiser, H.M.A.S. Perth, eye the New York skyline, as they pause during their task of swabbing the decks. Imagine making a trip half way around the world only to miss a day of shore leave playing nursemaid to a ship!

LYNCHING THREATENED—To save the life of Tom Ashwell alias Charles Jefferson, above, he was removed to the jail at West Palm Beach, Fla., from Boca Raton, where he was arrested for the murder of Ruth Dunn, 17, and detention of Jean Bolton.

INFANTILE PARALYSIS CAMPAIGN FUNDS PRESENTED TO GROUP HEAD—Keith Morgan, left, presented a check to Bash O'Connor, to the amount of \$1,329,100, for use in the battle against infantile paralysis. Raised by proceeds from the President's Birthday Ball, held all over the nation, the check was presented at the President's home in Hyde Park, N. Y. Mr. Roosevelt, seated center, holds this itemized report on the amount of funds raised.

GOVERNOR'S SON CONSIDERS EMBARKING ON MOTION PICTURE CAREER—Mike O'Daniel, left, 19-year-old son of the Governor of Texas, is shown discussing the possibilities of his becoming a screen actor with Director Arthur Jacobson and Betty McLaughlin. It has been reported that young O'Daniel is suitable screen material. He will consult with his family.

HEADERS' BACK AGAIN—The 'petite film' wears a striped dress, as she models the latest in the 'headers' line. The 'petite film' is a new model in stripes, red and grey.

VICE PRESIDENT GARNER PAYS A VISIT TO HIS "CAMPAIGN MANAGER"—Vice President and Mrs. John Nance Garner stopped off at Dallas, Tex., to pay a visit to E. B. Germany, left, a close friend of the Garners, while en route to Uvalde. Mr. Garner didn't comment on his presidential aspirations, but Germany has been mentioned as his campaign manager.

UNIVERSITY RECEIVES WILL ROGERS MEMORIAL SCHOLARSHIP FUND—With Mrs. Will Rogers looking on, Gene Jones, right, secretary of the Will Rogers Memorial Fund, is shown presenting to the University of California a \$125,000 check to be used to establish the Will Rogers Memorial Scholarship at the University of California at Los Angeles.

Tells a Good Story of Pioneer Living in Texas

By AVIS PEATHER
Edgewood, Texas.

(Copyright 1939, by the Southwest Magazine Co.)

E. Spears, a pioneer Texan, 82 years old, was born in Sullivan county, Missouri, and came to Texas in 1878. During the past 40 years he has lived on his 106-acre farm near Edgewood, (Van Zandt-county), Texas. He has excellent health, is active for his age, and helps in the plowing, planting and harvesting of crops raised on his farm.

Mr. Spears is a good story-teller, so good, in fact, that we shall let him tell his early day experiences in his own way.

"I was born in a cold country," said Mr. Spears. "As I grew up I learned to let my beard grow over my face in winter for warmth. I still do it. My wife dislikes a beard and is always glad when spring comes, for it is then I shave off my beard. I have had two wives but only one set of in-laws. I married sisters.

"I was 11 years of age when the War Between the States broke out. Missouri was a battleground for four long years. Times were hard indeed and we had to work—not 8 hours a day—

but 16 hours. We raised corn, timothy hay and oats. The oats were cut with a scything hook.

"A Federal commander by the name of Clark with 300 soldiers under him went into winter quarters near our home. He conscripted two wagon loads of corn from dad, giving Federal script in payment therefor. We never were able to cash the script. My brothers still have it.

W. E. SPEARS, Edgewood, (Van Zandt County), Texas.

Home-Made Jeans

"Mother used the spinning wheel and loom. She would spin and weave 50 yards of woolen cloth a year. She taught me to spin and weave. Our trousers were of home-made jeans, a thick cloth spun from wool and cotton. Our flannel was all wool. I gave a demonstration of spinning from an old-fashioned spinning wheel in Ennis, Texas, a few years ago.

"In those days snow would stay on the ground in Missouri practically all through the winter. There was much sleigh-riding, among young and old folks. We boys had our own sleighs and would take our sweethearts sleigh-riding moonlight nights. It was great fun—more fun, I think, than riding in an automobile today.

"I was 23 years of age when I came

to Texas. I came with intention of staying about a year, then returning to Missouri. But I never returned. I came with the Reynold brothers and we had a wagon train of five wagons. We were on the road five weeks and five days. While traveling we ate whatever we could kill for meat, which were mainly squirrels, prairie chickens and wild turkeys. All along the route we met campers on their way to Texas. I have seen as many as 25 wagon-loads of campers at one water hole. They were good, home-seeking people.

"I had an idea of coming to Texas and being a cowboy, but I changed my mind at Bluff Crossing on Red river. There we met a herd of 4,000 head of cattle that the cowboys were trying to swim across the river.

Wild as Any Buck Deer

The cattle were longhorns and wild as any buck deer. The cowboys would drive them down to the river bank and try to force them to swim across, but the cattle would turn about and bolt for the open country. After worrying thus with the cattle a whole day and getting nowhere, the cowboys put 50 head on a ferry-boat and ferried them across the river in the hope that the rest of the herd would follow. Finally in about four days they got the whole herd across. Right there and then I saw enough of cowboy life and its hardships to convince me I wanted none of it.

"Arriving in Texas, I finally located in Ellis county and went to work as a farm hand on the farm of Will Roe. He paid me \$13 a month and in addition gave me board and lodging. We raised cotton, corn and oats. The oats were fed to livestock and the cotton sold at 13c per pound. It was here I first saw snuff. An old woman had a stick in her mouth which, now and

then, she dipped into a small can of snuff. I asked her what was good about snuff and why she dipped it. Without batting an eye she said it was none of my dern business.

"I saved my money and bought 60 acres of land near Forney, (Kaufman county). Paid \$5 an acre for the land, a black waxy soil that was very productive. It was nothing unusual for me to raise a bale of cotton to the acre and 40 bushels of corn to the acre. I had to clear the land and split rails to fence it. I built a 2-room boxed house and put a paling fence around it, leaving room in the back for a garden.

"I didn't like living alone. One day I met a pretty girl and courted her. She was shy, coquettish and kept me guessing. Finally she agreed to marry me and the wedding day set. It was one of the coldest days I ever experienced. The preacher and I went out to her house. She looked sweet in a long wool cashmere dress with a train to it. I can't remember what else she had on because I was too excited. The preacher tied the knot fast and fast, but there was no ring ceremony. I was too poor to buy a ring. It made no difference to her—she loved me just the same and we were very happy.

"At that time—1882—Kaufman county was just a bunch of trails. Transportation was by horseback or wagon. We used the wagon as little as possible because there were no good roads. A sure-footed saddle-horse could go anywhere and go quicker than a wagon.

Everybody Healthy

"My nearest neighbor lived two miles from me; the nearest doctor five miles.

We seldom needed a doctor. My body was healthy. Folks used home remedies when they got sick, such as sassafras root tea, bitters made of cherry bark and sarsaparilla, and whisky added.

Kills Big Bear

"I have always liked to hunt and fish. I used to go bear hunting in Dallas county. I remember a big one I killed in Trinity river bottom, two miles below Dallas. The hounds had the bear cornered, were snapping at it but afraid to jump on it. When I shot the bear they were careful enough to keep out of its reach. Then the bear began striking at near by tree limbs, breaking them off as though they were matches. It broke off one limb as big as a man's arm. We barbecued some of that bear's meat and it surely tasted good.

The hounds had the bear cornered, were snapping at it, but afraid to jump on it.

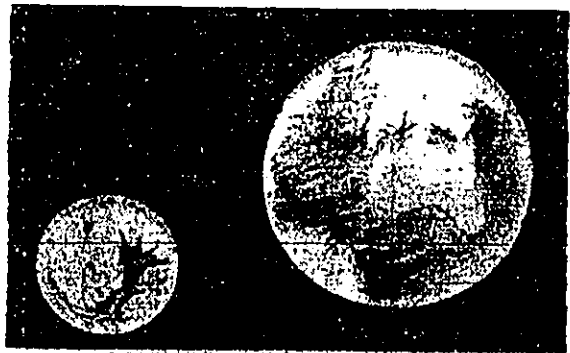

"I am glad I left Missouri and came to Texas. It's the greatest State in the union. No trouble to make a good living here if you try hard enough. Of course, you got to work and use your head. We live at home. The family is my first thought and I see to it that most of our living comes from our farm. I raise corn, potatoes, peas, peanuts, peanut hay, and a little cotton. I sell sweet potatoes and peas. One year I sold 200 bushels of sweet potatoes at \$1.02 a bushel. I raise my own meat and lard, have a few shoats to sell on the side. Our cows furnish us with plenty of butter and milk. We sell cream to a few regular customers. I always have several yearlings that I can sell or kill for meat. I never fail to keep good teams, never bought but one work animal in my life. I guess no one cares about my way of farming, but if all farmers would raise most of their living at home I believe they would get along better and be happier."

Planet Mars As It Is Seen Through Great Telescopes

By EARNEST CHERINGTON, JR.
(The New York Times)

NOT since the summer of 1924 has Mars passed so close to hand. On July 27th this year it was within 36,033,000 miles of the Earth. Mars is not an easy object to investigate. At its closest approach it will appear no larger than a dime 50 feet away, and even under high magnification it is disappointingly small. Any object upon its surface, less than twenty-five miles across, will completely escape the notice of the most skillful and best-equipped observer. Animals as large as prehistoric dinosaurs might roam the Martian planet and we would have no indication of their presence unless they moved together in vast herds.

When viewed through the telescope the surface of Mars appears light red. This red background covers about two-thirds of the entire planet and it appears unchanged year after year. The remaining third consists of dark patches, large and small, in a great variety of shapes and shadings. The dark markings change color in sequence with the Martian seasons, varying from a blue-green in the summer to a chocolate brown in the winter. Although one might invent a lifeless mechanism to explain such variations, the simplest and most logical explanation is embraced by the hypothesis that the dark patches are vast areas of vegetation.

Showing comparative sizes of the planet Mars (left) and the Earth (right).

Animal Life Seems Probable

By terrestrial analogy we may go a step further and say that if the dark areas are colonies of plants the presence of animal life in some form on Mars seems probable. But we demand to know more. The idea that grips the attention of all of us is the fascinating possibility of intelligent life on Mars. Are there any living beings there who exploit the resources of nature for their own comfort and advancement? Do any of the supposed Martian animals possess highly developed minds, skillful hands, that enable them to design and construct intricate machines? Are they peering out into the universe through powerful instruments—undreamed of here and watching us as we work and play? If such creatures there be, do they look with envious eyes upon our warm, moist climate and contrast it with their cold, dry environment?

Such are the questions that surge up within us as we examine Mars through great telescopes. At such times even the astronomer, whose imagination is held in check by his professional knowledge, finds it difficult to resist the temptation to indulge in speculation. Wild guessing, however, never solved any scientific problem. If we can gather a few definite facts about physical conditions on Mars, then we shall be in position to do some scientific guessing.

Life as we know it requires an atmosphere, and that atmosphere must contain oxygen. Moreover, the average temperature of the territory should not differ greatly from that of the

Earth. Water also is a necessity. What has Mars to offer in the way of such essentials?

Not Very Promising

The situation on Mars is not very promising so far as water and oxygen are concerned, but what about temperatures? Since Mars is half again as far removed from the sun as is the Earth, it receives less than half as much light and heat from the sun. This fact was formerly discouraging to life hunters, but in recent years it has been possible to take the temperature of the planet through analysis of the light that comes to us from it. The results indicate more favorable conditions than were previously supposed to exist there.

Extensive measurements with a delicate heat-recording device called a thermo-couple, carried out at the Lowell and Mount Wilson Observatories, reveal a mid-day temperature in the Mars tropics of from 30 to 80, depending upon the varying distance of the planet from the sun. These temperatures apply not to the solid surface but to the atmosphere above it. Since the temperature of the terrestrial atmosphere decreases considerably if one ascends to a height of a few miles, it is quite likely that the surface of Mars is definitely warmer than the measurements indicate.

Since the Martian atmosphere is much thinner than ours, it possesses much less heat-holding capacity. Consequently the temperatures there must drop considerably after sunset. It seems likely that every night on Mars must be accompanied, even in the tropics, by a hard freeze. Although such a climate would be chilly, there are certain forms of plant life here on the earth that would be able to carry on the activities of life in the Martian environment.

White Polar Caps

The most prominent features of Mars are white polar caps, which at times may be seen easily with a small telescope. They were first noticed by Herchel 220 years ago. Sir William Herchel studied them intently during the latter part of his eighteenth century and he noticed that they alternately expanded and contracted in step with the Martian seasons. During winter in the Northern Hemisphere the cap about the North Pole reached its greatest development. At that time the southern cap could not be seen. Six Martian months later the south-

ern cap appeared very broad, while the northern cap shrank to invisibility. Such observations led Herschel to announce in 1781 his belief that the caps were ice fields.

Such are the cold, dry facts. They furnish an inadequate answer to our chief question about Mars. The controversy over the presence of intelligent life centers around the interpretation of the "canals." In 1877 Mars passed exceptionally near to the earth, and the Italian astronomer Schiaparelli discovered a number of hairlike lines connecting the large dark areas. These he called canals, since the dark patches were then regarded as seas.

Eleven years later the canals were seen for the first time by other astronomers. Observers described them as straight and artificial in appearance. Some one suggested that intelligent beings had constructed them for the purpose of irrigating the arid planet with water from the melting polar ice fields. Most astronomers were unable to see the delicate lines even under the best observing conditions, and so a heated discussion ensued.

Percival Lowell's Observations

In 1893 Percival Lowell became interested in the problem. His observations the following year proved so fruitful that he founded a permanent observatory at Flagstaff, Arizona, for the study of Mars and other planets. His keen eyes detected hundreds of canals, which he interpreted as strips of vegetation bordering actual waterways. His discoveries of seasonal variations in their color and of "oases" marking their intersections convinced him of their artificiality. His conclusion that pumping stations would be required to maintain the flow in certain localities led him to announce his belief not only that intelligent Martians had built the canals but that they were still operating them.

Efforts to settle the controversy through photography have not brought conclusive results.

With the death of Lowell in 1916, the lively discussion over the reality of the canals gradually subsided. Astronomers still study the elusive lines (or canals). However, such observations are questioned by some, and their interpretation is questioned by many.

At the present moment science is unable either to prove or to disprove the popular contention that Mars is an inhabited planet. Those who debate the question today are embarrassed by a scarcity of evidence, regardless of which side the choice is. Only through continued investigation can we hope to reach a satisfactory answer. Perhaps astronomers, through continuing observations, may bring to light the solution of the intriguing problem of life on Mars and thereby open the way

Fitting Poultry for Show Room

By W. R. HUNT
San Marcos, Texas.

(Copyright 1939, by the Southwest Magazine Co.)

ANY outstanding specimens of pure bred poultry never see the inside of a show room because their owners are of the opinion that showing poultry involves some deep, dark mystery that only the dyed-in-the-wool fanciers have solved. Expense is another item that frequently scares the farm and backyard owner of good birds.

True it costs considerable money to make the big shows, like New York and Chicago, but how about the local county fair of the winter show close to home? Many of these poultry shows charge no entry fee, or if a fee is charged, it is usually small. The person who owns good poultry can show a few birds at one of these fairs at almost no cost, and have the fun of some hot competition. Frequently the owner can have the satisfaction of winning some prize or prizes and take orders for stock and eggs while in the show room.

The first requirement for winning in any poultry show is good standard bred stock. The birds must be clean, well feathered, and grown as they should be. The birds must be clean, well feathered, and grown as they should be.

finishing touches in fitting mean the difference in prizes or no prizes. Grabbing a chicken up from the backyard and hauling it to the fair is a blunder and miss proposition. You haven't got a chance in a hundred.

A good chicken can be made into well dressed "show bird" within a few days time. It just takes a little work and plenty of patience.

Select the Best in Distances

First, select the best individuals you have. Or, if you have a few good birds, select the best of them. Show them in a show where the competition is better than elsewhere. First wash them thoroughly in one water using mild soap. Never use lard. Then thoroughly rinse in clean water. For the third tub use turpentine and add a little turpentine to give the feathers a glossy but not greasy appearance. Wash the feet in turpentine.

If you intend to show white birds, wash them in turpentine. This will give them a clean, bright appearance. For the third tub use turpentine and add a little turpentine to give the feathers a glossy but not greasy appearance. Wash the feet in turpentine.

W. R. Hunt exhibiting prize chickens.

CURRENT COMMENT

By A STAFF EDITOR
(Copyright 1939, by The Southwest Magazine Co.)

U. S. Serves Warning on Japan
The United States turned its diplomatic attention to the Far East recently, and served notice on Japan of its decision to abrogate the 1911 treaty of commerce and amity between the two countries. The pact will terminate in six months, and after January 26, 1940, the United States will be free to impose an arms embargo and take other economic measures against Japan. The State Department's move surprised and shocked Japan, but met with general approval in the United States.

To moderate elements in Japan the notice of abrogation of the treaty is intended as a friendly warning—a warning that Japan must curb its military clique and compel them to respect American-commercial rights in China and stop their soldiers from insulting American men and women.

Meanwhile, as Secretary Hull clearly indicated in his statement following the treaty abrogation, Japan's policy will have the closest bearing on the momentous decision to be taken by this country in January, when Congress meets. Japan, in effect, is given six months to show its good faith and its alleged friendliness for the United States.

Japan took \$18,686,000 worth of petroleum products from the United States in the first five months of 1939. Orders for iron and steel scrap came to nearly \$13,000,000. The bill for power-driven machinery, including automobiles, trucks and aircraft, came to \$12,953,000.

Here are the cold statistics of Japan's dependence on American supplies, figures which have led numerous Americans to charge that this country is Tokyo's most valuable ally in the war against China:

Commodity—	Percentage bought from U. S.
Copper	92.9
Automobiles and parts	91.2
All oil	89.5
Pig iron	41.8
Other iron	59.7
Machinery and engines	48.5
Zinc	29.4

Women Members of Congress and Parliament

There are five women members of Congress: Mrs. Hattie Caraway, U. S. Senator from Arkansas; Mrs. Mary Mc-Beth Norton, House Representative from New Jersey; Mrs. Caroline O'Day, House Representative from New York; Miss Edith Nourse Rogers, House Representative from Massachusetts; and Miss Jessie Sumner, House Representative from Illinois.

Mrs. Norton is chairman of the House Labor committee, a powerful and important committee.

There are more than twice as many women members of the British Parliament than of the American Congress—to be exact. Most prominent member, of the 12 members of the House of Commons is the American-born Viscountess Astor, elected November 1919. She has served continuously as a House member for 20 years and generally voted a success in having brought her special experience of home and family problems to bear on the deliberations of a Parliament which is increasingly concerned with such subjects. Lady Astor is the mother of five children.

Building Volume of 44 States
Building volume, comments E. M. Craig, secretary of the National Association of Building Trades Employers, had a substantial rebound the first half of 1939 when compared to the like 1938 period.

This optimistic observation was disclosed in the mid-year building survey compiled by Robert D. Steele, the association's statistician of 44 States and 41 key cities. \$1,858,298,628 was the estimated dollar value of the 44 States for the first six months of 1939 compared to \$1,315,062,077 for the 1938 like period. 41 key cities during the first half of 1939 showed 125,397 permits issued and an estimated dollar value of \$386,055,866. Compared to the first half of 1938 there were 112,168 permits issued, having a dollar value of \$344,485,800.

During the first 1939 half year there were 24,728 homes constructed and started, with a dollar value of \$126,904,397. During the first 1938 half there were started and constructed 15,698 homes with a dollar value of \$75,808,466.

Acidity and Alkalinity

Many people advise their friends that their bodies are acid and they are suffering from acidosis.

The term, acidosis, is really a misnomer. It is used by the medical profession to indicate any condition in which the body is less alkaline than it should be; for if the body became actually acid death would result.

What we eat rather than how much we eat is what should be watched carefully. Many of our most valuable foods are acid-producing foods and although we need them we must balance them by eating liberally of alkaline-producing foods such as green vegetables, fresh fruit, and milk. Apples, milk, muskmelons, oranges and potatoes have been

found, experimentally, to be very efficient in reducing acidity. Asparagus, beans, carrots, raisins, lettuce, celery, and similar foods are also among the alkaline-producers.

Women and Men Drivers

The American Institute of Public Opinion recently took a poll on women and men drivers—asking, in their nationwide survey, definite preferences about riding with a man or woman at the wheel. The answers were that 60 per cent had rather ride in a car with a man driving than a woman. Only 8 per cent voted a preference for women, and 32 per cent said it made no difference.

Actually the argument over men and women drivers may never be solved. Insurance experts and others who study the accident figures in the United States every year are impressed by the fact that women drivers figure in only 7 or 8 per cent of all fatal street and highway accidents.

But such figures don't take into account the greater mileage driven by men, nor the conditions under which truck drivers, taxi and bus drivers do much of their driving.

The typical male may think, the Institute survey showed, that women are too "temperamental" to make good drivers and that they pay too little attention to the road. But on the face of the figures, both of the present survey and of the national accident statistics, this typical male would have to admit that women do not take, on the average, as many chances on the road as men. Moreover, he ought to be courteous enough and frank enough to agree that a good woman driver is among the best in the world. The admissions reported in the survey as to speed and carefulness show that there is abundant room for improvement in the driving of both sexes.

25th Anniversary of Panama Canal Opening

Twenty-five years ago the Panama Canal was opened to sea-borne traffic, marking the completion of one of the greatest engineering feats of our age and the opening of a new era for the nations of the Western Hemisphere.

It was on August 15, 1914, just a few days after the opening of the World War, that the S. S. Ancon made its historic voyage through the newly cut canal, the first ocean-going vessel to make a commercial transit of the inter-oceanic waterway. Built at a cost of \$366,650,000 over a period of ten years after earlier unsuccessful efforts, the completion of the canal was hailed as

victim of bull-nettle stings. Inadvertently one beautiful moonlight night, long ago I sat down on a bull-nettle while making love to a pretty girl on the sylvan banks of Coon Creek. Whooping with pain, I leaped from the ground. The girl, startled and visibly embarrassed, said: "Mr. Gandy, I hope you are not seriously hurt. Did something hit you in the vertebra?"

A great industry stages a come-back—that of geese-raising. Nearly all farmers in my neck of the woods have a flock of geese. Now we are getting back to fundamentals. I've known a long time that something was wrong with the country, that all we needed to bring back prosperity was to return to the wise ways of grandpa and grandma. Happy and prosperous days are inextricably woven with geese and feather beds. I well remember grandma's flock of geese and how a certain old gander took a dislike to me and often chased me all over the place. He or she who has never slept on a downy, billowy feather bed in freezing weather has missed comfort and repose beyond words to describe.

A woman advertised in the classified columns of a newspaper for a husband who could cook. Better far had she advertised for a husband who could provide something to cook. Wife, when I proposed the last time and was accepted, agreed to cook everything I would bring in, which was fair enough and looked easy, but sometimes I failed to bring home the bacon. When that happened she made no complaint. One reason so many marriages go on the rocks today is because the wife bitterly complains when husband fails to bring home the bacon.

Allergy is another big word going around—a word used by the doctors to explain why certain things may cause you discomfort, such as rag-weed that causes hay fever, some foods that cause pain, indigestion, etc. The strangest case of allergy is that of a man in Iowa who is allergic to money. He had to quit his job in a store because handling bills caused rash to break out on his hands. The last bills I handled—five \$1 bills—didn't stay in my hands long enough to cause rash. Creditors gobble them up in about one-sixteenth of a split second.

an outstanding example of American persistence and engineering.

Its influence on world commerce, on the political and social contacts of the two Americas, over the past quarter century has been incalculable. More than 100,000 commercial vessels have passed through the waterway since its opening, carrying untold millions of tons of cargo. To commemorate the completion of the great task and the position of the canal as a world factor, August 15 was observed with fitting ceremonies in Canal Zone, and elsewhere.

George Goethals, U. S. Army engineer, supervised the building of the canal.

Gasoline and Motor Vehicle Taxes 1938

Highway users contributed \$1,177,010,000 to State treasuries in 1938 in gasoline and motor vehicle taxes and fees, the Public Roads Administration reported. Gasoline taxes amounted to \$771,764,000; motor vehicles fees to \$388,825,000, and motor carrier taxes to \$16,421,000.

The net funds distributed amounted to \$1,175,202,000, the report said. More than \$44,000,000 was assigned to collection costs; \$691,063,000 went for State highway purposes; \$273,865,000 went for local roads and streets; \$7,906,000 was assigned to park and forest roads and \$158,284,000 was assigned to non-highway purposes such as relief, education, and general funds.

Taxpayers paid \$62,057,000 of the total amount of \$1,177,010,000.

Congress Session Cost Nation \$13,344,077,162

The total of appropriations voted by the first session of the Seventy-sixth Congress, which adjourned August 5, was \$13,344,077,162, according to figures compiled by the House Appropriations Committee.

This compares with a total of \$9,356,171,982 in the first session of the Seventy-fifth Congress, and \$11,861,815,655 in the second session of the Seventy-fifth Congress.

An analysis of the \$13,344,077,162 total, major categories, follows:

Relief, WPA	\$ 725,000,000
Relief (Supplemental)	100,000,000
Relief (1940)	1,765,600,000
First deficiency	23,765,041
Independent offices	1,668,218,340
Legislative establishments	21,851,779
Treasury-Postoffice	1,700,615,054
Military establishments:	
War Department	508,789,824
Supplemental War	232,398,047
Department	305,188,614
Navy	773,049,151
Second deficiency	167,619,059
Agriculture and Farm	
Credit Administration	1,194,498,633
Interior Department	172,679,765
District of Columbia	48,002,347
Department of Labor	30,536,170
State, Justice, Commerce Department	123,177,220
Urgent deficiency	3,099,377
Third deficiency	185,176,086
Permanents, indefinites and trust funds	3,624,812,775
Total	\$13,344,077,162

Back to the Soil, Says Ford

Mr. Henry Ford, born 1863, on his recent 76th anniversary, had this message for young people:

"Young people would better start on the soil, if they want to succeed; at least a move back to the soil is what this country most needs now.

"If young men and women make their start there, they can go on and build successful lives in business or the professions later, if they want to. But they need that experience with the soil. They need to find out that they can create their own security and success right on the soil.

"Too many young men want to get somehurry in a great hurry. They want to win big success quickly. It is the wrong view of life to take. After all, all any of us gets out of life is experience, and patient work is the only way to get any experience worth having.

"I think, too, that business concerns and the young people employed in them have got to get a new idea of what business is all about."

Armament Race Costs Estimate for 1939

The cost of the world's feverish efforts to reinforce armaments may reach a new peak of \$20,000,000,000 this year, figures from government and other sources indicate.

On the eve of the World War, in 1914, the seven largest powers were spending annually only \$2,400,000,000 for arms.

Mounting defense expenditures by England and France largely account for an indicated \$2,000,000,000 rise in arms outlay this year by the chief participants in the spending race.

American appropriations for defense have been mounting, but actual outlays have been slower on the rise because of the time it takes to get navy, air equipment and other long-range programs going.

The world arms bill, it was figured, has risen at least fourfold since Nazi Germany started setting a new pace in 1938.

Secretary Morgenthau, nevertheless, had sufficient information to be able to report to Congress that Great Britain was spending almost 50 per cent of its national budget for arms.

France, he said, was devoting almost 40 per cent to the same purpose, Italy 50 per cent, Japan over 70 per cent. Soviet Russia, he said, had been reported to have authorized a 50 per cent increase in outlays for arms.

By contrast, he noted that the record peacetime arms budget of the United States represented only about 12 per cent of contemplated expenditures. Mr. Morgenthau's figures were for the 12 months closing June 30.

Alaska

In all of Alaska there are less than 70,000 persons, approximately half of whom are white. This gives the country a density of about one-tenth of a person to every square mile. On the other side of the globe, Norway, Sweden, and Finland, whose combined area and natural resources are smaller than those of Alaska, support a total population of approximately 13,000,000.

Mines in Alaska produced minerals worth \$28,607,000 last year, bringing the total value of mineral output of the territory since 1880 to \$777,818,000. When placed beside the \$7,200,000 paid Russia for the area, in 1867, this amount becomes quite impressive.

Most spectacular of the mineral activities in recent years has been the mining of platinum. More than 34,420 ounces of the precious stuff were taken from Alaska last year, or more than in all the other years.

Secretary of State William Seward was criticised throughout the United States for paying \$7,200,000 for Alaska in 1867. The purchase was dubbed, "Seward's Folly."

Bosque County Spends Wisely

The commissioners court of Bosque county, Texas, spends the taxpayers' money wisely for the benefit and welfare of the people.

"The county is unique in that it never, since it was organized in 1854, has had a county-wide debt," County Judge Carl Lovelady said. "It has," he proudly declared, "more gravel roads for its population and size than any other county in Texas. There is a \$43,000 road bond indebtedness, together with \$28,000 for courthouse improvements, for which warrants were issued and for which a 3c tax is levied each year.

"For the last twenty-two years there has been no change in the county tax rate, which is 55c on the \$100 valuation. In 1933 the commissioners court granted a 20 per cent reduction in taxable values on all real estate in the county.

"A pay-as-you-go policy prevails on the part of the county commissioners. All claims are paid in cash. The general fund takes care of WPA projects, direct relief and health matters," said Judge Lovelady.

Grass Root Reveries

By JOE GANDY
Winnboro, Texas

(Copyright 1939, by The Southwest Magazine Co.)

POET referred to September days as "the melancholy days, the saddest of the year." This poet was either a pessimist or had just been jilted by his girl friend. September is more important than any month of the year, for it ushers in the fall harvest season—the gathering of two major crops—cotton and corn. Millions of nimble fingers now move up and down whitened rows picking the fleecy staple from opening bolls. I used to enjoy picking cotton when it sold for 10c and 12c a pound and there was no big surplus. Now as I pick it I get high blood pressure from thinking about the surplus and the plow under. Some economist has figured out that if all the women wore cotton petticoats and cotton hose it would take up the \$13,000,000 bale surplus. Why pile 13,000,000 bales on the women? They didn't plant it. Women say, on the other hand, that they look attractive in cotton hose. Furthermore, they argue, men would quit looking if they wore cotton hose. Maybe so. But my guess is that cotton hose would never stop men from looking expect-blind men.

"Whooping with pain, I leaped from the ground."

Citizens of a certain town are striving to have an ordinance passed to fine cows for mooping, owners of cows to pay the fines. Why pick on cows? Why not include dogs that bark, cats that meow, roosters that crow and jackasses that bray? Dumb creatures like to give vent to their feelings same as humans. Berets of speech, they can't talk your arm off about their troubles, so they resort to inarticulate sounds to tell the world they are either sad or glad.

Chemurgy, it seems, is destined to become a factor in developing many profitless crops. The latest claim for chemurgy is the making of a fine face powder out of bull-nettle roots. No one ever dreamed that any good could come of bull-nettles. Now the ugly and much-maligned weed is to make milady beautiful. We marvel at science, and what it does these days. This late discovery, I hope, will be the means of using up all bull-nettles. As far back as my memory runneth I have been a

victim of bull-nettle stings. Inadvertently one beautiful moonlight night, long ago I sat down on a bull-nettle while making love to a pretty girl on the sylvan banks of Coon Creek. Whooping with pain, I leaped from the ground. The girl, startled and visibly embarrassed, said: "Mr. Gandy, I hope you are not seriously hurt. Did something hit you in the vertebra?"

A woman advertised in the classified columns of a newspaper for a husband who could cook. Better far had she advertised for a husband who could provide something to cook. Wife, when I proposed the last time and was accepted, agreed to cook everything I would bring in, which was fair enough and looked easy, but sometimes I failed to bring home the bacon. When that happened she made no complaint. One reason so many marriages go on the rocks today is because the wife bitterly complains when husband fails to bring home the bacon.

Allergy is another big word going around—a word used by the doctors to explain why certain things may cause you discomfort, such as rag-weed that causes hay fever, some foods that cause pain, indigestion, etc. The strangest case of allergy is that of a man in Iowa who is allergic to money. He had to quit his job in a store because handling bills caused rash to break out on his hands. The last bills I handled—five \$1 bills—didn't stay in my hands long enough to cause rash. Creditors gobble them up in about one-sixteenth of a split second.

The Great American Home

BRIEF TEXAS NEWS---from Over the State

ANOTHER COTTON ROAD
Tarrant county will build an experiment cotton road. The road will extend from the Fort Worth-Dallas pike to Arlington high school.

BIRD LINGUIST AND DIETICIAN
Eastland Chronicle: "The Fort Worth zoo has hired Mrs. Willard Price as bird linguist and dietician. Her job includes feeding of delicate caged birds and teaching native crows and hill mynahs to talk."

RECEIVES CHRISTMAS CARD MAILED IN 1921
It took Uncle Sam 18 years to deliver a Christmas card to C. R. Yieser, of Yoakum. He received the card July 30, 1939, and the card was mailed to him by his sister from Marshalltown, Iowa, December 2, 1921.

TSCW ENROLLMENT HEAVY
Texas State College for Women, Denton, has an all-time high enrollment of 2,900 for the fall term. Because of crowded conditions, 300 State and out-of-State applicants were turned down, said J. K. Brim, president of the college board.

ROPE MADE FROM YUCCA
Rope of exceptional strength has been made from the native yucca plant, which grows throughout the major portion of Texas, by the chemurgic laboratories of the North Texas Teachers College at Denton.

COTTON INSULATION
Cotton insulation for homes is a new use for cotton developed by a Taylor, (Williamson county), manufacturing firm. Representatives of the U. S. Department of Agriculture recently visited Taylor to see a demonstration of the cotton insulation.

WOMAN SHERIFF
Mrs. Bill Brunt, 26-year-old widow of the sheriff slain in a roadside gun fight near Rusk, was appointed Cherokee county sheriff in her former husband's place. Like her husband, who was a sharpshooter, Mrs. Brunt is an expert with firearms.

TOURISTS TO MEXICO SET NEW RECORD
Approximately 14,000 American tourists, establishing a new high record, entered Mexico through the port of Laredo during the month of July, traveling in a total of 4,515 automobiles.

FARMER CONTRACTS ANTHRAX
Dr. H. L. Lobstien, county health officer of Brown county, said Lois Miller, Brooksmith, farmer, had been infected by anthrax. The diagnosis followed laboratory tests. Miller became ill of anthrax on his farm after peeling the hide from a beef animal.

CHAMPION MARKSWOMAN
Mrs. L. P. Bartlett, of San Antonio, is the nation's best rifle markswoman. She outshot male competitors from seven States recently at Fort Worth in the become regional champion of the Southwest. Her total score was 3,178 out of 3,200 points.

STATE CEMETERY
Established in 1854 by the Legislature, the State Cemetery, at Austin, covers a half mile square. More than 1,900 Confederate veterans, including General Albert Sidney Johnston, together with some of Texas' greatest heroes, are buried in the cemetery, the State Board of Control reported.

HEN HATCHES QUAIL EGGS
Deport Times: "Mr. and Mrs. A. R. Davis, of Halesboro community, (Red River county), have a small game hen that has set on and hatched eight quail eggs out of ten found by Mr. Davis in a quail nest in his garden. All the quail chicks are very lively and don't seem to know the hen is not their own mother."

FLAX CROP IN BLACK LANDS
Flax, which heretofore was supposed to grow only in the lower South Texas counties, has yielded a crop of 13½ bales per acre on eight acres on the farm of Mrs. John Hatch, of Waxahachie, (Ellis county). This farm is in the heart of the black waxy soil of North Texas.

WAR ON RAT POPULATION
San Antonio's Health Department has started a war on exterminating rats, which is estimated by the department to be 260,000, or one rat for each of the city's population. Furthermore, the department estimates that these rats destroy annually \$500,000 worth of food and \$10,000,000 worth of San Antonio property.

MOTHER OF 26 BABY BOA CONSTRUCTORS
San Antonio Express: "A Mexican boa constrictor gave birth to 26 baby boas on the Willis Woolems' snake and animal farm near San Antonio. The baby snakes range in length from 12 to 14 inches."

TEXAS GETS \$540 OF GREEN ESTATE
Texas, which once sued for \$6,000,000 inheritance taxes from the estate of the late Col. E. H. R. Green, will get \$540.60. The suit, fought out before the U. S. Supreme Court, was won by Massachusetts. Col. Green lived for several years in Terrell, Texas.

TEXAS EDITOR WINNER
H. B. Fox, 28-year-old editor of the Madisonville Meteor, (Madison county), won the title of best country newspaper writer of 1939 in a nation-wide contest conducted by Country Home Magazine. The young Texas editor won over 4,500 competitors and received, as prize for winning, \$500 and a free trip to New York City.

CATTLE SHIPMENTS
Cattle-shipments from Texas are running above last year, the total for the first six months being 1,178,000 head compared with 1,067,000 for the same period a year ago, and 938,000 for the average movement of the last eight years. Most of the increase this year was due to heavy movement from thrifty regions of South Texas.

NYA ANNOUNCES 12,546 PART TIME JOBS
J. C. Kellam, State NYA administrator, announced that 12,546 part-time jobs would be available to youths in the next school year.

ROMANCE HITS DALLAS TEACHERS
Of the forty-nine teachers in the Dallas public schools who will not be in the system next year, thirty-three withdrew to be married, L. V. Stockard, assistant superintendent, told the Dallas Board of Education.

TO SAVE LAGUNA MADRE FISH
The Game, Fish and Oyster Commission ordered dredging of an artificial pass through Padre Island at Murdock's Landing and prepared a contract for construction of a bulkhead at Corpus Christi to free Laguna Madre of excessive salinity which is killing thousands of fish. The project was needed, said the commission, to allow more fresh water to enter Laguna Madre, one of the world's best fish spawning grounds.

CENTENNIAL COST
State Auditor Tom King announced that total expenditures on the Texas Centennial celebration were \$5,098,894. From the State came \$3,139,750, from the Federal government \$1,905,566, and from donations and other sources was derived \$63,578. Although the main celebration was held in 1936, the construction of memorials was not completed until last year.

WILL PLOW UNDER 500 ACRES OF COTTON
Dallas county farmers will destroy 500 acres of cotton, or about 165 bales, within the next few weeks in order to meet 1939 AAA regulations and evade heavy penalties, members of the Dallas county AAA committee announced.

GOVERNMENT BOATS CLEARING LOWER TRINITY
Three boats, manned by government engineers, have started work clearing the Trinity river of logs and snags from the mouth of the river to Liberty, a distance of 38 miles. Afterwards the channel will be dredged. At the conclusion of these operations regular transport service will be possible from Liberty to Gulf ports.

TRAINS HORSES TO DIVE
Miss Betty Jane Bowman, age 14, of Plainview, (Hale county), owns four pet ponies that she has taught to dive into water from a platform 85-feet high. She recently refused an offer of \$1,000 for Lula Belle, her favorite diving pony. She started training the horses to dive as a hobby, but expects to eventually earn enough money from exhibiting her pets to pay her way through college.

TO ATTEND A. & M. THROUGH CO-OP PLAN
Between 80 and 40 Anderson county rural boys will attend Texas A. & M. College this fall and live in a co-operative home, sponsored by the Palestine Lions Club. The co-operative home plan, worked out by college officials, enables dozens of boys from throughout Texas to attend college at a nominal cost.

MILLIONAIRE LEAVES BULK OF ESTATE TO POOR
M. D. Anderson, late president of the world's largest cotton company, of Houston, left the bulk of his riches to the poor, his will revealed. Anderson, a bachelor and partner of W. L. Clayton, set aside \$1,000,000 for relatives, and the residue of his estate, estimated to be worth millions of dollars, was left to the M. D. Anderson Foundation, which, trustees said, would be used to support and maintain hospitals, homes and institutions for the care of the sick, blind, crippled, the young, the old and decrepit.

MARS INHABITED, SAYS ASTRONOMER
Dr. Cyril Wyche, of Dallas, astronomer and builder of amateur telescopes, says the planet Mars is inhabited by beings whose intelligence surpasses that of Earthly humans. "I believe Mars has conditions suitable for life," said Dr. Wyche. "As conditions there would be more severe than on the Earth, the beings would have to be smarter than we are to survive."

PECAN INDUSTRY TO ADVERTISE
A huge 3-year national advertising program was unanimously approved by the State-wide advertising committee of the Texas Pecan Industry at Waco, Texas, August 15. The first year's drive, for which the appropriation is to be \$200,000, will begin in November and continue through April.

WFA SEWING ROOMS ALLOTMENT
Senator Tom Connally has announced that the President had approved a WPA allocation of \$9,769 for maintenance and operation of sewing rooms throughout Texas.

DALLAS IN 1845
Uncle Jack Smith, age 83, and a resident of Dallas for many years, tells what Dallas looked like in 1845, when he first saw it. The site of the present city was occupied then by a lone cabin, that of John Neely Bryan. Uncle Jack decided to settle, and induced Judge Patterson, a Kentucky friend, to join him. The two built a cabin, and opened and operated the town's first store in 1846. The late Ed Patterson, son of Judge Patterson, told this writer that part of his father's farm was on the site of what is now Main and Elm streets, Dallas, and that he had hoed corn where skyscrapers now stand.

KILL PRAIRIE DOGS WITH AUTO FUMES
Concho county ranchmen have found that carbon monoxide will kill prairie dogs almost instantly. They drive over the range until they find a prairie dog hole. Then a tube is connected with the car's exhaust, and placed in the dog's hole. A few fumes from the motor leave the animal dead in his habitat.

MAKING MOST OF PECAN TREES
Money grows on trees—right here in Texas—in the opinion of W. D. Sims, chief of the pecan division of State Department of Agriculture. The money that Sims says grows on trees is the pecan crop. "Thousands of Texas farmers are ignoring money-making opportunities by failing to clear out bottom lands and give native pecan trees a chance to live under favorable conditions. Native trees need freedom from choking undergrowth and competitive vegetation," said Sims.

WPA BUILDS 5,905 DAMS
Of the 10,645 dams built by WPA throughout the nation 5,905 were in Texas since July, 1938.

RETAIL STORES SHOW GAIN
The Commerce Department reported that dollar sales of independent retail stores in Texas were 8 per cent higher in June this year than during the same month in 1938.

SUN POPS CORN
Old Sol ran true to form again in July this year. Sydney Broyles, Jr., of Mesquite, (Dallas county), exhibited two ears of corn he gathered from his corn patch that had been popped by the July sun.

CLEARING TIMBER FOR DENISON RED-RIVER DAM
Crews of workmen are clearing timber on the Texas and Oklahoma side for the huge Red river \$56,000,000 dam, near Denison, Texas. Engineers estimate the dam, when completed, will impound the largest reservoir of water in the entire Southwest.

BEES STORE HONEY IN HOUSE
Wichita Falls Times: "Burger Reed, Trenton, (Fannin county), tried every way he knew to get rid of bees in the wall of his house. For three years they were impervious to smoke and sprays. Then Reed tore out a section of wall. He found a slab of honey, five feet high, 22 inches wide and four inches thick."

YOUNGSTERS RESCUE AGED WOMAN FROM BURNING BUILDING
Greenville Herald: "Two little fellows, Jim Ingram, age 10, and Billie Jim Blankenship, age 11, of Mineola, (Wood county), smashed down a door and carried Mrs. Betty Ottobach, age 84, from her burning home. They scooped sand and extinguished her burning hair and clothing. But they were too late. Mrs. Ottobach died as a result of the burns a few hours later."

XIT RANCH REUNION
Just a few survivors of the colorful band of 4,500 cowboys who rode the old 3,000,000-acre XIT ranch met in Dalhart August 5 for their fourth annual reunion. The XIT reached up through the center of the Texas Panhandle, a strip approximately thirty miles wide, from Lubbock to north of Dalhart. The land was deeded to Charles and John Farwell, of Chicago, by the State of Texas in payment for the Farwell construction of the State Capitol at Austin. The ranch was subdivided into farms in 1912.

SIX MONTHS SURVEY OF AUTO ACCIDENTS
A six months' survey of automobile accidents by the Public Safety Department showed that of 699 lives lost in Texas during the first half of the year, 394 died in highway accidents. Blame for 19.71 per cent of the fatalities, both urban and rural, was placed on drivers who had been drinking; excessive speed 15 per cent; head-on collisions 27 per cent. The fact that Texas' rising death toll parallels a national decrease in street and highway fatalities was pointed out by Homer Garrison, Jr., State police director, who voiced the opinion the public was relaxing its vigilance against auto accidents.

LARGEST LAND OWNER
Texas is said to be the largest land owner in the world. When it entered the union in 1846 the State was permitted by treaty to retain its public domain. It owns 643,685 acres in unsold public school land. It owns about 7,500,000 acres of royalty, including school land which has been sold with a royalty reservation. In addition, the Texas University of Texas has 2,000,000 acres, including rich oil production. The penitentiary system has 73,133 acres, including oil production. State hospitals own 9,083 acres. Texas also owns about 1,000,000 acres of submerged land along the coast bays and lagoons. Some of this land is producing oil and brings in royalty money.

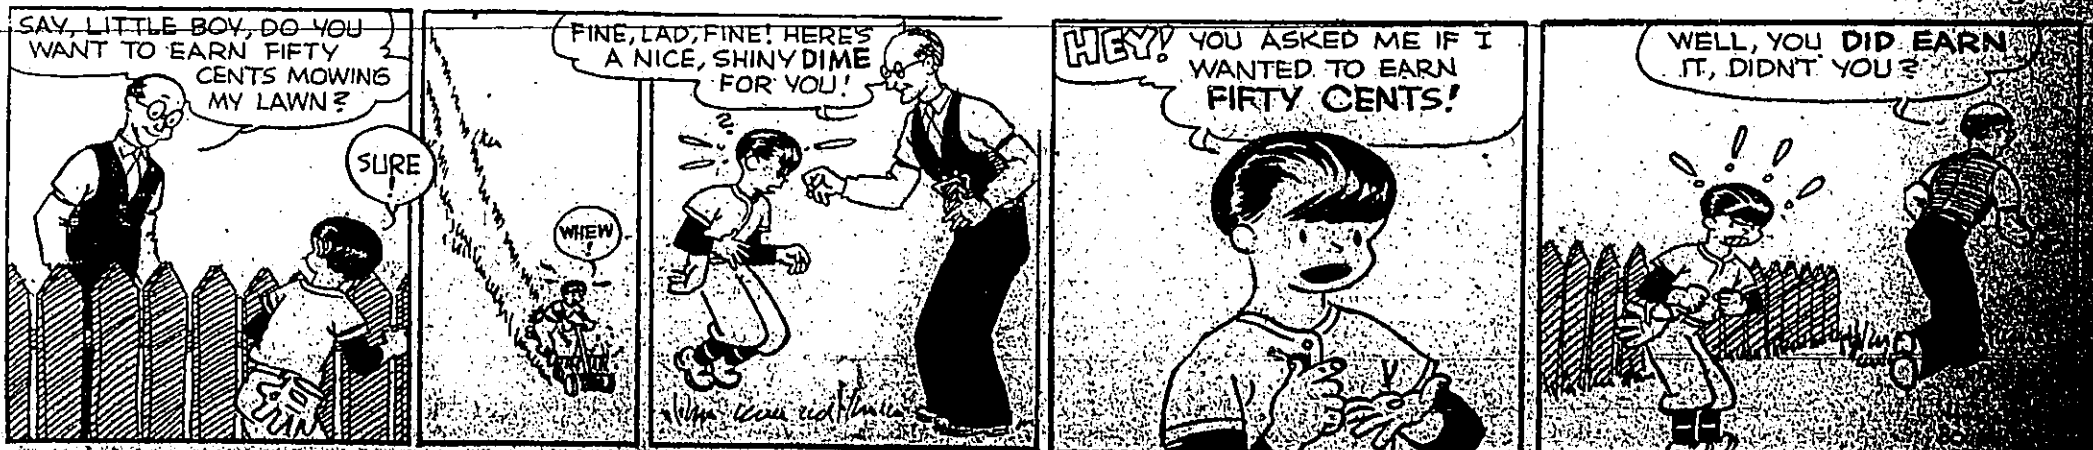

IN MEMORY OF PIONEER FREIGHTERS

Twentieth century transportation methods have outmoded but will never dim the lustre of the old wagon train that played such an important role in early Texas pioneer history. Nearly two generations have passed since the crack of a bull whip over a yoke of oxen hitched to a creaking wagon signaled the moving of overland freight. The surviving handful of old freighters have formed an association, known as the Pioneer Freighters' Association, and they still meet annually to discuss old times. Before the days of rails overland freight shipments moved at an average speed of about 25 miles a day. The trip from San Antonio to Dallas took about ten days, if weather was favorable, and the freight rate approximately \$2.50 a hundred pounds. Today the freight rate between these two cities has been cut to about 60¢ a hundred pounds. A granite monument in San Pedro Park, San Antonio, was erected in memory of the pioneer freighters. In addition to a map of Texas, showing the important freighting points, it bears the name of the organization and the simple legend: "They were true." —Photo by Texas View Company.

He Did Earn It!

By Bouhne

A LITTLE FUN Jokes to Make You Laugh

Bob Burns' Joke

During a recent appearance at Casa Marina, Fort Worth, Bob Burns told this joke:

"I always wanted some pretty clothes, and the first day I was in Hollywood I went around and bought a suit. Well, sir, I hadn't had it two days until the pants shrank to the knees. And it didn't rain either—just not cloudy."

Brief Enough

"At a lumber camp 100 men were employed and two women cooks."

"When you make your report," said the owner to the foreman in charge, "don't use a lot of language. Just put down in figures what has been done during the month."

When the report came it read:

"Last month one per cent of the men married fifty per cent of the women."

'Twas Ever Thus

First Cop: "Did you give that married prisoner the third degree?"

Second Cop: "Yes, we browbeat him, badgered him, and asked him every question we could think of."

First Cop: "And what did he do?"

Second Cop: "He dozed off, and merely said: 'Yes, dear, you are perfectly right.'"

As Per Custom

Teacher: "That is the story of the Pilgrims—children—now—what do you suppose they did after they had been here a year and gathered good crops?"

All right, Bobby.

Bobby: "They bought a car."

Retraction

"Half the City Council Are Crooks!" ran a glaring headline.

"A retraction in full was demanded of the editor."

Next afternoon the headline read:

"Half the City Council Are Not Crooks!"

Getting Rid of Isms

Politician: "We must get rid of radicalism, Socialism, Bolshevism and Fascism!"

Voice from the Crowd: "Sure! And rheumatism, too!"

Must Have Money

A New Yorker was confronted in a dark alley by a bandit.

"Hand over your money, or I'll blow your brains out," was the demand.

"Blow away," was the calm reply. "You can live in New York without brains, but you must have money."

A Cinch

"If I could get some one to invest a thousand dollars in a scheme of mine, I could make some money."

"How much could you make?"

"About a thousand dollars."

Prolific

Say, mister," said the little fellow to a next door neighbor. "Are you the man who gave my brother a dog last week?"

"Yes."

"Well, ma says for you to come and take them back."

Poultry News Banding Pullets Contamination

Banding Pullets

Where tramping is to be followed this year one of the most important things to look for are the first layers. Other things being equal, these early, long distance layers will be the best ones to save for production and for breeding work. In order to have a complete record of the production of these birds, it is especially desirable to be able to record all eggs laid by them right from the start. Get the pullets into the houses before they begin to lay and have the bands right at hand so that you can begin banding as soon as the first egg appears.

Soil Contamination

In order to keep the ground around them from becoming heavily contaminated, and to lessen the danger of disease, move the range shelters when the ground starts to become bare. It is also a good idea to change the feeding ground from time to time, to avoid contamination; feeding in the same spot for any length of time will cause the ground to become contaminated from the birds' droppings.

Parasites

Lice, mites and worms sap the strength of the birds, and that results in lowered interest in feeding, less growth and production. Sometimes death results.

Even a mild attack from one of these sources will cause a setback. Immature birds will stop growing and look unthrifty, the production of layers will be affected. All of these pests multiply much faster in hot summer weather and the damage they do increases with their number. Lice and mites can be wiped out with roost paint, individual powder treatment, and leg bands provided with a chemical pad that keeps lice and mites away. By worming the ranging flock just before they are housed and making sure there are no mites and lice, they can start out the laying year with no handicap.

Sanitation

The prevention of disease by sanitation, by raising young stock separate from old birds, and by frequent culling, cleaning, and changing of ground is playing an important part in producing a better grade of poultry.

Medication in general needs further investigation to place it on a par with vaccination and testing. Much has been learned. Much still remains to be learned. With new discoveries being made in the field of medicine of such importance as sulfanilamide, roxamine, and other synthetic formulas, who can predict what preventive medicine holds in store?

Fitting Poultry for Show Room

(Continued from Page 2)

and feet should be washed, but not the feathers. After the shanks and feet have been washed, let them dry thoroughly. Then take a toothpick and clean all particles of dirt from around the scales on the legs. Older birds will have a rather heavy scale on the shanks and cleaning this may be a slow job, but it adds a lot to looks.

After the feet and shanks have been thoroughly cleaned, go over feet and shanks with a mixture of equal parts of olive oil and alcohol. Use this same mixture on comb, beak and wattles. Apply this with a soft cloth, wiping off any surplus. It surely adds to the gloss. If possible to do so, it is a good idea to touch up the comb, wattles and shanks with this mixture again, after the birds are placed in the show coops, before the judging starts.

Wild Bird Has Little Chance

A wild bird has but little chance in a show room. The judges check what they see, and a bird trying to fly through the top of the coop makes a poor impression.

You can gain the confidence of your birds and have them so they will pose for you without much difficulty. In handling the birds never make a quick motion. Always move slowly and the birds will soon find out that a hand moving toward them is not something that will hurt them.

Possibly the easiest way to coop-train a bird is to put it in a small coop for two or three days. Then get a few apples and every time you go around that coop hold a piece of apple in your hand. At first the bird will jump back but will soon come up and peck at the apple. After three or four trial pecks, that bird is expecting something good to eat every time a hand is placed in the coop and will come forward to get it. It requires only a few trials of this kind until you have a bird that will arch its neck and pose when a hand comes near the coop. Furthermore, this bird will show at its very best when the judge reaches for it in the show room.

Another important point is to go over every bird thoroughly and remove any

dead or off colored feathers. It is permissible to remove a few off colored body feathers. Large feathers, such as wing and tail feathers, cannot be removed as this disqualifies the bird.

By taking an old silk sock and rubbing the feathers carefully it helps to bring out the natural gloss and luster.

Polishing Off Feathers

Three minutes per bird each day for four days will work wonders. In brushing and rubbing the feathers, never rumple them. Always rub with the feathers. A few sunflower seed added to the grain and fed each day for two weeks before the show opens also helps to bring out gloss in feathers.

After your birds are in the show room, and placed in the coops, it is a good idea to use the apple trick again. By so doing the birds seem assured that the strange, new environment is a pretty good place after all.

In most shows the show attendants water and feed the birds. However, there is nothing to prohibit you from handling your own birds, feeding them bits of apple or grain and adding any finishing touches you think necessary. Never attempt to handle birds in the show room which belong to some other person. In most show rooms this is considered sufficient cause for an exhibitor to be barred from the show.

After you once get in the show room, resolve to be a good sport. If you win, don't crow over the other fellow. If you lose, don't act like a sore head. Just resolve to come back and win next time.

Tact With Judges

If you do not understand why you lost, wait until after the judging then ask the judge if he will give you information about how he judged your breed. I have never seen a judge who would not explain his decisions to a person who sincerely asked for information. But if you go to a judge to air out a grouch, or tell him how blind he was to pass up your birds, don't expect much courtesy. After all, judges are human.

I recall many instances where some of the highest type judges, in large shows, would take considerable time to thoroughly explain every point to some

beginner who was trying to learn the correct color and type for their particular breed or variety.

As an example of tact with judges, several years ago at a large show a rather timid lady was showing Barred Rocks for the first time. The judge of Rocks was an old-timer who had helped write several editions of the "Standard of Perfection." He was noted for his judging ability and for his peppery disposition.

When the lady first approached him he snapped: "If you don't like my judging, file a protest with the secretary of the show."

"Your judging is all right with me," the lady answered. "I am showing for the first time and wanted some information. I thought you were in better position to tell me what I want to know than anyone else."

No Hard and Fast Rule

You should have seen the old boy smile. An hour later, they were still standing in the aisle by the coops, talking Barred Rocks.

There is no hard and fast rule for fitting poultry for the show room. However, the methods described in this article have been used by a number of breeders to fit birds for some of the leading shows.

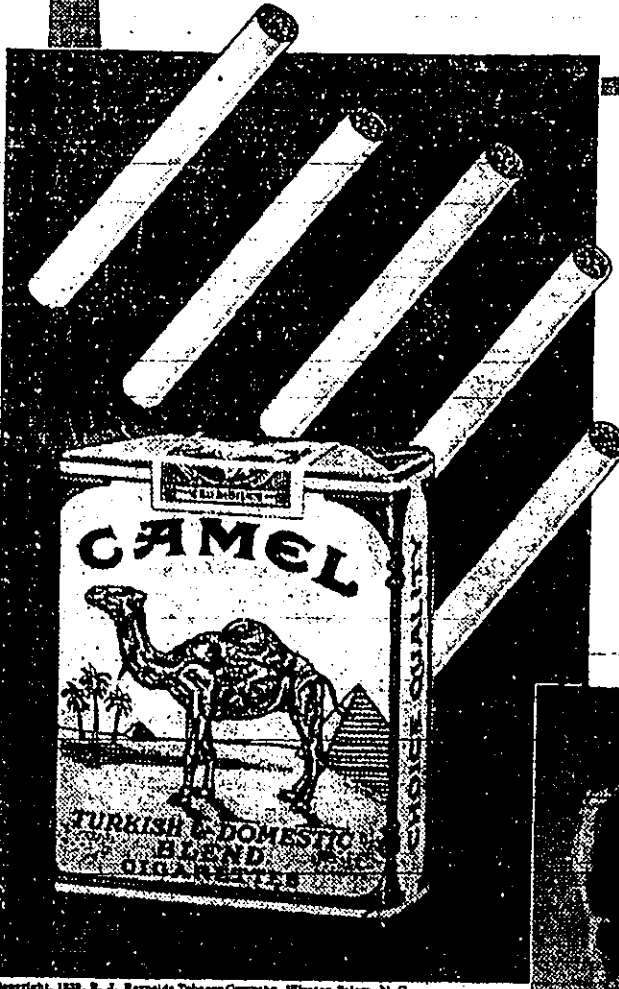

No amount of grooming will make a good bird out of a poor one. If your birds are not well-bred, or if they have been stunted in growth, or allowed to become vermin-infested, the show room is no place for them.

If you have the right sort of birds, proper fitting will enable you to make a good showing. It is not a practical idea to try one of the big shows first. A beginner in the show room business can make several small fairs or shows close to home, learn a lot from this experience, then he can try the big shows if he thinks he has a chance.

You will meet many poultry fanciers in any showroom. If you are a good sport, able to take losses as well as winnings, you will build up many valuable friendships among the fanciers. The show room is a fine place to learn more about your breed, to find out what a fine bunch of people are growing and exhibiting good poultry.

SMOKERS: SAVE THE COST OF THE STATE CIGARETTE TAX!

More pleasure per puff, more puffs per pack in CAMEL'S expensive tobaccos, so inexpensive to smoke (see below)

Whatever price you pay per pack, it's important to remember this fact: By burning 25% slower than the average of the 15 other of the largest-selling brands tested—slower than any of them—CAMELS give a smoking plus equal to

Let every delightful extra puff of Camels remind you that Camel is the quality cigarette every smoker can afford. Costlier tobaccos—ripe, mellow, fragrant, delicate in taste—and in generous extra measure. Camel certainly is America's shrewdest cigarette buy!

5 EXTRA SMOKES PER PACK!

IMPARTIAL tests by a leading independent laboratory show which one of 16 of the largest-selling brands gives the most actual smoking per pack! Here are the findings:

- 1 CAMELS were found to contain MORE TOBACCO BY WEIGHT than the AVERAGE for the 15 other of the largest-selling brands.
- 2 CAMELS BURNED SLOWER THAN ANY OTHER BRAND TESTED—25% SLOWER THAN THE AVERAGE TIME OF THE 15 OTHER OF THE LARGEST-SELLING BRANDS! By burning 25% slower, on the average, Camels give smokers the equivalent of 5 EXTRA SMOKES PER PACK!
- 3 In the same tests, CAMELS HELD THEIR ASH FAR LONGER than the average time for all the other brands.

LONG-BURNING COSTLIER TOBACCOS

TEXAS FARM NEWS REPORTS

A hen owned by C. B. Eafly, farmer near Redwine, (Lynn county), laid a freakish egg. It was in the shape of a dumbbell.

The girls' encampment at the State Fair of Texas for its 51st annual event, October 7 to 22, has been set for October 10, 11 and 12. Special encampment dates for the boys are October 17, 18 and 19.

James Boyd Elliott, Dallas county 4-H club member, recently checked the weight on his Poland China barrow which he is getting ready for the State Fair this fall, and found that the pig had made a gain of two pounds per day for thirteen days.

Bud Morrison, of Kent county, has a hedge of salt cedars planted on the northwest side of his house for a windbreak. He set this hedge out last spring, and it is now from four to six feet tall. He intends to extend it all around the house.

D. W. Hicks, county agent of Bexar county, reports that terracing is still on the increase in his county. About 15 miles of lines were completed last month for four farmers. County road machinery is kept busy constructing these terraces.

A. W. Burnside, of Wichita county, reported to his county agent, G. R. McNeil, that after two cuttings of alfalfa hay he cut the third one for seed. On 18 acres of alfalfa he harvested 4,200 pounds of seed, and sold them for \$12.85 per 100 pounds.

F. E. Engelman, Wichita county, made 36 bushels of wheat per acre on 35 acres of land on summer fallow. In his surrounding fields, not summer fallowed, he made yields from three to eight bushels per acre.

According to Geo. P. McCarthy, poultry husbandman of the Texas A. & M. College Extension Service, egg eating among poultry is a habit of individual birds, but it is also an indication that the entire flock needs more calcium. Although most commercial feeds in the form of oyster shell, home mixed feeds should always be supplemented with either calcium, limestone or ground oyster shell. Another common mineral deficiency trouble is perosis, or slipped tendon disease. This one is caused by lack of manganese. Poultry usually get what manganese they need from a good grade of shorts. It is found in most commercial feeds, but it can also be offered in the form of anhydrous manganese sulphate. A free choice mineral box, offering poultry these different minerals and especially calcium, will pay dividends, McCarthy said.

Lawrence Kriska, of Crisp, (Ellis county), member of the FFA, has five acres of improved Yellow Dent corn that will make, according to estimate, fifty bushels to the acre. Ordinary corn planted in the same field probably will not make more than 35 bushels to the acre.

The unusual growth of a watermelon inside a can was reported by Barney Fritz, of McAllen, (Hidalgo county), who noticed the freak in his father's garden. The melon vine dropped a bloom inside the can, where it developed, grew to maturity, swelled and popped out of the container. The melon weighed 6 pounds.

E. D. Owens, of Fannin county, reports that he has saved enough feed in one month with the self-feeder for his hogs to pay for the expense of building it. And more important still is the fact that his five head of hogs are assured of a balanced ration that they did not receive in hand feeding.

Frame gardens were built on approximately 500 farms in Coleman county this year under the sponsorship of the Extension Service and the Farm Security Administration, reports Roberta Ricketts, home management supervisor for FSA. These gardens have flourished, she stated, while outside uncovered gardens dried up and were blown away.

R. M. Reynolds (Camp county), of the Ebenezer community, has discovered that the cheapest feed is native pasture. He planted 400 pounds of lespedeza on a ten-acre meadow for hay. Then for pasture he planted 20 acres in lespedeza, carpet grass, Dallis grass, Italian rye, and white Dutch clover. He is carrying more than one animal unit to the acre this summer, and hopes to cut enough hay to carry his stock through the winter.

Something new in the way of baby chick brooding equipment has been invented and patented by a young Carmine, (Fayette county), man, Elton Albers. The battery brooder is different from other types in that the chicks are warmed from the bottom instead of from the top. Heat, generated by an ordinary kerosene lamp, is brought directly under the chicks to a shallow tray which is filled with about a half inch of sand.

Seven hundred and ninety-seven Floyd county farmers are thoroughly convinced that co-operative fuel associations can save them big money in their farming practices, according to a report from D. F. Bredthauer, county agent. For the year ending April 1, 1939, the Consumers' Fuel Association of Floydada sold 1,177,439 gallons of gasoline to Floyd county farmers. Sales from kerosene and other merchandise such as tires, tubes, distillate, lube oil, grease, etc., brought the total sales of the fiscal year to \$202,929.82, and brought a saving of \$63,657.86 to this group of farmers, said Mr. Bredthauer.

It is expected that more cotton bagging will be used this year by ginners in McLennan county than ever before. Substituting cotton for jute in baling is a part of the general movement to create new uses for cotton.

Bell county's 1939 pecan crop will be almost a failure, according to local buyers and producers. Very few sections report a fair yield with most territories bare. Continued drought and the case borer are said to be responsible.

Research workers of the Texas Agricultural Experiment Station have crossed field and sweet corn, giving Texas a large, high quality ear of sweet corn with a tight shuck as protection against worm damage.

Financed by a \$460,000 Federal appropriation, a new pink boll worm eradication program has begun in the Rio Grande Valley. Entomologists reason the destructive pest can be eradicated only by ripping up and burning picked over cotton stalks.

Mrs. O. K. McLaughlin, of Mineral Wells, (Palo Pinto county) put a sack of bantam eggs on top of her electric refrigerator and forgot about them. Three days later, she states, she heard twittering noises, opened the sack and five little bantam chicks hopped out.

According to N. H. Hunt, Frio county agent, J. F. Burleson, a farmer of that county, reports he had a brood sow in 1938 which brought 32 pigs and raised 30 of them. Of these he kept one gilt and sold 29 pigs for \$142. This particular sow has farrowed 73 pigs with an average of 14 per litter, Mr. Burleson says.

Cottonseed hulls may be profitably used to insulate farm houses, making them more comfortable both in summer and winter, J. W. Simons of the U. S. Bureau of Agriculture Engineering, has announced. The hulls are treated with a solution of ammonium sulphate to make them fire resistant, a simple and inexpensive process.

Green pastures come in "cans" now for East Texas cows. "Canning" is accomplished by digging a trench and burying sorghum, corn stalks and other green feeds that contain enough sugar to set up fermentation. Next year, or perhaps years later, the earth covering is removed and the feed is used. Live-stock prefer it to fresh fodder, says C. M. Evans, farm security administration regional director.

The latest food product produced in the East Texas area is watermelon molasses, introduced by F. M. Lockaday, Athens, (Henderson county) farmer. The watermelon pulp is strained and boiled, thickness of the syrup being determined by the length of time boiled. No sugar or other ingredients are necessary. A 15-pound melon, it is said, will produce a gallon of the new syrup.

Leroy Danman, of San Antonio (Bexar county), has built an 8-foot deer-proof fence around the old Austin ranch of 25,000 acres. Deer, javelinas and wild turkeys will be stockaded in this protected enclosure, it is reported.

Most farm youth no longer have the inclination to move to the big city, according to a survey made by The American Magazine. More than 361,000 boys and girls participated in the survey, which indicated that security is now the chief desire of youth.

That an orchard can be grown without money has been proven by Juanita Fowler, farm demonstrator for the Roxton (Lamar county) 4-H club. Miss Fowler has an orchard of 10 peach, 15 plum, 2 pear and 2 apple trees—all grown from seedlings or cuttings.

Colorado county's deer have become a target for protest by farmers in that area. They state the deer are ruining their crops of peas, sweet potatoes and peanuts, and have filed protest with the county's wildlife planning board, asking damages. Game Warden T. T. Waddell estimated there are 7,800 deer in the county.

Texas will receive \$3,654,663 of the \$38,000,000 available to the nation for the 1939-40 program of loans to tenants for the purchase of farms under the Bankhead-Jones farm act, the Farm Security Administration has announced. This is the largest amount allotted to any one State under this program. Average amount of loan will be \$6,000, and total fund is expected to be sufficient to finance 602 tenants in buying farms.

George V. Holmes, of Duval county, has stated, according to his agricultural agent, H. B. Haegelin, that he has found there are two main problems every farmer has to face relative to insuring a good feed supply for a dairy herd. The first problem is the production of a feed crop which can be solved by hard work and mother nature; the second problem is the conservation of the crop after it has been made. This, Holmes has found, can be solved 100 per cent by digging trench silos and by converting all of his feed into silage, enabling him to conserve and utilize his entire feed crop.

Edwin Crass, of Hale county, reports to his county agent, D. M. Carrell, that he had practically no flies in his screenless milking barn when a test was taken in July. The reason for this desirable condition, according to Crass, is the fact that his barn is isolated. Calves and hogs are kept at least one hundred yards from the milking barn in pens large enough to promote dry conditions, and except during the milking hour the cows are kept at least fifty feet or further away from the barn—thus there is no soil or barnyard manure around the barn to remain moist long enough to be suitable breeding places for flies.

A hatching of White Leghorns at the home of Mrs. James A. Hale near Morton, (Cochran county) contained a four-legged chick. One pair of legs turned forward and the other pair backward.

Twenty-three hundred head of sheep from Concho and Tom Green counties have been sent to Santa Rosa, (Cameron county) by Bob Austin, of Brownsville, who will feed the sheep on heagra and red top cane. Austin has had satisfactory results in previous experiments with this feed.

Fifteen Rio Grande Valley farmers are making tests to determine the possibility of introducing a new building crop in the Southwest. It is fenugreek, a legume of the clover family. The crop has been tested in California, where it produces as much as 18 tons of green fertilizer per acre in addition to the nitrogen benefits.

H. A. Pearson, Bishop, (Nueces county) farmer, reports the story of a steer that choked five hogs to death on his farm. After losing several hogs from no apparent cause, Pearson investigated and found that a young steer was stealing feed from the hogs' self-feeder. To get to the grain the steer scrambled over the top of the feeder, and with heavy forehoofs caught the lid under which the hogs fed, just where it would choke the porkers.

Special cash awards in the junior divisions will be awarded 4-H boys and girls clubs at the 51st State Fair of Texas, Dallas, October 7 to 22. In addition special entertainment has been prepared for them, said Harry L. Seay, resident.

Mrs. Leona Young, of Dallas, (Dallas county), set a hen on a nest of eggs in her barn, but after two days the hen quit the nest. All but two of the eggs were removed. As a result of the hot weather and without benefit of a hen, one of the eggs hatched a Plymouth Rock chick, says Mrs. Young.

Bee county women are solving the problem of having nice fresh vegetables at all times by using frame gardens, most of which are sub-irrigated. "I've never been able to have much in the summer on this dry, sandy, windy hill," said Mrs. A. L. Robertson, "but now with this frame garden 20 feet long, 4 feet wide, sub-irrigated and covered, I can feed my family fresh vegetables through drouthy months."

The Alvin Miller family, of Jackson county, have produced and preserved at home this year \$604.53 worth of food, according to Bonnie Cox, county home demonstration agent. This food includes 616 wide preserved foods, 1,000 gallons of milk, 260 pounds of butter, 700 dozen eggs, 425 pounds of cured meats, 120 pounds of lard, 1,500 pounds of potatoes, and 250 pounds of onions.

Don't Drink With ALCOHOLISM

THE SAMARITAN has been the means of effectively reducing the lives of thousands of men and women oppressed by liquor used by their control.

ALCOHOLISM is treated by most doctors as a disease which yields to proper treatment.

SAMARITAN TREATMENT requires an average of 10 hours in their institution in Dallas and Houston. This is a treatment which is taken at home without interfering in any way with normal daily activities.

Although farming operations have taken up vast tracts of former grazing lands in Texas, still nearly three-fourths of the land area of the State is devoted to grazing, according to figures compiled by Highland Hereford Association.

Here They Are... THE WHOLE FAMILY OF NEW FARMALLS

Features of the New "H" and "M" Farmalls

- Comfort—sitting or standing. Adjustable sponge-rubber upholstered seat.
- Clear vision. Smooth, streamlined design enables you to see your work.
- Balanced power. Smooth-running 4-cylinder, valve-in-head engine, with Tocco-honed cylinders, full force-feed lubrication, and replaceable cylinder sleeves. Brilliant performance and amazing economy on No. 1 tractor fuel.
- Five-speed transmission. Four field speeds, plus a 16-mile road speed (on rubber). Variable governor—you can control driving speeds within 1/4 inches per hour.
- Potential automatic steering—wheel cultivator gang shift. Clean cross cultivation of 4 or 5 miles an hour.
- Single-tip auto-steering. Brakes can be applied separately for making short or pivot turns—or do a unit on the road.
- More than 30 high-grade ball and roller bearings. 19 rowwide spring-loaded dust and oil seals.
- Can be equipped with "Lift" hitch lifts and lowers machines, or front or rear sections, on either side.
- Adjustable wheel tread—for all row-crop requirements.
- Most complete line of quick-attachable machines.

Last month we introduced the small Farmall-A with its great new feature, "Culti-Vision."

Here's your first view of the little fellow's big brothers—Farmall-H and Farmall-M—spic and span from the Harvester factories, raring to go! You'll get a real thrill when you take hold of one of these steering wheels, give the smooth cylinder engine the go-ahead, and put your new Farmall through its paces.

Here are three bears for work—big size, middle size, small size! You'll find each one a go-getter in every inch and ounce. Step out ahead with your choice of the new Farmalls. Phone the McCormick-Deering dealer for the full story. Satisfy yourself about the quality, utility, power, comfort, and economy of these great new tractors—and about the new low Farmall prices. Catalogs on request.

DRAW the Easy Way

WITHOUT the aid of the squares, it might be hard for your little fingers to make this picture of a pony. But with the squares drawing becomes easy. Won't you try it? Hurry up and get your pencil ready when you have made this one picture, but get a large piece of paper and mark off the same number of squares, making your drawing four or five times larger than this one.

CLUB NEWS

It has been a real pleasure to see the club grow so fast. Memberships are coming in daily. We are planning a big fall season ahead for all members.

If you are not now a member fill in the coupon and mail it once to Aunt Mary, Route 5, Box 179-B, Fort Worth, Texas, as we want you to be on the roll not later than October 1, 1938. This will put you in line for all the big contests.

Club Rules

1. There are no fees or dues now or at any time.
2. All that is required is for you to fill out the coupon below and mail it at once to Aunt Mary, Route 5, Box 179-B, Fort Worth, Texas.
3. You will receive your membership card, list of instructions and secret code as soon as we get your coupon.
4. You may join as many as three departments, but NO MORE. The departments are as follows: (A) Friendly Correspondence, (B) Sunshine for others, (C) Stamp Exchange, (D) News (cards), (E) Miscellaneous, (F) Coins, (G) Curious, (H) Souvenirs, (I) Butterflies, (J) Clippings, (K) Books, (L) Postmarks and (M) Magazines.

STORIES THAT LIVE

I have selected a story from "Mofon Folk Lore Tales" that, I think, is very beautiful. Here it is:

"THE FIVE RACES OF MEN"

A caravan once happened to pass along a road that led by a great orchard. As the camels came near to a fruit tree that overhung the low fence, one of the finest of the camels reached up, his long neck, seized an apple laden branch and broke it off. The owner, who was standing nearby, saw the act and thoughtlessly seized a stone from the fence and hurled it with such force and aim it struck the camel in the middle of the forehead, killing it instantly.

The stone that killed the camel dropped at the feet of the owner of the animal. In a fit of rage he snatched it up and hurled it at the thrower with such force and true aim that it crushed his head.

From the distance the some of the dead man saw all that had happened. Rushing up they seized the slayer and would have put him to death upon the spot had not one of them remembered that the ruler of the country, the just Caliph, Omar of Khattab, was encamped not far away.

"In his hands, alone, are life and death," said he. "Let us drag this fellow before him

in the silence where men scarcely breathed, the executioner had asked the Caliph if he would like to see that this noble man should quit the world, and twice Caliph had answered, "Yes."

Just as the fatal question was being asked for the last time, a friend of Abu Dhuir who had climbed to the very-top of a palm tree, screamed out, "For Allah's sake, stop! A camel has fallen on the sands and someone has dismounted and is running hither as if mad."

At a sign from the Caliph, the executioner drew back and Abu Dhuir rose up just as the condemned man rushed into the group and threw himself, out of breath and exhausted, upon the "Nuta."

"Praised be Allah!" was all he could gasp. "Allah is merciful."

"Fool," said the Caliph, "why did you return at all? Had you lingered even an hour, this man would have died in your stead and you would have been free."

"I returned," panted the man, "in order to prove not only the place known only to myself, but from the Caliph, but the race of the truthful still exists."

"Then why did you go away at all?" asked the Caliph with a frown.

The man rose. "Worthy ruler," he said, "sometime ago a widow came to me, placing in my keeping all her worldly goods. Shortly afterward I was compelled to leave home on important business. Left in my absence, thieves take from tents the wealth of the widowed woman, I took it by night into the desert and buried it secretly in a place known only to myself. Had you not spared my life for the three days, the widow's treasure would have been lost to her and my name would have fallen into deep disgrace. I went away to prove to the widow by returning the wealth to her, that the race of the trustworthy had not died out from the earth. Let it be known to you, therefore, that in the three days, I returned the goods to the widow, paid my debts, begged forgiveness of all those who harbored ill against me, took affectionate leave of my family, and so shall never be more ready to leave the world than at this very moment."

As the man finished speaking, the Caliph rose from his seat and went down to the man and took his hand and said, "I pardon you. Go in peace!"

"Why so, Commander of the Faithful?" asked an ancient Skeykh.

"Because," answered Omar, "the action of Abu Dhuir has proved that the race of the manly still lives upon the earth. This man's return proves that the race of the truthful still lives also. In turning the money to the widow under these circumstances this man has proved, without doubt, that the race of the trustworthy still lives on. I would bestir to such glorious company. In freeing this person and paying his debt to the sons of the slain man, I hope to prove that the races of the kind and the generous are still alive and here upon this earth."

COINS MADE OF STEEL

Italy's got something new in the money line—coins made of steel! But when you come right down to it, there's no reason steel shouldn't be found among the money metals. It's used for practically everything else. And though it's become widely employed only in comparatively recent times, steel is nothing new. Metal workers in India made it—using pretty much the same principle we do today—nearly 4,000 years ago.

CODFISH

Codfish like the frigid waters of the northern oceans. They are unknown in the Mediterranean region. Along the United States coast, they seldom come farther South than the Chesapeake Bay, and prefer the waters off New England and Newfoundland.

As for weight, the average cod runs about 10 pounds, though some of 50 pounds have been hooked.

"ON AND OFF A HIGH-WHEEL BIKE 32 TIMES!"

"BELIEVE ME, I NEEDED THE QUICK FOOD-ENERGY POST TOASTIES GIVE YOU!" says vivacious JUNE DUPREZ, now featured in Alexander Korda's technicolor production, "FOUR FEATHERS."

YOU NEED QUICK FOOD-ENERGY, TOO ... EAT DELICIOUS POST TOASTIES!

POST TOASTIES' QUICK FOOD-ENERGY helps millions get off to a faster start—particularly on these busy summer mornings! Every delicious bowlful of these crisp corn flakes brings you the rich goodness of plump, ripe, flavor-filled corn, and...

A SPECIAL OVEN-TOASTING PROCESS partially dries every flake so that Post Toasties digest faster—in fact, they start to digest in thirty seconds. Remember, you get quick food-energy. No wonder Post Toasties are called "The Wake-Up Food!"

NEW LOW PRICE!

HERE'S REAL ECONOMY! Post Toasties now cost much less—they're actually selling at the lowest price in their history. Buy a package from your grocery, and treat your family to America's delicious "Wake-Up Food" tomorrow morning!

THE Wake-Up FOOD

TOPS IN TASTE... LOW IN PRICE... RICH IN QUICK FOOD-ENERGY.

INVENTOR OF SAXOPHONE

Belgium planning a monument in his honor.

Sax, a talented instrument maker, moved to Paris in the 1840's and invented the saxophone, saxhorn and saxtromba. Top-notch as his own press agent, and before he died, he got his name affixed for a while to other instruments he didn't even invent.

THE INVISIBLE COLLECTOR

The old adage gloomily opines that "nothing is certain except death and taxes." Many persons have questioned the second "certainty," pretending that they pay no taxes because they own no property and pay no income tax.

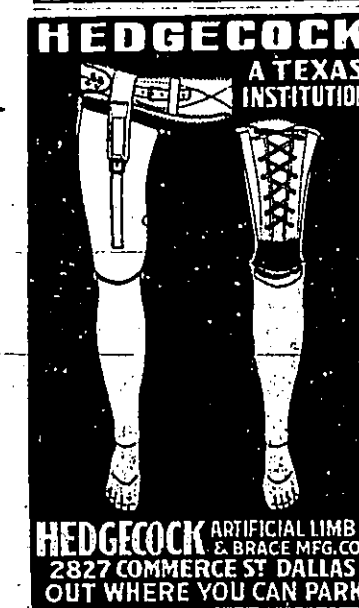

Actually, though, about the only individuals who have escaped the second "certainty" are those who have run afoul of the first—death.

And it seems strange indeed that, in the face of all facts to the contrary, any American is able to deceive himself into thinking he avoids taxes, for everywhere the individual citizen goes an invisible tax collector is as close on his heels as his own shadow. In fact, out of every dollar gathered in by government, almost 60 cents is in the form of hidden taxes, mainly paid by people with small incomes.

Mr. Average Citizen pays the money out a few cents at a time, as an added charge on virtually everything he buys, seldom realizing how rapidly the total mounts up into dollars and keeps him from buying more of the good things of life that he would like to.

Since taxes are mostly invisible today, it is hard to make them a burning issue in public affairs. But with their burden constant mounting, the average American is beginning to reach the stage where he wishes devoutly that not only would the collector become a little more "invisible," but some of the taxes themselves would also "do the vanishing act."

Each Friday of the 51st State Fair of Texas, Dallas, October 7 to 22, has been set aside for the school children of Texas. The first Friday will be for the elementary children and the second Friday for those of high school grade.

BUSY WOMEN'S WORKBASKET

It Is Always Fiesta Time

Fascinating Mexico—let's visit it via the wood cutout route. Here's just the collection you'll need. Four gayly costumed Don Juans make a holder for a pot of flowers; the other four support an ashtray. Then there are the three cunning donkeys: one holds a pot of cactus, the second puts his hoof against the door to hold it open, and the third keeps a match supply handy. To o, color schemes are in evidence, but black and white contrasts present the most glamorous effect.

FASHION HIGHLIGHTS

After summer and the still warm early days of fall, we eagerly look forward to the fresh, crisp days of autumn. Looking over our summer wardrobe, we find most of our prints worn and faded. So milady tours the shops in search of lovely new frocks. According to leading stylists, she will be greeted with fashions reminding her of grandmother's day.

For evening wear the gowns are streamlined models of the 1890's. Fingerless lace guantlets and bustles are quaintly reminiscent of an era we had thought packed away with lavender.

It is an established fact that hips are to be emphasized this fall. The smartest fall dresses feature a modernized bustle, and the long full skirts for evening give an air of grace to the modern miss. Many striking color schemes are in evidence, but black and white contrasts present the most glamorous effect.

Another startling new evening gown features a sweater. It is a black wool lace-woven garment with a conventional design, and as close-fitting as a fencer's jersey. This sweater is worn with a very full skirt gathered on a snug waist band. The black sweater looks particularly smart when worn with a skirt of apricot-colored fringe.

As usual, black is the predominating color for early fall. Street clothes are quite attractive, and tailored along lines our grandmothers knew so well. Once more may we remind you that in order to present a completely smart ensemble you must have a clear, lovely complexion. So start now to remove unsightly traces of old-fashioned summer spots. Keep the skin thoroughly cleansed of all impurities and dust; then apply as often as necessary a good cream or lotion. The truly stylish woman will look dainty and very feminine this coming season.

YOUR HOME

"Be it ever so humble, there is no place like home," is certainly not an idle quotation, but a definite hope in every human heart. Be it ever so humble does not necessarily mean that a home be not attractive. By planning and wise economy many simple changes can be made which will convert a drab-looking house into one that is lovely.

1. Drains—clogged ones need attention.
2. Faucets—leaky ones need tightened, new parts added where necessary, or sometimes just a new washer will suffice.
3. Flush valves—defective ones in water closet should be repaired or replaced.
4. Water pipes—provide covering to prevent freezing where exposed.
5. Refrigerator drain pipe—replace the old pan with a drain pipe and trap.
6. Shut-off cocks and valves—install additional ones where needed.
7. Water heating equipment, water softener, etc.
8. Worn-out piping—replace with more modern type.
9. Worn-out fixtures—replace with newer types.
10. Extra bathroom or lavatory and toilet be provided if needed and if its cost can be afforded.

BACK TO SCHOOL

From the length and breadth of our land slow or hastening steps of youth are on their way back to the schoolhouse. Many mothers will first breathe a sigh of relief; then find the house strangely still.

To simply send children to school with clean faces and neatly packed lunches is not all. Mother and dad should take lively interest in the work the children do in school, the games they play, and the places they go after school hours. The increase in juvenile

crime is partly caused by parents' neglect of children. Many fathers and mothers have only themselves to blame. If their children go astray, if by parents keep in close contact with youth up to and entirely through the adolescent age we can do much to reduce the blot of juvenile crime.

At this time I am gathering data on juvenile delinquency in America and its relationship, particularly, to high school pupils. A summary of my information will be printed on this page at an early date.

WE DINE

Now is a good time to get out the old trusty cook-book, and begin planning well-balanced meals for the family. The wise mother keeps in mind while preparing meals, "We are the sum and substance of what we eat." The food we eat will eventually become one of four things: Brain, brawn, fat or poison. Food combination and correct diet, authorities say, is an important factor in any homemaker's success. The health and efficiency of a family depends largely on meals and how appetizingly they are served.

School Lunches

I have gathered some suggestions for preparing tasty sandwiches and school snacks. There are several general rules worth remembering to make the lunch attractive. Above all, it should be neat, clean and attractively put up. Each lunch might well contain a "surprise package." It may be a dainty flower (artificial or real), a beautiful verse, a small cherished gift or some new kind of food. Take special care in wrapping the "surprise." It would be worth while to

plan and prepare some such surprises in advance, keeping them hidden until ready to use. It is better to cut fresh bread with a sharp knife. Do not mash the bread when cutting. Use a sawing motion. Remove butter or flavored filling from refrigerator at least ten minutes before preparing sandwiches. Never include in a lunch food that might spoil in a short while. Such perishables can cause food poisoning.

Sandwiches

Attractive sandwiches may be made by spreading different fillings on each slice of bread; then put slices together like a loaf, wrap in molasses-proof paper and place in refrigerator for an hour or more. Cut the loaf crosswise.

Fillings

- 1/2 cup softened butter
 - 1/2 cup strongly flavored cheese
 - 2 tablespoons Worcestershire sauce
- (Continued top next column)

- 1 teaspoon mustard
- 1/4 cup softened butter
- 2 tablespoons sardine paste
- 1 teaspoon Worcestershire sauce
- 1/2 cup dried beef
- 1/2 cup American cheese
- 1/2 cup ketchup or tomato purée
- 1 cup peanut butter
- 1 tablespoon cream
- 3 slices broiled bacon, minced.
- 1 cup minced dates, raisins or prunes
- 1/2 cup minced nuts
- 2 or 3 tablespoons mayonnaise.
- 1 sliced banana
- 1/2 cup sliced dates
- 1/2 cup mayonnaise
- 2 tablespoons minced nuts
- Buttered bread
- Lettuce.
- Tomatoes skinned and sliced
- Thinly sliced lettuce
- Salt
- Mayonnaise.
- Ground beef
- Mayonnaise
- 1 tablespoon ground onion
- Thinly sliced lettuce.
- Hard boiled eggs, chopped
- Mixed with Mayonnaise
- Slices of crisp bacon.

MINISTER WRITES HOME ABOUT WAR-TENSE EUROPE

Rev. J. Frank Norris, well known Baptist minister of churches in Fort Worth and Detroit, is touring Europe. He writes as follows of what he saw along the Rhine river between France and Germany:

"We drove through Alsace and Lorraine and stopped at Metz and Strasbourg on the Rhine. This is one of the most famous cities in Europe. What a tragic spectacle met us on the huge steel bridge across the Rhine—France on one side and Germany on the other. Both sides of the Rhine splendid specimens of young manhood of both nations armed and ready to shoot each other down. What fine fellows these young German soldiers on the German side, and what brave lads in the French uniform.

"At both ends of the bridge, and right in the middle of each entrance, are steel forts with machine guns and soldiers ready to shoot.

"Barbed wire entanglements everywhere, and the whole of it connected with high power voltage.

"Under both ends of the bridge German and French mines and tons of dynamite are ready to blow the bridge up at a second's notice.

"And such tension! Everybody eyeing everybody else.

"Everybody searched and put through the 'third degree.'

"And all because of one mad ambitious dictator!

"This cannot last. Not only is this terrible war-like condition at the Rhine at Strasbourg but it exists from the Swiss border clear to Belgium—the entire length of boundary between Germany and France.

"The Maginot Line on the French side runs the length of the boundary and cost three billion dollars to build and vast costs to maintain. We crossed it. It is miles across. Forts, forts, forts—soldiers, soldiers—and a million French soldiers kept in forts under the ground, all ready for the first shot. And the same character of forts on the German side in just a short distance from each other.

"The 'Hindenburg line' has only been moved back to the Rhine.

"This cannot last. It is bankrupting both France and Germany to maintain. Half of the blood earnings of the people go for armaments.

"Contrast this with our happy condition, and the peaceful boundary between the United States and Canada!

"Therefore, give me democracies rather than dictatorships."

SACRED CATTLE

Hump-backed zebu cattle, cause of many a bloody riot in their native Asia, have just been introduced into Peru. They will be crossed with native stock in an effort to produce a higher quality of meat.

Curiously enough, the zebu itself has little standing in the list of great beef and milk-producing animals. White zebu bulls are considered holy in India, where the Hindus will eat no zebu flesh, but keep the animals for milk and as beasts of burden. When some one else dares to harm or eat one of these sacred cattle the Hindus seek revenge and start a violent feud.

But zebus, called "Brahma cattle" in the United States, have the ability to live on scant pasture, can resist hot weather, disease and pests. When crossed with other breeds of cattle, they transmit these qualities.

The King ranch, in South Texas, has produced a good beef animal by crossing native with Brahma cattle.

THE GLASS BOTTLE

In 1904, the United Patent Office issued a patent for a glass bottle-making machine.

New uses were found for the products of the industry, and employment in glass container manufacture rose from 64,000 wage earners in 1904 to 69,000 in 1909. By 1937 it was in excess of 79,000.

Whole new industries and occupations grew up around glass containers. The outstanding example is the rise of the modern system of retail milk distribution. There are in the United States today about 56,000 milkmen, 57,000 milk plant employees and 16,000 clerical employees in the fresh milk industry, a total of more than 138,000 according to a survey made by Indiana University.

When milk was laded out of cans at the customer's door, milk distribution was an inconsequential industry from the standpoint of employment provided. Glass bottles, made possible by an invention, developed under patent protection, created new jobs in modern industry.

The soft drink business has also grown up around the glass bottle and stimulated employment not only in that industry but in the manufacture of refrigerating equipment and the production and distribution of dry ice.
