

WOODVILLE BOOSTER

An ardent baseball fan, he wrote the famous poem of the Great Casey, who struck out. De Wolfe Hopper immortalized the poem on the stage and Wallace Beery brought it to the screen in the title role.

Thayer retired from active service shortly after the turn of the century. Meanwhile a mild controversy arose over the authorship of "Casey." Other writers claimed to have written the piece that De Wolfe Hopper immortalized and Thayer ignored the rival claims until a Santa Barbara newspaper man discovered his retreat in Montecito, a Santa Barbara suburb, and was shown records, that conclusively proved Thayer to have been the writer.

This attitude is logical since present-day war preparedness is not limited to combat forces. Never in history have wars been waged so far in advance of the actual fighting. Preparedness calls for vigorous efforts of millions of men and women who, in addition to those in uniform, are a vital part of a nation's defense system.

The physical condition of everyone not only is a matter of individual but national concern. In the production of defense material, certain standards can be demanded and achieved. On the other hand, vigor of body and mind is entirely to personal to be affected directly by governmental decree or public health regulations. Nevertheless, it is reasonable to suggest that the health of all citizens should be developed to as high a plane as possible. Moreover, it is definitely one's patriotic duty to see that this is done.

For example, a physical check-up by the family physician for those of mature age is likely to bring to light any existing latent condition and thus make remedial measures promptly possible. On the assumption, however, that many of those submitting to the test will be free of any incipient disease or physical defect, this professional contact will afford an opportunity to obtain advice on habits of living. Some practices indulged in daily, in thousands of individual cases, now is the national need. Such habits include lack of exercise, insufficient rest and relaxation, excessive reliance upon stimulants of various kinds, improper or unwise food consumption, and other activities frowned upon by nature.

In short, the general development of a positive, rather than passive, attitude toward health loans large as a personal patriotic and preparedness duty. Incidentally, such an attitude conceivably can add years to one's life and generate a physical zest which will mean much in terms of efficiency and happiness, concluded Dr. Cox.

WEEVILS AT WORK
Weevils are working over time these days. To help off-set some of their damage to peas and beans which have been or shortly will be harvested on most Texas farms, Cameron Siddall, entomologist for the A&M College Extension service, has something to say on this subject.

First of all, the safest way to keep beans or peas which are to be used as seed is to shell or thresh them and treat them with carbon disulphide, then store them in half-gallon jars, gallon syrup buckets, or 25-lb hard cans. Carbon disulphide can be used in the following proportions: one-fourth teaspoonful per half gallon jar; one half teaspoonful for a gallon syrup bucket; five teaspoonfuls for a 25-lb hard can; and one ounce for a 50-gallon drum.

The peas or beans should be placed in a jar, bucket or can. Then a small saucer or jar top containing the carbon disulphide solution should be placed on top of the peas before the lid is placed on the container. After 36 hours, the lid and the carbon disulphide should be removed and the peas spread out on a table top or on the floor until there is no trace of the fumes. The peas should then be placed back in the container and the lid placed on tight.

If the peas are not to be treated, they should be left in the hulls, since they are less subject to the weevil damage than if they are shelled or threshed. Where peas are beans are to be used for eating, they may be placed in an open container, such as a turkey roaster, and heated to 180 deg. F. for 10 minutes, then stored in tight containers.

KIDNEY STAGNATION IS WORSE THAN CONSTIPATION!
Because We Treat Constipation at The Onset, While We Neglect Our Kidneys Indefinitely
No other organ in your body is so important as your kidneys. For in your kidneys there are nine million tiny filters which must work day and night to filter the fluids and keep the system free from wastes, acids, poisons which, if permitted to remain, may cause serious kidney and bladder trouble.
It is no wonder then that Nature often calls for help to clean out the kidneys. So if you are troubled with Getting-Up-Nights, Leg Pains, Headache, Nervous Headache, Distress or Loss of Energy, due to functional kidney disorder, try KIDANE, the famous kidney remedy, which aids Nature to finish out the kidneys, to filter all wastes to prevent kidney stagnation.
KIDANE is Safe and Reliable. Thousands report entire satisfaction. Taken according to directions KIDANE will give splendid results. Try KIDANE. Buy it at our Special Price of Two Boxes. Use one if not satisfied, return unopened box and GET YOUR MONEY BACK.
If your local druggist cannot supply you, send \$1 to The Kidane Company, Atlanta, Ga. for two full-size boxes on a money-back guarantee. 10-22

AFTER 175 YEARS

Read this fact state law carefully. All is busy and content at Woodville. Expenses are at every moment cut to the minimum, and, if, some accident, are to be credited, we are on the eve of a new chapter with the most formidable of our neighbors. They, and the dignitaries, which are but too justly appreciated in Poland through to delege Europe abroad in ideal and throw an uncommon air of dejection over this method, which was just beginning to reveal from the masses of the life was.

The date of the item was August 10, 1761. It was printed in the Hartford Courant 175 years ago. With but a slight change (the word express to be changed) it could be printed in the same paper on August 10, the year of 1936, and told the news of the outbreak of the same old European war that started in these weeks. The Island Prince.

ETEX CHAMBER SENDS LOCAL TAX SURVEYS

Taxpayers of Tyler county who may desire the county tax rate, may obtain a complete picture of the county's fiscal affairs from the Tax Survey of this county recently made by the Tax Department of the East Texas Chamber of Commerce.

A copy of the survey for this county has been sent to the county judge and to the office of F. B. Sullivan, where any interested citizen may inspect and study it, according to a letter received by the Chamber from the East Texas Chamber.

FARM SECURITY ADMINISTRATION

Farms bought by Texas tenants with Farm Security Administration loans will be limited in value to \$1,200 in some counties this year, instead of running to \$4,000 and \$5,000 as during the previous three years of operation. J. Woodrow Willett, FSA's supervisor for this county, made known today that the amendment to the Bankhead-Jones Farm Tenant Act, passed recently under the sponsorship of Congressman Taylor of Georgia, will force a drastic revision in the provision that "no loan shall be made to purchase a farm of greater value than the average farm unit of 30 acres or more in the county."

Under this restriction, 488 farms

Chinchilla, Tiny Native of Chile, Is Aristocrat of Fur-Bearers

SO RARE ARE coats made from the fur of this little rodent—the chinchilla—that leading furriers know accurately their number and their ownership. Originally the furs were imported from Chile but in the past 20 years a California has been supplying the market with pelts of animals raised on his "chinchilla ranch."

The area has been worked by geophysicists, but the prospect now is to be drilled is a combination of surface and sub-surface geology. The well is supposedly located in the center of the structure. Pure Oil did surface work on the area in 1929. The No. 1 Crews was drilled several years ago by the Boone Brothers. Gas still shows around the plug.

Some years ago Young-Lee shot the area and took acreage but dropped it. No. 1 Hayes was also drilled there several months ago by J. Z. Werby who made a deal with Louis Franklin holder of the acreage. The well drilled to 4500 feet, 220 feet into the Wilcox and Franklin took it over and drilled 100 feet more. Humble also drilled core holes to 1,000 feet in the area. All show some gas.

A new firm, Franklin and Tidemann, Ltd., (Louis Franklin and R. W. (Bill) Tidemann) are making the operation. Arch M. Parker it tool polisher and superintendent.

War's Tension Grips Citizens of Bucharest

Usual Gaiety Is Missing From Rumania's Capital City.

Prepared by National Geographic Society.

Grim war tension has supplanted the usual gaiety in Bucharest, the capital of Rumania. As city officials mourn the recent assassination of Prime Minister Calinescu and members of an organization suspected of planning the overthrow of the government are being hunted, citizens are alarmed by recent war activities near the Rumanian border and rumors of a Russian advance on the Rumanian province of Bessarabia.

Normally Bucharest is so gay that it has long worn the sobriquet, "The Little Paris of the Balkans." Also to remind the visitor of the French capital, one of its important thoroughfares, the Chaussee Sosea, is nicknamed the "Little Champs Elysees." It passes under an "Arc de Triomphe," built for the coronation of the late King Ferdinand and Queen Marie.

On the Chaussee, lined with palatial residences, fine churches and government buildings, in peace times a grave countenance seems out of place. But this portion of the city has no monopoly of carefree good nature; for the neighborhoods of the humblest Bucharest homes in the cobble byways of the poorer sections, and in the gypsy quarter, are filled with smiling chattering parents and playing children.

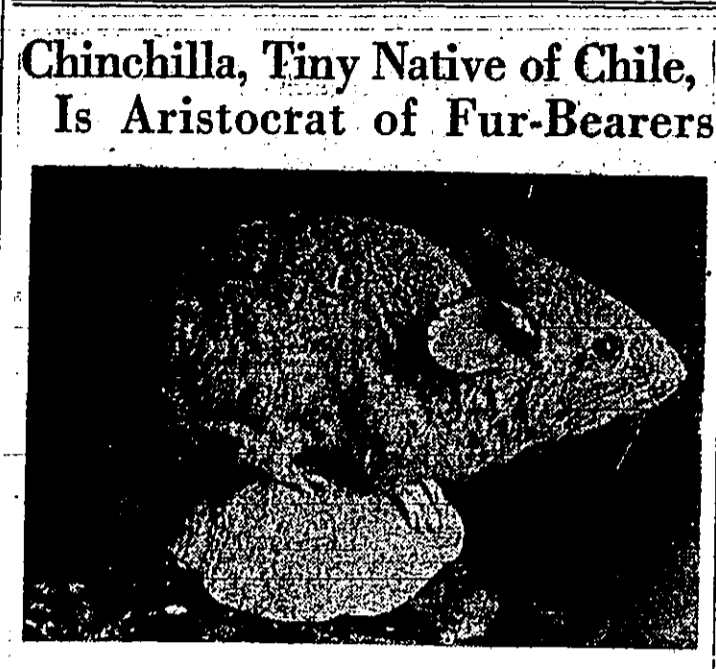

Many Modern Shops.

Shops as modern as can be found in most of the capitals of the world line Bucharest's streets, and behind their plate glass windows the American traveler finds such familiar articles as American-made flashlights, radios, phonographs, and automobiles. But one does not have to come. More than a century before Columbus discovered America, Inca wove warm cloth from the fur even domesticated the animals, and at their death after shearing the fleece. Some 40 years ago, chinchilla fur provided an important industry for Chile. Today, chinchilla farms are spreading throughout the world. First and foremost chinchilla farm in the United States was established because of an American mining engineer's enterprise while in Chile. Interested in preventing extermination of the animals, and not blind to the possibilities of a fur business, the American dispatched 22 Indians to bring back alive all the chinchillas they could find. After combing the province of Atacama, in north Chile, for three years, the natives returned with only 11 chinchillas.

In her native habitat, a female chinchilla bears from one to two litters a year; but in mild California, mama chinchilla can have three litters with an average of two young in each. After less than 20 years, the original 12 chinchillas from South America have multiplied to more than 1,000 on a farm at Inglewood, Calif.

Other farms in Idaho, Wyoming, Utah, Pennsylvania, Wisconsin, and New York breed with breeding stock from the California farm.

A single pair of chinchillas can be expected to produce a pair of their own in a year.

SO RARE ARE coats made from the fur of this little rodent—the chinchilla—that leading furriers know accurately their number and their ownership. Originally the furs were imported from Chile but in the past 20 years a California has been supplying the market with pelts of animals raised on his "chinchilla ranch."

Squirrel-Like Rodent's Pelt Is Highly Valued By Furriers.

Prepared by National Geographic Society.

The chill winds of winter bring about the sale of thousands of fur coats. But among them will be very few garments fashioned from chinchilla fur, for the very good reason that chinchilla pelts are strictly limited in number. So few are the chinchilla coats in existence that leading fur dealers know pretty accurately their number and their ownership.

Little larger than a man's hand, the chinchilla—a rodent—weighs about 20 ounces when full grown. Of squirrellike appearance, the valuable little creature has dense, soft, pearly-gray fur; and in its native habitat, protective coloring enables it to lose itself among rocks.

In community burrows on the eastern slopes of the Andes in Chile, Peru, and Bolivia, chinchillas live at altitudes between 8,000 and 12,000 feet. Nowhere else have they been found in a wild state.

Hunted since ages past, chinchillas still offer hope to furriers for years.

WOODVILLE NEWS

The annual barbecue given by J. Wood Farm for his employees at the theatre and Sinclair Oil Co. was held Friday night at Boykin Springs.

Mrs. John Hill of McAllen are rejoicing over the arrival of a baby son, James Paul, who arrived last Thursday the 22nd. Many will better remember Mrs. Hill as Miss Pauline Richardson. Mrs. Lou Shumaker of Houston is spending the week with Mrs. J. D. Risner.

Mrs. Sam Barnes of Chester were in Woodville Tuesday and Mr. Barnes underwent a minor operation at the local hospital.

Miss Lois Richardson who is taking a beauty course in Beaumont spent Sunday here with relatives.

Mrs. Harry Johnson, were in Nacogdoches Friday night where Mrs. Johnson received her degree at SFA.

Miss Bennie Frances Dismukes is enjoying a visit from Miss Laura Jean McGregor of Corpus Christi.

Mrs. Charles Parker was a Beaumont visitor one day last week.

Mesdames John and S. H. Reid will return today from Navasota where they helped Mrs. Wm. Craig celebrate a birthday.

Messrs. George Best and Martin Nellius, Jr., were over from Jasper Sunday.

Bob Walton returned last week end from Texas U where he attended summer school. This week he with his parents, Mrs. Leonard Walton is visiting relatives in Austin.

Mrs. C. B. Birdwell enjoyed Sunday with relatives in Lufkin and Nacogdoches.

HERE'S A FORTUNE in chinchilla pelts. The furs pictured here are valued at about \$50,000, and 78 of the little animals had to give up their lives for this prize to be made into a fur coat.

RIGHTS OF MAN

"I hold the individual rights of a man to be priceless; and I declare that no reformation of any kind is justified in beginning by breaking down those rights."

From Pulpit Sermons, Henry Ward Beecher.

Animals Are Loose!

ON SUNDAY morning November 9, 1936, a shiver of fear ran through New York City. Headlines in the New York Herald proclaimed that all of the animals in the Central Park zoo had escaped. The story, which ran to five full columns, said that 49 persons were dead, of whom 27 were identified, (their names were printed) and 200 were injured, 60 of them seriously.

The mayor had issued a warning for everybody to stay at home while brave citizens, including Chester A. Arthur, Samuel J. Tilden and other notables, who had killed most of the ravening beasts, rounded up the 12 animals still left.

For several hours the city was in an uproar. Then somebody happened to read the last paragraph of the story. It is headed "The Moral of the Whole" and revealed that this was a gigantic hoax. The story of what MIGHT happen if better and stronger cages weren't provided for the animals in the zoo.

In fact, that was what Thomas B. Connery, the managing editor of the Herald, who ordered the story written, had hoped to accomplish with it. He gave the whole city the jitters but the zoo didn't get stronger cages for its animals, at least, not until long after the excitement over his hoax had died down.

Mrs. Ray Baker are building their new home just west of the Dr. J. F. Shivers home.

A PAIR OF BABY SHOES

I saw a pair of baby shoes Upon a porch as I passed by. White shoes that had been freshly cleaned Placed there in the sun to dry. Aboardly little things they were To stir my heart deeply, to twist A half-forgotten memory Long ago buried, to bring a sudden mist Into my eyes. And strangely all Landscape—look where I might— Was blotted out completely by A pair of tiny baby shoes. By Hazel M. Kerr.

ADVERTISING COMPULSION

From time to time the question is raised whether a newspaper has the right to reject advertising copy with out giving a reason to the advertiser. It is the settled jurisprudence that a newspaper is free to accept or reject advertising without accountability to the advertiser or to anyone else, subject, of course, to the rule of subsequent liability if, in accepting advertising, the paper knowingly assists the advertiser to injure a third party.

If a newspaper were not free to accept or reject advertising there would be no freedom of the press in America. If the government had the power to compel a newspaper to accept certain forms of advertising, then the government would have the power to compel that newspaper to accept such advertising at rates fixed by the government, even though they be confiscatory.—New York Press.

DID YOU REMEMBER THE FOLLOWING?

For what types of service does the United States award the Distinguished Service Cross and the Distinguished Service Medal?

The Cross is awarded for heroism in military operations against an enemy; the medal, for service in a position of responsibility in time of war.

The fact that average newspaper reader has only a hazy notion of the meanings of many words in common use has often been cited by students of newspapers in their pleas for simple writing.

We do not know of any Gallup-method inquiry into this subject that has been done, but in Baltimore recently the Van Sant, Dugdale advertising agency conducted an interesting word test with interesting results.

"As writers of advertising, we have a very strong interest in words," it stated: "Which words arouse interest? Which words don't? Which words do people understand? Which fail to register?"

To find out, it sent a man to call on users and prospective users of the products of one of its clients, principally automobile repair shops and manufacturing plants. A number of advertisements were handed each person interviewed.

As the ads were read the interviewer noted each hesitation over a word, and asked what the word meant.

Some surprising results were obtained.

To one man, "accumulated" meant "grinds off paint"; "predecessor" meant something new; "Eliminate" meant "fix"; "Minimum" meant "motor turnover a minute"; "Facilitates" meant "shows where tool is used"; "Intermittent" meant "slowly"; "Involve" meant "cover"; "Embody" meant "face of valve"; "Continuous, versatile, boon, incidentally," were words which other readers failed to register quickly and clearly.

No one, of course, contends that stories and editorials should be written in words of one syllable, but the tendency to use a big word when a smaller one would do should be guarded against. Simple, clear concise writing best serves the reader.—Editor and Publisher.

A MIRACLE

She was an old Irishwoman on her way back to Dublin from the North. The customs man fished out a bottle from its temporary sanctuary in a voluminous night-dress.

"And what is this?" asked the customs man.

"Shure, an' it's holy-water," said the old lady clutching it. The customs man had his suspicions; pulled the cork; sniffed.

"This is whiskey," he said in a stern voice.

Up went the old lady's hands in amazement.

"Glory be! A miracle!"

WOODVILLE NEWS

Mrs. J. L. Jordan returned to her home in Crockett yesterday after a visit with her daughter, Mrs. T. A. Houston.

Mrs. Sam Tubb of Houston enjoyed Sunday with the parents, Mrs. E. W. Tubb and Mrs. C. L. Williams.

Jackson Lee McNeil, 74, member of a pioneer family of the Woodville section died in a hospital here Thursday. He had been a resident of Silsbee 24 years. He was a member of the Baptist church and Masonic order. Funeral services were held at the home at 1 p. m. on Sunday, with Rev. E. T. McKenzie, assisted by Rev. H. E. Floyd. Burial was at the Magnolia cemetery, Woodville. Surviving are his wife, Gertrude Ioturn McNeil; two daughters, Mrs. H. C. Havens, Liberty; Mrs. Addie Stevenson, Port Arthur; one son, J. J. McNeil, Liberty; a sister, Mrs. Willie McNeil, Madisonville; two brothers, Dr. W. H. McNeil and J. Y. McNeil of Silsbee, and 10 grandchildren.

Industry Ready to "Keep 'em Rolling" for Defense

Graphic illustration of the way in which one of America's greatest industries, general activities, with the United States Army for national defense is found at Little Falls, Minn., where the greatest peacetime manufacturer of trucks in the country are being built. The history of the country are being built. The history of the country are being built. The history of the country are being built.
