## NOTABLE NEWS EVENTS IN PICTURES

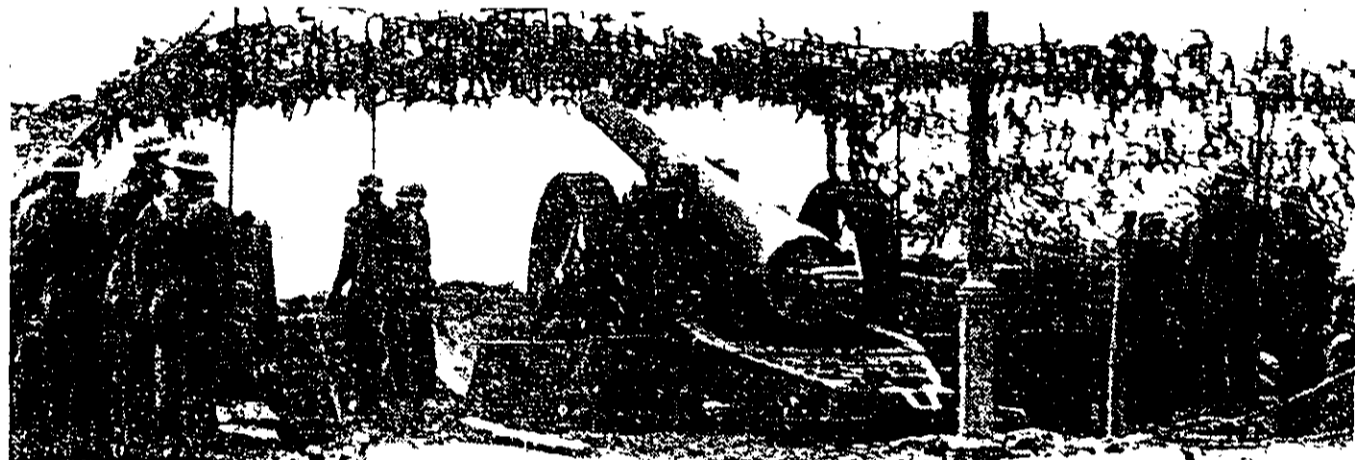

**WILL IT BEING AGAIN?**—Independence Hall in Philadelphia is the home of Liberty Bell which in 1776 tolled for freedom. The passage of the British Aid Bill 1776 may prove prophetic. Opponents of the case had but insisted that the case be dropped.

**FLEET FIGHTERS**—Ten of the U. S. Navy's dynamic little torpedo (mosquito fleet) boats, newest contribution to coast defense, skim over the water at Miami, Fla., where they are undergoing grueling tests. These craft are capable of mile a minute trip.

**BRITISH TANKS KEPT**—How did they perform? One is shown in action, pushing a heavy plow, part of the war effort. Even over the water, as in the case of the British, the British tank is a small, compact, and efficient.

**READY FOR "JERRY"**—Long months of expectancy have not caused any relaxation of British invasion precautions at coastal command stations. Above, lummies, death overhead camouflage, stand ready to repel invaders beside big gun at defense point.

**BASKETBALL BATTLE**—Somewhat of a precision performance is rendered by the Dubuque cagemen as they surround West Texas State men in basketball fray at Kansas City. West Texas, world's tallest team, downed opponents, 77 to 66.

**TAKING THE DODGE** OF 101 DODGERS—Dodging fast balls is a hazardous pastime and not always successful, so Larry MacPhail, Brooklyn Dodger boss, has ordered protective headgear to his players. In Havana he's slipping metal "protective plate" into cap of Pee-wee Reese as Ducky Medwick and Fred Fitzsimmons, left, look on.

**ENGINEERS BRUSH UP**—Units of 121st Engineers construct 72-foot pontoon bridge across Patuxent river at Fort Meade, Md., as part of their training under U. S. defense program.

**DIVER FOR THE NAVY**—Expansion of naval forces in connection with national program has placed motor plants on 24-hour a day basis throughout the country. Here's a general view of assembly floor in Cleveland, unit of General Motors where huge Diesel engine order has things humming.

**ON THE "SOUTHERN FRONT"**—Uncle Sam is losing no time in teaching conscripts the fundamentals of actual combat. Troopers of the 167th Infantry from Alabama participate in bayonet drill at Camp Blanding, Fla. This maneuver is known as "pairing" and is used in close combat.

# Old Blue, Lead Trail Steer of the J A Herds

By J. FRANK DOBIE  
From the book, "THE LONGHORNS"  
Edited by J. Frank Dobie, Publisher, Houston,  
Texas

ALWAYS a group of animals, some that are beasts, certain animals emerge. The emergence of animals that were mostly sheep, that were talked about as the "best" about cutting and so on, were not to be trusted. Now and then a few of these animals, that were not to be trusted, were found to be trustworthy. Old Blue was one of these. He was a steer that was not to be trusted, but he was trustworthy. He was a steer that was not to be trusted, but he was trustworthy. He was a steer that was not to be trusted, but he was trustworthy.

### Assets, Natural Leadership

Old Blue's natural leadership was one of his greatest assets. He was a steer that was not to be trusted, but he was trustworthy. He was a steer that was not to be trusted, but he was trustworthy. He was a steer that was not to be trusted, but he was trustworthy.

## Naval Air Station Corpus Christi, Tex.

THE Naval Air Station at Corpus Christi, Texas, commenced operations on March 12, 1941. It is one of the Navy's largest air stations and includes the main station, three auxiliary fields and a number of smaller operating areas.

ALVA D. BERNHARDT  
Commanding Officer, U. S. Naval Air Station, Corpus Christi, Texas

The command officer of the Naval Air Station at Corpus Christi is Captain Alva D. Bernhardt, U. S. Navy, and the Executive Officer is Commander R. D. Lyon, U. S. Navy.

In the summer of 1876 the restless Goodnight decided to pull up stakes in Colorado and return to Texas. So Blue led the herd that stocked the first ranch in the vast Texas Panhandle of the Staked Plains. There were 1,600 head of cattle in that first herd, as they filed down the bluffs, rising nearly a thousand feet above the floor of the Palo Duro Canyon.

### Rout 5,000 Buffaloes

Below the pass the canyon opens on several miles wide, the bluffs on either side making a natural fence. Out of this enclosure Goodnight and his companions led five thousand buffaloes. They led the pass into the mighty Palo Duro and rode him daily to the bluffs above. The cattle wintered in the bluffs. Goodnight found a settlement, Anson by name, with the two formed a partnership. For ten years their brand was the J A on the sides of the cattle and the J A range embraced thousands of acres up and down the bluffs. The J A range had stocked the whole country and Blue, the lead steer, became the outstanding animal of the Palo Duro herds.

As the year 1885 drew to a close, the J A herds numbered two hundred and fifty thousand head. It was October 26, 1885, that a herd of 1,000 J A steers headed to the west. The trail was a hard one, but the J A herds were used to it. They were used to it. They were used to it. They were used to it.

### Blue Proud of His Bell

Blue's bell was brass, with green patina and red label upon the brass. The label was green and shiny and had on it the words "J A" in white. Blue was proud of his bell. He was proud of his bell. He was proud of his bell. He was proud of his bell.

### Two Thousand Horns Checked

At daylight there was a "bell" in the water. The water was from the tank, but the bell was from the tank. The water was from the tank, but the bell was from the tank. The water was from the tank, but the bell was from the tank.

### Flight Training

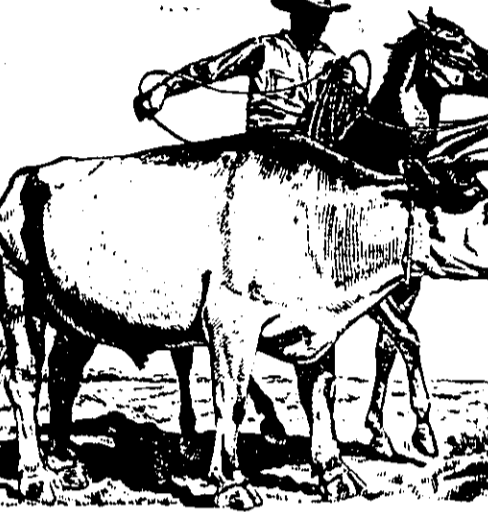

The early commissioning of the Corpus Christi Naval Air Station follows the announcement by Secretary of the Navy Knox that effective February 15, 1941, opportunities would be open for approximately 1,000 young men a month to enter flight training in the Navy as aviation cadets leading to commissions as ensigns in the Naval Reserve and assignment to flying in the United States Fleet.

Candidates are first being enlisted in class V-5, Naval Reserve, and ordered to preliminary flight training. Those who complete successfully will be appointed aviation cadets and ordered to the full Navy flight training course at Pensacola, Jacksonville or Corpus Christi.

After leading a thousand steers all day, Blue believed in exercising the privileges of individuality. He considered himself always as apart from the longhorn masses. He would walk right into camp among the pots and pans and eat pieces of bread, meat, dried apples—anything the cook would give him or the boys could steal from the cook. He became a great pet. Often he was hobbled and left to graze with the saddle horses. Sometimes he was staked out at the end of a long rope. He preferred to bed down away from his inferiors—and he had no peer.

### Always "Rarin' to Go"

The trail work followed a well-established routine. When it was time to travel after the early morning grazing, Blue nosed out toward one of the point men to have his bell clapper loosened. Then he would give a toss of the head and a twitch of the tail, often throwing in a few chuckling bellow to emphasize his pleasure, and stride north. Some waddie with the voice of a high horn would sing-sing out the

Old Blue and Jack Carter lead trail man.

in Texas cow. He called the big steers and the big steers would soon be strung into line. Blue must have known the North Star, he could see answers. Blue was always "rarin' to go" and, unless checked, he was apt to walk too fast.

When this pioneer herd from the Palo Duro reached the Cimarron river, they found it on a rampage, but Blue shouldered straight into the waters and after him strung the thousand J A's.

### Major Defense of Indies

Singapore, major defense of the Indies, commands the Strait of Malacca, commanding the Indian Ocean on one side and the China sea on the other with the home Strait cutting it off from the mainland. It is the great free port for trade in Malaya which comes most of the world's rubber and tin, including most of America's supply.

No warship could afford to approach within twenty-five miles of Singapore's defense batteries, the most powerful in the world. Within the Johore Strait there is anchorage for a battle fleet larger than that of the Japanese, a graving dock second only in size to that of Southampton, England, capable of receiving the largest of battleships, and supplemented by a 50,000-ton floating dock. A huge airfield is prepared for resistance to a bombing siege.

of a race horse. Still at the lead of his herd, he headed straight for the twenty-foot gate that opened into the big shipping pens. With one bunch of cowboys to cut, another to count, and a third to run the cattle up the chute into the cars, they were loaded long before noon and on their way to Chicago—all but Old Blue.

He had proved himself far too valuable to be sold for steaks. He stayed with the remuda and ate hay while the cowboys ate sour dough biscuits and some-of-a-gun.

### Brought Outlaw Into Camp

After this trip up the trail as Blue's occupation for 1885 was settled, he was put to various uses. If an outlaw steer was roped in the cedar brakes and had to be led in, he was necked to Old Blue. The pair was turned loose, and straight as a crow flies, the bell ox would bring the outlaw into camp.

If a wild herd of cattle was to be penned, Blue was put with them to show the way in. With cattle open approaching a pen, Blue would lead the herd away and the wild ones could not break ahead of Blue, and his course was right into the gate.

### Register of Merit Bulls

BY AVIS PLATTER  
Merced, Texas

THE citizens of Fegwood, Van Zandt county, wanted a cheese factory. They talked a great deal about it among themselves but got nowhere. Finally they took up the matter with R. F. Gray, a successful farmer and livestock raiser near Edgewood. He told the citizens that before they could get a cheese plant they must first produce enough milk in the community to keep the plant running.

### Lack of Quality and Quantity

"An inventory of the dairy cattle in the county showed a lack of quality and quantity. Many farmers knew this, but had done nothing about it. However, I found a majority of the farmers willing to co-operate.

"First, it was necessary to raise the standard of milk, and the only way to do this would be to put first-class bulls among the cows.

### Farmers Convinced

"After working on the job for some time, with the co-operation of Heber T. Stewart, FSA supervisor, we convinced the farmers that the loans would be an asset rather than a liability. Six men voiced their readiness to accept a loan and to purchase a bull.

last animal entered; then he would bolt out.

Once John Taylor and another cowboy took him up on the Canadian river to bring back a pair of young buffaloes. They necked the two to him, both on one side, and, of course, they were contrariness personified. "Old Blue was the maddest steer a man ever saw." He shook his head and bellowed, worked around until he had one of the wild buffaloes on each side of himself, and then struck a course. When he wanted to go to water with them, he went; when he wanted to stop and graze, he grazed. He knew every camping place on the route, and when he got to one would stop whether the men with him wanted to stop or not. He tamed the buffaloes thoroughly and in good time brought them into the Palo Duro, where they were turned loose to help the famous Goodnight buffalo herd.

### Eight Years of Leadership

For eight years Old Blue kept at his occupation of leading herds. Some years he went up to Dodge City twice. The horns and legs of the steers he led were growing shorter and shorter, and often the cowboys had to cut out and doctor a limping short-horn whose feet got sore on the trail, but never once did Blue limp. His hoofs were as hard and bright as polished steel. At ten thousand head or more of the J A cattle followed Blue and his bell into the shipping pens of Dodge City.

The older he grew, the more philosophical he became. Blue was mighty kantan when a stampede started. If the boys could get the stampedes to mill, Old Blue's head had a powerful effect in quieting them. At the head of a herd he never "flipped" when a jack rabbit suddenly jumped up from under a sagebrush at his nose, or something else that happened, and this day and night he was a steady influence.

When he was twenty years old, he died. For a long time his horns remained in the office of J A headquarters, over the door leading into the vault. They may be seen today in the fine little museum maintained by the Panhandle-Palo Alto Historical Society and the West Texas State Teachers College at Canyon. It is his trademarking owner, Old Blue, of the Texas Longhorns belongs to history.

Registered Jersey bulls purchased by farmers near Edgewood, Van Zandt county, Texas.

most Jersey bulls ranging in ages from ten months to two years, all of which came from dams and sires whose dams and sires, grand dams and grand sires had records that just couldn't be beat. These bulls are really among the best the South produces.

### Select Their Own Bulls

"We took the men who were going to buy the animals up to Nashville in autos. By this plan each man was able to select his own bull. One man, who had a large herd of dairy cows, bought two bulls.

"These men have now formed bull circles, so at the end of a set period, say two years, they will exchange bulls and thereby lengthen the productive life of each animal.

"The least production of butterfat among the dams of these bulls was 51 pounds a year. The butterfat produced by their dams and grand dams ranged from 512 pounds to 600 pounds a year.

"Generally speaking, everybody is proud of having these good dairy bulls available in our community. We are sure that within a reasonable time the dairy herds in our county will be much improved and our milk will be so much increased that it will be possible to raise enough capital to operate a cheese plant."

# CURRENT COMMENT

By A STAFF EDITOR

## Outlay for Defense

TREASURY figures show that defense expenditures for the first eight months of the current fiscal year, which ends June 30, were more than \$4,890,000,000, and that the rate per month had gone up to \$572,000,000 in January on a rapidly rising scale.

The total Federal outlay on defense since July 1, as of February 25, was \$2,828,560,693 and was running at the rate of \$21,000,000 each day. Net Treasury receipts for the same period were \$3,755,971,691. With total Federal outlays for all purposes of \$7,250,609,529, the Treasury had a gross deficit of \$4,494,637,837.

The largest category of defense expenditures were those for the Army. Since the beginning of the fiscal year the War Department has spent \$1,500,600,127, exclusive of funds earmarked for the Panama Canal and other harbor work.

The Navy spent \$1,200,000,000 for the Selective Service, \$700,000,000 for Defense funds, and \$100,000,000 for other defense activities.

A breakdown of the current fiscal year's expenditures for the first eight months reflects the following: During July, \$177,000,000; August, \$199,540,000; September, \$200,000,000; October, \$238,000,000; November, \$375,940,000; December, \$470,000,000; and January, \$572,000,000.

## Juvenile Delinquency

The war has had a profound effect on juvenile delinquency. It has never spoken so loudly as it does now. It has never been so clearly defined by the public as it is today.

In a number of cities, juvenile delinquency has increased. In some, it has decreased. In others, it has remained about the same. The reasons for these changes are many and varied.

A number of factors are at work. One is the economic situation. Another is the social situation. A third is the educational situation. A fourth is the moral situation.

These factors are all interrelated. They all have an effect on juvenile delinquency. We must understand them if we are to do anything about them.

## Bullet-Proof Vests

Bullet-proof vests are now among the clothing styles in London.

Already the vests, made of strips of hardened steel sewn in canvas, are being displayed in swanky London tailor shops, one of them within tommy-gun range of the United States Embassy in Grosvenor Square.

The vests are made in England by the Wilkinson Sword Company, whose head, Frank Barrett, conceived them in 1915 during the World War. The first vests were bulky, heavy affairs, but the modern streamlined versions fit snugly and weigh a good deal less.

The biggest demand for the new vests came from gamblers in the Riviera. A few years ago, gamblers were being shot down in the streets of Monte Carlo.

Now, however, the vests are being worn by a much wider class of people. They are being worn by police officers, by soldiers, and by civilians.

The vests are being worn by a much wider class of people. They are being worn by police officers, by soldiers, and by civilians.

areas in which an enemy can operate over the surface without fear of detection and destruction by shore-based aircraft.

## Cold and Hungry Paris

The winter that has struck Paris is the worst that the capital of France has known since the Middle Ages, says a foreign press dispatch in the New York Times. It is harder than the winter of 1789, when told that the people had no bread, Queen Marie Antoinette said, "Why don't they eat cake?"

It is harder than that of 1870 during the siege of the armies of Bismarck, when the animals in the Jardin des Plantes were starved to death.

Paris is freezing. On the houses and on the terraces, the snow is piled up. The streets are empty. The people are hungry and cold.

The people are hungry and cold. They are suffering from the lack of food and shelter.

## Comparative Military Strength

The military strength of the United States is being compared with that of other nations. The United States has a much larger military force than any other nation.

The United States has a much larger military force than any other nation. It has a large navy, a large army, and a large air force.

The United States has a much larger military force than any other nation. It has a large navy, a large army, and a large air force.

## Dies Committee Gets Larger Appropriation

Re-constituted for the fourth successive year and with a larger appropriation than it ever has had before, (\$150,000), the special House Committee Investigating Un-American Activities is getting set for another go at subversive elements in the United States, both of the right and of the left.

The chief committee work present under way is the preparation of four reports on further subversive activities which the committee and its staff have uncovered. One of these will deal with the Bund, another with Italian Fascist organizations in this country, a third with the financial manipulations of the Axis Powers against the United States, and finally a fourth with subversive business activities.

That the committee is at work on a report of widespread activities in the first year of its existence has given the estimate of Washington a new interest in the subversive activities of the Axis Powers.

## Explosives From Orange and Grapefruit Peel

Explosives can be made from orange and grapefruit peel. The peel contains a substance called pectin, which can be used to make explosives.

old songs often have histories of their own that endear them the more. The British wrote the rollicking "Yankee Doodle" to plague us, and sang it here in 1767, if not before that. But we captured it and turned it against Cerberus and his Renegades with results that are to the world.

## Alaskan Defense Construction Program

Working with all speed and spending \$10,000,000, the Army and the Navy are engaged in a great construction program in Alaska, strengthening the defenses of the Territory. The program includes the construction of a great many new buildings, the improvement of existing ones, and the construction of a great many new roads.

The program includes the construction of a great many new buildings, the improvement of existing ones, and the construction of a great many new roads.

We Legislators don't at Austin know very little about what is going on in the world. We don't have time to read the papers. All our time is taken up with tax problems, tax committee meetings and oratory. I never knew before that Texas had so many orators in its Legislature. They soar to interminable heights and keep on soaring by the time they are through soaring it's time to adjourn. Some lawmakers want to increase taxes, some want to lower taxes. They all promised, if elected, they would reduce taxes. But many forget the promises when they start getting letters from the gimme crowd back home. It's a lot easier to

reduce taxes than to increase them. It's a lot easier to reduce taxes than to increase them. It's a lot easier to reduce taxes than to increase them.

It's a lot easier to reduce taxes than to increase them. It's a lot easier to reduce taxes than to increase them. It's a lot easier to reduce taxes than to increase them.

It's a lot easier to reduce taxes than to increase them. It's a lot easier to reduce taxes than to increase them. It's a lot easier to reduce taxes than to increase them.

It's a lot easier to reduce taxes than to increase them. It's a lot easier to reduce taxes than to increase them. It's a lot easier to reduce taxes than to increase them.

It's a lot easier to reduce taxes than to increase them. It's a lot easier to reduce taxes than to increase them. It's a lot easier to reduce taxes than to increase them.

It's a lot easier to reduce taxes than to increase them. It's a lot easier to reduce taxes than to increase them. It's a lot easier to reduce taxes than to increase them.

The Texas News, of Dallas, is the first newspaper in the state to publish the "Only 12 Deathless Days" column, which is a daily feature.

**WORLD WAR I MEMORY TREE**  
The Texas News, of Dallas, is the first newspaper in the state to publish the "World War I Memory Tree" column, which is a daily feature.

**CONTRACT FOR BOMBING PLANT**  
The Texas News, of Dallas, is the first newspaper in the state to publish the "Contract for Bombing Plant" column, which is a daily feature.

**EX-RANGER AND INDIAN FIGHTER DIES**  
The Texas News, of Dallas, is the first newspaper in the state to publish the "Ex-Ranger and Indian Fighter Dies" column, which is a daily feature.

**1500 GIRLS OUTSHOOT A. & M. BOYS**  
The Texas News, of Dallas, is the first newspaper in the state to publish the "1500 Girls Outshoot A. & M. Boys" column, which is a daily feature.

**SQUIRREL HUNTING MONKEY**  
The Texas News, of Dallas, is the first newspaper in the state to publish the "Squirrel Hunting Monkey" column, which is a daily feature.

**SMALLEST INCOME TAXPAYER**  
The Texas News, of Dallas, is the first newspaper in the state to publish the "Smallest Income Taxpayer" column, which is a daily feature.

**SELLS FERTILIZER MADE FROM SEWAGE**  
The Texas News, of Dallas, is the first newspaper in the state to publish the "Sells Fertilizer Made from Sewage" column, which is a daily feature.

**100-YEAR-OLD CHURCH ANNIVERSARY**  
The Texas News, of Dallas, is the first newspaper in the state to publish the "100-Year-Old Church Anniversary" column, which is a daily feature.

**MAC**  
The Texas News, of Dallas, is the first newspaper in the state to publish the "Mac" column, which is a daily feature.

**SECRET WEAPON**  
The Texas News, of Dallas, is the first newspaper in the state to publish the "Secret Weapon" column, which is a daily feature.

**BY BOUGHNER**  
The Texas News, of Dallas, is the first newspaper in the state to publish the "By Boughner" column, which is a daily feature.

**WELL, WELL, WHAT HAVE WE HERE, A TANK?**  
The Texas News, of Dallas, is the first newspaper in the state to publish the "Well, Well, What Have We Here, A Tank?" column, which is a daily feature.

**THAT'S GOOD! HAW HAW - G'WAN. SHOOT ME ONCE**  
The Texas News, of Dallas, is the first newspaper in the state to publish the "That's Good! Haw Haw - G'wan. Shoot Me Once" column, which is a daily feature.

**SURE, SURE! GO AHEAD SHOOT ME**  
The Texas News, of Dallas, is the first newspaper in the state to publish the "Sure, Sure! Go Ahead Shoot Me" column, which is a daily feature.

**OKAY**  
The Texas News, of Dallas, is the first newspaper in the state to publish the "Okay" column, which is a daily feature.

**KLONK**  
The Texas News, of Dallas, is the first newspaper in the state to publish the "Klonk" column, which is a daily feature.

**KILL MOUNTAIN LION**  
Willie Kreuger and Emil George shot and killed a mountain lion on the Hiedmann ranch, west of New Braunfels. The lion measured 7 feet in length.

**SAME SERIAL AND ORDER NO.**  
Felipe Lopez, age 32, a farm hand living near Robstown, (Nueces county), has serial No. 1622 and order No. 1622. Draft officials said it happens only once in several million registrations.

**FIRST IN LOAN SHARKS**  
Statistics show that Texas stands first among nations in amount of business done by loan sharks. Approximately \$28,000,000 in loans are now outstanding in Texas, at excessively high rates of interest.

**14-YEAR-OLD NEWSPAPER**  
The American Statesman, Mrs. H. D. Brown, 1422 Baker Lane, Austin, Tex., is the oldest newspaper in the state, having been published since 1874.

**MOTHER AND DAUGHTER SCHOOL MATES**  
Mrs. L. C. Ott and her daughter, Dorothy, both of 227 Carew Street, San Antonio, are school mates at San Antonio Vocational and Technical school. Mrs. Ott is studying garment manufacturing while Dorothy is taking a course in secretarial work.

**HOLDS UP BURGLAR**  
A woman in the town of a burglar who was making a run for it. She held him up and he was arrested.

**"UPSIDE DOWN" BABY**  
A baby was born upside down. The mother was lying on her back and the baby was born with its head down.

**INTERESTING HOBBY**  
A man has a hobby of collecting old coins. He has a large collection of coins from all over the world.

**CHAMPION BOY SCOUT**  
A boy scout won a championship in a contest. He was the champion of his group.

**DOG SAVES COUPLE**  
A dog saved a couple from a dangerous situation. The dog barked and the couple escaped.

**TEXAS COTTON IMPROVED**  
The quality of Texas cotton has improved. It is now one of the best in the world.

**HENS FOR SUBSCRIPTIONS**  
A man used hens to get subscriptions for a newspaper. He gave away hens to people who subscribed.

**CONFEDERATE VETERAN, 93, WEDS**  
A 93-year-old Confederate veteran got married. He and his wife were both veterans.

**WOMAN OWNS LARGEST KARAKUL RANCH**  
A woman owns the largest Karakul ranch in the United States. She has a large flock of sheep.

**BILL TO PURCHASE BIRTHPLACE OF GENERAL SAM HOUSTON**  
A bill to appropriate \$15,000 to purchase the birthplace of General Sam Houston at Timber Ridge, seven miles north of Lexington, Va., was introduced in the Texas Senate.

**SMALLEST INCORPORATED TOWN**  
Montague county boasts of having the smallest incorporated town in Texas. It is Belcherville with 94 residents, according to the 1940 census. This number represents a gain of nine citizens in 10 years.

**OUR TRAFFIC PROBLEM**  
"Our traffic problem," said State Police Director Homer Garrison, "is not so much one of eliminating the wildly reckless driver as creating an appreciation of everyday courtesy on the streets and highways on the part of our citizens."

**MOTHER AND DAUGHTER SCHOOL MATES**  
Mrs. L. C. Ott and her daughter, Dorothy, both of 227 Carew Street, San Antonio, are school mates at San Antonio Vocational and Technical school. Mrs. Ott is studying garment manufacturing while Dorothy is taking a course in secretarial work.

**HOUSTON STOPS 'EM DEAD**  
Other Texas cities have reports of speedsters. But Houston stops 'em dead and slaps 'em fine. Four Houston cracking patrolmen arrested 525 motorists for speeding in the month of February.

**NEW OIL FINDS IN 1940**  
The American Petroleum Institute has issued a report on new oil finds discovered in 1940. The total is 2,066 Texas leads with 125. Others are Oklahoma, 46; Kansas, 33; Illinois, 30; and Michigan, 26. More new oil fields were discovered in 1940 than any previous year.

**WOOL-SCOURING PLANT**  
Texas' fourth wool-scouring plant was opened, April 3, at Marble Falls, (Burnet county).

**ELECTROCUTED IN BATH-TUB**  
Ralph Gray, radio mechanic, was found dead in a bathtub at Greenville, (Hunt county). A radio receiving set was strapped to his head, and it is assumed he had connected the set to a light socket, then stepped into the bathtub to listen to a program while bathing.

**BILL PROTECTS CARRIER PIGEONS**  
A bill has been passed by the House of Representatives making it unlawful to kill carrier pigeons. In World War I carrier pigeons were used by the U. S. Army as messengers.

**SAN JACINTO SWORD LEFT TO SON**  
A copy of General Sam Houston's sword, which he used in the Battle of San Jacinto, was left to his son, Sam Houston, Jr. The sword is now in the possession of the Texas State Museum.

**RAISES CHUKAR QUAIL**  
Raising chukar quail is the hobby of W. S. Seaborn, of Refugio, (Refugio county). The chukar, a game bird whose habitat is India, has the body structure, the resemblance, and is four times larger than a bobwhite quail. Seaborn hopes the chukar will thrive in this climate and be plentifully distributed throughout Texas.

**SECRET WEAPON**  
A man has a secret weapon. It is a very powerful one.

**BY BOUGHNER**  
A man has a hobby of collecting old coins. He has a large collection of coins from all over the world.

**WELL, WELL, WHAT HAVE WE HERE, A TANK?**  
A man has a hobby of collecting old coins. He has a large collection of coins from all over the world.

**THAT'S GOOD! HAW HAW - G'WAN. SHOOT ME ONCE**  
A man has a hobby of collecting old coins. He has a large collection of coins from all over the world.

**SURE, SURE! GO AHEAD SHOOT ME**  
A man has a hobby of collecting old coins. He has a large collection of coins from all over the world.

**OKAY**  
A man has a hobby of collecting old coins. He has a large collection of coins from all over the world.

**KLONK**  
A man has a hobby of collecting old coins. He has a large collection of coins from all over the world.

UNSAVY AT TRAINING BASE—Gene Tunney, left, retired boxing champion, now serving as athletic instructor for Southern Naval training base, is greeted by Captain Ava Bernhard, as he dropped in on his 51st birthday at Corpus Christi, Texas, which was dedicated recently.

# A LITTLE FUN Jokes to Make You Laugh

**Harmless Infection**  
**Army Medical Examiner:** "Ever have any trouble with dyspepsia?"  
**New Recruit:** "Only once. That was when I tried to spell it."

**Backfiring**  
**Mister:** "I sure miss that old cupido since it's gone."  
**Misus:** "You missed it before. That's why it's gone."

**Discretion First**  
**Small Betty:** "Did you know there was a burglar in our house last night?"  
**Teacher:** "Goddess me, no! And what did your father do under the circumstances?"  
**Betty:** "Oh, he wasn't under the circumstances. He was under the bed."

**Boom Times**  
**Friend asked:** "How's business?"  
**Friend:** "Lousy. I bought a new car, a new refrigerator, and a new washing machine. I'm broke."

**Not Warned**  
**Jones:** "I was sitting in a chair when I saw a woman in a nightgown come in and take a bath. I was so shocked that I hid behind a door."  
**Helen:** "Why didn't you tell me?"  
**Jones:** "I was afraid you'd tell me."

**Couldn't Say**  
**Mr. Jones:** "I was in a restaurant when I saw a man in a tuxedo sitting at a table by himself."  
**Mr. Smith:** "What was he doing there?"  
**Mr. Jones:** "I don't know, but he looked like a waiter."

**Sure-Footed**  
**Mr. Jones:** "I was in a restaurant when I saw a man in a tuxedo sitting at a table by himself."  
**Mr. Smith:** "What was he doing there?"  
**Mr. Jones:** "I don't know, but he looked like a waiter."

**Incomprehensible**  
**Mr. Jones:** "I was in a restaurant when I saw a man in a tuxedo sitting at a table by himself."  
**Mr. Smith:** "What was he doing there?"  
**Mr. Jones:** "I don't know, but he looked like a waiter."

**Avoid High Temperatures**  
**While hanks probably do not suffer as frequently from fever as we do from chills, it is nevertheless a wise practice to avoid high temperatures. This is particularly true for chickens, which are very sensitive to heat. If a chicken is kept in a warm, dark place, it will become fat and fleshy, but it will also be more susceptible to disease. To keep chickens healthy, they should be kept in a cool, well-ventilated place. This is especially important during the summer months when temperatures are high. If you have a chicken house, make sure that it is properly ventilated and that the chickens have access to shade and water. If you are raising chickens in a small space, such as a backyard, it is important to make sure that the chickens have access to shade and water, and that the ground is kept cool and moist.**

**Feed Hoppers and Water Containers**  
**Feed hoppers and water containers are the most popular spots for the range for the pullets. All of them will be around the equipment at some time during the day. As a consequence, the ground around them will become quickly saturated with their droppings and contaminated. In order to protect the birds, move the feed hoppers and waterers often—say once a week, more often if the range is not well covered with grass.**

**Clean Up Range Shelters**  
**Nice weather will soon be here, and the range shelters will need to be cleaned up. Make sure that the shelters are free of droppings and are well-ventilated. This will help to keep the chickens healthy and happy.**

**FREE informative booklet, "How To Make More Money With Livestock and Poultry." It costs you nothing and may save you a lot. Write to: M. BURRIS FEED MILLS, Fort Worth, Dallas or San Benito.**

**OLD GAGS THAT FIND NEW VICTIMS**  
**Jimmy, the new office boy, never saw type lice. He was curious to know what they looked like. So one of the printers fixed up a galley with two blocks of type on either end. In between the blocks of type was a puddle of ink water.**

**Getting Hungry**  
**Sentinel—(at 4 a. m.): "Halt! Who goes there?"  
 Voice in the Dark: "Cook with doughnuts for breakfast."  
 Sentinel: "Pass cook. Halt, doughnuts."**

**Miscalculation**  
**Guest as they approach the house:  
 "Ah, I see your son and daughter out on the porch to welcome us."  
 Host: "Well, not exactly. The girl in the short dress is my mother, and the young fellow in slippers is my wife."**

**Constant drip of water**  
**Where was the faucet? The water was dripping down the wall. The constant drip of water was a nuisance. It was a constant drip of water. It was a constant drip of water. It was a constant drip of water.**

**Gentle Persuasion**  
**He was a man of peace and when he saw a man fighting in a ring, he walked through the crowd and persuaded the contestants to stop.**

**Crucify Mankind Upon a Cross of Gold** lost to McKinley's "Sound Money."

**MAPLE-SUGAR-TIME**  
 Maple-sugaring-time is now on in full swing in the New England States. Maple sugar and maple syrup are big business to certain sections of the north. Vermont, New York, Ohio, New Hampshire, Maine, and Wisconsin are the leading producing areas. The peak production was reached in 1915 when syrup enough to make 100,000,000 pounds of sugar was taken out of the maples. The maple sugar industry is now a big business and is expected to continue to grow.

**SLOGANS**  
 Slogans arise in critical times like the present. "Thumbs Up" inspired by the peace movement. "No More War" inspired by the anti-war movement. "Be An American" inspired by the patriotic movement.

**Crucify Mankind Upon a Cross of Gold** lost to McKinley's "Sound Money."

## THE SMOKE OF SLOWER-BURNING CAMELS GIVES YOU EXTRA MILDNESS, EXTRA COOLNESS, EXTRA FLAVOR

**28% LESS NICOTINE**

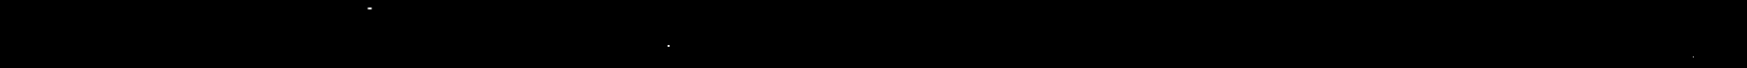

than the average of the 4 other largest-selling brands tested—less than any of them—according to independent laboratory tests of the smoke itself.

**THE SMOKE'S THE THING!**

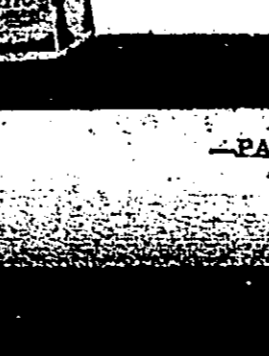

IT'S NEWS! Not the picture kind—but news of first importance to smokers like you.

Independent laboratory findings as to Camels and the four other largest-selling brands tested—the four brands that most smokers who are not Camel "fans" now use—show that Camels give you less nicotine in the smoke. And, the smoke's the thing! But that's only the start of the story! Camel brings you the extra mildness, extra coolness, extra flavor, and extra smoking of slower-burning costlier tobaccos. Get Camels your next pack.

Dealers feature Camels at attractive carton prices. Why not get a carton—for economy and convenience?

TEXO FEEDS

By burning 28% slower than the average of the 4 other largest-selling brands tested—slower than any of them—Camels also give you a smoking plus equal, on the average, to

5 EXTRA SMOKES PER PACK!

# TEXAS FARM NEWS REPORTS

Of 20,000,000 bushels of onions that are consumed by the citizens of the United States yearly, Texas supplies more than 3,000,000 bushels, according to report.

Troops of the Fort Bliss (H. Paso) area drink lots of water. A plentiful supply of water is being pumped to the area from the Rio Grande.

The average production of the Cass county area is about 1,000 gallons per acre and it takes approximately 100 bushels of seed to produce one acre of alfalfa.

At the University of Texas, a study is being made of the effects of the Texas climate on the growth of various types of alfalfa.

A produce publication has announced three important additions to the vegetable family. These include the rhubarb chard, a Swiss chard which looks like rhubarb; the pure alabaster white tomato, and a new, tender pod bean, fiberless and stringless.

Leon E. Wenger, of the Bureau of Plant Industry, has found that soaking of buffalo grass seed in water from 2 to 4 days, followed by immediate drying, largely overcomes the delayed germination characteristic of this seed.

A seven-day breeding experiment with the Texas variety of alfalfa was conducted at the University of Texas campus. The study was headed by R. R. DeBorja, assistant professor of alfalfa and clover, and was conducted in cooperation with the Texas Experiment Station at Amarillo.

### GIANT MEN

Macnaw, the "Russian Giant," Macnaw stood nine feet three inches, and weighed 600 pounds — he was skinny as a rail. His acromegalic hands measured 24 inches in length and 11 inches in width.

John Middleton, born in 1752 at Hale, Lancashire, England, was of the same height as Macnaw. Middleton was measured by Oxford students and teachers, and many drawings were made of him. Macnaw spent much of his life in the United States, and was measured many times.

The British Isle seems to have produced the greatest number of giants of both fact and fiction. There is the story of the three giant brothers known as Og, Gog and Magog, who inhabited the Tower of London, and the middle of the 18th century. All of them were said to be eight feet high. The story of Hiram, a giant of the present time, is also well known. He was said to be eight feet high, and his feet were six inches wide. He was said to be a half foot tall.

These fine specimens, Dr. Cook says, had great endurance and bull strength. They were nearly wiped out during the war between Chile and Argentina. The Onas were sheep herders, and after the war the white men shot and killed most of them, and the sheep hid in the mountains to the south and some of them are still there for all we know.

Perhaps the world has more giants than we know.

## Our Boys and Girls

AUNT MARY, Editor, 1808 Ashland, Fort Worth, Texas.

### DEAR BOYS AND GIRLS

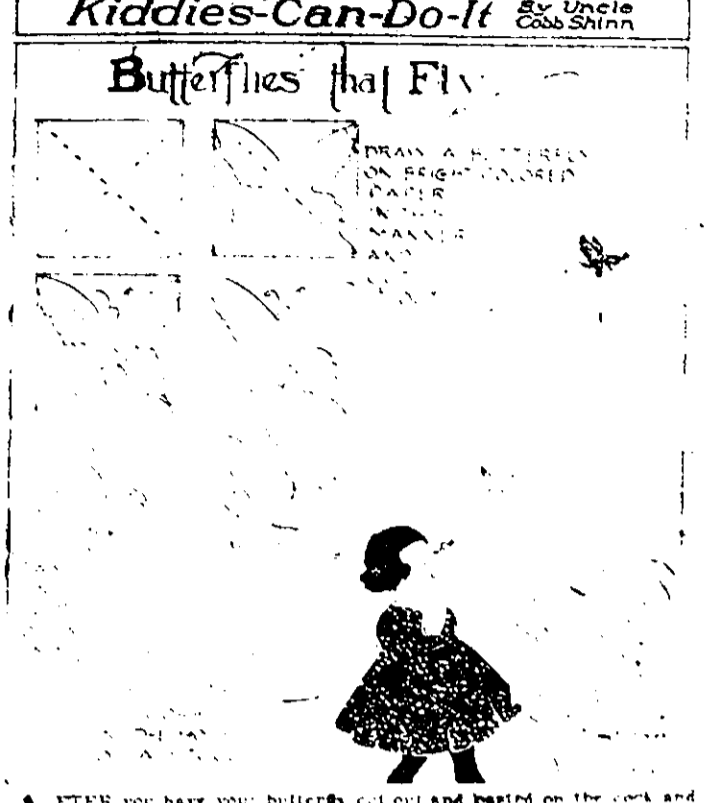

I have received many fine letters recently, and I want to thank each and every one for them. It makes me happy for you to write me.

These letters and post cards covered a lot of worthwhile subjects. A girl writes from Oklahoma, Anna Mae, who sent me some very good suggestions. (See this page.) Anna Mae suggested that we devote a page to the name of the month. What do you think of this suggestion?

Another suggestion for a page was sent by a girl from Texas. She suggested that we have a page for the month of the year. This is a very good suggestion, and I will try to do it.

There are many other suggestions that I will try to do. I will try to do them as soon as I can.

Yours truly,  
Aunt Mary

After you have your butterfly net out and pasted on the back and placed in the end of a spoon, place the spoon in your mouth and blow sharply. The butterfly will ascend rapidly to the ceiling and float slowly down.

could do it now. But something was wrong, something had broken, and he could not mend it.

"What shall we do?" sobbed Rene.

"There's but one thing to do and that is to turn the hand wheel," said Paul.

"But you cannot turn the wheel alone."

"No, but we could turn it together. Remember we are the children of the Light," said Rene.

"I'll help," said Paul.

So, seizing the great hand wheel, they began to turn. The light moved around and around, and they were very happy. Now the sailors would be able to charter their ships' course so as to avoid crashing on the rocks.

Four hours later they found the light nearest endlers. Two little points of hands were blistered. At the arms sashed. Minutes passed. Hours passed. They were so tired they turned the light off. Outside the steering gear and great waves lashed the light.

Below the water was a great light. For father, mother, Paul and Rene were children of the Light. Outside the steering gear and great waves lashed the light.

Below the water was a great light. For father, mother, Paul and Rene were children of the Light. Outside the steering gear and great waves lashed the light.

## OLD TIME CHARM OF LACE

There is a demand for lace that is not only beautiful but also practical. Lace is a charming addition to any home. It is a craft that has been practiced for centuries. The art of lace-making is a delicate and intricate process. It involves the use of fine threads and specialized tools to create intricate patterns. Lace is used in a variety of ways, from decorative accents to functional items like doilies and table linens. The charm of lace lies in its timeless beauty and the skill required to create it.

## DEEP PART OF AMERICAN DEFENSE

The deep part of American defense is a complex and multifaceted issue. It involves the protection of the nation's resources, infrastructure, and population. This includes the development of advanced technologies, the training of a skilled workforce, and the implementation of robust security measures. The deep part of defense is essential for ensuring the long-term stability and prosperity of the United States. It requires a commitment to innovation, research, and development. The deep part of defense is a critical component of the nation's overall defense strategy.

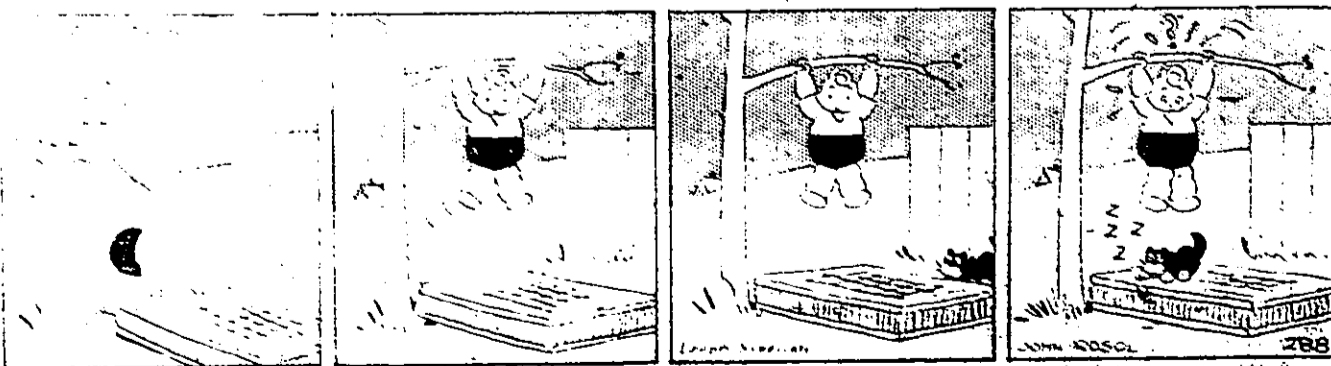

## NEW HAIR DO, A SPRING TONIC

A new hair do is a spring tonic for the mind and body. It is a refreshing change that can help you start the new year with a clean slate. A new hair do can boost your confidence and improve your mood. It is a simple yet effective way to refresh your look and embrace the new season. A new hair do is a spring tonic for the soul.

## WE DINE

We dine on a variety of delicious dishes that are both healthy and satisfying. From fresh seafood to hearty meats, there is something for everyone. We dine on quality ingredients and use traditional cooking techniques to create our signature dishes. We dine on a variety of cuisines, from classic American to international flavors. We dine on a variety of occasions, from casual family meals to formal dinners. We dine on a variety of beverages, from refreshing drinks to rich wines. We dine on a variety of desserts, from simple cakes to elaborate pastries. We dine on a variety of experiences, from the comfort of home to the excitement of a restaurant.

## A MOTHER OF THE WILD

Whenever the Santee river beside my South Carolina plantation goes into flood, I spend much time on its banks getting my swampland and water out of danger. On one such expedition, I witnessed the following behavior of the wild animals of the region.

She was a wild cat, a large one, with a long sharp snout, she had gotten across. When I started her from my swampland she was transported into a log wedge, into the catch of a water oak, and handed up to her tank were nine little ones. The savage old creature knew well that the log would soon be swept away by the fast rising water. She could easily have saved herself—wild raccoons can swim miles, but she would not leave her babies to perish.

Had a mile across the water stood a piece of high ground, she looked at it as if contemplating the possibility of swimming to it. Her eyes were fixed on the ground, and she made a great effort to get up on it. Next she began to swim about to show her babies how easily she was done, and clambered back on the log. Again granting me my passage, she came up to the water's edge, and began making a great noise with her swampland as the ridge, keeping the tiny pigs in the lee of her great back to break the force of the current for them. It was beautiful to watch that grim old monster mothering her babies across the threatening tide to safety.—Archibald Rutledge in Field and Stream.

## CURIOUS FACTS

Insurance statistics show that twice as many teachers die between 20 and 30 as do married men of that age. The five most popular names and their numbers are Smiths, 1,305,891; Johnsons, 1,124,200; Browns, 730,500; Williams, 684,700; Jones, 625,800. It costs three times as much to drive a car at 60 m.p.h. as at 40. Sixteen States have no speed limits, yet have no more accidents than the other 32. Shortest distance across the United States is from Charleston, S. C., to San Diego, Calif., 2,150 miles.

## COMPARATIVE SALARIES OF GOVERNMENTAL HEADS

The President of the United States gets \$208,500 a day, and it seems like liberal day wages, but isn't a drop in the bucket compared to the pay of some European rulers. The last czar of Russia had an average income of about \$25,000 daily. The last sultan of Turkey received \$18,000 a day. Napoleon III of France used to get \$14,219 every twenty-four hours and Queen Victoria's pay check averaged \$6,271 a day.

I COST AN AVERAGE FAMILY ONLY 2¢ A WEEK!

PLAIN - OR IODIZED

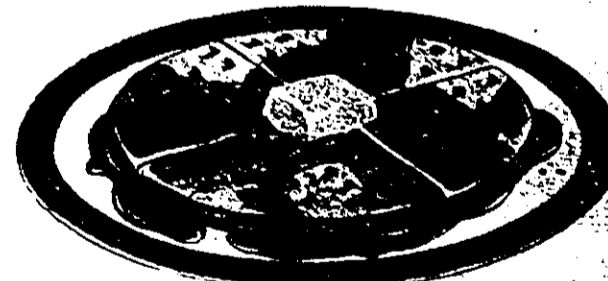

## NUTS

Although the United States has always imported quantities of nuts, we have an increasing amount of our own. It is expected that this year there will be \$6,000,000 worth of nuts, mostly of English walnuts and filberts and all of the black walnuts. There are endless ways of using nuts in cooking. Besides making nut pies and sundaes, even more delicious than these, there are many other ways. There have been rumors when cooked as a delicacy, that he is planning to retire, use the ground meat that he has given no indication goes into it, either, that they are true. The nuts are chopped, bound Friends express the opinion with a heavy cream sauce that he will remain on the and, dipped in the cream, court as long as he is able to crowned quickly in deep fat, do the work.

## CHARLES EVANS HUGHES

Charles Evans Hughes has always imported quantities of nuts, we have an increasing amount of our own. It is expected that this year there will be \$6,000,000 worth of nuts, mostly of English walnuts and filberts and all of the black walnuts. There are endless ways of using nuts in cooking. **NOTICE**

The annual spring uprising of measles prevalence is evident from reports to the State Health department by more than 300 city and county health officers all throughout the state.

The prevalence of measles was 338% higher than the normal prevalence for last week, figured on a seven-year median, according to Dr. Geo. W. Cox, State Health officer. There were 1410 cases reported for the 11th week of the year, ending March 15, and the median number of cases for the week over a seven-year period was 420.

Since measles is a disease which should always be given careful nursing, with isolation of the patient to protect other against the disease, and since it is characteristic of the disease that it usually become more prevalent in the spring season, the State Health department issues this warning to the parents of Texas children—guard your children against measles, and if they contract the disease put them to bed immediately, call your family physician, and see that cases are promptly reported to the local health department, and that your home is properly placarded.

The stage of measles, preceding the eruption is frequently mistaken for a common cold, and as the disease is highly communicable at this stage the germs are widely spread because, as a rule, we take no common-sense precautions either in treating or protecting others from a common cold. Measles cause a congestion and inflammation of the respiratory tract, the delicate membrane that lines the eyelids and the accessory sinuses—these conditions make complications of the disease fairly common. Complications may take the form of bronchitis, pneumonia, and acute inflammation of the middle ear.

This disease is particularly dangerous in the very young children. It is a serious mistake to expose a small child to measles so that he will have it before school age, because the mortality rate for the measles and its complications is very much lower among children of school age than younger children.

The very young children who have recently recovered from respiratory diseases or who are undernourished should be given the opportunity for protection if they are exposed to measles. Prevention or modification of measles is a very successful procedure if the physician is given opportunity within a short time after exposure to the disease.

**CLASSES IN WELDING**

A class in welding for men who want to qualify to work in Naval Ordnance will start at Texas A&M college about the first of April. The enrollees must be at least 18 year old, physically fit, and mentally able to learn to do welding jobs. They must also have had at least one year of experience in some metal work occupation.

**GENERAL, we shall have to buy gloves together.**  
Gen. Philip Kearney

Kearney has his left arm in the Mexican War in 1847. During the Civil War, eleven years later, he saw General Oliver Otis Howard being wounded in the field with his right arm shattered, and could not forbear this shout of sympathy to him.

# WOODVILLE NEWS

Mrs. Beatrice Frances Thomson is one of the 250 Bluebonnet Belles who will appear at the annual university round up, in color and ball in Austin, Friday night.

Rev. W. W. Hardt was in Galveston early this week, and while he is able to be at the services next Sunday, B. V. Ferguson will speak for him. Rev. Hardt expects his son to be here next week and preach on Sunday. One service will be the union-faster service.

Mrs. W. H. Galbreath and daughter Jean, drove to Huntsville Sunday and the son, John, joined them for a drive to Old Washington to see the bluebonnets. They found about as many bluebonnets as visitors found dogwood in the Woodville country.

Mrs. E. F. Baskin and children and Milton Watts of Beaumont, Mrs. Milton Watts, Mrs. Robert Watt, Mrs. Vernon Ramsey, all enjoyed dinner with the parents Mrs. Hiram Watts on Sunday of last week.

Mrs. C. C. Greer was here last week and moved her household goods to Beaumont.

Mrs. J. B. Faircloth of Spurger, was a county seat visitor Monday. Athle Mae Smith with the child, Charley Smith and family of Houston, visited here early last week. They plan to spend the week with Woodville relatives.

Mrs. J. B. McAllister of Liberty, visited the father, G. C. McAllister, in town of last week. Mrs. Lige Harding made a business trip to Beaumont Tuesday.

Do not forget that the local CCC camp was established here just 8 years ago this week and is being celebrated by various events at the camp. Open house will be held on Saturday and you are invited.

Mrs. Joe Wickline of Kirbyville, visited in Corrigan and Woodville Sunday. Mr. Wickline states that his mother, Mrs. T. Craver is some better and the family hope to bring her to Woodville in the near future. Mrs. C. M. Easley has returned to Washington, D. C., but Mesdames Rock and J. M. Rogers will stay until Mrs. Craver is able to make the trip to Texas.

Mrs. Wayne Parker of Beaumont spent Sunday with Mrs. Bryan Martin. A dinner was enjoyed at the highway park celebrating the birthdays of Mrs. Parker and Mr. Martin.

J. R. Fisher of Doucette was a county seat visitor Friday.

**SQUAREING THINGS**

"Now girls," said the eating house proprietor, "I want you to look your best today. All a bit extra dab of powder to your cheeks and take a bit more care of your hair."

**DEMONSTRATION CLUB**

The ladies of Spurger met Monday afternoon of March 24 in the agriculture building of the school for the purpose of organizing a Home Demonstration club. After a thorough discussion as to the purpose of the club, and benefits derived from it by Miss Johnson, home demonstration agent for this county, the club went into the election of officers. The officers elected for the ensuing year are: Mrs. Q. B. Culpepper, president, Mrs. Scott I. Willis, secretary and treasurer; Mrs. Herschel McClain, Council delegate; Mrs. Bruce Jordan, parliamentarian and Mrs. Jack Jordan, reporter.

# WOODVILLE NEWS

The drive to repeal the Texas chain store tax, which has been gathering momentum since the passage of the chain store law in 1936 and now is postponing the measure to take it out, please to press for its passage at the earliest opportunity. The opportunity of its passage is now in the hands of the legislature.

I believe the majority of voters feel that the chain store law is a fair and just law, and that it is a mistake to repeal it. I believe the majority of voters feel that it is a mistake to repeal it.

Representative Sam Hanna Bell, who originally voted for passage of the chain store law in 1936 and now is postponing the measure to take it out, please to press for its passage at the earliest opportunity. The opportunity of its passage is now in the hands of the legislature.

Mrs. C. C. Greer was here last week and moved her household goods to Beaumont.
