IS IT not a fact each new
 industry for Texas means more
 employed help, more homes and
 a greater Texas? Texas appears
 to have unlimited stocks of petro
 leum, together with a great area
 as yet undeveloped. The danger
 of war becoming a reality not
 only in munitions, but in actual
 human conflict by the army, will
 have a tendency to further exploit
 the entire state.

THE ROCKLAND
 seems to be getting a lot of en
 couragement these days and the
 fact that it is now in the filing
 process is a law. It is a test
 case of the state's interest in
 the protection of its citizens.
 The bill is now in the hands
 of the Governor and will be
 presented to the Legislature
 in the near future. The bill
 is a very important one and
 should be given the most
 careful consideration.

IF THERE is a thing
 that is more important than
 anything else in the world
 today, it is the need for
 a strong and united
 government. The people
 of this country are
 entitled to a government
 that will protect their
 rights and interests.
 The only way to achieve
 this is by electing
 representatives who
 will stand for the
 principles of justice
 and freedom.

REMEMBER BACK
 in the days when
 the country was
 a united whole,
 when the people
 were united in
 their purpose and
 their action. It
 was then that we
 achieved our
 independence and
 our freedom. It
 was then that we
 became a great
 nation. It was then
 that we became
 a world power.

ANOTHER THING
 that is important
 in the world today
 is the need for
 a strong and
 united government.
 The people of
 this country are
 entitled to a
 government that
 will protect their
 rights and inter
 ests. The only
 way to achieve
 this is by elect
 ing representa
 tives who will
 stand for the
 principles of ju
 stice and free
 dom.

Old Man Texas is today
 looking ahead and planning.
 Beside the great farming and
 ranching country which Tex
 ans have built, he sees a new
 industrial empire here.

Already the start has been
 made. Some industries, such
 as petroleum, are now show
 ing what can be done to
 utilize Texas' vast natural
 resources. Today this indus
 try refines with Texas labor
 over four-fifths as much oil
 as the State produces. Its

products make up nearly one
 half of all Texas manufactur
 ing. Altogether petroleum
 provides the living for al
 most one-sixth of our people.
 But this is only a beginning.

Each new industry means
 more jobs. It makes added
 tax values for our State and
 local governments, bigger
 payrolls for our workers,
 and greater prosperity for
 you and every other Texan.

SAM HOUSTON CO-OP PLANS LINE EXTENSION

Further extensions of R. F. A. lines in counties served by the Sam Houston Electric cooperative are in prospect, according to M. T. Potts, superintendent in charge of the construction of an additional 220 miles of lines in Washington county. Final approval of the project is expected in approximately 200,000. It includes the construction of extension lines to the present system will be 100 miles in Hike, Armstrong, Liberty, Walker, Montgomery, Hardin and Tyler counties.

THINK YOU ARE A GOOD SHOT?

Maybe you are better than the average when it comes to hunting ducks and geese, but if you are just an average hunter, your ducks are costing you considerably more than they are worth. A survey made by a game department biologist of 308 hunters during last season showed that they fired 10,765 shells in bagging 2,205 ducks. That is an average of 4.4 shots per duck. A total of 196 geese hunters fired 1,199 times to bring down 124 geese for an average of 9.6 shots per goose. Maybe you're not so cheery now. We're not!

FATE REUNION SUNDAY AT WOODLAKE

The annual Fate reunion will meet at Woodlake Saturday and Sunday. A big gathering is planned. Sunday Rev. Carraway of Beaumont will speak and Mrs. B. K. George also of Beaumont will bring a special program in music. Clyde Goens of Bryan, president of the family organization will preside.

FOR RELIEF

DR. MILES ANTI-PAIN PILLS

If you never have had any of these pains, be thankful. They can take a lot of the joy out of life.

If you have ever suffered, as most of us have, from a headache, the next time try DR. MILES ANTI-PAIN PILLS. You will find them pleasant to take and unusually prompt and effective in action. Dr. Miles Anti-Pain Pills are also recommended for Neuralgia, Muscular Pains, Functional Menstrual Pains and pain following tooth extraction.

Dr. Miles Anti-Pain Pills do not upset the stomach or leave you with a doped, drugged feeling.

NOTABLE NEWS EVENTS IN PICTURES

LIKE FATHER, LIKE SON—Preparations for opening of trotting season at Roosevelt Raceway, Westbury, Long Island, find little Jimmy Moril, age 6, son of black stallion, being his bet.

PEACE QUEEN—As a token of hope for world peace, Mary Gibson of New Rochelle, N. Y., will reign as "Peace Queen" at College of New Rochelle festival.

JUST NUTS ABOUT IT—This little squirrel who fell from a nest in Rochester, N. Y., before his eyes were open, doesn't miss his ma much. Geraldine Mensing keeps him happy with "store milk."

"STRIP TEASE"—This started out to be a "strip-tease" act by Wise County, Texas, farmers, protesting disparity between farm and general commodity prices, but churchmen called a halt.

BLACK SHEEP MAKES GOOD—The black sheep of the human variety is usually a ne'er-do-well, but the black sheep of Rawlins, Wyo., herd provided the black wool for these black blankets to be used as black-out precaution blinds over windows in England. Cowgirls help pack 'em.

BUCK PRIVATE BILL MARTIN—swapping his \$1,000-a-month job as head of the New York Stock Exchange for a \$21-a-month job as buck private in the army.

SAND, NOT SEA—African desert assumes all the appearance of a choppy sea as Nazi infantrymen advance toward Egyptian border in North African campaign. Wind-blown sand and glare of sun accounts for what seems to be foamy wave in foreground. (Passed by German censor).

MOST BEAUTIFUL—Mary Ann Keiser, age 4, daughter of Dr. and Mrs. Harry R. Keiser of Chicago, has been named "America's most beautiful child" in contest sponsored by group of national magazines.

CURTAIN COMES DOWN, GOES UP—It was curtains for Dizzy Dean, pitcher, as he packed up in Chicago Cubs' dressing room following "retirement," but immediately he set out on a new career as coach, as club officials rehired him in that capacity.

JANE MORGAN, chosen as "Chili Pepper Queen" to rule over Riverside, Calif., De Anza Days celebration.

ON MEDITERRANEAN PATROL—Confidence in his ship and gun is expressed in the face of this Australian anti-aircraftman aboard H. M. A. S. Perth, one of the units patrolling the Mediterranean, scene of bitter fighting between German and English bombing planes and warships.

Restoring La Villita, Spanish Village in Texas

By W. N. BEARD
715 Jones St., Fort Worth, Texas.
(Copyright 1941, by the Southwest Magazine)

The city of San Antonio is restoring the little Spanish village of La Villita, situated on the east bank of the San Antonio river, within a few blocks of the downtown district.

Restoration plans will be available here and cultural with a view to modernizing the old buildings and streets. The village, founded in 1722, is a typical Spanish village with its adobe buildings and narrow streets. The restoration is being carried out by the City of San Antonio, with the cooperation of the National Youth Administration (NYA).

Texas, the Confederate States and the United States.

Drama of Stirring Events

A symbol of old and new world cultures, this little town has passed through a drama of stirring events. Through the centuries it has survived Indian raids, rebellions, epidemics, and the rise and fall of governments. Its homes have entertained Spanish viceroys, French missionaries, cavaliers, explorers and men prominent in the affairs of the Texas Republic. Deaf Smith, Santa Jacinto, Battle and others lived there with their young bride, Jack Hays, Indian fighter and ranger captain, General Edward Burdick and James Bowie were residents of La Villita. General Cos, nephew-in-law of Santa Anna, lived for several years in the house at the corner of the street. In this low, narrow adobe house were the headquarters of the Mexican army in 1835. It was here that General Cos was defeated by the Texas army in the Battle of San Antonio. The Mexican army was routed and the Texas army was victorious.

Strolling caballeros and señoritas wearing some of the native and Spanish dress.

Antonio was repeatedly attacked by bands of Apaches and Comanches at intervals over a period of 125 years.

Mixture of Races

As time went on the colonization of Texas brought to La Villita a mixture of races. In 1840 came German immigrants sponsored by Count Salinas-Braunfels, founder of New Braunfels. Some of the German families settled in and around Villita. In consequence a few of the Spanish buildings took on a Teutonic character as primitive little gardens replaced the tropic floriculture of old patios. Still other racial elements came—French and Polish—in the 1850's and 1860's.

By 1875 San Antonio's population was predominantly Anglo-American. An exclusive residential section grew up around La Villita, threatening to wipe it out. But against this modern encroachment Villita kept its Latin atmosphere. Enough of the old Spanish buildings remain today to form a nucleus for restoring in whole and in part the Villita of early days. This work, initiated by Mayor Maurer, is now going on under joint financial support of the NYA and the city of San Antonio. The Villita out-

stance, as adopted by the City Commission, is as follows:

"Recreating the Little Spanish Village For the Promotion of Understanding and Peace between the American Nations; To preserve Spanish and Southwestern Culture; To foster Arts and Crafts."

An Expression of Pioneer Life

Restored Villita, according to the commission, is to have a definite plan, both as to physical layout and structural purpose. It shall be properly landscaped with Texas trees, shrubs and flowers and be a living example of early day Texas architecture, an expression of pioneer life as lived by our forefathers. Several of the restored buildings have art and craft shops in

which NYA boys have produced some fine specimens of baked pottery, tiles and hooked rugs. A modern museum building will be added for storing and exhibiting relics.

Plans also include a rock wall around the entire area, an inner court or plaza, fountains, acacias and other quaint shrubs and flowers. The inner court will represent a bit of old Mexico. Here Mexican food will be served while strolling caballeros and señoritas, wearing gay costumes, sing songs of their native land.

Sponsors of the Villita project deserve commendable mention for restoring this old historical landmark. Commercialism has already destroyed too many Texas landmarks. At one time the ground on which stands the Alamo was about to be sold and the Alamo building torn down. This cradle of Texas liberty was saved by the Daughters of the Confederacy who bought the land and building and made of it a shrine dedicated to Texas valor and to the 188 brave men who lost their lives defending it against an army of 10,000 Mexicans.

Old La Villita, San Antonio, founded by Spaniards in 1722.

Long-Range Heavy Bombers

By DAVID A. STEIN

ESSOLTE commander of the air by the democracies is America's goal. To attain mastery of the skies, President Roosevelt has asked Secretary of War Stimson to increase substantially the production of long-range, heavy bombers.

While details of President Roosevelt's plan have not been revealed, experts say that assembly lines in automobile factories will be used in co-operation with the airplane industry to produce 500 heavy bombers a month. Production of these huge machines of destruction will make it easier to guard vital sea lanes and will help to win the crucial battle of the Atlantic.

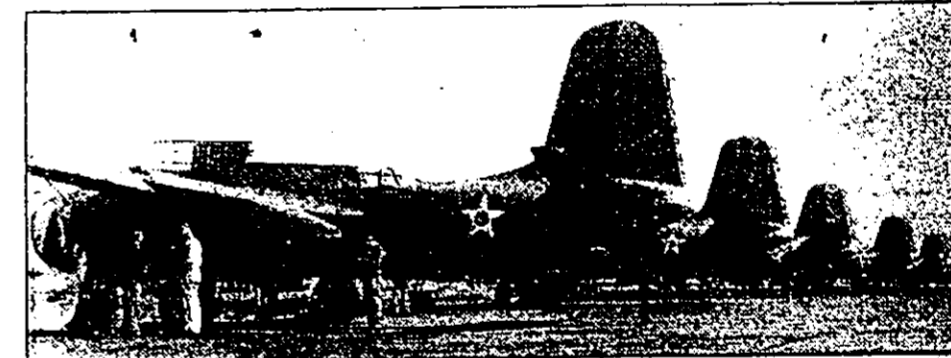

Bombardment planes now being produced for the Army Air Corps and the R. A. F. are of three general kinds: light, medium and heavy. Light bombers are designed to give fire support to ground troops by machine gun fire and

spread of 212 feet, and an overall height of 12 feet 9 inches. Four air-cooled engines generate 2,000 horsepower. Capable of attaining a speed of 200 miles an hour, the bomber has a range of 7,500 miles. It will transport a normal crew of 10 men and 18 tons of bombs. Its two tanks equal the capacity of a runway tank car.

B-19 Cost \$3,000,000

As a troop transport, it can carry 125 fully armed soldiers. Built at a cost of \$3,000,000, the B-19 took four years to build, and 500 engineers, technicians and mechanics were employed in its construction.

Other bombers, bigger and faster than most of those in Europe, have been designed by the Martin aeronautical engineers. The Martin B-26 is considered by many experts to be the most powerful military striking force yet designed, because it is faster than most

Fast and formidable Douglas A-20-A attack bombers line up ready for delivery.

bombs. Medium bombers are designed for bombardment and reconnaissance missions that do not require extreme range.

Deadliest of War Machines

Heavy bombers are designed for use over land or sea, and are the most powerful and deadliest of war planes. The army wants 4,000 heavy bombers, in addition to 3,000 light bombers (which have been used with telling effect as dive bombers) and 8,000 medium bombers.

The Douglas B-19 has set new standards for aeronautical engineering and is recognized as the last word in production of giant bombers. This huge aerial dreadnaught is armed with machine guns, cannon, and huge bomb loads.

It's an all-steel bomber, with a wing

pursuit planes and incorporates the latest features demanded of military aircraft.

As this war has become more decided, a naval and air war, the need for bombers has become more apparent. Pursuit planes are defensive weapons, vitally important, but unable to strike effectively at the enemy's bases of war-making power. The hope of an ultimate British victory rests very largely on the use of tremendous numbers of bombers to blast German submarine bases, German air fields, German factories and European transportation centers and channels.

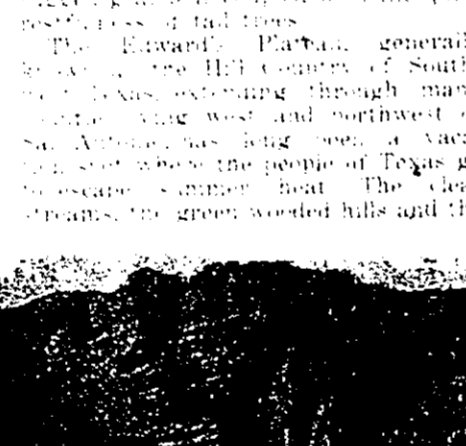

The battle for the island of Crete proves the great value of heavy long-range bombers. Britain had to withdraw her light fighting planes from Crete and substitute her bombing planes from Egyptian bases.

Texas Vacation Spots

By JACK WHITEHEAD

THE state of Texas is a vast and varied land, offering a wide range of vacation spots for every taste. From the rugged mountains of the Big Bend to the sandy beaches of the Gulf Coast, there is something for everyone. The state is rich in natural beauty and offers a wide variety of recreational opportunities. The state is also rich in history and offers a wide variety of cultural and educational opportunities.

One of the most popular vacation spots in Texas is the Big Bend National Monument. Located in the heart of the state, it offers a wide variety of recreational opportunities. The monument is home to some of the most beautiful scenery in the state, including the rugged mountains of the Big Bend and the sandy beaches of the Gulf Coast.

Santa Helena Canyon, on Rio Grande, in Big Bend.

Trans-Pecos region of West Texas is a high plateau of which several mountain ranges are prominent. It includes the Davis mountains, the Guadalupe mountains, and the Big Bend mountains. The region is a summer vacation spot and is becoming more popular every year as more people discover its distinctive charm.

Fort Davis, in the heart of the Davis mountains, is a museum for the traditions of great ranches that are numerous in this section. Here is the colorful cowboy country of the best western tradition in a setting of scenic values and exhilarating climate. The nearby Davis Mountains State Park with its picturesque Indian Lodge, the McDonald Observatory on the top of Mount Locke and old Fort Davis are of special interest to visitors.

The Big Bend is that vast mountainous region that is half encircled by the Rio Grande, which in threading its way through the mountains toward the Gulf of Mexico is forced to flow northward about a hundred miles. It is a land of deep canyons, of open plains and of rugged mountains, some heavily wooded on their upper slopes. Recently the Texas House of Representatives appropriated \$1,500,000 to purchase 788,000 acres of land in the Big Bend area for a national park.

Local Parks
The recreation departments in Texas are broadening their range of activities to take care of the greater demand for parks, provide playgrounds for children and adults. All of the larger cities in Texas have well-developed municipal parks, notable among these are Max Starcke Park at Sugar Land and Land Park at New Braunfels. Max Starcke Park opened in 1938 and has received national recognition for its completeness in equipment and program.

Variety of Scenery
Because of its enormous size, Texas has a great variety of recreational areas. Palo Duro Canyon, a deep colorful gorge in the high plains of the Panhandle, presents an extreme contrast to Caddo Lake in East Texas with its Big Cypress Bayou and moss-draped woodlands. Then there is Goose Island State Park on the Texas coast with broad white sand beaches and excellent salt-water fishing in contrast with the Davis Mountains State Park and Big Bend. Longhorn Cavern State Park, near Burnet in Central Texas, includes a wonderful subterranean cavern. Also there are numerous areas over the state that were the scenes of significant events in the early history of Texas. Some of these have been acquired by the State Park Board and are being preserved and restored as monuments to the early days of Texas.

Fort Parker, an old Indian fort, built of cedar, has been restored near Mexico (Limestone county). This was the scene of the Indian massacre of 1826 in which the famous Cynthia Ann Parker was captured. A recreational area is being developed nearby on a 700-acre lake that was formed by a dam on the Navasota river.

One of the recent acquisitions of the State Park Board is the old townsite of San Felipe de Austin on the Brazos river near Houston. San Felipe was established by Stephen F. Austin in 1823 as the seat of the first colony in Texas of the Republic of Texas. It is one of the most significant historical spots in the state.

Every month has drawn Texans every summer for many years. There are "ranch rambles" and vacation camps in this section, and some of the best-organized recreational camps in the South are located here.

"Piney Woods" of East Texas
East Texas has a pine forest belt about the size of the State of Indiana. There are four national forests in this region, which are recreational grounds. The United States Forest Service has developed a number of spots throughout the four national forests to meet local needs. Fishing is usually good throughout this forest region. Caddo Lake is considered one of the best fresh-water fishing spots in the South. The Big Thicket of Southwest Texas with its almost impenetrable jungle growth is of great interest to nature lovers. It comprises in a general way Polk county and the several surrounding counties. Much of this region is covered by the thick vegetation

Air Power Against Sea Power

By HANSON W. BALDWIN
(The New York Times)

The "strange, grim" battle for Crete, as Prime Minister Churchill called it, ushered in a new era in warfare and again underscored air power as the arm of the future. In detail, the German use of parachute troops and air-borne infantry against Crete was not essentially different from previous operations of those troops. But a glider-borne army was employed for the first time in war and the scope and daring of the operation—the first assault in which an army has been transported by air across a strait of ocean—marked a new employment of air power.

In Poland, in France, in Greece and Yugoslavia the plane was an indispensable ingredient of the Blitzkrieg technique. It was used to blast enemy airfields, railroads and communication lines and then as flying artillery to dive-bomb fortifications and lines of resistance and to provide the mobile "artillery" support to the Panzer divisions which is essential to their success.

Now along the entire Western Coast of Europe, air power has been used against sea power; dive bombers and torpedo planes and high-altitude bombers have smashed at the British fleet, in effect trying to extend German control of the land out into the high seas, trying to throw a blockade around Britain with the use of planes as well as submarines.

Against the Fleet

And it is in one sense for this reason

that the Battle of Crete is of such decisive importance, for the air-borne troops that have invaded Crete have leaped above the British fleet, they guard the sixty miles of water between Crete and the Peloponnese. The objective this time is not the Home Front, but an island important in strategic schemes of further conquest. But the air-borne invasion of Crete, nevertheless, has ignored sea power; sea power could not prevent it; land power could only fight it, on its own element, the land.

The Germans established a foothold on Crete by full utilization of all the capabilities of air power, and if they stay there it will be because of power.

Wherefore let him that thinks he standeth take heed lest he fall. 10:12.

CURRENT COMMENT

By A STAFF EDITOR

(Copyright, 1941, by the Southwest Magazine Co.)

Battle of Bombs

OMEWHERE in London recently members of the House of Commons met in temporary quarters. Their famous oak-paneled chamber in the Houses of Parliament had been wrecked by one of the war's worst nocturnal raids. The 100-foot-long room where the Commons held its debates since 1852 gaped open to the skies. Twisted girders, charred beams and the debris of masonry buried the green benches. The tables beside which Disraeli and Gladstone had stood and thundered. Other sections of Parliament's home—which sprawls over eight acres—were damaged, but less badly. Big Ben, atop the battered 320-foot Clock Tower, still rang out the hours.

Across the street from Parliament, houses incendiary bombs had burned through the roof of Westminster Abbey, the nation's shrine and spiritual symbol of the empire. The damage was not confined to London's architectural masterpieces and historical landmarks. On both sides of the gleaming Thames, which reflected a bright moon, the Nazi raiders had dropped their cargoes.

Britain's air forces struck at the German capital. The wings of the R. A. F. were wide and British bombers in their four-motored planes dropped heavy explosives and fire bombs on German cities. The targets were Hamburg, on the Elbe; Bremen, on the Helgoland; on Bremerhaven and coastal towns in France and the Low Countries.

"Black Gold"

The oil wells of the United States last year yielded 3,447,000 barrels of crude petroleum, valued at \$1,200,000,000. The world produced 104,285,000 barrels. The fields in Texas alone produced more than twice the amount of any foreign nation, and the state accounts for an one-third of the total output. A portion of this production is used in manufacturing, and the rest is exported. In the past few years, the United States has been producing more than a million barrels of aviation gasoline a day, according to a report entitled "American Youth and Aviation" which the organization released recently.

Raising model airplanes, many young persons were taught elementary lessons about full-scale aviation. Many of the boys and girls taking part in the work last year had not previously taken part in aviation activities, the report con-

as to the Standard Oil Company's refineries at Bayonne, N. J. The reason for Standard Oil's shift to the pipelines was a tanker shortage.

The shortage had arisen principally from the recent agreement of the oil companies to turn over fifty large tankers to the British government. Members of the oil trade said that the loss of the vessels—twenty-five have already been transferred—would strain the country's oil transportation facilities to the utmost, that the cost of the long overland haul would greatly increase petroleum prices in the East. At the request of the Office of Production Management, a fact-finding committee of oil men began a study of the petroleum transportation problem.

The British plea for the American vessels came, some thought, as a result of Germany's submarine drive against tankers during Britain's flag.

Our Man Power

The Selective Service system has been informed by the Census Bureau that there are in the United States 19,317,411 males of ages between 18 and 35, and 19,972,144 between 21 and 35. Of the latter group 14,456,682 are white and 1,615,452 are non-white.

The bureau put the man power of the country by year ages as follows:

Age	White	Non-White
18-20	1,000,000	100,000
21-23	1,100,000	110,000
24-26	1,200,000	120,000
27-29	1,300,000	130,000
30-32	1,400,000	140,000

Total	14,456,682	1,615,452

Air Training for Youth

Working through 600 local clubs and groups scattered throughout the nation, Air Youth of America, a national aviation organization devoted to training youthful interest in aviation, has begun a quarter of a million boys and girls of average age last year, according to a report entitled "American Youth and Aviation" which the organization released recently.

Raising model airplanes, many young persons were taught elementary lessons about full-scale aviation. Many of the boys and girls taking part in the work last year had not previously taken part in aviation activities, the report con-

China's Women Aid Soldiers in Field

American women physicians are attempting to get military status in order to serve the nation in case of war, but in China, according to a report received at headquarters of United China Relief, in New York City, hundreds of Chinese women already are at work as doctors, nurses, dressers, and pharmacists with the Chinese forces.

One Chinese women's unit, known as "Friends of Wounded Soldiers," the report said, supervises the soldiers' food and hygiene, directs mosquito and vermin control and even treats skin diseases.

Mobilization of women for war service under Mme. Chiang-kai-shek is the most extensive in history, the report indicated. They are functioning, it was revealed, not only as farm workers, in factories, as laundresses, cooks, teachers, dieticians, as caretakers for war orphans, the disabled and the aged, but even as soldiers, guerrilla fighters, saboteurs and army orderlies.

Struggle for the Mediterranean

Another chapter in the struggle for the Mediterranean, particularly the Eastern Mediterranean, has opened as Germany forced a new agreement with Vichy and Axis planes landed in Syria and Iraq and Crete. The stage apparently was rapidly being set for a full extension of the zone of war and for resumption of military operations on a large scale.

These unfolding events—separated by thousands of miles of sea and land—are nevertheless all related to the central struggle for control of the Mediterranean basin. It is a struggle that will be dominated in its next phase, particularly in the Eastern Mediterranean, by air power. It will be a struggle for air power and land power versus sea power and land power and air power, with the Germans striving seriously for the first time in this war to burst the bounds of the continent of Europe and to push beyond the British-dominated seas to Africa and Asia.

It will be a struggle complicated for both sides by long and inadequate lines of communication, some of them subject at their focal points to assault by the enemy. It will be a struggle for the domination of the oil fields of the Middle East, the cotton of Egypt and the foodstuffs of the Levant. It will be a struggle for the domination of the Arab world and for the naval bases at Alexandria and Haifa. It will be a struggle for Suez, for Crete, and for control of the sea-borne lines of communication in the Mediterranean.

In the struggle for the Mediterranean the fates of four nations—France,

Spain, Turkey and Russia—are intimately tied up, with Britain and Germany locked in a campaign that may eventually decide the outcome of the war.

Plastic Car in Making

If America's rearmament program sharply limits steel for automobiles, it is possible that motorists will drive cars with bodies made of entirely new materials, in the opinion of George W. Walker, industrial designer.

Because the nation must be kept on wheels, new body materials notably plastic, will be adapted rapidly to automotive uses by the motor industry, says Mr. Walker, stylist of a leading make of car and of many auto accessories.

Already there is a strong movement afoot to replace the steel in automobile bodies with plastic materials, if the needs arise. One evidence is Henry Ford's statement that his company plans to produce plastic-bodied cars. A Ford research scientist recently said such cars will appear "soon."

In the last half-decade scientists have made rapid progress in the development of strong plastic materials," Mr. Walker points out. "Plastics can make a distinct contribution to the cause of national defense by enabling the steel industry, now operating practically at capacity, to devote more and more of its output to urgently needed war materials."

U. S. Defense Bonds

Series E is a registered, non-transferable bond in denominations of \$25, \$50, \$100, \$500 and \$1,000. Matures 10 years from date of issue.

Series E bears 2.0 per cent interest a year, compounded semi-annually, when bond is held to maturity (10 years).

Issue price	Maturity value
\$10.00	\$10.00
25.00	25.00
50.00	50.00
100.00	100.00
500.00	500.00
1,000.00	1,000.00

This bond can be registered only—
(1) in the name of one individual, or
(2) of two individuals as co-owners, or
(3) of one individual and one individual as beneficiary.

Garner State Park

Garner State Park, named in honor of Texas' favorite son and former Vice President John Nance Garner, was officially opened May 1.

Garner Park, one of thirty-four Texas State parks, which vary in size from about fifty acres to the Big Bend Park, has within its boundaries of 840 acres a far greater variety of terrain, flora and fauna, water and boulders, than can be found in many parks of greater size. It is easily accessible to excellent highways and a scant thirty miles from "Cactus Jack" Garner's home town of Uvalde.

Five years ago the present site of Garner Park was a wilderness seldom penetrated by man. After five years of work by the CCC it is now a beautiful spot.

Sun, Water, Sky

A man is never too old and seldom too young to love the sun and the water—the skies, the seas, the lakes and streams. And of all the seasons, spring is the time when thoughts turn most strongly to these eternal forces. Spring is the sun's season, and the rain's. A spring sunrise is full of new leaves, new flowers, new songs and awakening life. A spring sunset is an evening of eager life pausing only in order to gather breath for another day.

Both sun and water have been guide and companion to man since time immemorial. Feuds and wars and pestilence and death may scourge the tribes of man, but overhead the sun continues its unwavering rounds and down from the hills the streams still run to the lakes, and to the seas where the tides never fail.

When the countryman reaches for a symbol of certainty he says, "As sure as the sunrise," or "As sure as water runs downhill." The sun warms man's blood and makes his fields flourish, it meters his time and warms his faith with its inevitability. The waters of the earth slake his thirst and cool and cleanse his body; they rise as clouds and fall as rain to nourish his crops. With the sun and the earth, the waters complete an elemental trinity of life.

When man first set forth to new

lands, his going was beside the waters or upon them. He traveled down the streams to the lakes and across the lakes to the lands beyond, and he traveled down the river valleys to the sea. Because the rivers were his highways, it was on their banks that he built his first towns, and on the seacoast beside the great waters of the earth he built his cities.

Towns and cities that still stand today remain on the banks of the same old rivers and streams, and the same old seas and oceans. The waters of the earth are the highways of the world, and the cities of the world are built on their banks. The waters of the earth are the highways of the world, and the cities of the world are built on their banks.

New Giant of Forest

After finding what is regarded as the world's largest forest, a team of Douglas fir trees lies in the Oregon forest, has been discovered by a team of forest workers.

The forest is located in the Oregon Coast Range, and is estimated to contain 500,000,000 cubic feet of timber. The forest is located in the Oregon Coast Range, and is estimated to contain 500,000,000 cubic feet of timber.

English Newspapers Smaller

English newspapers are becoming smaller and smaller. The average length of an English newspaper is now about 100 pages, down from 150 pages a few years ago.

The reason for this is the increasing cost of paper and the need to reduce expenses. The average length of an English newspaper is now about 100 pages, down from 150 pages a few years ago.

Army Has "Panzer Killer"

The development of a new anti-tank weapon, known as the "Panzer Killer," has been announced by the Army. This weapon is designed to destroy the armor of German tanks.

The "Panzer Killer" is a new type of anti-tank weapon, designed to destroy the armor of German tanks. It is a powerful and effective weapon, and is expected to be used in the near future.

Grass Root Reveries

By JOE GANDY
Winnboro, Texas

JUNE is a marriage month and June weddings are notable events. Brides are more beautiful in June and bridegrooms are more venturesome. However, a June wedding is no guarantee that a living can be made or that there will be peace and tranquility. Young folks fall in love more easily during May and June when flowers are blooming, birds singing and the moon riding romantically high and handsome. But the month to marry in does not matter. I have seen as many matrimonial ships go on the rocks as in June as in any other month. The marrying business is all a great gamble, there's no security for marital happiness or success. Best chance for success is to trust the Lord and bring home the bacon.

The moon rode high and lit up the "cyan scene with a soft glow."

This has been the wettest spring I ever saw except for back in the nineties when there was a spring so wet it bogged down some ducks' wife had been trying to raise. The other day I saw a plow in the ground for the first time in 90 days and had to learn all over again the art of plowing. You may laugh at me for saying that plowing is an art, but it surely is. It takes brains as well as brawn to plow a furrow just right. But plowing is not all a farmer has to do. He has to tussle with wicked weeds, grass, persimmon sprouts, cancerous mules, and hogs that break through the fence and eat up the truck. Despite drawbacks I still love farm or I would sell out, move to town, and loaf around a grocery store.

Vacation days are here again and the skeeters, flies and chiggers are getting ready for big business. I can't get out what good insects do, especially the kind that bite and sting us human beings. We have troubles

enough of one kind or another without fighting insects. I've come to the conclusion that the insect world is ruled by dictators. These dictators want to enslave the human race by force and make everybody either fascist or communist. I may be just jitters because of reading war news but it seems to me that Hitler and insects have ranged up on the democracies.

I see in the paper where a woman in California rented out her husband to another woman a whole year for \$10,000. That establishes a bad precedent. I clipped the article out of the paper so my wife wouldn't see it. I have a premonition she would rent me out a whole year for much less than \$10,000. In fact, I suspect there are wives who would rent out their husbands a whole year for 10 bucks each. And wives who support their husbands would rent them out a year for 10 cents each.

A scientist has published the statement that the sun will have used up all its fuel in 10 billion years and afterward the earth will be in total darkness. Scientists are always predicting some terrible catastrophe that's going to happen to the earth a few million years hence. When I was a child they talked about the stars falling and about some star that had broken away from its orbit and was headed straight for the earth at a thousand miles a minute. I used to lay awake nights afraid some star or comet would crash into the earth. But as I get older I feel surer that nothing of this kind will happen. The Great Creator of the universe sees to it that the stars and planets move in regular order according to a well-ordained plan. Man might take a lesson from the orderliness of the universe. But man thinks he is smarter than God and consequently makes a monkey of himself.

Nature can beat any florist raising flowers. For miles around our farm home the land is covered with millions of wild flowers. I don't know the botanical names of one-tenth of them but I know they look beautiful as the gentle breezes waft them to and fro.

While in a big bank the other day I watched the tellers handle thousands of dollars. They checked and tossed stacks of currency around like they were bundles of hay. As I looked on I got the impression that this money meant nothing to the tellers; it was just part of a day's work. They even looked bored by having to handle so much money. A little later I went outside and a colored boy politely asked me if he might shine my shoes. When through I gave him a dime—and a smile of supreme joy lit up his face as he pocketed the coin. There may or may not be a moral to this story. But it does show that money is relative; that thousands of other peoples' dollars are nothing compared to a dime that is your own and that you have earned honestly.

The din of city life drowns out the still small voice of nature. Wherefore, the other night I strolled to a quiet little spot out in the countryside and sat down on a tree stump. The moon rode high and lit up the sylvan scene with a soft glow. A lone whippoorwill sang at intervals. It all had a soothing effect after listening to the city's traffic horns, traffic police whistles and the raucous cry by newsboys of headline war news. There was peace all around me—no bombing, no machine-gunning. It's great to live in a country that lets you live your own life your own way. God bless America.

As I write this column the session of the Texas Legislature is about over. We have labored hard and have tried to do our best. Some things were not done as well as we wanted them done. But that's water below the bridge and we shall try to forget it. A legislative body faces two clamorous groups of citizens—the haves and the have-nots. Both groups take up most of a Legislature's time. If you are fair to both groups you are charged with being unfair to one group. That's what makes a representative "sweat great drops of blood."

The American Family By George

"We revisit our old spooning grounds after all these years and what do you do—start working on the car."

BRIEF TEXAS NEWS---from Over the State

STATE AND WAYSIDE PARKS

In addition to 47 State parks, there are 750 Wayside parks in Texas along its State highways.

COTTON RESEARCH WEEK

Spotlighting the Cotton Research Congress to be held in Waco, June 26 to 28, Governor W. Lee O'Daniel proclaimed the week beginning June 22 as Cotton Research Congress Week.

OLD AGE PENSION CHECKS

Old age assistance checks averaging \$10.40 each were mailed in May to 133,000 old Texans over 65 years of age. Welfare Director J. S. March, says that the April payment to 128,655 old Texans averaged \$14.55.

RAT ON TILWAD

W. Lee O'Daniel's signature on the bill authorizing the use of the Texas State System of the State's System. The measure was passed by the Legislature in 1936.

HEROIC LITTLE DOG

A hero's tale was told for the first time in the history of the State. A little dog named "Buddy" saved the life of a young boy named "Tommy" who was playing in a field near the home of the boy's father. The dog was found dead after the rescue.

LIGHTNING PRIES EGGS

Lightning struck a hen's nest in a field near the home of a farmer in the State. The lightning pried the eggs from the nest and scattered them in all directions. The farmer was able to recover most of the eggs.

260,000 TOURISTS VISIT TEXAS

Approximately 260,000 tourists visited Texas during the month of May. This is a record for the month and shows the popularity of the State as a tourist destination.

BANS WOMEN IN SHORTS

A city ordinance in a Texas town bans women from wearing shorts in public places. The ordinance was passed by the city council and is now in effect.

TWINS ATTEND CONVENTION

Two identical twins from a Texas town attended a national convention in New York. They were the only twins to attend the convention and their presence was a great attraction.

\$5,200,000 ZINC REFINERY

A \$5,200,000 zinc refinery is being built in a Texas town. The refinery is one of the largest in the world and will produce a large amount of zinc for industrial use.

CHEMICAL INGREDIENTS OF MAN

A list of the chemical ingredients of a human body has been compiled. The list includes elements such as oxygen, hydrogen, calcium, phosphorus, and iron.

BANK ROBBERY IN BANKLESS TOWN

A bank robbery took place in a town without a bank. The robbers entered the town and stole money from a private individual. The town is known for its lack of a bank.

"SNAKES SHALL CRAWL"

A religious gathering in a Texas town was held in a room with a snake crawling on the wall. The gathering was held in a room that was believed to be haunted by a snake.

PAPER MILL GETS ORDER FROM CHINA

A paper mill in a Texas town has received an order from China for a large quantity of paper. The order is for a large quantity of paper and is expected to be filled soon.

THE BOAT SAVED THE DAY

Rapkin Smith and Jimmy Davis, of Waco, went fishing at the junction of the Bosque river and Lake Waco. They caught one 2-pound bass that flopped into their boat, the only catch of the day.

DENSITY OF TEXAS POPULATION

There are 24.3 persons to every square mile in Texas, the Census Bureau reported in a survey of the density of our population. Little Rhode Island with 713,846 persons living on its 1,058 square miles still has the most dense population in the country—674.2 persons per square mile.

ARMY LEASES 4,000,000 ACRES IN EAST TEXAS

Government agents are now leasing approximately 4,000,000 acres of land in thirteen deep East Texas counties for far army maneuvers to begin September 30 and continue through to September 30, with an estimated 550,000 troops participating.

PRISON SYSTEM REPORT

A late report of the Texas Prison System discloses that of the 6,070 inmates in prison last year, 5,952 were men and 118 were women. Burglary led the list of crimes. A total of 1,582 were in prison charged with burglary.

NEW INDUSTRIES

Capitalization of new domestic corporations in Texas for 1940 was \$24,128,000, compared to \$22,445,000 for 1939, records of the Secretary of State's office reveal. The great majority of the new charters were granted to concerns with capitalization less than \$500,000.

WATERMELON FESTIVAL

Hempstead (Waller county) will have a Watermelon Festival July 4, 5 and 6. Elaborate plans are being made for the entertainment under the sponsorship of Hempstead's Junior Chamber of Commerce. The Waller county watermelon crop last year brought growers approximately \$400,000. Hempstead is one of the largest watermelon producing points in the State. Texas and some years has shipped as high as 1,000,000 watermelons a year.

TRAFFIC TOLD TO TRAVEL LIGHT

Travelers are urged to travel light and avoid carrying heavy baggage. The Texas State Selective Service Commission has advised all travelers to travel light and avoid carrying heavy baggage.

SURED BY MAN O' WAR

A horse named "Man o' War" was sired by a stallion named "Man o' War". The horse was named after the famous racehorse "Man o' War".

12-GRADE SYSTEM ADOPTED

The 12-grade system will be adopted in Texas for the next term. The State Department of Education has adopted the 12-grade system for the next term.

WINS \$1,000 PRIZE FOR "POSSUM PILE"

A Texas farmer has won a \$1,000 prize for a "possum pile". The farmer has won the prize for a large pile of possums that he has collected.

MEMORIAL TO HIGHWAY PATROLMEN

A memorial to Texas Highway Patrolmen has been dedicated in Austin. The memorial is a monument to the brave men who serve on the Texas highways.

164-FOOT SHAFT WILL BE SUNK TO ODESSA METEOR

Dr. F. H. Sellards, director of the Bureau of Economic Geology, University of Texas, said a 164-foot shaft would be sunk to the top of the Odessa meteor, which buried itself centuries ago into the West Texas soil. Ten miles west of Odessa, (Ector county), the crater is second in size in the United States. It is now partially filled with rock debris. Construction of the shaft should be finished late in July, Dr. Sellards said.

BLIND ATTORNEY GETS LAW LICENSE

Pampa News: "Bird Lloyd Sparkman of Dallas, led by his seeing-eye dog, left the Supreme Court at Austin as a full fledged attorney. The former law student received his law license from the high tribunal in recognition of successful completion of bar examinations. Sparkman attended the University of Texas law school."

PLAN TO SWAP HISTORICAL FLAGS

A proposal to swap the Mexican battle flag taken from Antonio Lopez de Santa Anna at the Battle of San Jacinto for the Texas flag wrested from the Alamo, was made May 1 in the Texas Senate. A resolution to that effect—to "promote good will between the two countries"—was introduced in the Senate.

NEWEST STATE PARK DEDICATED

Fort Parker State Park, near Mexia, was formally dedicated by former Governor Pat M. Neff, president of Baylor University. Recalling the historical massacre at Fort Parker in 1836 when Cynthia Ann Parker was captured by the Indians, to live most of her life as an Indian squaw, Neff also dedicated the park to the memory of the heroes of early Texas.

665,585 VISIT SAN JACINTO MONUMENT

Nearly two-thirds of a million persons have visited the San Jacinto monument since it was erected, said Director the Moore. The final count showed 665,585 visitors—348,840 the first year and 316,755 the second year. The average daily attendance during the two years was 916.

AIMED AT RAT, SHOOT OFF TOE

G. W. Ennis, Fort Worth fireman, had been pestered with rats around his home. When he saw a big rat in his garage he grabbed his shotgun and aimed away with the result that he shot off the tip of his right toe. The rat escaped.

SLABBITE FATAL TO CRIPPLED MAN

Lubbock Times: Francis M. Burch, age 59, a crippled man engaged in farming on the Antonio Sandoval farm eight miles north of Lubbock, was found dead in the bed of his home with a large cobra snake coiled up on the pillow beside his head. His death was due to a bite inflicted by the snake in his right side.

RARE OPERATION

Patricia Cotton, 2-month-old baby, at Southwestern General Hospital, El Paso, is recovering from a rare operation. She's the baby who was born with the dead-end esophagus. She's fed through a tube in her stomach and weighs 8 1/2 pounds. She was operated on when she was nine days old. Patricia has as good a chance to live as any baby in El Paso, her doctor says.

STOCKS OF WHEAT AT TEXAS MILLS

Stocks of wheat in Texas in elevator mills, elevators and warehouses on April 1 were estimated by the Agricultural Marketing Service at 9,125,000 bushels, by far the largest April 1 stocks since estimates were begun in 1921. Stocks a year ago were 4,650,000 bushels, the largest to that date.

CATTLE POPULATION

Texas again leads all States in cattle population, according to the U. S. Census. Leading States in order of cattle population were: Texas, 6,281,127; Iowa, 4,213,010; Wisconsin, 3,248,688; Minnesota, 3,090,394; Nebraska, 2,559,136; Kansas, 2,507,571; Missouri, 2,474,224; Illinois, 2,455,581; Oklahoma, 2,194,647; and California, 2,056,230.

CAUSES FOR REJECTING DRAFTTEES

Lieutenant Colonel J. W. P. H. Beck, chief of the medical division of the State Selective Service, headquarters at Austin, listed the number of draftees rejected and causes for rejection as follows: Syphilis, 1982 persons; eye defects, 1366; hernia, 861; defective teeth, 817; cardiovascular disease, 701; tuberculosis, 278; and diseases of the nervous system, 776. Of the total number of draftees classified, 17.28 per cent were classified as unfit for military service.

ENTERED CAVE TO KILL LION

Clay West, predatory animal hunter, went into a cave single-handed to kill one of the 11 mountain lions taken during the first quarter of 1941 in the San Antonio district, the Texas Predatory Animal Control Association reported.

\$100,000 YAM PLANT

After several months of negotiation, Texas Chemical Industries, Inc., of Dallas, announces that its first sweet potato dehydration unit and flour mill will be built in Bowie, (Montague county), with an estimated investment of \$100,000. The plant, to occupy a five-acre site and a brick building of 19,000 square feet, is expected to be in operation by next August.

GIANT STRAWBERRY

Orange Leader: "A strawberry four inches in circumference, and being of proportionate size, was brought to Orange by Cliff Chesson from his Orangefield truck farm. The giant strawberry was about an average size of those being produced under favorable conditions this spring. Chesson said."

PICK MONEY OUT OF WIND

W. H. Fryer, attorney, and J. C. Breaker, bookkeeper, were walking along a downtown street in El Paso when they espied some money being blown along by a stiff breeze. They stooped down to pick it up. Fryer picked up \$25 and Breaker \$40 in U. S. currency. They turned the money over to the police department for identification.

4 PERFECT BRIDGE HANDS

Brownsville Herald: "Mrs. J. L. Young, Jr., of Dallas, opened the bidding at two on her 13 clubs, just to see how the rest of the bridge power lay. It was concentrated. Mrs. S. C. Stephenson came up with all of the diamonds, Mrs. Arthur Voelck with all of the hearts, and Mrs. Betty Downs with a perfect hand in spades."

MOHAIR BRINGS TOP PRICE

Jake Schwartz, of Uvalde, sold 45,000 pounds of grown mohair for 55 cents per pound, said to be the highest price paid in Texas this year for mohair.

RARE \$1 BILL

F. Ibsch, 2202 Yale, Houston grocer, is the owner of a \$1 bill bearing an engraving of Martha Washington. The bill is said to be one of four outstanding and is very rare. It is of a series of 1886.

250-ACRE BEAN FIELD

Gardeners who plant small patches of beans are pickers compared to H. (Red) Rice, who recently harvested a 250-acre bean crop near Devine, (Medina county). Mr. Rice employed 600 pickers to gather the crop which he sold to a big cannery.

HOTEL PAYS CHURCH EXPENSES

Rebel Temple, a Dallas church, has no worries about bills. A top floor apartment here rent pays all expenses. The idea was the Rev. Albert Ott's, who built the apartment. The church under his guidance increased its membership from 30 to 1500 in three years.

DIME A DAY DIET

University of Texas nutritionists have developed a diet that supplies the necessary food value for a variety of incomes, and keeps the grocery bill to 10 cents a week. The diets, menus, and recipes will be distributed through welfare agencies to low-income families.

SHE TEACHES MEN TO FLY

Patricia Flynn Miller, among her share in the United States defense program by teaching the menfolk how to fly. The 26-year-old former Baylor University student is proud instructor at Odessa in the CAA-approved advanced flying school, where her students are engineers, plumbers, drilling contractors, geologists, and a lawyer.

29 IN SENATORIAL RACE

Twenty-nine candidates have entered their names in the race for U. S. Senator to succeed the late Mrs. Sheppard. The Democratic race is represented by 25 names; the Republican party 2; the Independent party and the Communist party 1.

ENTERED CAVE TO KILL LION

Clay West, predatory animal hunter, went into a cave single-handed to kill one of the 11 mountain lions taken during the first quarter of 1941 in the San Antonio district, the Texas Predatory Animal Control Association reported.

A LITTLE FUN Jokes to Make You Laugh

Doubly Difficult
 First hobo: "It's sure a tough world, ain't it, brother?"
 Second hobo: "I'll say. A pessimist won't give you a dime and an optimist can't get any."

Cheers for Willie!
 "Who gave the bride away?"
 "Her little brother, Willie. He stood right up in the middle of the ceremony and yelled, 'Hurray, Louise, you've got him at last!'"

Singing
 "Here's a story in the paper which says it has been discovered that singing warms the blood."
 "That may be true, but I've heard lots of singing that made the blood run cold."

Downfall
 "The teacher tells me you are at the foot of the spelling class again."
 "Yes, m"
 "And how did that happen?"
 "Got too many 's' in scissors."

Just One More
 "Daddy may I ask you a question?"
 "Yes, son—just one more question. Be all for tonight, what's next?"
 "If a doctor is doctoring a doctor, does the doctor doing the doctoring doctor the doctor the way the doctor doctoring the doctor doctor the way he wants to doctor the doctor?"

Reforming the Bull
 A man driving through the fields noticed a farmer working a bull in the plow. Stopping, he asked the farmer: "No bull in the plow?"
 "No, sir," the farmer answered. "I don't have a bull in the plow, but I work the plow."
 "We have two plows," the man said.
 "Then why do you work a bull?"
 "Your cultivation is limited to a bull."
 "I'm just trying to train the bull. There is something in his head."

Stearable Dress
 Customer: "I'd like a dress to wear at my wedding."
 Clerk: "Certainly, madam. How big should it be?"
 "House."

Profitable Cross
 As a farmer said, "I'm sure I have a valuable hen. I crossed a parrot and a hen and as a result I have a chicken now that not only lays an egg, but also says 'come and get it.'"

Chemists' Worst
 A group of chemists were discussing the trend of the present war.
 "It was generally agreed that the research chemists would play an increasingly important part in the future."
 "Bah!" grunted an older chemist. "Chemists can never produce anything more generous than war, they are already.""
 "What's that?"
 "Blondes."

Poultry News Tips From a Poultryman

Chickens on Farms
 An announcement by the U. S. Bureau of Animal Industry, U. S. Dept. of Agriculture, says that in the 1940 survey 1,000 farms had 2,099,799 chickens, up from 1,888,000 in 1935. The increase was due to a population increase of about 10 million.

Eggs Produced
 Eggs produced in 1939 totaled 2,381,001,510 dozens compared with 2,639,719,188 in 1936. The 1939 egg production was at the rate of over 48 dozen per capita of population.

HEDGECOCK A TEXAS INSTITUTION

For head lice on chicks, use a small dab of lard on the head of each chick, but don't use too much. Greasing the whole head sometimes causes the death of the chick.

HEDGECOCK ARTIFICIAL LIMBS
 2777 COMMERCIAL ST. DALLAS, TEXAS
 WHERE YOU CAN PARK

The Eyes Have It
 Jones: "A cinder got in my wife's eye last week and she had to see a doctor. It cost me \$3."
 Brown: "That's nothing. A fur coat got into my wife's eye and it cost me \$300."

Forethought
 The young negro recruit was the victim of so many practical jokes that he doubted all men and their motives. One night while he was on guard, the figure of one of the officers loomed up in the darkness.
 "Who goes dar?" he challenged.
 "Major Moses," replied the officer.
 The young negro scented a joke.
 "I had to meet yah, Mr. Moses," he said cheerfully, "advancc and gub de ten commandments."

Awful Suspense
 A man put up at a hotel, and the clerk warned him that the man in the room below was very nervous. When the man went to his room he thought, "I'll throw his shoe down very hard. When he happens to look at the shoe, I'll say, 'I'm glad to see you.'"
 He went to bed and about two hours later he heard a rap at the door. He asked what was and the man in the room below said, "I've taken your shoe. It's very nice. I like it very much. I'll keep it for you."

Editor's Note
 The following article is a reprinting of an article published in the "New York Times" on the subject of "The Smoke of the War." It is a very interesting and timely article, and we are glad to reproduce it here for the benefit of our readers.

Protection
 The Federal Bureau of Investigation has advised that the following information is being furnished to you for your information: The Bureau has received information that a certain individual is planning to travel to certain cities during the next few months. It is suggested that you be on your guard against any suspicious activities.

Was Dream Too Realistic
 Three Italian bombers encountered a British aircraft and were shot down into the sea. The crew of the bomber that was shot down was rescued by a British aircraft carrier and taken to the nearest port.

Tips From a Poultryman
 Make arrangements now to have an adequate supply of winter green feed for chicks and turkeys for the rest of the year.
 Be sure your birds are free from lice this summer.
 The successful poultryman keeps a ready supply of means to have an ample supply of feed for his birds next fall and winter.

It is essential that you use a good high grade commercial mash for your baby chicks. Allow two pounds of feed for each chick for the first six weeks. Later on make your growing mash by using 200 pounds of yellow corn meal and 100 pounds of 26 per cent supplement.

The shift from home to commercial hatching seems to be continuing. Washington authorities announce Farnett's spring intentions indicate that 9 per cent more chicks will be purchased in 1941 than in 1940.

In setting a hen, be sure she is free from lice and mites. Dust her well with sodium fluoride when the first eggs are placed under her.

Sodium fluoride is the best remedy for getting rid of lice, but it may kill baby chicks. Don't dust the hen at hatching time or when she is carrying young chicks.

For head lice on chicks, use a small dab of lard on the head of each chick, but don't use too much. Greasing the whole head sometimes causes the death of the chick.

DAY AND NIGHT BOMBING OVER LONDON

People in London have got used to being bombed, and the attitude of 96 per cent of the population is that unless a bomb has got your name on it you won't be hit, and that if it has you won't know you were hit. At first, during the daylight raids of last autumn, the big department stores would close when the sirens sounded, and people would either go home or down into one of the innumerable shelters that exist in every street. But now daylight raids have virtually ceased because of the Royal Air Force's big German bombers don't dare put in an appearance in daylight.

The answer to the night bomber has yet to be found. The raiders fly high usually at 20,000 feet or more, and once they know they are over London they just drop their loads of high-explosive and incendiary bombs indiscriminately. A few raiders are brought down by anti-aircraft fire or by night fighters, but as far as the people of London are concerned there is nothing they can do about night bombing except take just what is coming to them, and they certainly take it with marvelous spirit.

London covers an area of 442,455 acres, less than one-seventh of which is actually built up. There are more than a million buildings of all kinds, and of these no less than 825,000 are private dwelling houses with land attached.

The only parts of London built up solid are the city, embracing 677 acres, less than 300 of which are covered by buildings. Here about two bombs out of every five have found a mark. Then there is the West End with its theater district around Piccadilly Circus and the shopping center along Regent street and Oxford street. Here about one bomb out of three or four has scored a hit. But taking London as a whole, it can truthfully be said that not more than 15 per cent of the bombs dropped have fallen on buildings; 85 per cent have landed in the parks, open spaces, streets and gardens, breaking the glass in the neighborhood, blowing in a few front doors, but doing little real damage. So much for the high-explosive bombs. But for one of these some incendiaries are dropped. They weigh just over a ton, and if one falls on a house it may start a fire. But fire fighting has been carried to such perfection that very few fires actually get started, and those that do are quickly brought under control. Any man, woman or child with the lid of a dustpan or a small sack half filled with sand can cover the incendiary and put it out. And sacks of sand are ready on every floor of every building, at every front door, at every lamp-post, in every omnibus, everywhere.

The loss of life has been more serious than the destruction of property. When the war started London had a population of about 8,200,000, but the evacuation of all children, the aged and infirm and the departure of the die-hard to their country estates

have reduced the population to about 6,000,000. Since August 12, 1940, almost exactly 30,000 civilians, mostly women and children, have been killed; nearly 40,000 have been seriously wounded and taken to hospitals and many thousands more have sustained slight injuries that no one ever bothers to report. Let us say there have been 100,000 casualties of all kinds. That is nothing like what was expected. The government had prepared 150,000 beds for hospital cases, and these have averaged only about 5,000 a month. The highest number in any one month was in September, 1940, when 10,615 persons were taken to hospitals. At the present rate it would take the Germans more than ten years to kill one-twelfth of the population. Bombing has knit the Londoners into one great brotherhood. People pulling the dead and injured out of a bombed house don't wait to be introduced to one another. There is real comradeship everywhere. The King and Queen never fail to visit the scene of any really bad blitz, and every one tries to help.

ARMY AND NAVY ASK FOR 5,000,000 BIBLES
 According to press reports the Gideons have been asked by the War and Navy Departments to furnish the Army and Navy with 5,000,000 Bibles within the next four years. This is the largest order for Bibles in the history of the Gideons.

THE SMOKE'S THE THING!

YOU BET I SMOKE CAMELS. THEY BURN SLOWER AND SMOKE EXTRA MILD

RIGHT, BEN HOGAN!

The smoke of slower-burning Camels gives you **28% LESS NICOTINE** than the average of the 4 other largest-selling brands tested—less than any of them—according to independent scientific tests of the smoke itself!

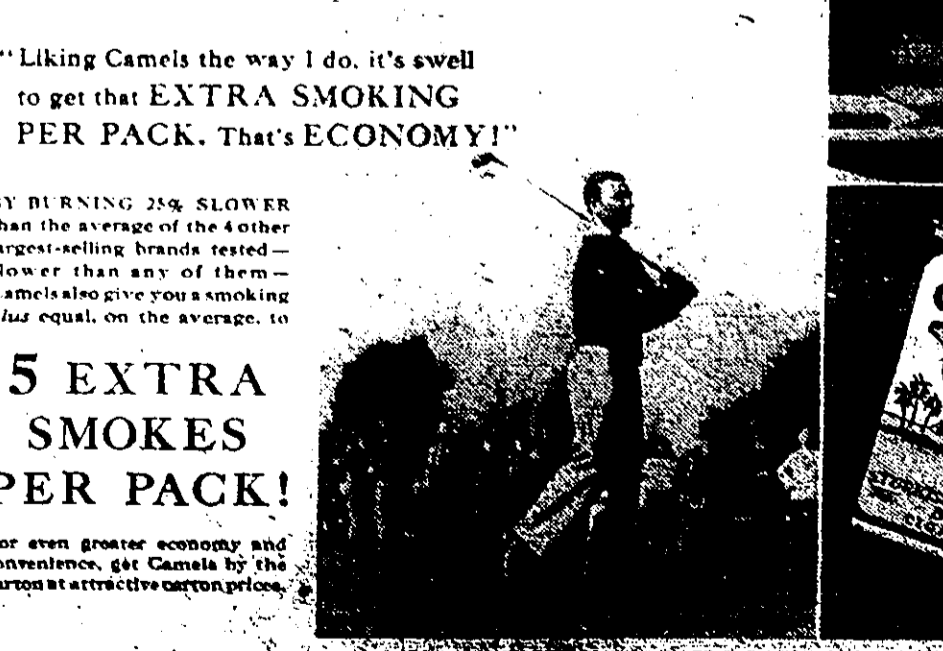

135 POUNDS that they say the "Texas mustang" has the greatest swing in golf. And to champion Ben Hogan, Camel's extra mildness is mighty important. Important to any smoker... to you... no matter how much you smoke... because this extra mildness is in the smoke itself. After all, it's the smoke you smoke.

And Camels give you less nicotine in the smoke than any of the other 4 largest-selling brands tested. 28% less than the average of the other brands. Even if you're only an occasional smoker, you'll find Camel's extra mildness—extra freedom from nicotine in the smoke—can add to your smoking enjoyment. Switch to Camels now.

"Liking Camels the way I do, it's swell to get that EXTRA SMOKING PER PACK. That's ECONOMY!"

5 EXTRA SMOKES PER PACK!

BY BURNING 25% SLOWER than the average of the 4 other largest-selling brands tested—slower than any of them—Camels also give you a smoking plus equal, on the average, to

For even greater economy and convenience, get Camels by the carton at attractive carton prices.

EXTRA FLAVOR ALWAYS HITS THE SPOT. THAT'S WHY I DON'T TIRE OF SMOKING CAMELS

AND CAMELS SMOKE SO MUCH COOLER, TOO

"THAT CAMEL FLAVOR is something very special," says Ben Hogan (above). Yes, too-fast burning in a cigarette creates excess heat in the smoke... dulls flavor and fragrance. Camels burn slower, give you a cooler, more flavorful smoke... and less nicotine (see above).

TEXAS FARM NEWS REPORTS

Approximately a quarter of a million evergreens have been planted in the shelter belts of Northwest Texas.

To protect the East Texas commercial lumber belt from the Texas Forest Service, the Texas Forest Service is maintaining 10 lookout towers.

Dairy officials report that a cow must eat 100 pounds of hay to produce 100 pounds of milk.

Mr. Frank R. Barnes, Texas Forest Service, reports that 144,000 evergreens have been planted in the shelter belts of Northwest Texas.

The Texas Forest Service is maintaining 10 lookout towers to protect the East Texas commercial lumber belt from the Texas Forest Service.

Farmer Henry Koehler, Sr., living near Kenedy, (Karnes county), grew a 13-pound radish of the "white giant" variety. It measured 18 inches in length and 7 inches around.

To protest the low return farmers realize on agricultural products, more than 500 farmers and a hundred girls marched through the streets of De Witt, Wise county, in an organized protest.

Announcement has been made by the Extension Service of A. & M. College that the week beginning Sunday, July 15 through Friday, July 18 has been selected as the period for the 1941 Farmers' Short Course at the college.

The short course is an annual event and several national speakers will be present, including Secretary of Agriculture Claude Wickard. Mr. Wickard is expected to be present.

The State Fair of Texas plans to enlarge its dairy show for the 1941 exposition. Texas dairy leaders are co-operating in the formation of these plans, it is said.

The Texas agricultural experiment station has begun five research projects on the utilization of commercial feeds in growing, fattening and finishing livestock and poultry for market, according to a recent report.

Poultry raisers who have never figured their costs will be amazed at the "Progressive Report for July of the 14th Georgia National Egg Laying Test" which shows that it costs approximately 18¢ to feed a hen during a nine-month period.

Lee Boling, hog raiser at La Graca, (Dawson county), recently purchased a 2-year-old Duro that weighs more than the average baby beef shows calf. The hog, Red Rex, weighs no less than 1,200 pounds, stands 47 inches high and is nearly 9 feet long.

A Texas bear growing wild in Denton county, usually in a dense thicket and attaining a height of 5 to 8 feet is being studied as a source of protein and vegetable oil by Robert C. Wilson, industrial research chemist.

About 200,000 turkey eggs have been shipped for sale to northern hatcheries from Brady, (McClintock county), and it is expected that more than 500,000 eggs will be sold by the local cooperative by the end of the heavy laying season.

Top Row saddle horse show winner from Pure-bred stables near Orange, (Orange county), enjoys a daily Pepsi "toker" which he drinks right out of the bottle, says his trainer, Jimmy Rogers.

Miss Alice Wilson, of the Dent community, (Anderson county), sold her setting hen by mistake, but jugged up an old kerosene lamp and "incubated" the unhatched eggs with heat from the candlewick. Fourteen motherless chicks hatched out of 16 eggs for a hatching average of 87.5.

Thirty-eight thoroughbred Jersey, Holstein and Brown Swiss cattle purchased at A. & M. College have been shipped to Nicaragua where they will be used for breeding purposes to improve Nicaraguan livestock. Special feed was taken aboard the ship, and a veterinarian will travel with the animals.

Under the 1940 conservation program of the AAA, Texas farmers received 25 tons of lime superphosphate and 250 pounds of Austrian winter peas according to a recent report.

A person was allowed to take home as many plants as he brought to the exchange. Directions were given for labeling the plants and taking them up carefully.

HOUSEHOLD HELPS

MRS. MARGARET STUTE, Editor, 1809 Ashland, Fort Worth, Texas.

For a Shower Gift

The towels for a bride (this or any year) are those of a bride. Her industrious efforts with the daily household tasks result in provocative embroidery which will brighten the kitchen towel rack the whole week through. Sunday's towel shows the happy young couple out for a stroll, and parabolles for the set may be made from the honey-moon cottage motif.

BUSY WOMEN'S WORKBASKET

VAST CHANGES IN FEMINE FASHIONS

The one has brought many changes in feminine fashions. Foreign fashion designers have longed for what American fashions have done in the past. American designers have suggested foreign designs and are setting the pace for American fashions.

For early spring styles, shoulders and sleeves are the spotlight and continue to be so well as for summer styles. Shirts and blouses are more smoothly rounded in appearance than last year. Sleeves are longer and there are again and again cut-outs, cut-outs by popular designers. These may suggest the design of a wide, narrow neck. They actually appear to be a different kind of cutting.

There is something new in different styles of hats. Some are called the "great" hat. It is made of a material and is worn absolutely straight on the head. The hat is made of a material and is worn absolutely straight on the head. The hat is made of a material and is worn absolutely straight on the head.

THE SUMMER TABLE

When the table is set for the summer, it is a pleasure to see the table set for the summer. The table is set for the summer. The table is set for the summer. The table is set for the summer.

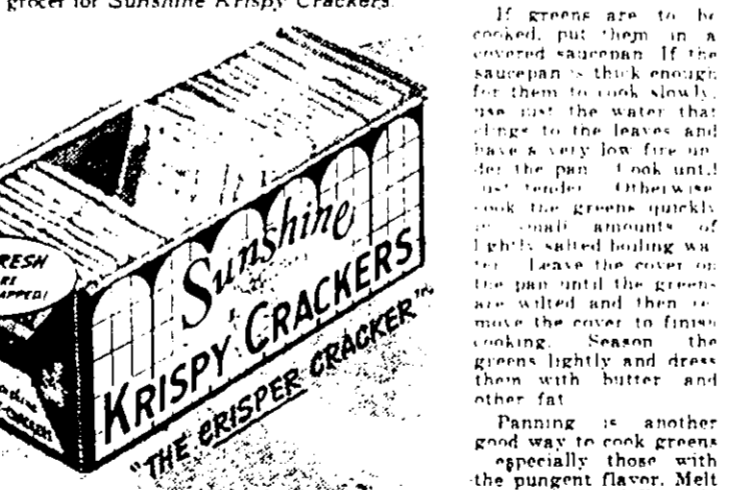

When the table is set for the summer, it is a pleasure to see the table set for the summer. The table is set for the summer. The table is set for the summer. The table is set for the summer.

When the table is set for the summer, it is a pleasure to see the table set for the summer. The table is set for the summer. The table is set for the summer. The table is set for the summer.

When SUCCESS MEANS Happiness

3
OUT OF EVERY FOUR PERSONS ARE DISSATISFIED with the coffee they are using. Are you one of these three? Are you still searching for a coffee with a rich, mellow flavor... a coffee that is so rich that you can use less per cup and still enjoy a superior cup of coffee?

Then get out of the quartet that three classes of coffee are happy. Four—switch to Admiration today.

NO OTHER COFFEE CAN GIVE YOU THE SAME RICH FLAVOR

JOIN THE HAPPY 4'S

DON'T BE EMBARRASSED WITH POOR COFFEE

Switch Today to Admiration

All successful hostesses agree on one point—coffee plays an important part in creating the fate of the party. Poor coffee experiences you and spoil the most successful party. It's the same token, serving a smooth and richly delicious coffee distinguishes you as both a successful hostess and a good "homemaker."

You can't fail with Admiration

Admiration blend of rare coffee makes every cup of Admiration taste better.

Admiration's trademarking insures uniform and delicious flavor at every serving.

Admiration's scientifically correct grinder, pot, drip, or vacuum coffee maker. With the great talent to fit the method, perfect coffee is assured every time.

Admiration Coffee

HAPPINESS IN EVERY CUP

YOU CAN GET ME PLAIN AS WELL AS IODIZED!

MORTON'S FREE RUNNING SALT

The chopped greens leave the pot to keep in the steam, and cook slowly for 15 or 20 minutes, at which time you sprinkle a small amount of flour over the greens, mix well, and if they prove to be very dry, add a little more milk and butter. Season with salt and pepper. These pan-fried greens will be served at the foot of the table and are a good accompaniment for the roast or the broiled meats. They are a most delicious change for the table and are a most delicious change for the table.

WE DINE

- Pineapple Sherbet
- 1 cup granulated sugar
- 1 cup milk
- 1 cup crushed pineapple
- 1 tablespoon lemon juice
- 1 cup milk
- 1 cup cream

Bananas on French Toast

- 1 egg
- 1 cup milk
- 1 teaspoon sugar
- 1 teaspoon salt
- 6 slices bread
- 4 to 6 bananas
- 1 cup jelly

Chocolate Ice Box Torte

- 1 package Semi-Sweet chocolate
- 2 tablespoons sugar
- 2 1/2 tablespoons water
- 1 egg yolk
- 1 teaspoon vanilla
- 1 egg whites
- 10 coconut wafer cookies, crushed

Chocolate Fleck Cup Cakes

- 1 package Semi-Sweet chocolate
- 2 1/2 cups sifted cake flour
- 2 1/2 teaspoons double-acting baking powder
- 1/2 teaspoon salt
- 1/2 cup butter or other shortening
- 1 cup sugar
- 1 egg whites, unbeaten
- 1/2 cup milk
- 1 1/2 teaspoons vanilla

EXPERTS SAID... It Couldn't Be Done... But Here It Is!

AN OUTSIDE VENETIAN BLIND AND AWNING

It took years of research and quantity manufacturing production methods to make a practical, adjustable outside 5-in-1 Venetian blind.

- 1st ... It had to do all that combination of devices and equipment had done before and do it better.
- 2nd ... It had to have all the advantages of old methods without any of their disadvantages.
- 3rd ... It had to be built to withstand the elements for the life of the building, winter and summer.
- 4th ... It had to be economical in cost and sold on easy terms.

CHESTER
 A shocking and sudden death occurred Monday when Mr. John Powell suddenly collapsed and died between the wall and bed. His wife, Mrs. W. N. Powell, 90-year-old, was sitting on the bed when she saw her husband who was sitting up in bed. He was lying on his back and she was sitting on the bed. She was sitting on the bed and he was lying on his back. She was sitting on the bed and he was lying on his back. She was sitting on the bed and he was lying on his back.

YOU'RE MY BOSS

As your electric service man, my first responsibility is to see that you get dependable electric service. And that goes for my fellow employees, too. From general manager on down, our entire organization is trained and equipped with the single object of making your electric service as convenient, useful and trouble-free as possible.

We know that it takes more than generating equipment, power lines, poles and transformers to provide good electric service. It takes understanding, cooperation and a genuine interest in the customer's needs. That's why my company conducts a continuous program of employee education... why we hold meetings at regular intervals to discuss ways and means of serving you better... why we are paid for submitting suggestions that will result in more efficient operations.

Your good will is our most valuable asset and we know that we can hold it only so long as we give you satisfactory service and make it easy and pleasant for you to do business with us. It is at any time our service is not all that you think it should be, we welcome your constructive suggestions. You're the boss and we want to please you.

Continued From Page 1

East Texas cities and counties have used WPA assistance in a vast and diversified program of public improvements during the past five and one-half years, according to a report issued by A. W. Elrod, who has served as district manager for the Work Projects Administration since the inception of the Federal program of work-relief in July, 1935.

A network of 3,183 miles of new and improved roads in the 24 counties of the Marshall WPA district is one of the most impressive products of WPA labor in this area, Elrod stated. The majority of WPA's road building has been over farm-to-market roads, he said, pointing to the 3,063-mile total of rural roads included in the program of completed work.

Elimination of traffic hazards, including the construction and rehabilitation of 2,455 bridges, was included in the road program. New and improved public buildings stand in 152 localities as a result of WPA activities in the East Texas area, Elrod reported. Among these structures are 63 school buildings and 41 recreational buildings. WPA workers have built and reconstructed 16 stadiums, grandstands, and bleachers, 18 parks and public playgrounds, and two swimming pools in this section.

Fourteen public utility plants and two airports also are credited to the WPA program of public improvement. Elrod listed major types of public improvements in this territory and the Booster is printing those county improvements near by.

San Augustine—There have been completed 120 miles of roads—all on farm-to-market routes. On these roads WPA workers have built and constructed 67 bridges. Physical facilities which have been created or improved by WPA workers in that county include four public buildings, and a public utility plant. Newton County—There have been completed 99 miles of roads, 98 miles of which are on farm-to-market routes. On these roads WPA workers have built and constructed 92 bridges. Physical facilities which have been created or improved by WPA workers in that county include seven public buildings and two parks. Jasper County—There have been completed 173 miles of roads, 167 of which are on farm-to-market roads. On these roads WPA workers have built and constructed 198 bridges. Physical facilities which have been created

Letter To Governor O'Daniel

Dear Governor: Suppose you, like President Roosevelt, decide to change your mind. See the comfort and security that will immediately come into your hearts and lives of all these old folks and others who have so faithfully counted on you to see this thing through. You can probably have the office of Governor of Texas as long as you wish. Just like President Roosevelt is in Washington for as long as he feels capable of serving. Also, who knows but if you should continue to serve as Chief Executive of Texas in an unselfish and faithful manner that some day you may be asked to serve as Chief executive of all of the U. S. and everyone would then continue to enjoy the freddie chaps which our beloved President brings to us and which you could so ably carry on. Governors, not Senators, usually become Presidents. The writer wanted O'Daniel to withdraw from the race for U. S. Senator and remain as Texas governor.

MEMORIAL SUNDAY NIGHT MOTHERS HONORED

It was to be regretted that the memorial service Sunday night could not have been a union service. Rev. Tom Munday gave a splendid message and all eyes were dimmed as the gold star mothers, Mrs. Adre Pate and Mrs. Lydia Pate of Dockett were escorted by Mrs. A. W. Harrison, to the front where Messrs. Hill Durham and E. M. Pitts presented them with lovely white corsages. Other high lights of the service were the appearance of tiny Martha Reid who sang, God Bless America with her mother, Mrs. John Reid at the piano and a solo, "Buddies" by Frank Lusk of Doucette. Mrs. G. G. Lemard acted as pianist for the service.

WOODVILLE NEWS

Mrs. Sadie Engle and daughter, Miss Mary Lynn spent Sunday in Houston with Mrs. C. O. Morrow, sister of Mrs. Engle. Miss Mary Lynn stood for an extended visit.

Elmer Pedigo is at home from Leon College for a vacation visit. Lecturer O'Brien of Wetherford spent Sunday home with his wife and baby. Ralph Houston came with him and remained for a longer visit. Mrs. J. M. Rogers of Batson arrived yesterday for a few days stay with her sisters, Mesdames Etta Gage and O. T. Craver.

SPEAKS AT ROTARY

Lieut. Col. R. R. Louden, president of the 8th Corps Area, of the rent and claim board now stationed at Jasper, will speak at Rotary tonight. The program is in charge of Mayor Watt Barclay. An interesting program was enjoyed last Thursday night when W. E. Suter was in charge and with his guests, Messrs. Harrison, Coffman, Nellius and Messrs. J. D. Brown, Carey Cruise and Bobbie Hammerly put on a quiz box program.

TOLERANCE ENDANGERED

Depositing in citizens of democracy and the current industrial revolution in the spirit of tolerance in the character of the debator. On the right of an individual and an public affairs there is an ever an increasing amount of abuse of individual and attribution of treatment of difference of opinion. When the people permit tolerance to be endangered they take the first step toward surrendering to and surrendering to the individual and the individual is being all that stands for freedom of expression. Salt Lake Tribune, Salt Lake City, Utah.
