WOODVILLE, TYLER COUNTY, TEXAS, THURSDAY, JANUARY 8, 1942

185,000 PLANES, 120,000 TANKS ARE ASKED BY ROOSEVELT A War Budget Of \$52,000,000,000 Is Asked Of The United States Congress

President Roosevelt, assuring the nation of ultimate victory in "a bloody war," told Congress the war program for the next fiscal year would require \$52,000,000,000 to help produce 185,000 airplanes and 120,000 tanks by the end of 1942.

To hit the enemy "wherever we can reach him," Mr. Roosevelt said American armed forces would operate all over the world, including the British Isles and the Far East.

The response of the American people has been instantaneous. It will be sustained until our security is assured.

Exactly one year ago today I said to the Congress: "When the dictators are ready to make war upon us, they will not wait for an act of war on our part. They will not wait for the time and the place and the method of attack."

We now know their choice of the time: A peaceful Sunday morning—December 7, 1941. We know their choice of the place: An American outpost in the Pacific.

Their choice of the method: The method of Hitler himself. Japan's scheme of conquest goes back half a century. It was not merely a policy of seeking living room.

It was a plan which included the subjugation of all the peoples in the far east and in the islands of the Pacific, and the domination of that ocean by Japanese military and naval control.

The development of this evil, insidious conspiracy was aided by the war against China in 1934, the subsequent occupation of Korea, the war against Russia in 1940, the illegal fortification of the mandated Pacific islands following the 1920 seizure of Manchuria in 1931, and the invasion of China in 1937.

and economic action. Already we have established unified command land, sea and air forces in the southwestern Pacific theater of war. There will be a continuation of conferences and the cross of mercy would be displayed by "Mein Kampf" and the swastika and the naked sword.

Our own objectives are clear: the objectives of smashing the military imposed by war lords upon their enslaved peoples—the objective of liberating the subject nations—the objective of establishing and securing freedom of religion, freedom of press and freedom from fear everywhere in the world.

We shall not stop short of these objectives nor shall we be satisfied merely to gain them and then call it a day. I know that I speak for the American people—and I speak also for all other peoples who fight with us—when I say that we have the ability and the resources to win the war, but also to maintain the security of the peace which will follow.

But modern methods of warfare make it a task, not only of shooting and fighting, but an even more urgent one of working and producing. Victory requires the actual weapons of war and the means of transporting them to a dozen points of combat.

It will not be sufficient for us and the other united nations to produce a slightly superior supply of munitions to that of Germany, Japan, Italy and the stolen industries in the countries which they have overrun.

The superiority of the united nations in munitions and ships must be overwhelming—so overwhelming that the axis nations can never hope to catch up with it. In order to attain this overwhelming superiority the United States must build planes and tanks and guns and ships to the utmost limit of our national capacity.

We have the ability and the resources to produce arms not only for our own forces, but also for the armies, navies and air forces fighting on our side.

For our own ultimate superiority of armament must be adequate to put weapons of war at the proper time into the hands of those men in the conquered nations, who stand ready to revolt against their German and Japanese oppressors, and against the traitors in their own ranks, known by the already infamous name of "Quislings."

These figures and similar figures for a multitude of other implements of war will give the Japanese and Nazis a little idea of just what they have accomplished in the attack on Pearl Harbor.

Our task is hard—our task is unprecedented—and the time is short. We must strain every existing armament-producing facility to the utmost. We must convert every available plant and production line to the production of war matériel.

1. To increase our production rate of airplanes so rapidly that in this year, 1942, we shall produce 60,000 planes, 10,000 more than the goal set a year and a half ago.

2. To increase our production rate of tanks so rapidly that in this year, 1942, we shall produce 125,000 tanks, 10,000 more than the goal set a year and a half ago.

3. To increase our production rate of merchant ships so rapidly that in this year, 1942, we shall produce 1,100,000 tons of shipping, 100,000 more than the goal set a year and a half ago.

4. To increase our production rate of merchant ships so rapidly that in this year, 1942, we shall produce 1,100,000 tons of shipping, 100,000 more than the goal set a year and a half ago.

5. To increase our production rate of merchant ships so rapidly that in this year, 1942, we shall produce 1,100,000 tons of shipping, 100,000 more than the goal set a year and a half ago.

6. To increase our production rate of merchant ships so rapidly that in this year, 1942, we shall produce 1,100,000 tons of shipping, 100,000 more than the goal set a year and a half ago.

7. To increase our production rate of merchant ships so rapidly that in this year, 1942, we shall produce 1,100,000 tons of shipping, 100,000 more than the goal set a year and a half ago.

8. To increase our production rate of merchant ships so rapidly that in this year, 1942, we shall produce 1,100,000 tons of shipping, 100,000 more than the goal set a year and a half ago.

9. To increase our production rate of merchant ships so rapidly that in this year, 1942, we shall produce 1,100,000 tons of shipping, 100,000 more than the goal set a year and a half ago.

10. To increase our production rate of merchant ships so rapidly that in this year, 1942, we shall produce 1,100,000 tons of shipping, 100,000 more than the goal set a year and a half ago.

DO YOU WANT TO TERRACE YOUR FARM

Have you been wanting to get your farm terraced but just haven't had the time, money or equipment to do it? Now is the time to get it done.

The county AAA committee receives offers for terracing work on the easier farms in the county. On the basis of these offers, the committee sets up a fair price for terracing. That same price won't prevail, of course, for every terracing job but it gives a yardstick for prices to be paid for more difficult or easier jobs.

Then, once the machinery of the program is set up, all a farmer has to do to get his land terraced is obtain from the AAA office a list of contractors who are cooperating. The farmer gets bids on the job from the contractors, takes the bid he likes best, and gets his terracing done. The AAA pays the contractor and deducts the charges from the farmer's AAA conservation payment.

During the month of January representatives of the AAA staff who are visiting every county in the state where terraces are needed. They are discussing the terracing program with county committees and are helping
