

...the door, she stepped back and his face was white with rage. "You little fool! Do you think it's as easy as that? Don't you know you'll be followed from the moment you leave this office? You will be driven to work every day by Paul Sherman. If you make a false move you will meet with an unfortunate accident. Shall we call it that?"

Silence. "There must be some way," Joan thought, "but what? She would tell Sybil Sybil would know what to do. Until then it would be best to pretend to Karl that he had won. He must believe that she was frightened."

"It seems that all the cards are in your hands," she admitted. "Very well," she said to Karl. "Joan wondered if she could really deceive Karl. Even if she were followed home, he would have no way of knowing what she told Sybil. She could tell Sybil to go to the police—yet Karl might have them both followed. Joan could not believe that Karl would take any chances."

"I'm going home," she said wearily, "straight home. You needn't worry about my going to the police tonight."

"I am not in the least worried," Karl said calmly. "You are young and beautiful, and I am sure that you are not yet ready to die."

"She looked at him and for a moment she longed to see that other Karl... the Karl she had loved. Tears stung in her eyes. How could she have been so blind? A reckless, adventure-loving girl, laughing at fate, moving blithely towards her own destruction. She had held open, eager arms to life, welcomed anything that was "exciting and different." But Sybil had been the wise one.

"You can't trust any man," Joan thought bitterly. Even Paul Sherman, who had warned her about Karl, was involved in the spy ring. He had warned her about Karl but he was no better.

Tearing it open she found a note in Sybil's handwriting. "I'll be back soon. Something terrible has happened."

He took her nervous hands and held them tightly in his own. "It's true I speak German. My grandmother was German. But I am Paul O'Malley of the Federal Bureau of Investigation—the FBI."

"That's right. We've suspected Karl Miller of subversive activities for a long time but we haven't been able to get conclusive evidence. I still haven't got enough to convict him. He's too clever for that, though I believe he trusts me. One reason is that I speak his language."

She reached the kitchen where Sybil's note still lay upon the table. The shade was drawn over the kitchen window. Joan advanced into the kitchen, watching her hand when another sound came from without—the unmistakable sound of footsteps upon the iron staircase.

visited her father J. B. Collier and brother Frank on Sunday of last week. Lavar Collier returned home with her.

Mrms Bill Chambliss of Woodville. The next convention will be at Harmony, May 10, skipping May 3 due to the Junior-Senior banquet.

Mrms Fred Dean of Spurger spent Sunday of last week in the home of Mrms Cecile Ratcliff.

Mrms Annie Lee Harval of Fred spent Thursday night with Misses Lucy B. and Cora Jordan.

Mrms W. A. Sheffield, Mrms C. C. Ratcliff and Rev. J. G. Ratcliff were in Woodville Wednesday on business.

Bob Brisbane went to Port Arthur Sunday of last week. On Monday he signed for the navy when the finishes school May 15.

Friends and relatives are sorry to learn that Mrs. A. A. Mook is sick. Her grandson, Weston Mook of Beaumont came to see her this week.

By continuing the usual clinics offered in the schools each year, the Tyler Health Unit will, at the same time, be keeping in line with the President's proclamation of Child Health Day, May 1st in which the president urges every child over 9 months of age be vaccinated and immunized.

The charge is 25c for those able to pay. Adults are urged to avail themselves of this opportunity as well as children. To those who took the required three last year only one is required this year to complete the immunization for another year.

"IF IT'S WORTH SELLING IT'S WORTH ADVERTISING"

ANNOUNCEMENTS
The Booster is authorized to announce the following candidates for public office in Tyler County, Texas, at the Democratic Primaries in July.

For Tax Assessor-Collector: ESCA D. WALKER (Re-Election) J. W. (JIMBO) HARRISON

For County School Superintendent: OSCAR A. RILEY (Re-Election)

For County Clerk: CROSS DANIELS (Re-Election)

For County Treasurer: LANDON RISINGER (Re-Election) J. R. MC COMBS

For Commissioner, Precinct No. 1: C. M. (FATTY) DAVIS, JR. JOE W. PATE (Re-Election)

For Commissioner, Precinct No. 2: J. E. ASHWORTH

For Commissioner, Precinct No. 3: W. C. CREWS NATHAN DICKERSON

For Commissioner Precinct No. 4: CLAUDE HICKS

All announcements will be cash at time of placing the same with The Booster. This rule applies to all.

State Senator \$25.00
District Judge 15.00
County Judge 10.00
District Attorney 15.00
County Offices 10.00
County Commissioners 10.00
Justice of the Peace 5.00
Constable 5.00

Mrms Perell Durham are the proud parents of a new daughter which arrived last Thursday, March 25. The name for her chosen by the parents was Evelyn Juanita.

Word has reached here that Mrms Leon Cruse of Colmesneer welcomed a baby son last Thursday.

Mrs. H. C. Gibson came and spent several days last week with Mrms Perell Durham and daughter.

Fain Durham attended the party in the home of Mrms H. C. Gibson of Sunny Dell Saturday night.

CITY ELECTION NOTICE
Notice is hereby given that an election will be held at the Court-house in the City of Woodville, Texas on the first Tuesday in April being the seventh day of said month 1942, for the purpose of electing a Mayor and two Commissioners for the ensuing term.

CONTRACTORS' NOTICE OF TEXAS HIGHWAY CONSTRUCTION
Sealed proposals for constructing 36.616 miles of Asphalt Surfaced Treatment From W. end of Neches River Bridge to Sikee From Jasper to Kirbyville and Buna Loop (Sections); From the Polk County Line to intersections with U. S. 287 and 89 in Woodville (Sections) on Highway Nos. U. S. 96, and U. S. 237, covered by Controls 65-5-21, 65-1, 2, and 10-9, 12, and 5, and 341-4-10, in Hardin, Jasper and Tyler Counties will be received at the Highway Department, Austin, until 9:00 A. M., April 10, 1942, and then publicly opened and read.

Why Don't You Try Dr. Miles Anti-Pain Pills?
MOST people who use Dr. Miles Anti-Pain Pills say that one pill usually relieves their headaches. In the regular package, Dr. Miles Anti-Pain Pills cost one penny each. In the economy packages, one penny buys 1 1/2 pills.

NOTABLE NEWS EVENTS IN PICTURES

BIG PROBLEM, BIG ANSWER—When tire rationing took effect at Randolph, Vt., rural mailman Perkins had his answer ready. Old plane tires, purchased from airline, are bulky but useful.

FOR AUSTRALIA'S DEFENSE—Almost ready to take their places at defense points on Australian soil, these grim-looking 3.7-inch anti-aircraft guns undergo last-minute inspection at an armament plant, "somewhere in Australia."

SUIT FOR SPRING—One of the most popular models this spring will be cardigan styled two-toned wool suits, like this one. Brown skirt is slightly gored and 26-inch length tan jacket is piped with matching brown.

MINIATURE CHURCHILL—Three-year-old Juan Franco went over big with a crowd at San Juan, Puerto Rico, when he appeared as Winston Churchill, during annual Ponce de Leon carnival. He's just 35 inches tall.

ALL SET—That the West Coast is awake to the fact that America is in a war and is daily girding for eventualities is evidenced above as Drew Terramore, 12, gets used to the feel of a gas mask at Menlo Park, California.

FOR SHIPWRECKED SAILORS—Being demonstrated in Los Angeles, this rubberized semi-inflated water-tight suit can keep its occupant warm and afloat indefinitely. Takes two minutes to don.

SCOUTS MAKE READY—Trained and ready for emergency service, crack Boy Scout signal units practice transmission of messages from New York skyscraper. They can send 30 letters a minute.

CITED FOR VALOR—U. S. Army Air Corps Major Lewis C. Hobbs, above of Houston, Texas, is one of the American officers decorated by the Philippine government for valor in action.

BURMA'S INDIAN TROOPS—Indian troops with bayoneted rifles, engage in maneuvers near Mandalay, while awaiting Jap assault against Burma. These men are crack jungle fighters. Many others are in action against Japanese.

SOMETHING NEW—The U. S. Army is testing this new type parachute, with an eye toward adopting it for the service. Cone in the middle is designed to lessen the shock of the opening fall and to slow the speed of descent. It's pictured billowing to the wind in trials at Reno, Nevada.

A LITTLE FUN Jokes to Make You Laugh

Matter of Faith
Wife: "Oh, John, I'm so nervous. I just feel there's a mouse under the bed."
Husband: "Well, just feel there's a cat under the bed and go back to sleep."

Town Gossip
"Had you heard that Whatchyou-call-it's daughter and Whosit's son—the boy that's in the army—were married the other day?"
"Yes, but this is the first time I've heard their real names."

Power Plant
A professor was trying to demonstrate a simple experiment in the generation of steam.
"What have I in my hand?" he asked.
"A tin can filled with water," was the answer.
"Exactly. Now can any little boy tell me how, with this tin can, it is possible to generate a surprising amount of power?"
One little boy raised his hand.
"You may answer, Jimmie."
"Tie it to a dog's tail."

Change of Pace
A colored preacher, standing before his flock, started in dismay at the red splotch on his white starched bosom, made by an over-ripe tomato tossed by someone in the congregation. He departed from his prepared sermon about the pearly gates.
"Brothers and sisters," he said solemnly, "there is wine to be had about ten minutes of this hebban business. Den you is wine to see all hell break loose!"

Matter of Multiplication
Sam: "The average woman has a vocabulary of only 500 words."
Joe: "That's not true of the average woman. When the average woman gets wound up talking she has a vocabulary of a million words."

The Uncanny Scot
A Scotsman and his wife were out motoring when their car broke down and it had to be towed to a garage. All the way his wife complained bitterly of the amount it was going to cost them.
"It's scandalous!" she said.
"Fifteen dollars for towing the car a matter of three or four miles!"
"Never mind," honey, said the Scotsman, "I'm making him earn it—I've put on the brakes."

Logical
Ma: "Son, don't you know it's Sunday? You mustn't play marbles in the front yard. Go into the back yard if you want to play marbles."
Son: "All right, ma, but it's also Sunday in the back yard!"

Family Discard
Sonny: "Mom, listen to pop snore. What makes him do that?"
Mom: "The doctor says some organ is out of order."
Sonny: "Sounds like an old hand organ playing jazz."

Poultry News Poultry Show Lice and Mites

Houston Poultry Show
The poultry show that was held recently in connection with the Houston Fat Stock Show was one of the most successful ever held in Texas. Among the highlights of this show, was the fact that the grand champion capon, raised by Luther Nygren, of Manor, Texas, was sold for a world record price of \$500.00. The purchaser was Jack Turner, owner of the famous Chicken Ranch, of Houston.

Control Lice and Mites
During the early spring days before the lice and mites appear, is the time to lay the ground work for the control of these pests. Because mites burrow into cracks and behind incrustations of dirt, it is important to clean all poultry houses thoroughly of dirt and droppings, before scrubbing with hot water. After the house is dry, spray walls, cracks, roosts, and floors with a mite repellent spray. Wooden nests and feeders as well as any other wooden equipment should be given this same treatment. A nicotine sulphate preparation applied to the roosts will control the lice.

Use the Sun
The sun, in addition to supplying health giving vitamin D rays to poultry, also is a natural disinfectant. Few, if any, disease germs withstand the direct rays of the sun for any length of time. For this reason, it is a good practice to expose the interior of the poultry house and cleaned poultry equipment to the sun periodically at whatever the cleaning is done and the days are sunny.

Market Eggs Twice a Week
With the warm weather coming on, eggs should be collected often, cooled, stored in a low temperature room, and taken to market twice a week for top egg prices on a quality basis. It obviously doesn't pay to produce a good egg and then neglect to carry through with a sound merchandising program by neglecting to care for the eggs properly after they are produced.

How long to Keep Them?
The length of time you keep hens for laying depends upon what they do in their pullet year, says the American Poultry Journal. The flock should be culled when they stop laying and if they laid well during their pullet year, the best should be kept over. They will lay approximately 20% less in their second year than they did in their first. If you didn't get very good results in their first or pullet year, then it would be best not to keep any over for the second year. Usually two years are all that they will prove profitable, in most cases. In breeding flocks exceptionally good birds are kept as long as they live.

TEXO FEEDS
It's in the Bag

For Sale Ad
One of Uncle Sam's selectees put the following for sale ad in a Beaumont, Texas, newspaper:
"Five tires, equipped with radio, heater and 1941 convertible deluxe coupe. Car is A-1, owner is I-A. Asking \$1,200 for the tires—nothing for the car."

A Delicate Situation
The church service was proceeding successfully when a woman in the gallery got so interested that she leaned out too far and fell over the railing. Her dress caught in a chandelier, and she was suspended in mid-air. The minister noticed her undignified position and thundered at the congregation: "Brudder Johnson will now lead us in prayer while de congregation bows its head and shuts its eyes as Deacon Jackson rescues Sistah Smith!"

Dizzy Speed
Bill: "I had a little balance in the bank, but got married two months ago, and now..."
Sam: "Ah, love makes the world go round."
Bill: "I know it does, but I didn't think it would go around so fast as to cause me to lose my balance."

Better Educated
A farmer and a professor were sharing a seat on a train. It was getting lonesome so the farmer started a conversation and they soon became friendly.
"Let's have a game of riddles to pass the time," said the professor. "If I have a riddle you can't guess, you give me one dollar or vice versa."
"All right," replied the farmer, "but as you are better educated than I am, do you mind if I only give 50 cents?"
"O. K.," replied the professor. "You go first."
"Well, what animal has three legs walking and two legs flying?"
"I don't know," replied the professor.
"Here's a dollar. What's the answer?"
"I don't know either," replied the farmer. "Here's your fifty cents."

"War Correspondent" Way
If the "war correspondents" in Washington were reporting the completion of Joe Dunk's five-barrel pumper at Slippery Hollow, we suspect that the story would run something like this:
"A terrific blow for national defense was struck on the bleak hillsides of Slippery Hollow yesterday when the crack drilling crew of Veteran Oilman Joe Dunk smashed their way through unbelievable difficulties to a depth of 231 feet and made a brilliant contribution to the country's oil supply by bringing in a five-barrel pumper."

Life-Like
"Do you think you can make a good portrait of my wife?"
"My friend, I can make it so life-like you'll dodge every time you see it."

Big Bend, the Last Texas Frontier

(Continued from Page 2)
mountain. How many millions of years it took only the geologist can guess, but to comprehend the Big Bend at all one must keep in mind that journey of the river through the Rockies.
The Rio Grande rises in southern Colorado, on about the same meridian as the Colorado river. Both streams start on the west side of the Rockies and the natural thing for the Rio Grande to do would have been to flow westward to the Pacific. Instead, however, it turned south and for some 700 miles followed the western base of the range, passed entirely through New Mexico and at the gap of El Paso started to cross the mountains.

Believe it or not, the mountain chain swings a little east but continues generally southward into Mexico. For this entire distance there seemed remote chance the river could ever get through to the coast. But at some distance day the mountains apparently cracked open, letting the river come through to the western side of the watershed. Where it turned to continue southeast to the Gulf of Mexico constitutes the Big Bend.

To say the mountains cracked open merely explains how the river got through, but something far more interesting happened. They not only cracked but a whole section, some fifteen or twenty miles wide, crumbled away to lower level, making not just a canyon of splendid proportions but a huge funnel block. On the Texas side this block seems to have fallen two to three thousand feet and in Mexico the fall was six thousand feet or more.

Volcanic Debris
The whole country within the funnel block is a jumbled mass of marine and volcanic deposits and of desert weathering which emphasizes the grotesque. In the gigantic debris have been found bones of the dinosaur and giant turtles, fossilized crocodiles three feet in diameter and petrified trees, showing that vegetation and other forms of animal life must have abounded there.

The flora and fauna of the Big Bend region are appropriate to its unusual geographical characteristics and are more closely allied to the flowers and animals of old

Munitions From Sea Water

(Continued from Page 2)
Mexico than to those found elsewhere in the United States. Although it has never been completely explored botanically, more than 800 species of plant life have been identified.
Among the wild animals of Big Bend are beaver, peccary, deer, kit fox, jaguars and ocelots.
There will be a lesson for all mankind when the Big Bend of Texas and the wild region opposite it in Mexico shall be converted into an international park area devoted to the recreation and enlightenment of man, and to the promotion of peace and understanding between neighbor nations.

The Gulf Coast plant was blue-printed to produce 18,000,000 pounds a year. Before construction began Dow was asked by the government to double its capacity. Before it was completed the order came to double again. The plant produced its first magnesium—the first bar of solid metal ever made from sea water—January 21, 1941. From the sea and from its Michigan brine wells the Dow Company this year will extract 14 times as much magnesium as this country used in 1940.

Even this won't be as much as we want. To get more the government has financed the construction of several plants which are to mine magnesium from various rich deposits of ores. When they get going their output is expected to exceed Dow's.
At long last, magnesium has won recognition as a metal to make things with. After the war, magnesium will effect sweeping changes in our everyday life. Plentiful and low-priced (it's 22½ cents a pound now, should go lower), it will become a household metal. It will make a baby carriage light enough to be carried up the front steps—baby and all. It will be in kitchen pots and pans, thick and strong but light enough for a woman's wrist. Perhaps it will go into pianos, into furniture that a girl can move with ease, into lawn mowers, shovels, farm tools, bicycles, household appliances. Its greatest use is likely to be in transportation. It will mean cheaper planes—cheaper to build, cheaper to fly. It has already been used successfully in truck and bus bodies; it will be used in streamlined trains and automobiles.
Wherever lightness and strength are needed, magnesium—light as wood and strong as iron—will play a new part in the machinery of our living.

GREATER TEXAS CLUB
The Greater Texas Club, with headquarters at 209 Jefferson Hotel, Dallas, was recently organized for the purpose of increasing food production in Texas as an aid to winning the war. Frank Reedy, secretary-treasurer of the club, said: "The objective of the club is to arouse our citizens to the need of greater efforts in every line of production, whether it is airplanes, ships, bombs, cattle, sheep, hogs, milk, baby chicks, eggs, chickens, turkeys, field crops, fruit crops, vegetable crops, etc. It takes food as well as guns to win a war and the nation with the greatest food reserve will win. We want that nation to be America. Through our Greater Texas Club we want to awaken every man, woman and child to the vital necessity of co-ordinating the vast resources of Texas in an all-out effort to beat the Axis. We also want to assist co-operative marketing among our farmers and encourage them not only to produce more but to sell more."
"Ours is a State-wide institution. We plan to organize the State into districts with a Greater Texas Club of 100,000 members in each district. These clubs will consolidate our resources for local food production and for local and national consumption. Texas has the soil and climate for a tremendous output of foods of all kinds. If we can keep our boys at the front well supplied with food there'll be no doubt as to the outcome of the war. It will be the Allies who will be victorious and we Texans want to say we had a big hand in bringing about the victory."
The honeybee has eleven kinds of tools on its legs. These include different kinds of rakes, brushes, combs, spurs, presses and baskets, each designed for a special useful purpose in the busy life of the bee.
But Satan hindered us. I Thess. 2:18.

"Let 'er Ride!"

RODEO OR RANGE—TOP-HANDS AGREE: "THERE'S NOTHING LIKE A CAMEL"

GRAND CHAMPION ALL-ROUND COWBOY FRITZ TRUAN also has a Saddle Bronc title to his credit. Cheyenne... Pendleton... wherever the riding is the roughest... you'll find Fritz in action—either on a sun-fishing saddle or enjoying a Camel (right). "Yes, mildness counts plenty in my game," says Fritz. "And Camels are extra mild. I've smoked 'em for 10 years."

"AFTER A REAL TOUGH RIDE, believe me, nothing hits the spot like a Camel," says Steer-Riding Champion Gene Rambo (right). "That full, rich flavor is great—and no matter how much I smoke, Camels always taste swell. What's more, the extra smoking in Camels is mighty welcome economy."

"LESS NICOTINE in the smoke makes good horse sense to me," explains Bareback Bronc ace Hank Mills (left). "Camels have the mildness that counts. They've got the flavor, too." Everywhere you go, it's the same—for extra mildness, coolness, and flavor, there's nothing like a Camel—America's favorite.

The smoke of slower-burning Camels contains

28% LESS NICOTINE

than the average of the 4 other largest-selling cigarettes tasted—less than any of them—according to independent scientific tests of 100 smokes itself!

Camel

THE CIGARETTE OF COSTLIER TOBACCOS

AN AVERAGE FAMILY CAN ENJOY IT FOR ONLY 2¢ A WEEK!

LEAD PENCILS

You see a blind man on a street corner selling pencils and shoe strings. If you drop a coin in his cup, he will hold out his wares to you. You take a pencil, perhaps, put it in your pocket, and forget about it. It's just a pencil, but what is a pencil, and how did it get that way?

pencils, because its soft, straight-grained wood best served the purpose. Another supposedly new development came much later—the refill pencil that needed no sharpening, just the insertion of another piece of lead. But the idea of a refill pencil, in a very crude form, actually antedated the ordinary wooden pencil which was first used in 1683. Writers had already devised metal holders to keep the sticks of graphite from soiling their hands.

The first record of the use of lead pencils is found in 1565, in a book which shows a wooden tube holding a piece of what people then called black lead. Actually, it wasn't lead; it was graphite, an almost pure form of carbon. Graphite was discovered in this almost pure form at Borowdale, England, in 1564.

Writing was not the first use graphite had been put to. Three hundred years ago and more, physicians treated their patients with it. It was thought to be a form of lead, although this belief was wrong. But the name of "lead," in connection with graphite pencils, is commonly used; and it's a little late to correct the mistake.

Besides serving as a dose for patients, graphite began to be useful in marking sheep about to be branded. From time it was only a short step to other kinds of marking and writing. Peddlers of goods along the streets of London in the reign of James I. some of them selling "marking ink" which was nothing more than chunks of graphite.

Factory workers paid for suggestions. In the third quarter of last year, General Electric Company paid \$23,698 to shop workers in its plants for 2,574 suggestions that were accepted from among the 11,000 that were made.

Working at the same time, but independently of one another, Nicholas Jacques Conte, a chemist, painter, and mechanical wizard, and Josef Hardtmuth, a Viennese, found the solution in 1795. They discovered that graphite could be mixed with clay. Not only that, but the amount of clay used could be varied to produce any degree of hardness in the "lead" pencils.

THE LONGEST LIVED ANIMAL. It has been thought that the elephant holds the record, since his average life is between 125 and 150 years. In the London Zoo, it has been reported, there were some geese from 90 to 100 years old, which is exceeded by a number of humans. However, all these seem to be overshadowed by a species of turtle which naturalists believe to have reached an age of as much as 250 years.

HOUSEHOLD HELPS

MRS. MARGARET STUTE, Editor, 1809 Ashland, Fort Worth, Texas.

BUSY WOMAN'S WORK BASKET

Spring Bouquets

Harbingers of spring are these perky bouquets—so delightfully easy to make. Old felt hats, no longer wearable as such, college pennants, pillows, etc., will supply the materials—and pattern C9167, price 10c, will supply cutting outlines and directions.

FASHION WAR EDICTS

The edict of fashion centers that say there will be little change of styles "for the duration" is welcomed by women everywhere. We must remember this is a patriotic gesture as it is through changed styles that fashion designers make a profit.

FASHION WAR EDICTS

Ice blue is the favorite color of many brides as it is becoming to any type of hair or eyes. It also blends well with any color scheme chosen for attendants.

THE FAMILY MARKET BASKET

Now that early vegetables are plentiful with many more to come, let us all get the most good from our Victory Gardens.

more servings of other vegetables or fruits. At least one raw vegetable should be eaten every day. Use as soon as possible after gathering. Keep in a cool place. Wash just before using.

Of these vitamins C is the easiest to lose. Some of it may be destroyed by heat, some of it dissolved in the cooking water, and soda increases its destruction. Vitamin B is also lost in the same manner.

These rules are for getting the very most of the vitamins and minerals in vegetables. Once your family has acquired the taste of this style of preparation, any other method will be unworkable.

FROM A CO-ED TO HER MOTHER

DEAR MOM: Perhaps this will be the last letter I will get to write this school year. Spring term is almost out and you know how busy we are during the closing weeks of school.

lot of hard work. Of course, the cute uniforms attracted me first. However, after I got into the work, it was fascinating and somehow we can't help but dream of working side by side with our brothers in this war.

WE DINE. It has been said, "an army marches on its stomach" and it is as equally true that a country survives by the food it gives.

A fabulous new era in Southwestern history began when "Spindletop" blew in as the world's first great oil gusher in January, 1901.

Folks in the Southwest like their coffee... and they like it "just right." That's why ADMIRATION is their favorite... it's blended for Southwestern tastes alone!

3 PERFECT PACKS, 3 PERFECT GRINDS

ILLNESS COSTS 400,000,000 MAN-DAYS OF LABOR. A remedy for the nation's vast production loss from illness, 400,000,000 man-days each year, is suggested by Dr. Michael M. Davis, editor of Medical Care.

Worry During War. If you're worried and depressed about the war, don't feel that you are abnormal—everybody is reacting the same way. This is the advice contained in a bulletin released by the Association for the Advancement of Psychoanalysis.
