## CONSERVE FOR VICTORY

**HINTS ON THE CARE OF YOUR Vacuum Cleaner**

Your electric vacuum cleaner speeds up housecleaning and helps prolong the life of rugs, draperies and upholstered furniture. It will serve you better and last longer if you follow these suggestions:

- Empty dust bag every time cleaner is used. Dirt in the bag reduces power of suction.
- Keep brushes free from lint and hair. Replace brushes if tufts become worn.
- Avoid running cleaner over pins, nails, coins or other metal objects. Pick them up by hand.
- Clean brushes, wipe off other attachments after using.
- Follow manufacturer's instructions as to cleaning and oiling. Consult dealer from whom you purchased cleaner if you have lost instructions.
- Vacuum rugs frequently. It removes embedded grit that cuts rug fibres under the pressure of constant walking.

Use hand cleaner or vacuum attachments to clean drapes and upholstered furniture. Don't use vacuum on down cushions. They don't like it.

If cleaner is not picking up threads, check belt to see if it is turning brush. If in doubt, replace belt.

Be sure that brush is properly adjusted. The brushes should extend an eighth of an inch below bottom of nozzle.
