THINK BOBBIES

One of the Sunday papers full of news and pictures of the war, was a picture of a young boy, a member of the Boy Scouts, who had been captured by the enemy. He was wearing a uniform and a hat, and was looking very brave. The caption said that he was a member of the Boy Scouts and had been captured by the enemy. This is a very interesting story, and it shows the bravery of our young men.

CURRENT COMMENT

By A. STAFF AUTHOR

Key Battleships

At Wright Field, Gen. Henry Arnold wasn't just talking when he said the 80-ton Flying Fortress and Liberator are the last of the small bombers. Now bombers are on the way that will double and redouble the present range and striking power of our key battleships.

New fighters, able to make far more than 400 miles an hour, are not far in the future. Also on the way are cross-bred types that combine the terrific firepower of a Flying Fortress with the speed and agility of lighter planes.

These new superplanes are the secret, for detailed description. But aviation industries have been permitted to carry 400 passengers across the Atlantic with ease. That can make instant round-trip bombing raids on Europe that can carry tanks and field artillery into battle areas.

Lack of Farm Machinery

Latin implement manufacturers have wanted to supply the farmers with more machinery, parts and more new machines, but have been subject to government orders which tell them what percentage of materials they may have, what percentage of farm machinery parts and farm machinery they can manufacture and ship to dealers.

The War Production Board's 1943 farm equipment program provided for production of 20 per cent of amount of new farm equipment that had been built in 1940, and was too small to meet farmers' needs. The WPB recently announced it had granted authority to farm equipment manufacturers to increase 1944 production, but it comes too late in this year to make them particularly important.

The president of the International Laborer's Co., Frank McConick, has issued the following statement relative to the farm machinery situation:

"The government has actually increased somewhat the amount of steel to farm equipment production, but farm machinery cannot be built at steel alone. Tires, a critical component part, are required. If these components are provided at once, the output of tractors and harvesting machinery for 1944 delivery can still be increased."

S. Marriage Up

Marriages in the United States in 1942 reached an estimated record breaking total of 1,000,000, with two thirds of the year's brides being married to men in the armed services, according to a report of a survey of the national cities conducted by the Jewelers' Club, Inc., a trade magazine published in New York City.

The estimated rise in 1942 was an increase of 11 per cent in the year and of 83 per cent since 1937. It was attributed to lowering of the draft age limit and to great rise in production.

All figures in the survey are based on the actual number of marriage licenses issued by municipal authorities.

Ignorance of U. S. History

College freshmen throughout the nation reveal a striking ignorance of even the most elementary aspects of United States history, and know almost nothing about many important phases of the country's growth and development, a survey just completed by the New York Times has shown.

Seven thousand students in 46 colleges and universities in all sections of the country were examined. For the most part these students had taken courses in American history, social studies or government in high school. Questionnaires were given to the freshmen of the various colleges under the supervision of either of the history department or some responsible faculty member.

Part of the students had studied American history in college. This was designed to determine the amount of United States history that the high school graduates retain from his secondary course.

One of the conclusions from the present study is that the students are in need of United States history at the college or university level, even though they have taken courses in this field in high school.

More impressive than the lack of knowledge is the amount of misinformation that the survey disclosed. A large majority of the college freshmen showed that they had virtually no knowledge of elementary aspects of American history. They could not identify such names as Abraham Lincoln, Thomas Jefferson, Andrew Jackson or Plymouth, Massachusetts, and they had little conception of the significance of the events that have made the United States the nation it is today.

Tanks Drive May Close Oil Crisis

All-India, Palestine to give the Allied war machine in North Africa may relieve the fuel crisis of the East Coast of the United States, says Ethel News, Allied victory in Russia. It is pointed out, will liberate the Mediterranean, formerly the world's second most important sea route for oil traffic, and enable the United Nations to transport petroleum in tankers from Haifa to Algeria, South Africa, which precipitated the petroleum crisis in the Eastern States. May this also alleviate it when the Allies regain partial control of the Mediterranean Sea, which is the all-important fuel line in the route to the oil of Iran and the Persian gulf. This will loosen the severe strangle on the East Coast States, from which petroleum supplies have gone to the African continent.

Record Recovery of Battle Injuries

Of 1,000 dead, sea and air casualties listed in the South Pacific and America by the Navy said, without tabulating a record breaking mortality rate of only 0.18 per cent, the Navy's

Bureau of Medicine and Surgery revealed. Lieutenant George Criss, Jr. attached to the mobile hospital at Auckland submitted the report to the Navy in conjunction with a group of medical officers on a hospital ship operating in the Solomon Islands.

Speedy removal of the wounded from battle areas and excellent medical care, including the use of the sulfa drugs were credited by these authorities for the recovery of the many of whom had been badly wounded.

The casualties represented almost every type of injury, including those resulting from machine gun and rifle bullets, shell fragments, severe burns, skull fractures, penetrations of the chest and abdomen and fractures.

In most cases the danger of the injuries were speedily eliminated by almost immediate transfer from the battlefield to the hospital ship. About two-thirds of the wounded received first treatment at base and field hospitals ashore before reaching the ship.

Major World Cotton Crops

Even though 57 countries produce cotton commercially, six countries, the United States, India, Russia, China, Egypt and Brazil, produce over 90 per cent of the world's cotton. If we add five others, Peru, Mexico, Argentina, Australia, Sudan and Uganda, to these six the percentage is raised to more than 99 per cent and if we add four others, Czechoslovakia, Bulgaria, Congo and Nigeria, the figure grows about 99.9 per cent of the world's cotton.

The following countries in order grow the major cotton crops:

Country	Bales
United States	12,428,000
India	5,000,000
Russia	4,000,000
China	4,000,000
Egypt	1,700,000
Brazil	1,000,000
Peru	371,000
Mexico	352,000
Argentina	225,000
Australia	225,000
Sudan	225,000
Uganda	225,000
Czechoslovakia	100,000
Bulgaria	100,000
Congo	100,000
Nigeria	100,000

Housewives Urged to Can and Sell 'Something Extra'

Farm women and suburban housewives who last year put up 4,000,000, 400 jars of fruits and vegetables are urged to can and sell "something extra" to avert a serious food shortage this year.

It may be the means of adding tremendously to the limited supply of canned foods in this country, Carroll L. Steeger writes in the April "Farm Journal and Farmer's Wife."

To open up a huge market for home-produced foods, the publication has asked the Office of Price Administration to permit sale of such food without rationing or to reduce its point value below

the scale of commercially-packed foods. The armed forces and land-sea have already put in a claim for half of the commercial pack. Steeger said, "If we happen to get a short crop they may take well over half." He said it was possible home canners would pack half the fruit and vegetables consumed by civilians this year.

Rationing will influence the eating habits of rich and poor alike. It will result in a fairer distribution of the food that is available and it will improve the nutritional health of the population as a whole and more housewives discover the fascinating relationship between food and the health of their families.

Rationing also will make the housewife better acquainted with her grocer to the mutual advantage of both. She should not hesitate to tell him what she wants in the quality of food she buys. The grocer is sorely burdened with new troubles, but he is still attentive to his customer's needs.

The grocer should appreciate more closely the nutritive value of the bread and pastries she is buying, and her grocer will help her. Instead of thinking only of the taste or freshness of the bread, she ought to think also of its content of nutrients. She should insist on getting the best nutritional value for every dollar of rationing coupon she spends.

Portable 'Hazooka' Knocks Out Tanks

A new type of portable gun which the soldiers have named the "Hazooka," can knock out tanks, pill boxes or light mechanized defenses, according to an announcement made by the War Department.

"It is revolutionary in design," the announcement said. "It can be carried about in a jeep or carried by two men of average size. It has a high explosive projectile."

The weapon is understood to have been developed by the Ordnance Department and has been reported unofficially to have been used by the Russian front-line troops.

The War Department stated that "in addition to penetrating steel armor, the projectile will drive through brick walls and rock masonry with a blast effect. It will shatter cast steel and such materials as bridge girders and railroad rails, and perform other amazing miracles." "Before long the 'Hazooka' will be heard from on all fronts."

Will Mint Silver Dollars to Make Smaller Coins

The Mint is planning to mint about 50,000,000 worn silver dollars and use the alloy to making new silver coins from a dime to a half dollar.

In recent legislation authorizing changes in the content of some silver coins, the Treasury received power to reduce old silver dollars.

Mint officials said that the melting down of an estimated 50,000,000 worn silver dollars would bring about a surplus of 205,000 pounds of virgin silver which otherwise would be needed in making dimes, quarters and half dollars.

The legislation also authorized the production of "worn pieces," but Treasury authorities see no immediate plan for them. Because of technical difficulties involved in creating a dollar, five and eight-cent coins, the Treasury is holding to its original intention of such a coin until a technical solution is found.

Victory In North Africa Reduces Enemy Supplies

North Africa is the largest and richest source of Axis-controlled phosphate deposits. The millions of tons of phosphate are shipped through Belgium, France, Holland and Spain, but these have not been mined commercially. Prior to the war, North Africa phosphate plus some from Florida supplied most of Europe, but with the fall of France, production in North Africa dropped almost half. Most of that was taken over by Germany.

When the United States completes the conquest of North Africa and control of the Mediterranean, Germany's most important source of phosphate will be gone, and the German food supply will be reduced even beyond present low levels. Secretary Felix N. Williams, Monsanto production official, said: "Axis powers will not be totally deprived of phosphate, but they will not have enough to meet the requirements of agriculture and the chemical industry. Perhaps this is one reason why the Germans are fighting so hard to stay off defeat."

Wages of Crime Increase

J. Edgar Hoover, chief of the Federal Bureau of Investigation, called on law enforcement agencies for a "counter-offensive" against increasing crime which, he said, threatens "a breakdown of our human fabric."

"Crime figures last year were truly alarming," Mr. Hoover said. "Some things have happened to our moral fabric when the nation's youth under 18 years of age accounted for 16 per cent of all robberies, 38 per cent of all car thefts and 60 per cent of all burglaries," he added.

Absenteeism Causes

The Motion Picture of Industrial Relations conducted its 10th annual report released recently that absenteeism was the greatest cause of unemployment and kept the average worker off the job about three days each year.

Absenteeism and personal reasons were given as the other main causes of unemployment, a problem called the gravest of the year in the field of industrial health.

"With more than 17,000,000 untrained women war workers," said the report written by Dr. E. R. Weidlin, University of Michigan, "the war industries are losing manpower at the rate of 100,000,000 workdays per year, or an average of more than 2,000,000 workdays weekly, through absenteeism."

Because of absenteeism of all kinds, a substantial portion of which is certainly preventable, tons of coal are unmined and tons of other essential materials are not made available. In consequence, planes fail to fly, ships do not sail, and guns do not fire.

Search 'Coffee'

Acorn, citrus-fruit seeds and the pulp of the Jerusalem artichoke are among the products officially authorized in France as coffee substitutes. An order issued late in 1942 placed the coffee French business at a standstill at the disposal of the National Group for the Purchase of Coffee and Coffee Substitutes.

Industrial Diamonds

In 1942 thousands of carats of industrial diamonds—many times the weight of the famous big diamonds—were employed to speed up the grinding, cutting and edging of millions of precision lenses for military purposes. Diamond ground lenses more rapidly and accurately than other abrasives.

Grass Root Reveries

By JOE GANNLY
Winnamooch, Texas

MAY has been proclaimed the month of the mother, and I have been thinking about the days of my childhood. I was born in a small town in Texas, and I have never forgotten the days of my childhood. I was born in a small town in Texas, and I have never forgotten the days of my childhood.

When I was a child, I was very happy. I had a lot of friends, and I was very popular. I was born in a small town in Texas, and I have never forgotten the days of my childhood.

TEXAS BRIEF NEWS -- from Over the State

COAST GUARD BEGS HORNBLINDS
 Airplane as it may sound, the U. S. Coast Guard has been seeking recruits familiar with hornblows. They are needed to patrol beaches and coastline.

200,000 MILES BY HUGGY
 J. W. Esprit, age 85, retired mill worker who died recently in Marshall, had traveled about 200,000 miles by horse and buggy during his long service to rural patrons of Harrison county.

WOMEN OFFICIALS ELECTED
 Women won five of nine places in the city election in Lyle, (Hays county), including the office of mayor where Mrs. Mary V. Johnson will succeed B. J. Kitchener, former mayor.

SOLEDAD BECOMES MOTHER
 Sergeant Roy Hoffman, formerly of Camp Sherman, (Haskell county), is seeking his mother. He has had no word from her since joining the Army in 1917.

300 PATRIOTS KILLED
 Battle of Houston county, staged a huge patriotic hunt that resulted in 300 dead patriots. The shooting was so good that a number of patriots returned by first day more ammunition. Many big ones were in kill.

BATHING HEALTHY NAMED
 The commissioners (cont.) of Kaufman county, named Mrs. Della Huggins as the state of bathing of the county. Mrs. Huggins recently won a county-wide bathing contest.

OLD CAR STILL GOING PLACES
 John Burke, age 75, of Meeks, (Hill county), recently registered his 1913 model automobile for the 40th time. It is owned by J. M. Burke, deputy collector who used the 1943 Bureau, also sold Mr. Burke the car, new, in July, 1933.

TRIAL SCHOOLS RECEIVE LAND LEGACY
 William Desjardis, proprietor Kaufman county farmer, who died recently, left \$250,000 in cash and more than 200 acres of well improved land to four trial school districts in Kaufman county.

DOING THEM BET FOR WAR
 East Texas Highway Department advised its pilots today have removed 2,000 pounds of metal, potential fire time, from their cars, trucks, and other establishments. The metal was contributed to local salvage collection.

SEVEN POSSUMS IN ONE TRAP
 Justice of the Peace Wm. H. Hines of Fredericksburg, (Gillespie county), and his partner, by chance, caught seven possums in one trap. The possums were found in a trap, next morning, he had caught, in a trap, seven possums and six baby possums.

BAPTIST TRUST FUND \$1,000,000
 The relief and annuity fund of the Southern Baptist General Convention, held in Dallas, reported assets of more than \$1,000,000 at the end of 1942, according to Executive Secretary Thomas L. Waters. This was an increase of more than \$500,000.

WOMEN TRAFFIC COPS
 Officers of the Houston police department have made plans to employ women traffic officers due to shortage of men. They will begin work at points adjacent to schools. After gaining experience, they probably will be used in the business area, Chief of Police H. W. Dickey announced.

TEXAS WOMAN HONORED BY BAR
 Mrs. Marguerite Howell, of Washington and Corpus Christi, was introduced at a recent meeting of the American Bar Association as the first woman lawyer to become a member of that body. Mrs. Howell served as secretary to Hon. Pat M. Neff while he was Governor of Texas.

DON'T SHOOT HUNTING PIGEONS
 Hunters of hunting pigeons in Texas have made a strenuous appeal for safety for these birds, many of which are being shot down while in training flights. These birds are used by the Army and Navy as war messengers often when no other means of communication is available.

AUTO LICENSES INCREASE
 County Tax Officer Ed Cobb, of Dallas, blinked his eyes when 1943 automobile licensing was completed. For despite rubber shortage and gasoline rationing he found the county had registered about 20,000 more autos in 1943 than in 1942. The increase is due largely to influx of war plant workers in that area.

SMALL THEFT BRINGS FEDERAL CHARGE
 Charges mounted for two couples who stole several traveling bags from a downtown Dallas hotel. When police arrested them, it was found the bags contained...

HEN THAT LIVED 22 YEARS
 D. J. Jastor, of Dallas, (Tarrant county), reported the death of a hen 22 years old. During 1942 she had laid four eggs, he said.

PINCH HITS FOR HUSBAND
 Mrs. Lorenz Ammerman, mother of two children, operates a well-equipped shop in the garage of her home in Colton, (Dewitt county). She learned the trade from her husband who has joined the armed forces.

AIRFIELD NAMED FOR FLYER
 Army officials at Paris have announced that the new Army air field, seven miles north of the city, will be designated as Fox Field in honor of Capt. Charles Mac Cox, Paris youth, who died in a crash in 1941.

CANNING PLANT FOR PUBLIC USE
 Plans were worked out at Welmar, (Colorado county), whereby the public was permitted the use of the Welmar Canning Plant facilities according to Mrs. Nellie Marie Clark, home demonstration agent.

FIVE WEEK TRIP IN SIX HOURS
 When J. R. Cox, of Nocona, (Montgomery county), age 82, rode the first time in an airplane from Tuscan, Arizona, to Dallas, Texas, he declared he had made a five week trip in six hours. He estimated the trip would have required at least five weeks by wagon, the old method of travel he used in pioneer days.

MADE OWN COFFIN
 J. R. Patullo, age 72, of Dallas, (Tarrant county), who retired as a law firm, made his own coffin. He made it by hand and carpentry, was made in a workshop he worked in for 25 years and which he made 10 years ago.

FARMER ROSES IN 10 FEET
 R. V. Carmon, farmer, (Harris county), has a rose bush that is 10 feet high. It is a single bush of top of a post. Having nothing but a rose for a support, he has raised the big bush, which is a wing spread of more than six feet. The single was presented to the Dallas zoo.

WOMAN WELDED CHAIRMAN
 Mrs. Gertrude Sherman, 77, of Dallas, (Hill county), has made the first of her kind in the state. She has welded a chair in the kitchen of her home. She has been a welder in the same yard.

WOMAN WELDED CHAIRMAN. Mrs. Gertrude Sherman, 77, of Dallas, has welded a chair in the kitchen of her home. She has been a welder in the same yard.

LIGHTER POSSIBILITIES CITED
 Texas lights may prove to be a very valuable postwar commercial fuel, according to Carl A. Eckhardt, University of Texas engineer. He estimates that more than 10 per cent of the nation's reserves of light is in Texas.

AID FOR VICTORY GARDENERS
 Businessmen of Henderson, (Harris county), have adopted a early closing program so employees may have time each day to work in their Victory gardens. The plan was adopted in honor of granting a half-day holiday each week.

ROYALTY MAN-POWER SHORTAGE
 The town of Royal, (Navarro county), solved the man-power shortage in a unique way when grass grew rank in the city park. It was purchased 60 head of sheep which kept the grass mowed down as efficiently as a lawnmower.

WOMAN WELDED CHAIRMAN
 Mrs. Gertrude Sherman, 77, of Dallas, (Hill county), has made the first of her kind in the state. She has welded a chair in the kitchen of her home. She has been a welder in the same yard.

FIRE FANS WARNED
 People who use rationed tires and gasoline to chase the fire trucks of Mrs. Allen are in for a jolt. When a string of cars as far as you could see followed trucks two miles out of town Chief Alfred Myers declared he would in future report such offenders to the rationing board.

BAITCHECKER GOES TO WAR
 For many years employee of the Texas and Gulf States Co. had enjoyed a baitchecking and picnic each year, but this employee decided to spend the baitchecking money in which the war effort by donating checks that amounted to \$1,000 to the Army and Navy relief fund.

PIONEER RANCHER DIES
 Funeral was held at San Antonio for Ralph H. Harris, age 76, prominent pioneer rancher, whose holdings extended into Coke, Uvalde, Kinney and Pecos counties, totaling about 75,000 acres. Harris was the last survivor of the Southwestern Cattle Raisers Association's executive committee.

SUGAR RELIEF URGED
 When sugar rationing was authorized last year for civilians it came too late for many Texans to utilize "berry" crops. Commissioner of Agriculture J. R. McDonald has urged the OPA to authorize release of sufficient sugar early enough to save the 1943 crop. It was stressed that want of a berry crop this year would further shorten the nation's food supply.

CONFER RESERVER
 Although Texas is contributing a whole lot of quantities of copper to the war effort, more extensive reserves are being in stores than has been previously suspected, according to a survey by the Bureau of Economic Geology of the University of Texas.

VICTORY GARDEN PAYS OFF
 One Victory garden has paid off from planting in the backyard. In 1938 (City Market of San Antonio, just a yellow-brown rind. A few days ago, followed up the garden. Mrs. M. H. H. turned on the string, used as now.

BUYING OF RATIONED GOODS IN MEXICO HALTED
 Buying of rationed goods in Mexico and bringing them across the border into the U. S. has been halted all along the border upon orders from Washington. U. S. Customs agents now will collect ration stamps for such merchandise as meats, canned fish, cheese and flour.

NO BUSINESS FAILURES IN FEBRUARY
 February was a banner business month in Texas, according to the University of Texas Bureau of Business Research. For not one business failure was reported in the entire state during that month. There were 24 failures in February of 1942.

GULF DEEP WATER FISHING RULES
 Deep water pleasure fishing has been ordered discontinued in the Galveston area. Operators of boats who previously were permitted to take fisherman aboard have been told this must be discontinued and all outside or off-shore fishing must be by duly recognized commercial operators.

105 DESCENDANTS
 105th birthday of Mrs. Theresa Kuller, who celebrated her 105th birthday, has 105 living descendants. Mrs. Kuller, born in Austria, came to America with her husband in 1868.

MUCH SILK HOSE SALVAGED
 Texas shipped 25,430 pounds of silk hose to salvage depots between November 15, 1942, and March 15, 1943. State headquarters reported. Texas now stands tenth in amount of silk hose salvaged.

PARKS STEEL PENNIES FOR DIME
 San Antonio's first class of passing new steel pennies for dime was reported by a high school boy who asked a stranger for change for a dollar as he walked for a street car on a downtown corner. The man to whom the request was made gave the boy 10 new steel pennies in exchange for his dollar.

WORLD WAR LETTER RECENTLY RECEIVED
 It was almost 25 years ago that B. J. Thompson mailed a letter to his mother, Mrs. Ada Thompson, at Waukegan, (Montgomery county), from somewhere in France. Mr. Thompson recently received the letter, dated October 10, 1917, in Abilene in an envelope bearing at least 24 postmarks. Thompson served overseas with U. S. Army engineers during World War I.

MAC

MAC RUN OVER

A LITTLE FUN

Jokes to Make You Laugh

Matter of Rank
"I have a pain in my abdomen," said the recruit to the Army doctor.
"Young man," replied the medical officer, "officers have abdomens, sergeants have stomachs, you have belly ache."

Two in the Lead
"See your new wife, you married three times already, and you still have her?"
"Hah! Yes, Adolf. She is two compartments of an already married."

Disarmament
"Why do you Government traveling that kind of thing?" asked the high school boy in the garden around town.
"There were two," replied the other. "I had a colored man, there should be two chapters of the same organization."

Well, Now
"An old man," said the informant, "colored man. 'Day in, day out' he goes. One of the children of the church, the church found Moses in the wilderness. 'For you, church, you should find Moses in the wilderness in the wilderness.'"

Back in the States
The soldier of an Alabama regiment in the War Between the States was famous for having a splendid sense of humor. One day, while on duty, he was ordered to go to the front of the line and get a canteen from the mess. He went to the mess and found the canteen flat down on the floor with his gun in the air. "What's that?" he asked the cook. "That's a canteen," replied the cook. "It's a canteen, but it's flat down on the floor with your gun in the air."

Colonel
"Don't you know that a canteen is a canteen, and a canteen is a canteen?"
"Yes, sir," replied the soldier. "I know that a canteen is a canteen, and a canteen is a canteen." "Well, now, what's the difference between a canteen and a canteen?"
"The difference is that a canteen is a canteen, and a canteen is a canteen."

Whom of the Soldiers
"Whom of the soldiers?"
"Whom of the soldiers?"
"Whom of the soldiers?"

Engraved Warning
"ALC 1880" stamped a girl's name on a soldier's uniform. "What's that?" she asked. "That's an engraved warning," replied the soldier. "It's a warning that if you don't stop smoking, you'll be in the hospital."

Good Idea
"What's your idea of civilization?"
"Civilization is a very good idea. Nobody wants to do it."

Progress in Research
"Drying," which was considered promising. The second report raised the prospects by simply stating, "Still trying." The third report, however, shook them. It read: "Still trying my darnedest."

Naval Greatness
"Why the fleet of our Navy is so big," the captain goes around the deck in an auto.
"That's nothing," replied the sailor. "The fleet is big because the captain goes around the deck in an auto."

Price-Winner Fish Story
"Two brothers succeeded in rolling fish in a market in the same manner. A well-stocked stream meandered along the edge of the camp where the brothers were stationed. Every afternoon the boys would go fishing. One day, while fishing, they discovered a special delicacy for that evening's meal. The brothers would all fight next to each other and use the same equipment, but by some odd chance, one of them always succeeded in catching a fish with a plentiful catch while the other, if he would, never caught as much as a nibble. In complete amazement, the second brother decided one day to go out by himself.

He took the very red and hot boat which his brother had caught twenty fish the afternoon before, the same kind of bait, and set on the same creek that his brother had used as a base of operations. All things preparatory, then, did not differ at all. He sat on the bank for two and a half hours, but without getting a nibble. Finally, he moved in his boat and dismally prepared to return to camp. Just as he was heading away from the stream, a large trout jumped from the surface. "Where is your brother?"

Sure of the Hand
A soldier boy from Alabama with the big set into a poker game with some British doughboys. Picking up his cards he found four aces. "One thing," said the soldier, "I would bet a pound."

Good Idea
"What's your idea of civilization?"
"Civilization is a very good idea. Nobody wants to do it."

Engraved Warning
"ALC 1880" stamped a girl's name on a soldier's uniform. "What's that?" she asked. "That's an engraved warning," replied the soldier. "It's a warning that if you don't stop smoking, you'll be in the hospital."

Poultry News

Use Plenty of Litter
Many folks worry about the use of litter in the poultry house. There are a great many different kinds that can be used. Among the commonest are: wood shavings, sawdust, straw, and ground corn cobs. All of them can be used with advantage. It has been the experience of many poultrymen that the best litter is the one that is cleanest and most absorbent. Wood shavings are the best for this purpose. They are clean, absorbent, and they do not rot so fast as straw or sawdust. If you use wood shavings, be sure to get the best quality. They should be clean and free of mold. Many people like to cover the litter for the first few days. At this time, the litter is still damp and it is better to keep it covered. After a few days, the litter will dry out and you can remove the covering. This will help to keep the litter clean and absorbent. It is also a good idea to change the litter frequently. This will help to keep the poultry healthy and happy.

At this time of the year
At this time of the year many poultrymen find that they have a larger percentage of thin-shelled eggs. This is especially true in those areas that have had heavy frosts throughout the fall and winter months. It seems that the cause is a lack of calcium in the feed. This can be corrected by adding a calcium supplement to the feed. There are many different brands of calcium supplements available. It is important to choose a good quality one. It is also a good idea to check the feed regularly to make sure it is fresh and clean. This will help to keep the poultry healthy and happy.

Medicine Miracles Save Soldiers Lives

Doctors at Walter Reed Hospital have submitted a bewildering array of new treatments—surgical, medicinal, electrical, chemical, and plain common sense—aimed at saving lives and restoring human health.

Vaccinate for Tetanus
Doctors at Walter Reed Hospital have submitted a bewildering array of new treatments—surgical, medicinal, electrical, chemical, and plain common sense—aimed at saving lives and restoring human health.

Bladder That Can't Urinate
Newly invented the cases and from the first time, the bladder that can't urinate is a common problem. It is caused by a variety of factors, including infection, injury, and nerve damage. The new treatment involves the use of a catheter to drain the bladder. This is a simple and effective procedure that can save lives.

The Way of What It Takes!

It's all fighting talk with the "Walkie-Talkie"
"Company D to Battalion HQ—ready to move out! We're in position! This is a sample of what you'd hear if you listened in on the 'Walkie-Talkie' language in action at his portable 2-way radio in the line. Listen in on him talking to his all-duty subordinate (below) and you'll get a pretty good idea why Camels are the favorite cigarette with men in the Marine, and in the Army, the Navy, and the Coast Guard, too."

First in the Service
The favorite cigarette with men in the Army, the Navy, the Marines, and the Coast Guard is Camel.
(Based on actual sales records in Post Exchanges and Canteens.)

WHY do Camels win with men in the services? Every smoker has his own reasons—but this, perhaps, is most important: Camels are expertly blended from costlier tobaccos—tobacco rich in flavor, for lasting enjoyment—extra mild, yet never flat or thin-tasting. That full flavor holds up—pack after pack.
Try Camels yourself. Put them to the smoker's "T-Zone" test (see page 124). You'll find that Camels have got what it takes for steady smoking pleasure.

The "T-Zone"
where cigarettes are judged

Texas Farm News

Action removing the necessity of vaccination for many types of birds who have been announced by APHIS officials (U.S. Dept. of Agriculture) in the future. Restrictions on the sale of wild birds and their products were lifted April 1 for every class of birds.

The week of May 17-22 has been proclaimed National Cotton Week and Governor Coke Stevenson has called upon all Texans to support the drive.

OP A. H. Hays, chairman of the Texas Cotton Advisory Council, has announced that the cotton crop in Texas is expected to be the largest in the state's history.

Jack and Mack Weston, twin and members of the Carbon City 4-H club of Eastland county, have 200 registered Angus steers and 70 registered Hampshire ewes for breeding stock.

FOOD—and the Farm Equipment SHORTAGE

A Report to the Farmer

WE HAVE learned with surprise that in some parts of the country farm equipment manufacturers and repairmen are having difficulty in obtaining the supply of farm equipment materials.

At least 2,000 chickens, mostly hens or fryers, have been stolen in Dallas county since the advent of meat rationing.

A Texas wheat crop of 1,410,000 bushels, 34 per cent less than last year's crop of 2,148,000 bushels, but 10 per cent above the 1942-43 average, was forecast on April 1 by the United States Department of Agriculture.

The United States Department of Agriculture will supply a letter to backyard gardeners and poultry raisers.

The slogan "I will try to feed one fighter and myself" appeals to members of Brown County 4-H club.

At the end of the first quarter of 1943, members of boys 4-H clubs of Victoria county had marketed 10,701 pounds of beef and pork.

For all these reasons, the great bulk of our farm equipment production facilities is available now and has been available at all times throughout the war. Those facilities are capable of turning out many times the amount they are now producing.

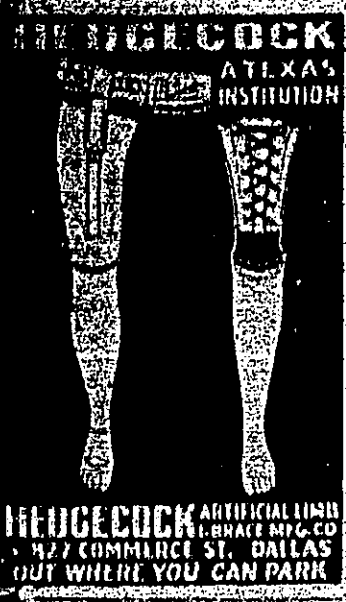

The War Production Board's 1943 farm equipment program, which provided for production of only 50 per cent of the amount of new farm equipment that had been built in 1940, was too small to meet farmers' needs. This has been fully recognized by official Washington, and the government has recently announced that it was granting authority for increased 1943 production of farm equipment.

The slogan "I will try to feed one fighter and myself" appeals to members of Brown County 4-H club.

At the end of the first quarter of 1943, members of boys 4-H clubs of Victoria county had marketed 10,701 pounds of beef and pork.

Chas. C. Crutch, 41st child of the family, was born to the community of Wilson county, Texas, on May 17, 1917.

Dr. W. E. Strang, head of the animal husbandry department at Texas Technological College, has been elected president of the Holstein-Krishna Association.

Our Boys and Girls

Kiddies Can Do It

Draw A Tabby Cat

For making a picture of a tabby cat on the large grid, you will draw a separate piece of paper and mark on the same number of squares that you did here. These squares you will draw with a lead pencil, so that when the heavy ink picture of Tabby Cat is completed you can erase the squares and pass left for the picture of Tabby Cat.

THE CRACKER THEY GIVE YOU EXTRA ENERGY!

Krispy Crackers offer you a important advantage these busy days. They give a handy source of food energy, and help restore the "zip" we all use up so quickly.

Down Cracker and Candy Company Division, LOOSE-WILLS BISCUIT COMPANY

Many substitutes have been found for many foods formerly prepared from their wheat, but you will find no substitute for the crisp, golden-brown texture of Sunshine Krispy Crackers.

work and to threaten those who do not go into service on the factory floor. It is a fact that the following conditions of the nation's health and material resources:

They are the most abundant source of energy in the world. They are the most abundant source of energy in the world. They are the most abundant source of energy in the world.

They are the most abundant source of energy in the world. They are the most abundant source of energy in the world. They are the most abundant source of energy in the world.

AN ATTACK FROM WITHIN

One of the most insidious attacks on our nation's health was not made by a foreign enemy. The attack came from within, and left its mark on 100,000,000 people.
