WOODVILLE, TYLER COUNTY, TEXAS, THURSDAY, JULY 8, 1949

NUMBER 51

## NOTABLE NEWS EVENTS IN PICTURES

**TIME ON HIS HANDS**—Commander of world's largest bombardier school, at Midland, Texas, Col. John P. Kenney, appealed for old clocks to construct super-size bomb-ights for classroom demonstration. Boy Scouts got busy and the colonel was deluged with old-time pieces.

**HOMEBODY**—Admiral Chester V. Nimitz, commander of U. S. Pacific Fleet, gets into occasionally to visit his family in Berkeley, Cal. Here he is at home with Mrs. Nimitz, their daughter, Mary Zed, Freddie the spaniel and Victory the cat.

**BOTH SQUITH'AWA**—When Carl Owen Hubbell, Jr., picks up a baseball, he holds it in his south paw, exactly like dad, pitcher for the New York Giants. Here are father and son just before a recent game at Wrigley Field, Chicago.

**WEAVE LIVERS**—Admiral Sir Martin Dunbar-Nasmith, C. S. center, watches in London operation of device to pump sea water into fresh water for drinking. Fitted in 15 months, it is expected to save many lives.

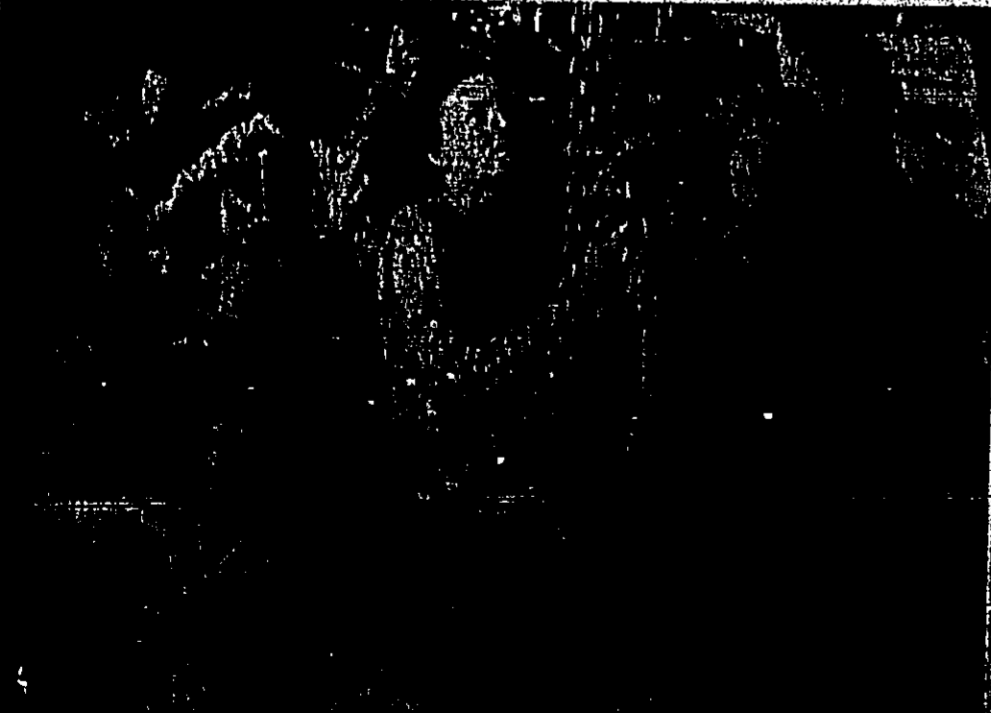

**NEWEST SUB CHASER**—A patrol craft escort (PCE), U. S. Navy's newest anti-American weapon, is launched in Chicago. Designed for heavy convoy duty, they are equipped with dual-purpose anti-aircraft guns and depth charges.

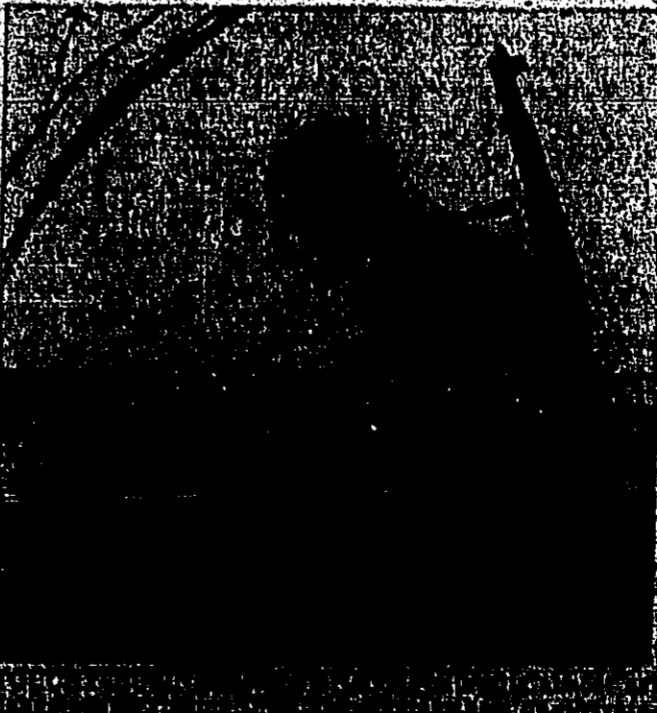

**FRNNIES**—British pennies are used as buttons on this white bird-eye pique model designed for hot days in Iowa. Dress was featured at a recent luncheon-fashion show at Waldorf-Astoria, New York.

**LETTER FROM HOME**—At an Alaskan base, Marine Audrey M. Hall, of Olney Springs, Calif., reads letter from home, more than 21 feet long. Her wife, a welder, wrote the letter.

**CONFIDENTIAL**—Mrs. J. C. Smith, wife of the late J. C. Smith, is seen here at the funeral of her husband.

**WONDERFUL**—Capt. J. C. Smith, U. S. Marine, is seen here at the funeral of his brother.

# The BOMBER, Our Best Weapon

By JOHN STEINBECK  
(Continued from a chapter of "Humble Aves" in "Honey" Digest)

**O**f all branches of the Service, the Air Force must act with the least hesitancy. The least tradition, the least inertia, and the least information of the nations of the world experimentally with airplanes.

The world at large was so tired of war, so sick with war that it hoped it might never have to use these experiments. Of all the nations of the world, only Germany knew what it was doing.

It was only toward the very end of the war that bombers began to be built and bombing tactics developed during the period between the two wars, most

Heavy bombers from 2nd Air Force, 1st Army, in the air over a target in Germany.

During the last war, military airplanes were used largely for observation. The heavy bombers which took place over the target in Europe were the result of the plans tried in the "honey" months.

It was only toward the very end of the war that bombers began to be built and bombing tactics developed during the period between the two wars, most

## RICE-GROWING May Become a Major Crop

By W. N. BEARD  
115 Jones St., Fort Worth, Texas

**A** NEW process for milling rice is expected to make this cereal more popular in the future. For the process is said to add to its palatability when cooked and served. Heretofore, rice has been milled by the old process, and many consumers have complained that it is too hard to eat. However, much of the reason for this has been due to improper cooking. The new process, known as conversion, will turn out a better product that can be

removed from the water soluble vitamins and other nutrients present in the hull and bran layers of the rice kernel. As a result of this process, it is said that a new rice is available on the market that contains the water soluble vitamins of brown rice, and the attractive quality of milled, polished rice.

It was only toward the very end of the war that bombers began to be built and bombing tactics developed during the period between the two wars, most

Harvesting rice in South Texas. The combine cuts, threshes and sacks the rice.

cooked easily and will retain more of the vitamins and flavor. The conversion of the rice is done by washing the grain in water of any temperature. This may be brought to the attention of the rice miller. The rice may be harvested with a combine, even when it is blown over, instead of by the customary hand-labor.

It is said a saving has resulted on some Texas rice farms of as much as \$10 to \$15 per acre by combining rice that is to be sold to a conversion plant. For the rice miller, the new process

## KILLING TANKS At Camp Hood

By MORRIS P. MOORE  
(Continued from "Honey" Digest)

**D**OWN AT Camp Hood, near Gatesville, Central Texas, the tank destroyer officers, charged with teaching men to kill armored tanks, rather pride themselves on the fact that the branch has no traditions.

When a tank destroys an infantryman, it shoots at it like an infantryman would shoot at a tank. The infantryman would take a shot at an enemy tank, but he would not take a shot at an enemy tank's head.

There are no traditions, no how-tos, no procedures, no rituals, no customs, no habits, no ways of doing things. Everything is new, so new that the tank destroyer officers, charged with teaching men to kill armored tanks, rather pride themselves on the fact that the branch has no traditions.

### 251,000 Drafted From Texas

FROM the beginning of the draft through April 30 of this year, Texas furnished 251,000 inductees, according to figures given to the House Appropriations Committee by the Selective Service System.

Nationwide, over that period, 7,719,806 young men were examined, 5,467,024 were accepted, and 2,252,781 were rejected.

In Texas, 210,340 were examined, 141,000 were accepted, and 69,340 were rejected.

New York State, which has furnished the most men, had 771,777 examined, 525,839 accepted, and 245,938 rejected. The number accepted in New York constituted approximately 70 per cent of those examined. The number accepted in Texas constituted approximately 72 per cent of those examined.

### Diamonds Go to the War Front

Diamonds not only have become essential to the production of war equipment, they now are actually going to the front. It is estimated that about 15 per cent of the Army's equipment was glass and glassware. The Army's Optical Company has developed a double lens eyeglass and for Army use, which is equipped with diamond tools. Every field repair shop for fighting planes or other military equipment which uses lenses of various optical carbide, must have diamond pointed grinding tools to keep the lenses true. So must the machine shops of the war ships. These diamonds that go to sea or to the front are only a small part, however, of all the millions of diamonds that help produce and maintain equipment used in military and naval operations.

Recently E. J. Moxley, chairman of one of the leading eyeglass manufacturing companies, said that only three per cent by value and five per cent by weight of the world's diamond output this year are being used in military work, as a few years ago only 10 per cent were used for that purpose.

### Russian-Germans Serious Problem for Nazis

Waging war on Russian territory behind the German front is becoming a serious problem for the Nazis. Reports from correspondents with the German troops give details of the extent of guerrilla attacks.

The guerrillas often work alone or in small groups, forcing the Germans to comb the forest or behind the front in occupied areas.

The upper reaches of the Dnieper, Dniester, and Prut rivers have been favorite guerrilla haunts.

### South Pacific Sailor Survives Seven Battles

William J. Holder, of Irving, (Dallas county), Texas, home on leave, has survived seven battles in the South Pacific area. "The Japs are tough and ugly," he says, "but we can win because this year, maybe next if the Army, Navy and Marines continue their marvelous cooperation and if the home front is solidly behind us, sacrificing and working hard."

To follow on the home front he urged his letter writing and cheerful letters. "It's a happy day for a sailor or soldier's wife when he hears from 'him,'" said Holder.

In another with some overseas husbands this information, your boy in the best equipped and best fed soldier in the world. Don't be uneasy if you don't hear from him regularly. The Army has a tremendous job of getting letters back home and is doing its best.

Holder's ship, the *Avenger*, is heavily armed, took part in many battles in the New Hebrides engagement of Guadalcanal, August 8, 1942, and Holder, wounded from the sea by a submarine, was slightly wounded.

### Low Rate Clothing

Army sources report that cow's hair is being used in the manufacture of clothing in Germany. A process has been devised to produce the hair for clothing. The plants will collect an estimated 1,700,000 pounds annually.

### Prisoners of War

American in many areas, including Texas and Oklahoma, become used to the sight of prisoners of war. At present camps throughout the country the Army is holding 30,000 prisoners of war, 22,110 Germans, 14,510 Italians and the Japanese.

The captured prisoners are living in standard army barracks in camps enclosed by barbed wire and guarded by American soldiers. Discipline is enforced by their own military organizations. The prisoners receive 30 cents a day for a five-day, forty-eight-hour week, 10 cents of it for expenditure in the camp canteen. The rest is paid to the prisoners' home government to affect the war effort.

They are working in various American War Production Administration jobs and with the Army-PW pointed in red on the backs of the coats and

### Death of Edsel Ford

The unexpected death of Edsel Ford, president of the Ford Motor Company, on May 26, left the company and a huge family fortune unshaken.

The action of the older Ford in rolling up his shirt sleeves to work in the pits which he had founded in his own 20 years ago was not an startling act. Many have seemed to do it. Although Henry Ford will celebrate his 80th birthday July 30, it was his dedication for this to rolling up his sleeves for the industry that the world ever has known.

The responsibility which Mr. Ford assumed in the active direction of his empire are staggering. Just how large and how rich that empire is, no one, not even Mr. Ford himself, can tell. Estimates of its value run from \$500,000,000 to a little less than two billion dollars, and if the personal fortunes of the Ford family are included the latter figure probably is more nearly the correct one.

Mr. Ford has plants in more than 20 cities in the United States and others in Ireland, Turkey, Spain, Portugal, Sweden, Finland, Canal Zone, Brazil, Cuba, Mexico, Uruguay, Chile, South Africa, Australia, India and Egypt. In addition, at the outbreak of World War II, he had plants in most of the enemy and occupied countries of Europe and Asia.

### Traffic Accidents Report

The Texas Department of Public Safety has completed a compilation of traffic accidents.

The report shows that in 1942 there were 1,416 traffic deaths. During the first quarter of this year, the department recorded 307 deaths. If this average continues for the current year there will be a further decrease in loss of lives.

As for the number of accidents, 1941 was high with 1,084 recorded. In the first quarter of 1942 there were 89 accidents.

Most hazardous time for driving is between 7 and 8 p. m., contrary to what the average person might believe. This is when most fatal accidents occur, but the report observes.

When, either a driver or pedestrian feels that he has the road to himself at a late hour, he is making "foolish."

Pedestrians were victims in 28 per cent of the 1942 fatal accidents.

### Mark Twain Abroad

Recently translated from the 2,000,000 copy of Mark Twain's works printed in that country since 1917, only Jack London precedes Mark Twain in popularity as an interpreter of American life to the European. Of the 16,000,000 copies of books by American writers published in Europe since the Revolution, 6,000,000 have been works of Jack London. Other successful ones, therefore, are: John Steinbeck, Upton Sinclair, Paul Buck and Paul de Kaulf.

### Radars Out of Hiding

The war has brought a new word into the radio lexicon, says C. S. Butterfield, press radio editor. It is "radar." It has been classified as a "rad" secret weapon—one that embraces radio detection and ranging devices.

And take it from the War and Navy Departments, both of which use it, as do the British, it has developed into a new science that not only has done a lot in blocking the tide of Axis conquest, but has helped to turn that tide, the other way. Thus it has many important uses in both defense and offense.

Before this war is over, you may be hearing more about radar. But probably not as much as when it is turned to peace purposes, for only recently has the use of secrecy been lifted enough to bring the word out into the public. Men at work with the device long have been under the strictest of secrecy.

Even a joint statement by the War and Navy Dept., which officially revealed for the first time that radar existed, carried the admonition that "no further facts will be released until the Army and Navy are convinced that the enemy already has the information from some other source."

Now that I am sure you have been given out to indicate the vital part radar now plays in our war effort, it should be able to do more than to be a "rad" secret.

### The Dallas Radio Show Association

has introduced a plan not to be absent on barefooted women. People here feel that bare feet are not sanitary and leaves a stain on new shoes. The association declared, which reminds me of what I read recently in a magazine. It says that many barefooted women, especially in the States, are getting dirty, messy, and even dangerous. The plan is to have a "barefooted women's association" to help them.

### Navies of the Smaller Allies

The navies of the smaller Allies fighting with the United Nations have a total of 240 vessels and nearly 27,000 officers and men operating under the flag of their respective countries. In just over one year these navies have been increased from 170 fighting ships and 15,000 officers and men to their present strength.

The composition of the smaller Allied navies was stated recently to be:

British	100
French	40
Netherlands	20
Polish	10
Yugoslav	10
Other	60

During the past 12 months, the smaller Allied navies have been replacing many of their older ships by up-to-date ones.

### Delays in Delivery of Pressure Cookers

Housewives will have little opportunity to buy pressure cookers in time for this year's autumn of foods of the War Food Administration.

Production delays have occurred, and most of the 275,000 authorized for manufacture by the War Production Board will reach retail outlets late for the peak cooking season, they explained.

A representative of the War Food Administration who conferred with manufacturers in Chicago said that of the four plants which production was authorized to have put their plants into production and the other two will not start manufacturing until July 1.

The delays have prompted the agency to alter its original plan for allotting the early output to southern markets. Under the revised plan, the cookers will be distributed as evenly as possible in markets throughout the country. Only a small number of cookers will be available by August 1.

Under earlier orders, neighborhood groups and organizations will be given preference in the purchase of the pressure cookers. They will be distributed through regular trade channels, but purchases must first obtain certificates from their county farm rationing committees.

The cookers authorized by WPA will be of the open-quot "family" size and will have pots made of porcelain-covered steel and tops of tin-covered steel.

### U-Boat Pack Showed Down

U-Boat pack is having a tough time in the western Atlantic. No western Atlantic Allied or neutral merchant ship sinkings were announced the first two weeks in June marking the first time since Pearl Harbor that no losses were revealed during any two consecutive weeks.

Although a test year showed that 111 merchant vessels were destroyed in the western Atlantic in June while 105 were sunk in May, this fact only slightly over-represented the sinkings for this year with none announced in June 11. However, sinking reports will be made public about a month after they occur.

### Fewer Vehicle Deaths in 1942

Deaths from motor vehicle accidents in the United States last year total 29,200, a decrease of about 1,000 from 1941, according to reports from the National Safety Council. The total number of motor vehicle deaths from 1935 to 1941 is 10,000 in 1942.

Contributions as a whole have not been so plentiful for safety as they have in the past. "Thousands of dollars of equipment are not yet seen to reduce these accidents," said that it is essential to have a safety factor to look both ways before stepping off the curb and in crossing streets, adhere strictly to the rule of "stop at crossing with the lights."

### Oldest Living Thing

The largest and the oldest living thing in the world—weighing over 2,000 tons and older than the pyramids—is the giant sequoia (tree) in California known as "General Sherman."

The tree, nearly 300 feet tall and over 100 feet in circumference, is estimated by naturalists to be nearly 3,000 years old. It was a big inhabitant of the forest long before the birth of Christ.

The big tree is over 30 feet in diameter. Its largest branch is 180 feet above the ground and nearly nine feet in diameter.

Scientists have never known a sequoia to die. It may be destroyed by man, fire, earthquake, lightning, wind, landslide or erosion—but so robust a tree has never been known to expire of old age.—The American Weekly.

### Add a Small Quantity of Water to a Mixture of 1/2 Pound of Salt and 1/2 Pound of Bicarbonate of Soda and Apply this Paste to Insect Bites to Relieve the Itch.

## Grass Root Reveries

By JOE MANDY  
Winnabow, Texas

THIS is one fourth of July that should be celebrated seriously, for America is again fighting for its freedom. Many precious lives shall be lost to maintain that freedom. Since the beginning, men and women have fought against enslavement by despots. The Egyptian was freed through a great blood and tears. Pharaoh was another Hitler, but the Lord took a hand and freed the Hebrews. The Lord will have something to do with this fight before it is over. We have to win, no matter what our attitude. If we do not win, God will give us guidance. We have to win, no matter what our attitude. If we do not win, God will give us guidance.

We took a few days off and visited Galveston recently. The blundering, tall men and shaggy heads black along the seawall beguiled. During the daytime in colorful array, some of the bathing suits cut to a mere fragment of the imagination. The water was fine and I rode the waves better than I expected. A cowboy tumbled over the waves and his wife said it reminded him of riding to ride a wild bronco without saddle or bridle. Galveston is and will always be the playground of the South-west. After a fooling in the surf, you are ready for a good fish dinner and you can get that, too, on meatless days and all other days at Galveston.

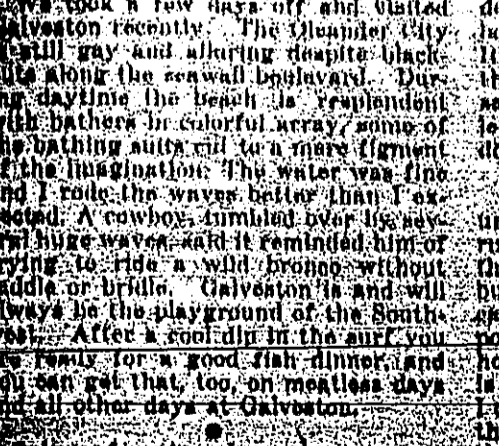

Only a few Americans pay any attention to the advice of scientists in peace time. I made a dime purchase the other day and through a honest mistake handed the lady cashier a new penny instead of a dime. She looked at me with those eyes and said, "That's a

old racket. You owe a little, please!" There is one place in the world that has not gone mad. It is a neck of the woods in Coon Creek, a small community of farm folk. The day I visit, the place is unshaken. The mill is still going on. A dozen women were quilting and talking all at the same time. "When a quilt is made, you can't see it, but when it is put in a yard, but with all the talking they get the job done, which is more than I can say for some men who do a lot of talking and never get the job done. It seems to me that the men who do a lot of talking and never get the job done are far-sighted and know that Old Man Winter, like Old Man River, keeps rolling on.

The boys are enjoying that "ole swimming hole" on Coon Creek these July days. We go in wearing nothing but a swimsuit, which makes for easier swimming and diving. This hole on Coon Creek is fed by springs and has been a favorite spot for a generation. If you want to feel young again, go in swimming with the bunch of kids who dunk and splash mud and water all over each other.

The pay-as-you-go tax finally passed both houses of Congress and was signed by the President. I am still looking for some one to tell me how it will work. One man explained that it was pay-as-you-go, pay-as-you-see and pay-as-you-get there. I guess he is right, for they are going to tax everything except air, water and sunshine and air will be taxed when we get synthetic trees.

The Dallas Radio Show Association has introduced a plan not to be absent on barefooted women. People here feel that bare feet are not sanitary and leaves a stain on new shoes. The association declared, which reminds me of what I read recently in a magazine. It says that many barefooted women, especially in the States, are getting dirty, messy, and even dangerous. The plan is to have a "barefooted women's association" to help them.

### Folks in Uniform

# A LITTLE FUN

**Quiz**  
 1. A man has a mysterious name called Quicker. What knowledge got faster and better?  
 2. As late as 1860, small...  
 3. He knew nothing at all...  
 4. And now he's a bureau professor.

**Meek Partner**  
 "Does your wife take the woman for you jawfully wedded wife?" asked the colored minister of an underseed, bow-legged, watery-eyed rustic standing on a bridge 200 yards of feminine patchwork.  
 "Ah, minkie, minkie!" responded the rustic gloomily. "Ia been took."

**Strange Reaction**  
 "Friend, what did you think of when you looked into the barrel of the holdup man's pistol?"  
 "Victim: 'I thought to myself, 'That's the first time I ever saw that had a handle on it.'"

**Indisposed**  
 "I hear you got a girl today."  
 "Yes."  
 "What's her name?"  
 "Hello."  
 "How did it go?"  
 "No."  
 "What's the matter? Had a fall with her?"  
 "No, I went to her house last night and there was a sign on the door. 'Hell out of order.' So I didn't go in."

**Absent Minded**  
 There was an absent minded Sunday school teacher with whom the boys of his class liked to have fun one day when the boys knew that their teacher was to read a lesson passage from the Bible, they passed together the connecting pages.  
 The teacher came into the room and began to read. When he got to the bottom of the page he read: "When Noah was 120 years old he look little things and wife, was... about he formed the man... 140 cubits long, 40 cubits wide, height of godher wood, and covered with pitch inside and out."

**Explained**  
 Young Housewife: "What makes this milk so thick?"  
 Milkman: "Well, you see lady, we thought two new cows this week and one of them had been killed by a bull, and that made her melancholy."

**All Out for Oshkosh**  
 Grandma Jackson and her young grandsons were riding on a train. Grandma had dozed and suddenly she sat up. "What's that sound?" she asked the boys. "The whistle," said one. "The whistle will stop the train," said the other. "No, it's just the door bell," said the third. "Get the bundles together, or you'll miss it," said Grandma. "This is Oshkosh."

**Adverse to Water**  
 Beggar: "Lobly, could youse do something for a poor old sailor?"  
 Housewife: "Sailor? You don't look like a sailor to me."  
 Beggar: "Lobly, I fell off the water for sixteen long years."  
 Housewife: "Well, you certainly don't look as if you've caught up with it."

**Mule Feed**  
 The mule had been out for white days and the oats on the side still stood at eleven to one. For a quartal. They filed into the restaurant for their evening meal, the second day.  
 "I've a mule as usual," asked the waitress.  
 "No," replied the foreman. "I've a mule as usual and one-half bale of hay."

# Jokes to Make You Laugh

**One Reception**  
 Bill: "Very few women have any knowledge of parliamentary law."  
 Joe: "You don't know my wife. She's been speaker of the house for 25 years."

**Quick Change**  
 Small Batty was all eyes at the fashionable church wedding.  
 "Did the lady change her mind?" she whispered to her mother.  
 "Why no, what makes you think so?"  
 "Cause she went up the aisle with the man and came back with another."

**Defense Workers**  
 Customer: "My goodness, but eggs are high."  
 Grocer: "Sure, but there's nothing we can do about it."  
 Customer: "Why?"  
 Grocer: "The hens are on a strike and have killed the War Labor Board."

**Operative's Opinel**  
 "I heard you got a girl today."  
 "Yes."  
 "What's her name?"  
 "Hello."  
 "How did it go?"  
 "No."  
 "What's the matter? Had a fall with her?"  
 "No, I went to her house last night and there was a sign on the door. 'Hell out of order.' So I didn't go in."

**The Early Bird**  
 Mac Latch had never had the reputation of being early to work, and things became so bad that the foreman pointed him. A few days later, noticing a considerable improvement, he complimented Mac on his changed ways.  
 "Aye," returned the latter. "I've got a parrot now."  
 "But what has a parrot got to do with it? Didn't I advise you to get an alarm clock?"  
 "I thought out, but after a morning or two I got used to it, and then it failed to wake me, so I just got a parrot, and now when I get to bed I bring the alarm clock over the cage. When it rings it awakens the parrot and he flaps his wings and yells:  
 "Get up! Get up! Dan you!"

**Allverse to Water**  
 Beggar: "Lobly, could youse do something for a poor old sailor?"  
 Housewife: "Sailor? You don't look like a sailor to me."  
 Beggar: "Lobly, I fell off the water for sixteen long years."  
 Housewife: "Well, you certainly don't look as if you've caught up with it."

**Mule Feed**  
 The mule had been out for white days and the oats on the side still stood at eleven to one. For a quartal. They filed into the restaurant for their evening meal, the second day.  
 "I've a mule as usual," asked the waitress.  
 "No," replied the foreman. "I've a mule as usual and one-half bale of hay."

# RICE-GROWING

...the rice-growing industry in the United States is a most interesting one. It is a most interesting one because of the many interesting facts connected with it. The rice-growing industry in the United States is a most interesting one because of the many interesting facts connected with it. The rice-growing industry in the United States is a most interesting one because of the many interesting facts connected with it.

**WHEN A SNAKE BITES YOU**  
 (Continued from column 1)  
 Undoubtedly the best protection against snake bites is a keen eye. With few exceptions, the only dangerous snake is the one you do not see. It is generally the snake under a log or rock, hidden in brush or grass roots and inadvertently stepped on or stepped on, which strikes. The snake you see a few feet away will do you no harm provided you stay away from it.

Research in the past few years have revolutionized the treatment for snake bites. Such treatment in the one-instant mortality is lower than anywhere else in the world. The Robert B. Green Hospital in San Antonio, Texas, treats more cases of rattlesnake bite in three months than any other institution in this country. The mortality is less than 2 per cent.

**They've Got What it Takes!**

*Blitz in Oil!*

It's one of the toughest battles on the home front—the laying of the giant pipe-lines that are hurrying precious oil from well to seaboard and beyond.

THEY CALL IT THE "BIG INCH" this 24-inch life-line to the front lines. And all along the line with Odeff Hatz (at the controls of the giant ditcher left) ... with pipe spacer Matt Baker and welder "Abe" Willis (below) ... the engineers in Camel.

**First IN THE SERVICE**

The favorite cigarette with men in the Army, Navy, Marines, and the Coast Guard is Camel.

(Based on actual sales records in Post Exchanges, Sales Commissions, Ship's Service Stores, Ship's Stores, and Camps.)

**The "T-Zone"**

How long since you've smoked a Camel? Give them a try today. Consider them carefully... for your throat, for your throat, for your throat.

FOR MY THROAT AND MY TASTE, THERE'S ONLY ONE CIGARETTE — CAMEL

ME TOO! I'VE SMOKED CAMELS FOR YEARS. THEY SUIT ME TO A T.

When Norman A. O. Henson (left) talks about "taste" and "throat" and when the man in uniform with him says "Camels suit me to a T" there's a lot in their words for you. Try Camels yourself—let your own throat and taste decide for themselves.

**Camel** — COSTLER TOBACCO

# Texas Farm News Reports

**J. H. Taylor**, of Fairburn (Brooks county), sold \$1,000 worth of tomatoes from an 11-acre tract this spring and estimated that a "clean up" would add at least \$200 more, a total of \$1,200 from 11 acres.

**Tom** is the (time) to stop getting out of "farming" here, according to Mrs. L. C. Taylor, who knows the Jefferson county market for Jefferson county. "It is the time to stop and get out of it," she says, "and get into something else."

**Home** cannot be made here, but it can be made in the city, according to Mrs. L. C. Taylor. "It is the time to stop and get out of it," she says, "and get into something else."

**Home** cannot be made here, but it can be made in the city, according to Mrs. L. C. Taylor. "It is the time to stop and get out of it," she says, "and get into something else."
