WARRIENS' RANGE for Electric Appliances

Electric Range Economy Tips

- When you are making meat in the oven, bake potatoes, a pudding and a casserole of vegetables, cooking them in the same oven.
- If you have several pans, cook two or three vegetables on one unit at a time.
- Switch the top units to low heat frequently when broiling to save.
- Cook more economical meals, such as baked fish steaks.
- Use the only enough water to prevent food from scorching. Some vegetables, like greens, need no water.
- Don't wash one of two slices of bread in beer. It is economical only if increasing in quantity.
- The well cooker for long, slow cooking operations, such as cooking dried beans, than more cookers.
- Use the covered, flat-bottomed pans that fit tight. Pans that are warped or too small waste electricity.
- Switch off surface units when food is nearly done and finish cooking on steam heat.
- Avoid excessive overcooking.

Uncle Sam Says:

Waste of anything in war-time is a crime. Uncle Sam says that you should be careful not to waste anything. He says that you should be careful not to waste anything.
