LET'S KEEP UP THE GOOD WORK

THIS community has every right to be proud of the way it is meeting the appeal for more pulpwood. We are proving that we can get out the wood. Now let's keep it coming!

This war isn't won yet—not by a long shot. Our boys will be fighting for a while. They will be needing ammunition, food, medical supplies—and all these things that are shipped in paperboard containers are made from pulpwood.

Pulpwood is our wartime job. Pulpwood can still be a bottleneck, holding up America's war effort. Our responsibility is to see that it doesn't. No boy shall die because we have failed.

WARTIME SAVINGS SUGGESTIONS
for Electric Appliance Users

Seven Ways to Eliminate Waste in Home Lighting

1. Turn off lights in unoccupied rooms. Wasting light not only wastes electricity but critical materials used in manufacturing lamp bulbs as well.
2. Switch three-light lamps to lower level when not being used, for reading, sewing or other close work tasks.
3. Use low-wattage bulbs in closets, hall and other places where light is not needed.
4. Keep bulbs shaded and dimming bowls clean. Dust and dirt will waste light.

Uncle Sam Says!
