Ready for  
**EXTRA DUTY**  
on the home front

Warmer weather means your electric refrigerator must work longer and harder to protect your perishables and keep you supplied with extra quantities of ice cubes, cold drinks and frozen desserts. So give it the care and attention it needs to operate with maximum efficiency and economy. Keep unit compartment clean. Use fast freezing only when necessary. Defrost at least once a week. And if you have reasons to suspect mechanical trouble, call in a competent serviceman NOW. Repairs take longer these busy wartime days and if you wait until something serious develops you may find yourself without refrigeration for a time just when you need it most.
