## THINK MOBBES

Even when it looks like the world is going to be a better place than it has been in the past, there are always some people who are looking for a mob to lead. They are the ones who are always looking for a leader to follow, and they are the ones who are always looking for a cause to fight for. They are the ones who are always looking for a way to make a name for themselves, and they are the ones who are always looking for a way to make a fortune. They are the ones who are always looking for a way to make a difference, and they are the ones who are always looking for a way to make a change. They are the ones who are always looking for a way to make a world, and they are the ones who are always looking for a way to make a better world than the one we have now.

**ELECTRIC POWER**  
 Makes a Good Fighting Power

**EMPLOYERS** of the electrical industry are not eligible for "E" awards because they are not directly engaged in war production, but the power they deliver helps set the records that keep the "E" flag flying.

Right now, for example, this company is delivering industrial power at 2 1/4 times the normal peacetime rate of consumption. Well over half (57%) of our entire output goes to industries essential to the war effort and to military installations.

At the same time, despite increased manpower and material requirements, we are still able to meet all needs for power and at the lowest cost possible.
