 Other prices have gone "high hat," but electricity is still cheap... still extra-polite to your pocketbook.  
 Not only has the cost of electricity stayed down, it is still available in ample supply for civilian use despite unprecedented war production demands.  
 "All you need at pre-war prices" is something rare these days, but that's what you get when you buy electric service.

**KATE SMITH asked to write this message on Saving Used Fats!**  
"The help of every woman is needed in saving used fats for the production of high quality soap. I have learned that I can do my part by saving used fats and turning them over to the local collection center. It is a simple task, but it makes a big difference." - *Kate Smith*

**MANY WOMEN SAY: "That I never have fat left over!"**  
Certainly it's good economy to use your fats, and that's always true. But it's also important to think about the environment. Only one teaspoonful of used fat will help make a single bar of soap. If you can't use it for anything else, save it for the local collection center. It's a simple task, but it makes a big difference.

**OTHERS TELL ME: "That my fats are often the start to a flare up!"**  
It doesn't matter how much fat you have, if it's not used, it's a waste. Saving used fats is a simple task, but it makes a big difference. It's a simple task, but it makes a big difference.
