Clever these Chinese?

CLEVER enough to fight back for nine years, with outmoded rifles. Clever enough to move factories, brick by brick, on back out of the range of Jap bombers. Clever enough to keep unfilled, and to keep going, despite the most vicious inflation ever to sweep a country. Cleverness can't warm cold bodies when there is no clothing. Cleverness can't feed hungry children when there is no food. Cleverness can't keep down disease when there are no medical supplies.

For nine years the heroic Chinese kept millions of Jap soldiers bogged down in China. They surrendered everything — families, homes, possessions, even lives — rather than surrender their country.

And because they have kept in the fight, our soldiers had to face many millions fewer Japs. United China Relief for years has provided the wherewithal to help the struggling people of China. The problems facing United China Relief, member agency of the National War Fund, grow more stupendous month by month. They, too, can't be solved by cleverness alone. They need cash. You can. Even if we were not deeply moved by the plight of the Chinese, we owe them our gratitude, our sympathy, our help. Won't you help them by giving now — and giving generously — through your County War Chest?

MARY OHARA
WRITER

The lightning struck the night and the thunder rolled in a series of about level around corners. The wind whistled through the trees and whirled around the corners of the building.

Genita stopped running and looked at him.

He was at the door, his feet on the rug, his hands on the door handle. He looked at her and she looked at him. There was a silence between them, a silence that was broken by the sound of the rain.

These things were his. He had never had a home of his own before. He had never had a place where he could call his own. He had never had a home where he could be happy.

Postwar Agriculture Demands THE RIGHT TRACTOR FOR THE PARTICULAR JOB

The proverbial Jack-of-all-trades was master of none. The modern world of science and technology passed him by. The same principle applies to farm tractors. The tractor that does a wide variety of jobs unsatisfactorily can't possibly produce the greatest results at the least cost.

That's what the farmer—particularly the small operator—has got to do to meet the competition he's got to produce. He has to produce with the least effort and expense, at the lowest cost.

That's why Harvester's postwar line includes a great variety of Farmalls and other specialized tractors and attachments rather than a single tractor with a single system of gears. Every tractor in the line was developed after scientific research and testing under actual operating conditions. The result is a line of tractors that are built to do the job they're designed for.

THE DOG'S SEN OF SMELL TRULY IS REMARKABLE
 It is the remarkable sense of smell that gives the dog those unique qualities for which he has become famous. The dog's sense of smell is so acute that he can detect a single drop of oil in a barrel of water. He can also detect the presence of a single hair in a haystack.
