## THINK 'BOBBIES'

What's so rare as a baby today? The answer is just another day.

Those fighting towards a good heading for the Houston Post, which it is and careful not to burst out from "offen your vest."

And now those most interested in the Post's "Houston Post" and who were there when it happened, are valiantly defending a drunken crew preceded by the night attack. How interesting.

The reading public of America will watch with interest how "Public Enemy, John Law" will perform now that he has returned to the American Federation of Labor's side.

Talk about ticks. We believe Woodville has more ticks than any other suburban locality this side of hedges. If you know what we mean, but the strange thing about all this is the absence of car killing accidents within the border lines of this city.

## WEEKLY NEWS

Weston, Jan. 25. The Lower Rio Grande Valley is off to a good start in 1946 shipments of citrus fruits and vegetables. A report issued by the Department of Agriculture, office in Weston, shows that for the winter season up to January 15 a total of 22,000 cartons of truck produce was moved from the valley.

The citrus crop for the winter season is about the same as last year. The citrus crop is being shipped in the form of gift packages, which are reported to have sold at a high price this past holiday season.

## NOTICE

Moon Mullion and The Show boys will play at the Houston Athletic Club on the 25th. Admission 50c and 50c. Everyone invited.

## The For New Kirby High Up for Re-Election

A matter that has been discussed in the minds of the citizens of Kirby High School and the parents of the community for several years is the construction of a new high school building. A new building certainly would add much to the efficiency and morale of the school, and it was with this view that the Woodville school board called a bond election in August of last year.

The voters of the school district approved the bond issue for the construction of a new high school building. The maximum amount of bonds that the district could issue was \$400,000. The amount of the community support of this issue, however, was \$100,000. This amount is expected to arrive soon.

The school board is now planning to begin the construction of the building in the spring. The building would be about 100,000 square feet in area and would contain about 100 classrooms and other facilities.

# A Letter to the President of the United States

January 10, 1946

Hon. Harry S. Truman  
President of the United States  
The White House  
Washington, D. C.

Dear Mr. President:

Your proposal to me in Washington last evening that the wage demand of the United Steelworkers of America-CIO be settled on the basis of a wage increase of 10% over an hour, retroactive to January 1, 1946, cannot, I regret to say, be accepted by the United States Steel Corporation for the reasons set forth below:

As you must be aware, your proposal is almost equivalent to granting in full the Union's revised demand of a wage increase of 19 1/2 cents an hour, which was advanced by Philip Murray, the President of the Union, at our collective bargaining conference with the Union in New York a week ago today. In our opinion, there is no just basis from any point of view for a wage increase of 19 1/2 cents an hour. It is not only a matter of principle, but also of fact.

As I have tried to make clear to you and other Government officials during our conferences in Washington over the past few days, there is a limit to the extent to which the Union wage demands can be met by us. We reached that limit when we raised our offer to the Union last Friday from a wage increase of 12 1/2 cents an hour to one of 15 cents an hour. This would constitute the highest single wage increase ever made by our steelmaking subsidiaries. Our offer of 15 cents was equivalent to meeting 60% of the Union's original excessive demand of a 25% day general wage increase. Our offer met 75% of the Union's final demand of a wage increase of 19 1/2 cents an hour. We are offering, would increase the direct labor cost of our manufacturing subsidiaries by approximately \$40,000,000 a year. That is a substantial sum, and does not take into account the higher cost we shall have to pay for increased goods and services when steel wages are increased generally.

As you must be aware, your proposal is almost equivalent to granting in full the Union's revised demand of a wage increase of 19 1/2 cents an hour, which was advanced by Philip Murray, the President of the Union, at our collective bargaining conference with the Union in New York a week ago today. In our opinion, there is no just basis from any point of view for a wage increase of 19 1/2 cents an hour. It is not only a matter of principle, but also of fact.

As you know, collective bargaining negotiations with the Union broke down at the White House yesterday afternoon, because Mr. Murray then refused to budge from his position that a country-wide steel strike must take place, unless steel workers are granted a general wage increase of 19 1/2 cents an hour. Our offer of a wage increase of 15 cents an hour was again rejected by the Union.

The Union threatened to go ahead with its program for a national steel strike at midnight next Monday. Although such a strike will be a clear violation of the no-strike provision contained in our labor contracts with the Union, which continue by their terms until October 1, 1946.

From the outset, we have recognized how injurious a steel strike will be to recovery and to the economy of this whole country. Most industries are dependant upon a supply of steel for their continued operations. We have done everything reasonably within our power to avert such a strike. If a strike occurs, the responsibility rests with the Union.

When the Government at the eleventh hour informed us about a week ago of its willingness to authorize an increase in steel selling prices, we at once resumed collective bargaining negotiations with the Union. Such price control by the Government was a recognition by it of the right of the steel industry to receive price relief because of past heavy increases in costs, something which the steel industry for many months has unsuccessfully sought to establish with OPA.

I should like again to point out some pertinent facts relative to the wages of our steel workers.

Since January, 1941, the average straight-time hourly pay, without overtime, of our steel workers has increased more than the 25% increase in the cost of living during that period. (Source: U. S. Bureau of Labor Statistics, "Steel Workers' Wages Have Kept Pace With Inflation," page 1, which averages steel wages from 1941 to 1945.)

Under our offer of a 15 cent increase, the average weekly take-home pay of our steel workers for a forty-hour week would amount to \$41.40, assuming that no overtime is involved. This figure is only \$4.64 less than the actual average year of 1944, when the average work week was 46 1/2 hours. The difference is really less, because you will undoubtedly continue to have overtime in the future, just as we have at the present time. In November, 1945, overtime premiums to our steel workers aggregated more than \$1,200,000. Such reduction of \$4.64 in weekly take-home pay is the natural consequence of a shorter work week of forty hours, and therefore one of lower production.

Much as we desire to avoid a steel strike, we cannot overlook the effect both on the Corporation and on our customers and American business in general of the 19 1/2 cent an hour wage increase which you have proposed. Such a wage increase must result in higher prices for steel than have previously been proposed to us by the Government. Great financial harm would soon follow for all users of steel who would be obliged to pay higher prices for their steel, higher wages to their employees and still have the prices for their own products subject to OPA control. Such a high and unjustified wage scale might well spell financial disaster for many of the smaller steel companies and for a large number of steel fabricators and processors. The nation needs the output of these companies. Increased wages and increased prices which force companies out of business will result in irreparable damage to the American people.

In our judgment, it is desirable in the public interest to take into account the injurious effect upon American industry of an unjustified wage increase in the steel industry.

After careful and careful consideration of your proposal, we have concluded that we cannot accept the wage increase of 19 1/2 cents an hour which you have proposed.

After careful and careful consideration of your proposal, we have concluded that we cannot accept the wage increase of 19 1/2 cents an hour which you have proposed.

After a few days ago 100 in steel war veterans presented a petition and the requisite \$100 filing fee to have Col. Jerry Hadley certified as a candidate for Governor of Texas. Jerry, a former railroad commissioner, ran about fourth in the 1946 gubernatorial campaign. He is going to try it again with a war record.

Col. William McCraw of Dallas, a veteran of the last two wars, has just returned home and is looking over the field. Jerry, who still would like to be governor, has Senator O'Daugh's opinion of "Pappy's" Poshole to announce.

## READING CLUB

The Women's Reading Club met Tuesday evening at the home of Mrs. Oona Daniels, with ten members present and two guests. Mrs. Allen Noonan presided over the business session, and then presented the guest speaker, Nurse Radio Engle, who spoke on "New Discoveries in Reading."

The discussion was very interesting and enjoyed by all present. Mrs. Harry Johnson was also welcomed as a guest. The next meeting will be Tuesday evening, Feb. 5, with Mrs. Leon Martin as hostess. At this meeting we will again be privileged to hear Nurse Engle speak on "Social Discoveries in Reading."
