**There's Money Today... and Tomorrow... in Your Woodlot**

Son, that woodlot of yours will give you more spot cash right now than any other part of your farm... and keep on paying you year in and year out.

Pulpwood can be depended upon when other crops are poor. And its extra income comes in mighty handy when times are good, too.

Your county agent or forester will tell you how to get the most out of your woodlot. By wise cutting, you can guarantee another cash crop. Let's get busy now and collect a cash pulpwood dividend.
