## If telephone service is slower... here's why!

S

We're using efficiency tools to bring telephone service to people who are waiting.

We're adding more telephones to each exchange, already heavily loaded, more telephones than the switchboards were ever intended to handle. This may slow up telephone service here at the busiest times of the day.

As fast as we can in the face of material shortage we're pushing our installation program. Our first goal is to serve everybody who is waiting. Then we'll restore service to proper standards as quickly as we can. It will cost a good deal. This year we plan to spend 47 million dollars in the five states we serve.

SOMETIMES YOU MAY NOT HEAR "NUMBER PLEASE" PROMPTLY

With switchboards here heavily loaded, the operator may not be able to answer your call as promptly as she might. This may be true especially during the busy telephone hours in the afternoon and early evening.

If you do not hear the operator's "Number please" for a few seconds, please be patient. The operator will answer just as soon as she can.

## ENJOY Open Porch Comfort THROUGHOUT THE HOUSE

with ATTIC VENTILATION

### Remember those stifling hot nights last summer when you sat outdoors and felt the idea of going into the hot house to bed?

This summer can be different if you install an attic ventilating fan now. An attic fan draws in cool, refreshing air through the windows, circulates it about the house and blows hot air out through the attic vents. It makes your entire house as cool as breezes, cool, shady, open air. You can retire early and enjoy a comfortable night's sleep no matter how torrid the weather.

A limited number of attic fans are available now for immediate installation. See your local appliance dealer or this company for full information about this low cost way to summer comfort.
