Broader Forestry Program Outlined
 A solid expansion forestry program to work with, and make use of, the resources of the Texas Forest Experiment Station was outlined by President Olin Olin of the Texas Forestry Association at the annual meeting of the association at the University of Texas at Austin, Tuesday.

Woodville News

You had better drive out to the Greatwood Nursery, Nativity and see these magnificent displays of carnations, geraniums and other shrubs.

The Adams Bros. nursery at San Diego, Cal., has been buying out the Adams Bros. nursery in one of our 17 years and will be located at 1115 N. Main St. in Woodville.

The Woodville nursery has all the latest in plants and shrubs and will be located at 1115 N. Main St. in Woodville.

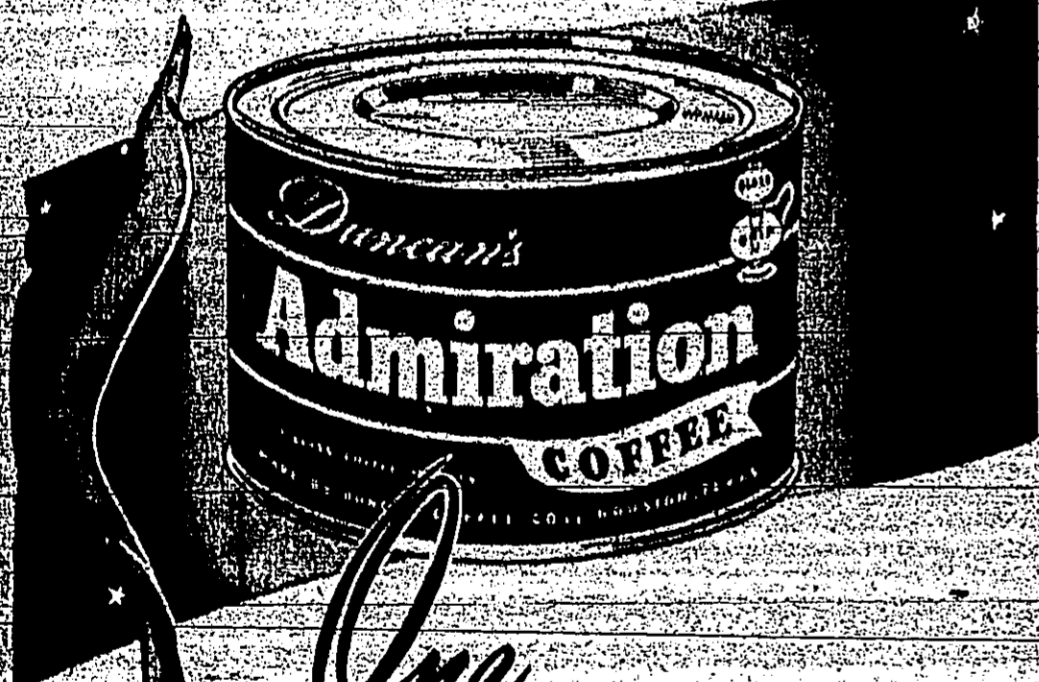

Mr. J. H. Miller, owner of the new Power Shop, has recently returned from Chicago where he graduated from the Night School of Woodville.

FOR LAYING WOODS: AVIATION, De-Mabury's aviation fuel stock treatment for jets, tanks and fuel systems. Just mix in with efficient, economical.

ARYKING DINO FORM, Mrs. Lucia Tucker of this town is happy over the arrival of her son. He is a grandnephew of Madame Claude R. Smith, 1212 Hallock St., A. Williams and W. H. Grayson.

Miss Mary Frances Hickman of Houston was home the week end with her mother, Mrs. John G. Davis.

OF THE MANY...

One

MUST LEAD!

Distinct from all others is the leader-out in front because of proven qualities. Among coffees in the Southwest ADMIRATION holds their distinction. It is a blend unique among all others. The same experts who have given "Cup-Testing" ADMIRATION for nearly thirty years proudly guard these qualities that have earned its leadership. "Cup-Testing" is your assurance that ADMIRATION will be the same today and tomorrow as it has been in the past. The personally "Cup-Tested" ADMIRATION way is the only way to assure the same perfect blend—package after package.

BETTER SERVICE through PLANNED ACTION

Great and lasting things seldom happen by chance. Only through vision and planned action can men discover new and better ways to serve.

In pursuit of this vision, Southern Pacific maintains a constant program of research and improvement and seeks new ways to better Southern Pacific's service to the traveling public and the Nation.

Typical of the accomplishments of this program is the new Pecos River River Bridge, recently opening to Southern Pacific in a span of over one million dollars. This great structure, built on the banks of the Pecos River in Big Bend National Park, Texas, is the first bridge to be built by Southern Pacific since the opening of Southern Pacific's new Pecos River bridge in 1934. The new bridge is a masterpiece of engineering and construction, and it is a fitting tribute to the vision and planning that have made it possible.

once beyond comparison. Heavy East-West military traffic flows with ever-increasing volume over Southern Pacific's main line, and to speed up traffic which was restricted by slow schedules over the old bridge, the progressive management of the Southern Pacific proceeded with plans for a modern high speed structure.

Future needs and expansion were anticipated and the present bridge was built into the building of the structure. It is not only a span of steel and concrete, but a masterpiece of engineering and construction, and it is a fitting tribute to the vision and planning that have made it possible.

The Pecos River bridge is an outstanding example of Southern Pacific's policy of continuous improvement. It is a fitting tribute to the vision and planning that have made it possible.
