Citizens Talk Improvements At City Forum

Two planning forums to discuss the future of Woodville were held here Monday under the sponsorship of the city council and the city planning commission.

The forums were directed by W. O. Parker and Jim Noland of Houston, city planning consultants with Planning & Research, Inc., planning engineers.

A morning session was held for junior and senior students at the high school.

The afternoon forum was open to interested citizens and was attended by about 25 persons.

The forums actually were informal discussions of the city's needs, capabilities, and aspirations as seen through the eyes of its citizens. From such sessions as this the planning firm will map future plans for the city.

At the high school session the students suggested the consideration of the following goals:

- Industrial development.
- More job opportunities.
- Improved educational opportunities.
- Better wage scales.
- City reforms, including community facilities, postal delivery, improved sewage disposal system, tourist attractions, expanded fire and police protection, recreational facilities, and increased citizen participation in public affairs.

At the downtown session, those present came up with a dozen suggestions to consider. Included in these were an enlarged school curriculum, better recreational facilities, new industries, better sanitation, an abundant supply of water, better off-street parking, expansion of city limits, planting of more dogwood trees and creation of a city park.

Among those taking part in the discussions were Mayor E. W. Gassiot, Gilbert Wright, Mrs. R. C. Schorlemmer, Leroy Davis, Paul Thomas, F. B. Sullivan, Paul Butten, Robert Thompson, W. G. Addison, J. B. Coffman, and Jimmy Freeman.

David M. Cochran of the Texas State Department of Health and Mrs. Cochran also were present. Mr. Cochran told the group that the city could count on the cooperation of the state health department in every possible way it could be of assistance.

Mr. and Mrs. I. Wood Fain are in Georgia attending a district Rotary convention. They are considered guests of honor and have been assigned special aides to assist them at the convention. The convention was scheduled to be held on Jekyll Island off the coast

If you enjoy minstrel shows (and we do) the Spurger P-TA is putting on a good one Friday night in the Spurger High School auditorium.

Now that we have taken care of the places for you to go, we will get on to more prosaic business.

This past Monday we attended the planning forum which the city planning commission sponsored here. The forum was conducted by W. O. Parker and Jim Noland of Planning & Research, Inc., Houston, the city's planning engineers.

This was the first opportunity we had ever been given to attend such a session, and we found that this first one at least was more or less a brainstorming affair. Everyone was encouraged to just talk about the needs, future expectations, failures, and so forth of the City of Woodville.

We had heard most of the things talked about before at the chamber of commerce, the Rotary Club, the Lions, and on the street corners. The purpose of the meeting was to kind of let down our civic hair so that Mr. Parker and Mr. Noland could get an idea of what the citizens of the town want to make of it. They will study the talk and comments and try to come up with a plan for the city's future.

Perhaps the most enlightening session was the one the two men held with the junior and senior classes at Kirby High School. Here were the future citizens of Woodville—if they don't wind up in Beaumont, Port Arthur, or Houston. The young people were interested, and had a lively discussion concerning what they would like to see done to improve Woodville.

Of course, most of this graduating class will likely end up having to go to the metropolitan areas to find jobs—a major point they brought up.

Not all high school graduates would remain here if they had a choice. But many will if given an opportunity here. In the future that opportunity must be made available, or we will continue to educate youth for the metropolitan areas.

We have a friend who collects these "witty" (his version) signs. You know the kind—"A Friend in Need is a Pest."

Here are a few from his collection:

"Look alive. You can be replaced by a Button."

"The Boss may not always be right, but he is always the boss."

"Love is blind. Marriage is an institution for the blind."

"Stop worrying. You will never get out of this world alive."

"They say life is what you make it and brother I ain't made it."

"Enter at your own risk. Everything is going wrong today."

"Worry is like a rocking chair. Keeps you busy, but never gets you anywhere."

Well, this is an amusing collection of that type of sign, and we enjoy reading them. However, the one that fits us best was in an office in Beaumont. It read:

"The Hurrleeder I go the Behinder I get."

That's us, brother.

Well, here we are at the end of this old column again. We enjoy filling up this part of the paper, because it requires no thinking.

As you can plainly see See you next week.
