One such item, cigarettes is purchased in the grocery store because of convenience and ecohomy of the carton. The supermarket is, in fact, the greatest single outlet for cigarettes. Today, 30 to.40 percent of the nation's sales are in grocery stores, whereas five years ago, supermarkets accounted for only 28 per-

Small kitchen utensils and gadgets, snack sets, patio furniture--all are frequently labeled as impulse. Items in the grocery store. Magazine sales have increased as much as 30 percent 'in one year in the supermarket.

And the trend is for more and more non-food items to be bought through this market. In 1948, 11 percent of the grocery dollar went to non-food items, In 1959 the figure stnod at 15 percent; today's figures show 23 percent.

No, potatoes aren't fatten No food is faffening until your body's need for calories has been met, points out Maurine Mooney, county home demonstration agent; Surplus food from any source is changed to fat and stored in the body, she says.

One medium-sized potato, unces, supplies 90 calories. This is about the same as a medium-sized apple, pear grapefruit or orange; none of which is considered a highcalorie food. Added fat and gravy, ofter

served with ptotatoes; to increase the calorie count coniderably. For example, fred potatoes may be two to hree times as high in calo ries as the same weight of boiled or baked potatoes. And the sour cream or butter or margarine added to the baked potato, for tastiness also add up n the calorie category.

But, it's not the potatoes that add pounds, it's the surplus. calories from other sources. _____ Durable press and wash
