Hello music fans, it looks like it's time for a D.I. to try to play volunteer again and take a look at what is happening in the great, wide and wonderful world of music.

First, I want to mention a man who goes by the name of Ford. No, it's not Henry Ford, it is Tennessee Ernie Ford. He is Tennessee Ernie Ford. He is Tennessee Ernie Ford. He is Tennessee Ernie Ford. He is Tennessee Ernie Ford. He is Tennessee Ernie Ford.

**The Potters are expecting a very important phone call.**

In the years ahead, you'll be able to preset your telephone to transfer calls to the number where you're visiting. Electronic switching — using a sophisticated computer system — will make this and many other new services possible. For example, your phone will have a memory. By dialing just two digits of a frequently called number, you'll activate that memory, then the phone will dial the remaining digits automatically. Electronic switching is fact, not fiction. It's part of our program to plan today for tomorrow's communications needs. We may be the only phone company in town, but we try not to act like it.
