When only a little over 60 percent of the eligible voters participate in an election, how can we be sure that the winner is the choice of the majority? In both the 1960 and 1968 presidential elections the voters who stayed home could have changed the outcome of the voting in Texas...

Our system of government is under attack both within and without the boundaries of the United States,, Within the country it is attacked with acts of violence the purpose of which is to promote chaos and anarchy which if unchecked can surely destroy the Democratic process through which, in this Republic, the people elect their public servants.

Violence is the last desperate resort of a people who have no other means to redress their. government's wrongs. In a country where the people have free elections-in-which to cast secret ballots for the candidates of their own choice there is no cause for anarchy.

Those who preach and practice violence do not do so to bring this country a better form of government but instead their aim, if we can take their own words for it, is a totalitarian dictatorship which iminority factions have forced upon many countries in the world. As: far as we know there is no country in the communist orbit in which the people voluntarily. voted for that form of govern

Sweaters to the most elegant costumes.

There are many ways to wear scarves, and you don't need a merit badge in "Knot Tying" to know how. The most versatile shape is the large square. It can be folded into a triangle and wrapped around a triangle and wrapped around the hips to add dash to a matching sweater and slacks outfit. Or it can be rolled along swith a chain belt into a scah around the neck and fastened with a ring over sweaters and shirts. Rolled into a rectangle and tied around the strap of a handbag, a scarf makes a debonaire pennant.

Very long rectangular scarves are worn wrapped twice around the neck and fastened with a ring over sweaters.
